

Details

- Increases shop grinding capabilities and efficiency
- Makes grinding more portable for greater volume and for hard-to-reach areas
- 3" diameter adapter connects 3M™ Kut-Down™ abrasive discs to handheld grinders
- Also includes 1/4" mandrel for use with automotive grinders
- Screws into disc backing plates for easy-on/easy-off quick disc changes

Our 3M™ Kut-Down™ Abrasive Disc Adapter is a vital component for bringing the benefits of 3M™ Kut-Down™ discs to a large range of grinding projects in collision repair. Use this 3" diameter adapter to attach abrasive grinding discs to 7/16-20 handheld pistol-grip pneumatic grinders and air sanders. Also included: a 1/4" hex mandrel for use with automotive drills, great for hard-to-reach areas.

The Power of Coarse Grade Abrasive Discs is Right in Your Hands

Vital for increasing your grinding capabilities in collision repair, our 3M™ Kut-Down™ Abrasive Disc Adapter lets technicians quickly and easily adapt our aggressive 3M™ Kut-Down™ Discs to a variety of common hand held shop tools — the full power of industrial abrasive discs right in the palm of your hand. The package contains a 3" diameter adapter that attaches easily to handheld pistol-grip type grinders and air sanders with 7/16-20 threads. The other end of the adapter twists directly into the built-in backing plates on our 3M™ Kut-Down™ Discs 01429, 01430 and 01431. This provides technicians with easy on/easy off quick-change disc operation for better results and higher efficiency.

This Kut-Down™ Abrasive Disc Adapter package also includes a 1/4" mandrel which lets you quickly attach Kut-Down™ discs to standard drills for even greater capabilities in portable grinding and sanding. Both adapters make grinding easier and more portable, great for grinding numerous jobs or in hard-to-reach areas.

About Our Kut-Down™ Abrasive Discs

The 3M™ Kut-Down™ Abrasive Disc Adapter makes it easy and practical to use our aggressive Kut-Down™ Discs for a variety of collision repair jobs. These discs feature extremely coarse grades down to 24 grit for effective grinding and include a built-in backing plate that provides durable support and allows for easy adapter attachment. Kut-Down™ means that as the discs wear, the edges can be trimmed to refresh them.

Better Sanding and Grinding from 3M

By making our Kut-Down™ Abrasive Discs practical for use with a range of handheld and pneumatic grinders and automotive drills, 3M adds plenty of power to your operations. This adapter is just another example of how 3M applies science to life, and makes your life easier and more efficient as a collision repair professional.
