

- Fast-cutting pad quickly refines P1200 or finer sanding scratches from automotive paint finishes
- 100% wool abrasive cuts fast with virtually no linting for refined finishes
- 4" diameter is excellent for control and access in small areas or tight spaces after compounding
- Fits all 3" Hookit™ back-up pads
- Single-sided wool pads work with variety of rotary polishers
- Hookit™ attachment makes for fast change-outs
- Part of the 3M™ Perfect-It™ Paint Finishing System for showroom finishes

The 3M™ Perfect-It™ Low Lint Wool Compounding Pad features 100 percent wool for a fast cut that quickly refines abrasive sand scratches on automotive painted surfaces. Yet the pad leaves virtually no lint residue which can lead to inefficient cleanup and rework. Single-sided pads feature insets for easy centering on rotary polishers and Hookit™ hook-and-loop attachment for quick change-outs.

Fast-Cutting Wool with Less Lint for Effective Compounding

Featuring a 100% wool abrasive that quickly refines paint defects including sand scratches of P1200 or finer, our 3M™ Perfect-It™ Low Lint Wool Compounding Pad is excellent for the compounding process in collision repair. These fast-cutting single-sided pads feature 100% wool fibers which are individually stitched to the pad instead of twisted into tufts. This means that the fibers hold more securely to the pad vs. twisted fibers during use, greatly reducing the chance of lint particles which can add cleanup time and even rework. A 4" diameter is great for control and access when compounding small areas and in tight spaces. Compounding pads feature insets for quick attachment to rotary polishers and Hookit™ hook-and-loop attachment for easy pad change-outs.

A family of 4 inch pads to meet all of your paint and finishing needs

3M™ Perfect-It™ Low Lint Wool Compounding Pads attach quickly to rotary polishers

Another Perfect-It™ Top Performer

We developed these low-lint wool pads as part of our Perfect-It™ Paint Finishing System to keep pace with evolving paint and clear coat technologies. 3M™ Perfect-It™ Low Lint Wool Compounding Pads are made in the USA with globally sourced materials. They are best used in conjunction with [Perfect-It™ EX Rubbing Compound](#) and attach quickly to rotary polishers. 3M recommends using these pads with 3M™ Buffer, Pistol Grip, 3 Inch, PN28354.

The 3M™ Perfect-It™ Brand: 3M's Highest-Quality Solution for Finishing Coated Surfaces

Our Perfect-It brand represents a complete range of solutions designed for busy shops to achieve perfect defect-free finishes, every time, in as little time as possible. Perfect-It brand products have been developed according to a step-by-step system — there's no need to create your own processes to get the best finish. Premium product performance means shorter process times at every step. You use less material, and you have less material to clean up. In all, our Perfect-It brand products let you complete more jobs in the same amount of time. You get better throughput, the finest and most consistent finishes, and increased customer satisfaction with every job.

Single-Sided Foam Pads and Our Hookit™ Attachment System

The Hookit™ attachment system has a hook-and-loop feature which makes attachment, removal, and re-attachment clean and easy. It also facilitates use and re-use of the Perfect-It™ pad for maximum product life. Hookit™ sheets have a brushed nylon loop backing of the type most commonly used in everyday hook-and-loop applications. The 3M™ Perfect-It™ Low Lint Wool Compounding Pad features hooks which grip the brushed nylon loop backing of your Hookit™ backup pad. It's simple: just attach the pad and start compounding. The pad removes just as cleanly and easily. The Hookit™ system is designed for work spaces and applications where adhesive backed abrasives may become contaminated by dust, dirt or debris.
