Thank you for your interest in partnering with Buffalo Corp in our internet fulfillment program. Buffalo Corp has been in business for over 50 years, and in the last 15 years, we have developed a successful dropship program. Today, we work with some of the biggest retailers in the ecommerce sphere, and ship over a million orders a year, directly from our warehouse in O'Fallon, Missouri, to customers all over the contiguous United States.

We operate as true vendor/wholesaler. None of our items are available for purchase directly from our website or over the phone.

It doesn't matter if you are an experienced online seller, or are new to the online world; we have the capacity to work with you. In the past 10 years we have worked with over 100 retailers, ranging in size from single office operations to the very largest retail outlets in the U.S.

Our Products & Brands

In addition to our knowledge and experience, we offer a large and diverse catalog of skus. We currently carry over 500 skus in our dropship program, under eight different brand categories, with over 100 new skus added every year.

We constantly keep our eye on trends in the market, and rush to meet the changing tastes and desires of consumers. From Generators to Bar Stool, Welders to Adirondack Chairs, and Scaffolding to Ice Cream Makers, chances are we carry at least a handful of items that will fit into your current online assortment.

Before We Begin

Before we can officially begin onboarding our products into your system, we need to have a few key pieces information. This will make the initial product launch go smoothly, and create a better customer experience.

1. Initial onboarding process

Before we can supply full product details and inventory feeds, the merchant must provide the following:

- 3-5 credit references
- A copy of your sales tax exempt certificate (if applicable)
- A completed credit application

Additionally a discussion and contract will need to be completed that details chargeback policies, payment terms, merchandise returns, and more.

2. Where do you sell your products?

- *Do you have a dedicated website, do you sell on 3rd party sites like Amazon and Ebay, or both?*

- *Can you list and identify all the places where your products are listed?*

We routinely update and improve our customer facing copy and images, and perform quality checks on online product listings. To do this effectively, we need to know where to find the listing. Additionally, unapproved sales of our products on 3rd party marketplaces can also impact the validity of the Manufacturer's Warranty.

3. Inventory & Receiving Orders

- *In what format do you want to receive inventory feeds?*

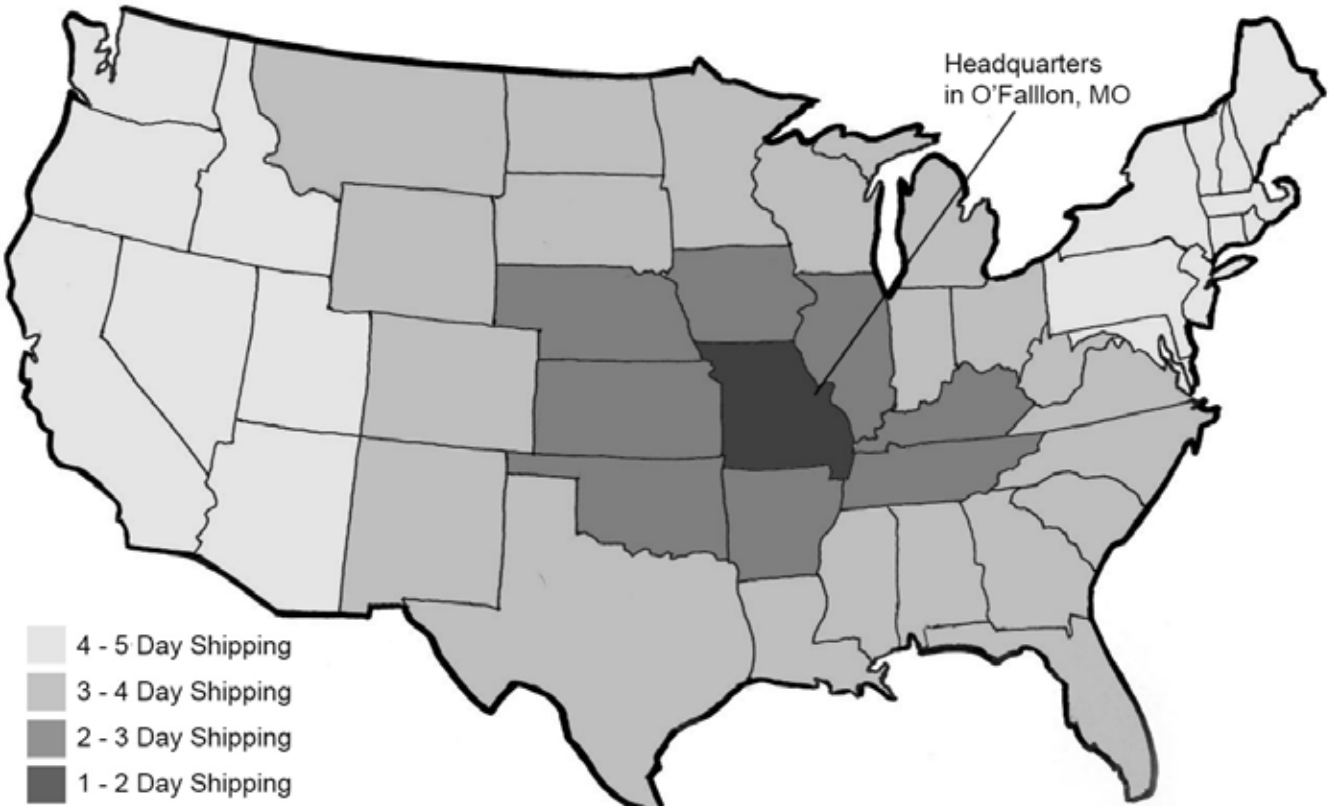
- *Does your company have EDI capabilities?*

