# 3M<sup>™</sup> E-A-R<sup>™</sup> Classic<sup>™</sup> Earplugs

Leading the Advancement of Hearing Conservation™

foam earplug—virtually revolutionizing hearing protection. Today, the revolution continues. The Classic product line has been expanded to meet more wearer and environmental needs with its proprietary foams, preferred cylindrical shape, and proven in-ear comfort.

# The Features that Make the Difference

Compared to other hearing protectors, 3M<sup>™</sup> E-A·R<sup>™</sup> Classic<sup>™</sup> Earplugs offer distinct features that have helped make Classic products a preference of workers and industrial safety professionals for over 30 years. Specify your request for Classic earplugs—feel the difference.

### The Foam.

Classic earplugs are made of a proprietary foam formulation which helps deliver key advantages over other foam earplugs.

Reduced Canal Pressure Users and safety directors have said that pressure in the earcanal leads to wear discomfort. Classic earplugs have a lower equilibrium pressure than many other competitive earplugs.\*

Classic earplugs

fully and deeply seal within the

earcanal when properly fitted.

**Not Too Soft** 

Classic earplugs are firm when rolled-down for fitting and soft after fitting, to fully and

comfortably seal the earcanal for noise reduction.

Resists Sweat & Moisture

Classic earplugs are resistant to moisture absorption for consistent fitting even in humid environments.

Resists Flammability

Arc flash exposure? Explosion or flammability potential with inventory storage? Classic earplugs have been tested and proven to be flame resistant.

Rated Medical Grade

Classic foam has been laboratory tested and meets the requirements of

a USP Class VI Medical Grade Material, the highest grade possible.

The Recycling Advantage Classic foam earplugs and most corrugated packaging are recyclable.

## The Shape.

#### The advantage of cylindrical earplugs

Outperforms Tapered According to a British Steel Technical Study, cylindrical plugs outperformed tapered earplugs for actual in-use protection levels.\*\*

Fits Most Earcanals Classic earplugs are designed to fit a wide range of earcanals, and meet the product dimensions of Mil-P-37407, the specification defining U.S. military requirements for foam earplugs.

## The Proof.

#### Unmatched performance for more than 30 years

Military Tested & Approved It has even met the rigorous demands of the U.S. military for training and combat. In fact, it is one of the highest attenuating earplugs in Air Force testing.\*\*\*\*

3M™ E-A-Rfit™ Validation System Classic earplugs can be fit tested using the E-A-Rfit system: on-site, in the workplace. In less than 10 seconds per ear, the system generates a personal attenuation rating (PAR) that indicates a worker's noise reduction level for a given fitting.

The E-A-Rfit validation system includes FREE online training & user support.

For more information and to see a video please contact your 3M sales representative or visit www.E-A-Rfit.com

## The Choices.

3M™ E-A-R™ Classic™ Earplugs are a leader in the industry in the variety of sizes and styles offered, making Classic products a great choice for just about any situation and nearly all ear sizes. Most products are available corded or uncorded.

Improper Fit

#### Classic<sup>™</sup> Earplugs

- The Original Foam Earplug Available in 3M™ One Touch™ Dispenser refills NRR 29dB\*
- The Classic earplug was the first earplug in the industry made of our proprietary slow-recovery foam.

# Classic<sup>™</sup> Small Earplugs • Enhanced Comfort for Smaller Earcanals • NRR 29dB\*

- The diameter of Classic small earplugs is 7% smaller than the Classic earplug (and the same length) to help provide optimum comfort and protection in narrow earcanals.

#### Classic<sup>™</sup> Plus Earplugs

- Increased Length Provides Greater Attenuation
   NRR 33dB\*
- The Classic plus earplugs are 20% longer than the Classic earplug (and the same diameter) to fit deeper into the earcanal for increased attenuation.

#### Classic™ Plus Metal Detectable Earplugs

- Traceable Protectors NRR 33dB\*
- Created for food processing and other industries where prevention of product contamination is critical. Earplugs and vinyl cord are metal detectable.

#### Classic<sup>™</sup> SuperFit<sup>™</sup> Earplugs

- Exclusive Fitting Ring Available in One Touch dispenser refills
- NRR 30dB\* for the SuperFit 30 or NRR 33dB\* for the SuperFit 33
- SuperFit earplugs have a built-in visual to confirm proper fit—the fitting ring. If the ring is visible after insertion, refitting is recommended for best hearing protection.

#### Leading the Advancement of Hearing Conservation™

## With More Than Just Hearing Protectors.

At 3M our commitment to hearing conservation extends far beyond our hearing protection products. Other services include:

- 3M™ E-A-Rfit™ Validation System Online training and information sites such as www.e-a-r.com/hearingconservation • Our HEAR FORCE™ Crew provides on-site employee training that helps employers meet the annual training requirements of OSHA 1910.95.
- Motivational posters to encourage wearing hearing protection Plus many more

#### Refillable Dispenser Patented "No Waste" system. Just turn the knob to get a pair of Classic earplugs. Refill bottles (500 pair) are available for Classic and SuperFit 30 earplugs.

#### **Econopack Dispenser** Boxes for Value Purchasing

Classic earplugs are available in easy access dispenser boxes in quantities of 500 or 1000 pairs Buying in larger quantities can reduce costs. Boxes can be used free-standing or wall mounted.

Leading the Advancement of Hearing Conservation™

#### **WARNING!**

These hearing protectors help reduce exposure to hazardous noise and other loud sounds. Misuse or failure to wear hearing protectors at all times that you are exposed to noise may result in hearing loss or injury. If there is any drainage from your ear or you have an ear infection, consult with your physician before wearing earplugs. Failure to do so may result in hearing loss or injury.

<sup>\*\*</sup>NRR Footnote: Research indicates that many users will receive less noise reduction than indicated by the NRR due to variation in earplug fit, and wearing time. It is suggested that the NRR be reduced by 50% for estimating the average amount of noise reduction provided.
