ALC Abrasives

40098 25 Lb. Aluminum Oxide is a high quality abrasive that is sharper than sand and cuts twice as fast. It leaves a smooth textured finish with no pits or burrs. It is tougher than glass bead and can be used over and over again. It is one of the most economical abrasives you can use in any reclaim system.
Also Available: 4 lb. and 50 lb.

41110 10 Lb. Plastic Grit is primarily used to strip aluminum. Great for stripping paint, light oxidation and surface rust. Recommended for use in blast cabinets because it creates very little dust. Works quickly, lasts a long time and increases visibility within the cabinet.
Also Available: 25 lb.

40126 25 Lb. Garnet is a multi-purpose abrasive. It is sharp and fast cutting with low dust. Recycles well. Great for cabinet blasting. Leaves smooth textured finish like Aluminum Oxide.

40109 25 Lb. Steel Grit is extremely fast cutting on rusty metal and hard-to-remove paint. Leaves a very smooth finish. It is also comparable in price to most other specialty abrasives. It should be used in reclaim systems or cabinets.

40105 25 Lb. Glass Bead is an abrasive that should be used in blast rooms and cabinets. It is generally used in creating a satin or matte finish.
Also Available: 4 lb. and 50 lb.

40092 25 Lb. ALC Mix #1 is used when removing paint and rust from panels. It has more cutting power and lasts longer than sand. Use ALC Mix #1 in any reclaim system or in any blast cabinet.
Also Available: 1 lb. and 4 lb.

40093 25 Lb. Coal Slag is used when paint and rust have to be removed from steel. Superior to silica because it has only .1% free silica, is faster cutting, can be re-used, is moisture free and will not pack or absorb moisture.

40112 10 Lb. Walnut Shells are recommended for use on "soft" surfaces such as aluminum, brass, wood, fiberglass and other surfaces where no pitting is desired. Leaves a smooth, dull finish.

40125 50 Lb. Corn Cob abrasive is used on "soft" applications such as wooden surfaces like baseboards & staircases, and aluminum, brass & other surfaces where no pitting is desired. Leaves a smooth, dull finish.