- *How often do you receive an updated inventory report?*

- *How will you send purchase orders to us?*

All purchase orders we receive must include the following information to ensure a quick and accurate product shipment:

- Ship to name, address, & phone
- Vendor model number
- Quantity ordered
- Parcel carrier
- Shipping speed
- Item cost



Dropship Policies

The Highlights:

• Over 15 years of experience in ecommerce sales with some of the biggest retailers in the country.

• The capacity to work with merchants of any size and ecommerce experience level.

• A vast and diverse catalog of over 500 skus, with more than 100 new items added every year.

• We can accommodate custom pack slips, and many other shipping guidelines your company requires.

• Standard order turnaround is 2 business days or less, with over a 98% on-time ship rate.

• All products have a minimum 90-Day Manufacturer's Warranty, and a 1-Year Warranty for gas powered products.

• Customer Service hotline open 40 hours per week to assist customers after purchase.

Shipping the Orders

Buffalo Corp's standard order turnaround time is two business days The count begins the day AFTER the order is received. For example, if we receive an order on Thursday, the order would ship no later than Monday.

Our warehouse is open normal business hours Monday through Friday, and is closed on weekends and major US holidays. Any order issued after close of business Friday will be considered received Monday and have a ship by date of Wednesday.

Creating Custom Pack Slips & Special Shipping Requirements

Many retailers, to maintain brand integrity, ask us to create custom pack slips, and ship in boxes that meet brand standards. While this can take a bit of effort to set-up on our end, we recognize the importance of maintaining this customer experience, and we will work with you to meet and maintain your brand expectations.

Dropship Policies

Parcel Carriers & Tracking

All dropship orders are required to ship on the merchant's 3rd party account number. We can ship either UPS or FedEx. 95% of the products we carry can ship via this method. Some of the larger items like scaffolding and high wattage generators, must ship via freight, otherwise known as LTL or truck delivery.

If you are interested in carrying LTL items (large bulky items that exceed the weight and size limit of traditional delivery methods), we must have your carrier's account number and details on file. If you do not have a preferred carrier, we must have a valid routing guide in order to schedule shipment in a timely fashion. If you do not have 3rd party LTL information at this time, please let us know and we will remove all LTL items from available product listing.

Tracking information is usually emailed via a XML file the day the order ships. If you do not have any orders shipping on a particular day, you will not receive an emailed XML file, but this can be adjusted depending on the size of the merchant and the quantity of orders.

Warranty & Customer Support

Our job isn't done whem the package leaves our warehouse. To maintain a positive customer experience, we offer a 90 Day Limited Manufacturer's Warranty on most items, backed by a Customer Service Team that can answer any question concerning operation, damage, and troubleshooting.

