- Paint finishing, car clean up and more...

From metal and plastic repair, to primer sanding, paint finishing and car clean-up, 3M has the repair processes and products for you to achieve the perfect finish. Feel confident your repair is done professionally and efficiently using the most up-to-date processes in the collision repair industry.

Skills for Success

3M Gold tier abrasives have been the workhorse abrasive in the industry since they were introduced over 25 years ago.

Product Use: Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. Given the variety of factors that can affect the use and performance of a 3M product, user is solely responsible for evaluating the 3M product and determining whether it is fit for a particular purpose and suitable for user's method of application.

Limitation of Liability: Except where prohibited by law, 3M will not be liable for any loss or damage arising from the 3M product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.

- The Abrasives by which all others are measured
- Delivering uniform, consistent finishes
- Available in both Stikit™ and Hookit™ for convenience and reuse

In our industry, these products are pure Gold.

3M™ Gold Abrasives are the standard that shops have turned to for quality, performance and durability for over 25 years. Our Gold Abrasives are precision coated with high quality minerals and resins to deliver longer-lasting discs that cut through a variety of surfaces - including paint, primer, fiberglass, metal and SMC. 3M™ Gold Abrasives produce uniform, consistent finishes and are available in both Stikit™ and Hookit™ options for convenience and reuse. When job quality and productivity matter most, turn to the abrasives that shops have relied on year after year.

Dent Repair and Paint Removal

D and E weight backing makes these abrasive products extremely durable for sanding paint, metal, or fiberglass. Open coat construction reduces loading on fresh filler. Products are available in no-hole and dust-free configurations, with either Stikit™ or Hookit™ attachment.

Featheredging and Primer Sanding

These products are designed to provide productivity in a variety of applications from express repair to larger body repair. Use the coarser products for sanding and featheredging filler and putties, and the finer grades for further refinement and primer sanding.

Paint Preparation and Paint Finishing

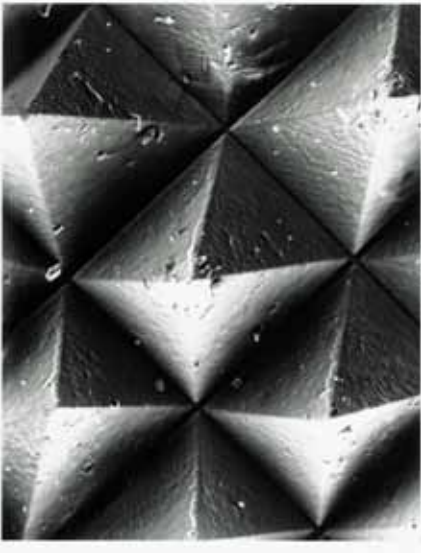

Performance Aluminum Oxide cuts fast, lasts a long time, resists loading and leaves a consistent finish. Use these products with a soft interface pad to scuff sand before painting. Use them to remove runs, dust nibs and excess orange peel from topcoat finishes before buffing.

3M™ Trizact™ Discs

Patterned, precise mineral structures give the combination of fast cut and consistent finish every time. Use P1000 foam blending discs for scuff sanding blend panels prior to painting. Use P1500 clearcoat sanding discs for leveling dust nibs and sanding of mismatched orange peel. Finally, use P3000 foam disc for removing P1200-P1500 grade sand scratches prior to use of 3M™ Perfect-It™ polishing system.
