

## Details

- Part of a complete assembly for compounding and polishing
- Designed to attach buffing pads or backup pads to machine polishers
- Helps reduce wear and vibration
- Users can change screw-on pads without removing the adaptor, saving time
- Provides hassle-free centering with 3M double-sided wool compounding and polishing pads

Our 3M™ Adaptors for Polishers are designed for saving time and hassle in collision repair jobs requiring double-sided screw-on compounding and polishing pads. It is part of a fast, effective assembly that incorporates our 3M™ Perfect-It™ Backup Pad and wool polishing pads, allowing users to quickly attach them without removing the adaptor. This durable adaptor is used with all polishers.

### **The Link to Fast, Efficient Compounding and Polishing**

For jobs requiring double-sided screw-on wool compounding and polishing pads, our 3M™ Adaptors for Polishers are integral to a complete assembly that saves time. The adaptor is designed for securely attaching our pads and backup pads to a full range of polishers. When used with 3M Wool Pads 05703, [05704](#) [05705](#) or [33280](#), this adaptor provides fast, easy centering. When used with a Perfect-It™ Backup Pad ([PN 05718](#)), it helps reduce vibration, preserves the backup pad from potential wear and protects the surface from damage due to direct exposure to the polisher shaft. This assembly allows for quick pad change-outs without having to remove the adaptor.

### **The Science of Better Compounding and Polishing from 3M**

Our 3M™ Adaptor for Polishers is part of an assembly that adds convenience and speed to machine compounding and polishing with screw-on pads. Together with our backup pads and wool compounding and polishing pads, it's another example of how 3M applies science to the lives of collision repair professionals.