All gas powered products have a 1 Year Limited, and 2 Year Emissions Limited Warranty.

Ready to Get Started?

Hopefully we have covered most of your questions about Buffalo Drop Ship Program. We realize every account has their own way of doing things, and we are very flexible in our operations. If there are questions that still need to answered, please contact us and we will work together to make sure both our companies are comfortable in working together for a mutually beneficial future.

MEAT PROCESSING EQUIPMENT

MEAT PROCESSING EQUIP. Purchase Decision Guide

BURGER PRESSES 4-¼" diameter

- **ADJUSTABLE:** Always purchase a single or double press with an adjustable thickness feature to meet a broader range of applications including stuffed burgers. Adjustable burger presses are available with a maximum thicknesses capacity of up to 1-⅛" inches.
- **MATERIAL CONSTRUCTION**: Plastic, Stainless Steel, and Aluminum are all common materials found in the construction of burger presses. Premium models typically feature non-stick coatings and aluminum construction for better results & ease of clean up.

SAUSAGE STUFFERS 5 lb. - 11 lb.

- **VERTICAL OR HORIZONTAL:** Vertical stuffers are easy to operate with the crank handle & output directly in front of you. Horizontal Stuffers are more awkward since they require you to extend your hands at both ends.
- **VERSATILITY:** Vertical stuffers can be operated in any location on a flat surface vs. horizontal stuffers that must be operated on the corner of a table or countertop to prevent the handle from contacting the surface.
- **CAPACITY:** Sausage stuffers typically range in capacity from 5 lbs. to 11 lbs. For processing higher volumes, consider a sausage stuffer with a capacity of 11 lbs. or higher.
- **MATERIAL CONSTRUCTION:** Stuffers constructed from Stainless steel won't rust and are easier to clean.

MEAT TENDERIZERS

- **CAPACITY:** SPORTSMAN Mechanical tenderizers can process meat cuts with a maximum width up to 4 inches and up to 1/2 inch thick. Determine the tenderizer that best meets your needs based on the size of meat cuts you prefer.
- **DESIGN OPTIONS:** Mallet, Clamp, and Table Top are the 3 most common types of meat tenderizers. Handheld meat mallets can typically only break down the connective tissue on the meat surface while a mechanical "clamp" or "table top" tenderizer penetrates into the meat deep enough to cut the connective tissue (tendons and ligaments) below the surface.
- **BENEFITS:** Mechanical tenderizers reduce cooking times up to 40%, transform any cuts of meat into a butter soft consistency, promote even & more thorough cooking, plus insure quicker penetration of marinades and rubs.

MEAT SLICERS 7 ½" Blade Diameter

- **BLADE SIZE:** Mid Tier and Premium slicers usually have larger cutting blades for all-purpose applications, whereas entry level models often use smaller cutting blades for less frequent use. Verify that the slicer's carriage size will also accommodate the product size you intend to cut prior to purchasing.
- **HORSEPOWER/WATTS:** Generally speaking, slicers with higher horsepower and wattage ratings are designed for more frequent use.
- **MAXIMUM THICKNESS:** Refer to the chart below for industry standards. Select a slicer with a maximum capacity that meets your preferences.

Horsepower	Watts	Blade Diameter	Maximum Thickness
1/10	80	7.5"	1/2"
¼	180	7.5"	9/16" (SPORTSMAN)

