

- Accessory offers excellent support for abrasives
- Aluminum construction offers long wearing durability
- Front slot aligns sheets for perfect positioning of abrasives
- Easy and quick insertion and removal of abrasive sheets saves time and effort
- Designed for 3M™ Stikit™ Sheets and Rolls

3M™ Stikit™ Air File Shoe provides support for 3M™ Stikit™ abrasive sheets and rolls. Our accessory features a leading tuck-in front slot for easy insertion and quick removal applications.

Gives Support that Abrasive Sheets Need

3M™ Stikit™ Air File Shoe gives the support needed for better sanding results when using 3M™ Stikit™ abrasive sheets and rolls. It's quick and simple to load and unload abrasives to the air file. The front slot aligns the sheet so that it is properly positioned. Removal of the abrasive sheet has been simplified because there are no mechanical clips. The easy insertion/easy removal design saves you time and effort when replacing worn abrasive sheets or switching between grades.

A Quality Tool Made to Last

Our sanding accessory is made from aluminum to offer the combined benefit of being both lightweight and durable. It is a long-wearing device that will provide exceptional service.

Easy Abrasive Sheet Changes

This accessory is made to work with our 3M™ Stikit™ system, which offers convenient abrasive sheet changes between grades or applications. Stikit™ abrasives come ready to use with a pressure sensitive adhesive coating on the backside so that attaching them to the air file shoe is as simple as pressing on a sticker, yet they remove cleanly without leaving any sticky residue behind.
