

Dynatron™ 3-Pack Spreaders ensure that collision repair professionals have the right size spreader at their fingertips for spreading auto body filler. Each 4", 5" and 6" spreading tool features a flexible edge for precise spreading of body fillers, caulks, putties and glazes. And cured body filler easily pops off the spreader surface for fast, easy reuse with very little cleanup.

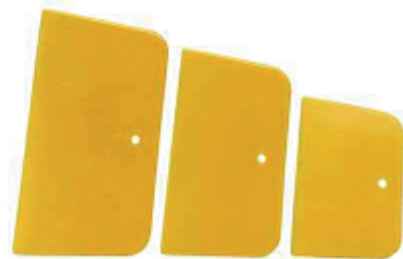

The Right Sizes for Just the Right Surfaces

This 3-pack of 3" x 4", 3" x 5" and 3" x 6" Dynatron spreaders ensures that you'll always have the right size filler spreader to create your best work in auto body repair. Dynatron™ 3-Pack Spreaders gives you reliable tools for a large range of auto body filling projects using fillers, glazes, putties and caulks. Flexible edges make applying, spreading and shaping fast and easy. All spreaders are reusable, as cured filler material separates cleanly and completely from the spreader surface leaving it clean and ready for the next use.

Dynatron and the Science of 3M

Dynatron™ 3-Pack Spreaders deliver much more than the right size spreader for the job. Each spreader is built for ease of use, fast cleaning and long product life — just what you need for an efficient and well-run collision repair business. A brand of 3M, Dynatron delivers science-driven benefits specifically for aftermarket auto body repair and maintenance.