MANUAL MEAT GRINDERS #10 - #32

1. **CAPACITY:** Manual meat grinders range in output performance from 60 pounds to over 300 pounds per hour. Determine the grinder that best meets or exceeds your needs based on the pounds of meat typically ground and the frequency of use. For higher volume grinding consider a grinder with a minimum output per hour of 150 pounds or greater. (refer to *the* **SPORTSMAN Manual Meat Grinder Guide** for detailed specifications)
2. **CONSTRUCTION:** Most manual meat grinders feature a cast iron housing coated with a durable tinned surface plating. Premium stainless steel manual meat grinders are also available for ease of clean up, greater durability, and to avoid oxidation.
3. **MEAT TYPES:** Another consideration when purchasing a meat grinder is the type of meat typically ground. For example: When higher volume meat processing is being performed & when coarse meats are being ground such as venison and large game, a grinder with a neck size of #22 or larger is recommended. For smaller volume processing and less coarse meats such as small game and pork, a smaller grinder with a neck size of #10 or less will perform well. To grind a broad range of meat types and applications, you may need to purchase another plate for fine, medium or coarse meats since most manufacturers typically include only one plate type with a manual grinder. Refer to the **SPORTSMAN Manual Meat Grinder Guide** below for performance details.
4. **MOUNTING:** One of two types of mounting configurations are typically found on the vast majority of manual meat grinders. A built in "clamp style" mounting system is common on smaller grinders while larger grinders typically feature a more secure "bolt down" mounting system. Both mounting designs function well however the "bolt down" configurations provide the added benefit of versatility and security (can use and set up quickly on the corner of any bench or countertop or be permanently mounted).

MEAT MIXERS 17 lb.

1. **CAPACITY:** Meat mixers are recommended when mixing batches of 10 pounds or more. Determine the size of mixer based on the number of pounds of meat you intend to mix. On average a meat mixer will blend approximately 5-10 times the rated capacity (lbs.) per hour. A 17 lb. capacity meat mixer can blend approximately 85-170 pounds of meat per hour as an example.
2. **CONSTRUCTION:** Only purchase meat mixers constructed of stainless steel (specifically the paddles) for easy clean up and to avoid rust which is a common issue with non stainless models. Even paddles that feature non-stick rust proof coatings tend to rust due to common wear.
3. **CLEAN UP:** Mixer paddles should be designed to remove easily for fast, easy clean up. Avoid mixers that require tools to remove and to re-install paddles.

ELECTRIC MEAT GRINDERS ½ HP – 1 HP

❶ **CAPACITY:** Electric Meat Grinders range in output performance from 80 pounds to over 1000 pounds per hour. Determine the grinder that best meets or exceeds your needs based on the pounds of meat typically ground and the frequency of use. For higher volume grinding consider a grinder with a minimum output per hour of 265 pounds or greater. (refer to *the* **SPORTSMAN Electric Meat Grinder Purchase Guide** for detailed specifications)

❷ **CONSTRUCTION:** Meat Grinders with all stainless steel parts that contact the meat (specifically the auger, knife, and plate) are necessary for ease of clean up, durability, and to avoid rust which is a common issue with non stainless models. Stainless steel grind plates last up to 3 times longer than standard carbon plates.

❸ **MEAT TYPES:** Another consideration when purchasing a meat grinder is the type of meat typically ground. For example: Coarse meats such as venison require a higher horsepower grinder to perform satisfactorily when compared to fine or less coarse meats such as pork or small game. To grind a broad range of Meat types and applications, a meat grinder should always include at least 3 plates for Fine, Medium, and Coarse. Refer to the **SPORTSMAN Meat Types Guide** below for performance details.

Propane vs. Gasoline

Consider These Options When Choosing Which Generator Best Suits Your Needs

Low Maintenance

No carburetors, gummed up fuel systems, or stale gas. Engine life is extended because of low carbon build up on internal engine parts.

Environmentally Friendly

Propane burns cleaner than natural gas. Carbon monoxide emissions range between 20% to 40% lower. Although burning propane puts 10% more methane into the atmosphere, the result is still a net decrease in effective greenhouse gases and low carbon footprint.

Infinite Fuel Shelf Life

Propane will not degrade, so you can keep several propane tanks on hand and store them for an unlimited amount of time. Gasoline has a more limited shelf life and will deteriorate over time. Gasoline tends to go bad if it is not used in a timely manner. A propane generator will start more easily in extremely cold weather because the fuel will not gum up.

Ease of Fueling & Refueling

Gasoline Generators are messy and difficult to fill involving gas cans that often leak during the fueling process. In contrast, LP gas cylinders are quick, clean and easy to couple and uncouple.

Safety

Gasoline spills contaminate and leave stains and odors; propane will dissipate into the air. Propane is naturally odorless, but a distinct but harmless odor is added to warn of leaks. Burning propane produces less harmful fumes (mostly carbon dioxide and water). Sportsman Generators also feature an auto shutoff safety value for added security.

