

- Provides soft, controlled touch during light scuff sanding and other fine-grade jobs
- Eliminates finger marks and edge cutting on primed surfaces
- Accepts Stikit™ Sheet Rolls for fast sheet change-outs
- Abrasive rolls won't slip or tear for effective, smooth sanding

Our 3M™ Stikit™ Soft Hand Pad is ideal for collision repair jobs requiring a light touch, such as sanding around contours and light scuff sanding. Soft but durable pad helps technicians maintain a good “feel” even for irregular surfaces, helping ensure consistent contact without cutting or finger marks. Stikit™ sheet rolls adhere firmly with no slipping or tearing and release easily to save time.

### **A Controlled Touch for Hand Sanding**

Ideal for use with 3M™ Stikit™ Sheet Rolls, our 3M™ Stikit™ Soft Hand Pad provides a soft, controlled touch for light scuff sanding or sanding around contours. Its blend of flexible support creates an ideal balance, helping technicians to maintain a clear “feel” during auto body work such as leveling and other surface prep applications requiring a finer grit abrasive. This pad helps eliminate finger marks and edge cutting into primer and paint.

### **About Our Stikit™ System**

The 3M Stikit™ system was designed for convenient changes between abrasive grades or applications. Stikit™ abrasive rolls come ready to use with a pressure sensitive adhesive coating on the backside so that attaching them to the Soft Hand Pad is as simple as pressing on a sticker. Yet they remove cleanly without adhesive residue left on the block. This makes for very fast change-outs, saving time, and prolongs the life of abrasives.

### **Better Sanding from 3M**

A soft, flexible pad and our patented Stikit™ system combine to make hand sanding easier, faster and more effective. The features built into our 3M™ Stikit™ Soft Hand Pad afford a controlled touch, consistent facing that eliminates finger marks or edge cutting into primed surfaces and fast, convenient sheet roll changes — simply better sanding for smoother collision repair operations.

When it comes to quality abrasives, grinding & sanding, 3M is the brand you can depend on.
