- Use to remove compound swirl marks on automotive paint and gelcoat
- Blended wool abrasive combines fast cut and fine finish
- Double-sided pad provides fast, easy changeouts
- Quick Connect attachment saves time, allowing user to quickly change between pads and pad sizes with a single adaptor
- Quick Connect attachment provides fast, easy centering of pads, reducing operator fatigue
- Part of the 3M Perfect-It™ paint finishing and gelcoat systems
- Perfect-It™ brand means this is 3M's highest performing wool polishing pad

Our 3M™ Perfect-It™ Wool Polishing Pad combines fast cut and a fine finish when removing compound swirl marks and fine paint defects. Quick Connect attachment makes for fast, easy centering and allows for quick changeouts. This pad is part of our Perfect-It™ Paint Finishing System, signifying 3M's highest performing double-sided wool-blend pad.

Fast Cut, Fine Finish

To meet the unique challenges of compounding and polishing in collision repair, our 3M™ Perfect-It™ Wool Polishing Pad features a fast-cutting, durable wool/acrylic blend to remove swirl marks and surface defects for a fine, polished finish. Our durable double-sided polishing pads feature built-in support at the center which allows for excellent control and a more aggressive cut without applying additional pressure. This support also works with our Quick Connect adaptor for fast, precisely centered attachment. Perfect-It™ polishing pads work with our Perfect-It™ paint finishing and gelcoat systems for excellent results on automotive paint and gelcoat surfaces. This polishing pad is made in Canada with domestic and imported parts.

Our Quick Connect Double-Sided Pads

Our double-sided 3M™ Perfect-It™ Wool Compounding Pad features a center plate for added durability, and works with the 3M™ Quick Connect Adaptor, PN 05752, to attach to rotary and random orbital tools. The metal adapter has 5/8-inch threads, making it easy for you to quickly lock our compounding pads to a large range of standard rotary polishers. This method also perfectly centers the pad every time for fewer fly-offs. You can detach them just as quickly, which makes changing pads easy and fast and saves time and money during the stages of our [Perfect-It™ Paint Finishing System](#). For Festool polishers, use 3M™ Quick Connect Adaptor PN 33271 with 14 mm threads.

The 3M™ Perfect-It™ Brand: 3M's Highest-Quality Solution for Finishing Coated Surfaces

Our Perfect-It brand represents a complete range of solutions designed for busy shops to achieve perfect defect-free finishes, every time, in as little time as possible. Perfect-It brand products have been developed according to a step-by-step system — there's no need to create your own processes to get the best finish. Premium product performance means shorter process times at every step. You use less material, and you have less material to clean up. In all, our Perfect-It brand products let you complete more jobs in the same amount of time. You get better throughput, the finest and most consistent finishes, and increased customer satisfaction with every job.

Removes compound swirl marks and fine paint surface defects