Greater Fuel Availability during Power Outages

Neighborhood gas stations will likely be without electricity, and unable to pump fuel, during power outages. Reliable propane tanks are as close as the backyard grill.

Lower Operating Costs

LP Gas can reduce operating expenses up to 50% vs Gasoline.

Easily Attaches To Rain Gutter. Three Height Settings Reduce Wind Noise.

Tough 3/16" Thick Crossbar Uprights Have Wide Base To Spread Load Evenly.

Fits All Makes And Models
Heavy Duty Powder
Coat Paint Finish
Supports Ladders, Lumber,
Pipes, Canoes, Etc.

Bolt Bases To Front & Rear Truck Bed. Racks Slide Into Mounting Base For Secure Installation.

Telescoping Support Arms Adjust From 18"-32" And Tilt 0° Or 20°.

Cargo
Truck Rack

- 500 Lbs Load Capacity
- Keeps Bed Free For Bulky Cargo
- 2 Inch Diameter Tubular Steel

#HTCARG

Multi-Use
Truck Rack

- 250 Lbs Load Capacity
- Mounts On Either Side Of Truck
- Telescoping Support Arms Adjust From18" to 32" And Tilt 0° Or 20°

Generator Purchase Decision Guide

The size of the generator you need depends on your power requirements. Generally, a higher-wattage generator lets you power more items at once.

1 Select the items you wish to power at the same time. Using the chart on the opposite page, fill in the running watts and starting watts requirements on the "Your Power Needs" worksheet below.

2 Add the Running Watts of the items you wish to power. Enter this number in the Total Running Watts column.

3 Select the one individual item with the highest number of starting watts. Take this one number, add it to your Total Running Watts , and enter it in the Total Starting Watts box.

RUNNING = (rated) watts produced by a generator represents the amount of continuous power output

SURGE = (starting) watts produced by a generator represents the amount of temporary bursts of power output required by common tools and appliances for 2 - 3 seconds during start up.

EXAMPLE

TOOL OR APPLIANCE	RUNNING WATTS	ADDITIONAL * STARTING WATTS
1. Refrigerator/Freezer	700	2200
2. 1/2 HP Furnace Fan	800	2350
3. Television	500	0
4. Window AC	1200	1800
5. Sump Pump – 1/2 HP	1050	2200
6.		
7.		

HIGHEST STARTING WATTS

4250

	4250	TOTAL RUNNING WATTS
+	2350	HIGHEST STARTING WATTS
=	6600	TOTAL STARTING WATTS NEEDED

With this example you need a generator that produces at least 4250 total running watts and 6600 total starting watts.

FREQUENTLY ASKED QUESTIONS

How many watts does it take to power basic items in an average size house?

In a typical home, essential items will average 5000 – 7500 watts of power to run.

What is the difference between running watts and starting watts?

Running, or rated watts are the continuous watts needed to keep items running. Starting watts are extra watts needed for two to three seconds to start motor-driven products like a refrigerator or circular saw, this is the maximum wattage the generator can produce.

Why is only one starting watt item used to calculate your total starting watt requirement?

Unlike running watts, starting watts are only needed during the first few seconds of operation. In most cases, only one item will start or cycle at the same time, therefore this is the most accurate estimate.

What if I can't determine the running or the starting watt requirement for a tool or appliance?

You may estimate using one of the following equations:

Volts x Amps = Watts
Amps / Watts = Volts
Watts / Volts = Amps

* Only motor - driven items will require starting watts. Many devises need 1 - 3 X the running/rated watts additional power to start up (Maximum Output Watts), and then require less power (Rated Watts) to run continually. For example, a refrigerator requires 2200 starting wattage with a 700 running wattage, so you would need a generator with at least 2200 watt maximum output to run ONLY a refrigerator.

The above are estimates only. Check your tool or appliance for exact wattage requirements. The wattages listed in our reference guide are based on estimated wattage requirements. For exact wattages, check the data plate or owner's manual on the item you wish to power.

CAUTION:
Operating voltage and frequency requirement of all electronic equipment should be checked prior to plugging them into this generator. Damage may result if the equipment is not designed to operate within a +/- 10% voltage variation, and +/- 3 hz frequency variation from the generator name plate ratings.
