

Our 3M™ Masking Film Dispenser is a simple, convenient way to keep masking films, overspray protection and other plastic sheeting at your fingertips to keep the shop – and the work you do – clean and professional. The heavy-duty portable frame rolls easily and keeps 36" sheet rolls locked into place, ready for roll-out. Double steel spring brakes keep the unit stable during sheeting application.

Dispensing Plastic Masking Gets Easier and More Efficient

Now, 3M™ Plastic Sheeting, 3M™ Premium Plus Masking Film and 3M™ Overspray Protective Sheeting can be held and dispensed from the most convenient locations in your auto body shop with our 3M™ Masking Film Dispenser. Weighing just 20 pounds with an easy-to-grip frame, the dispenser can be used horizontally or vertically. Wheels make it easy to move into place to dispense plastic sheeting over vehicles or designated "clean" shop areas. It can be wall mounted to create maximum floor space.

3M™ Plastic Sheeting (sold separately)

Smart, Efficient Operation

A spring-loaded end frame makes it fast and easy to load 36-inch rolls of 3M plastic sheeting or masking film (sold separately) into the dispenser. A locking tape hub assembly keeps the roll securely in place for ease of use. The sheeting feeds through a spring guide for easy access and a simple pull-out motion. Double steel spring brakes keep the unit from rolling or tipping during use.

Making Auto Body Operations Easier

Our 3M™ Masking Film Dispenser is another way that 3M helps auto body technicians get the most out of their time and their operations. With its portability and efficient operation, it can significantly reduce time and effort applying plastic sheeting. Plus, it's easier to keep your work and your shop clean and professional.

3M™ Masking Film Dispenser can be used horizontally or vertically
