

3M Science.
Applied to Life.™

A family of pads to fit every size repair.

More is better!

Our redesigned foam buff pads now have TWICE as many convolutes (peaks and valleys) as our previous generation pads. Our 100% Low Lint wool pads reduce the amount of floating fibers with great cut and a better finish for easier polishing. And what benefits does that provide?

- Smoother gliding with less chatter and drag
- Uniformly spreads compound with less smearing
- Less spatter and sling = less cleanup = less work

4 inch pad inset protect sharp edge of the backing plate

33271	3M™ Quick Connect Adaptor, 14 mm, 10 per case
33270	3M™ Quick Connect Adaptor, 16 mm, 10 per case

Details

- Ideal during ultrafine polishing step to remove light swirls and scratches from automotive paint
- May be used on cured, hard or medium finish paint to eliminate scratches
- Convolute foam pad conforms to irregular surfaces, curves and body lines, reducing chatter for improved finish
- Use with 3M™ Perfect-It™ EX Ultrafine Machine Polish for complete scratch removal
- Hookit™ backing attachment makes for quick backup pad changes during multi-step sequences
- Use with 3M™ Perfect-It™ Ultrafine Machine Polish for showroom-grade finishes

Our 3M™ Ultrafine Foam Polishing Pad eliminates swirl marks and holograms on painted surfaces for a showroom-grade paint finish even on dark colored vehicles. Foam pad works with Perfect-It™ Ultrafine Machine Polish, part of the 3M™ Perfect-It™ Paint Finishing System.

The Perfect Balance for Finishing Auto Body Panels

The 3M™ Ultrafine Foam Polishing Pad is engineered for the perfect balance: it holds up during the final polishing process. Properly used with 3M™ Perfect-It™ EX Ultrafine Machine Polish, it delivers a refined cut to eliminate swirl marks, haze and holograms without compromising the high gloss of the panel. Its foam construction and specially designed face holds polish and prevents slinging during critical final paint finishing.

Single-Sided Foam Pads and Our Hookit™ Attachment System

The Hookit™ attachment system has a hook-and-loop feature which makes disc attachment, removal, and re-attachment of 3M™ Ultrafine Foam Polishing Pads clean and easy. It also facilitates use and re-use of the disc for maximum product life. Hookit™ discs have a brushed nylon loop backing of the type most commonly used in everyday hook-and-loop applications. A range of Hookit™ disc backup pads features hooks which grip the brushed nylon loop backing. It's simple: just attach the disc and start sanding. The disc removes just as cleanly and easily. The Hookit™ system is designed for work spaces and applications where adhesive backed abrasives may become contaminated by dust, dirt or debris.

Convolute foam pad conforms to irregular surfaces, curves and body lines, reducing chatter for improved finish
