DO NOT DISCARD – GIVE TO USER

Model:

72SL

Product Type:

720 LUMEN RECHARGEABLE LED USB-C SLIM LIGHT

SAFETY AND USAGE INSTRUCTIONS

- 1) Tools may in principle only be used for the purpose intended, under the conditions envisaged and within the limitations as to their use.
- 2) The battery must be completely charged before using for the first time!
- 3) Pay attention to heat management without fail (operating temperature -10 °C to +40 °C) (incorrect heat management leads to destruction of the lamp)!
- 4) Do not look directly into the light (danger of injury to the retina)!

OPERATION

The rechargeable worklight has two modes of operation:

- 1) Main light with dimming function. The worklight is switched on and off by means of the rotary switch on the reverse side. The dimming function is likewise regulated by means of the rotary switch (turning to the right increases the LED power /to the left reduces the power).
- 2) Spot: activated at the push button on the reverse side above the rotary switch.

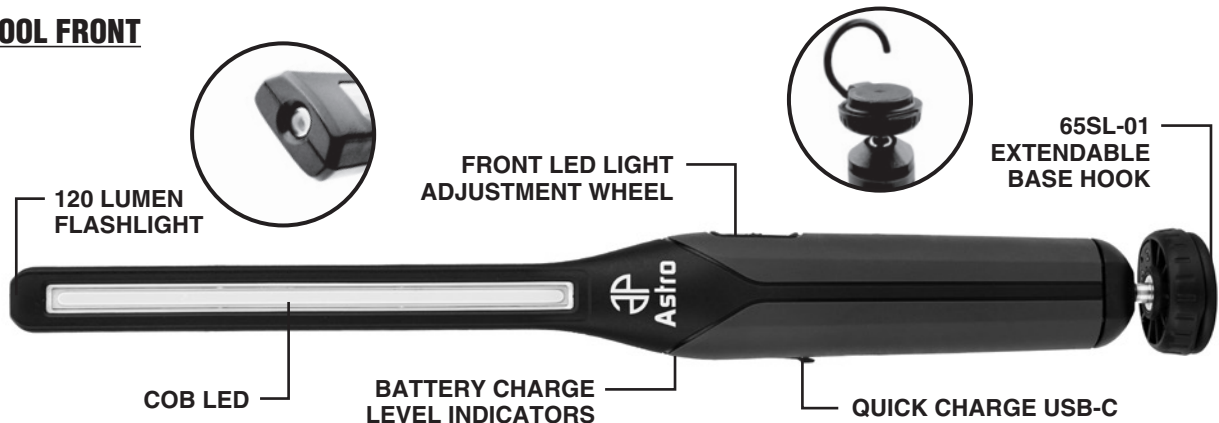

CHARGING PROCESS

- The micro USB charging socket is located on the side below the rubberised protective cover. The charging process is symbolised by a flashing green LED on the charge control indicator. When fully charged, all 5 LEDs light up.
- Fully recharge the lamp until indicator on charger turns all 5 LEDs light up before first use.
- The battery should only be charged with the charger supplied by the manufacturer. To avoid damage, please do not use any other chargers.
- Keep the lamp in a dry place away from direct sunlight. The lamp must be protected against high humidity and water during storage.
- Remove the charger adapter plug from the wall AC outlet when moving the connected equipment, as doing otherwise may cause damage to the power cord, resulting in a fire.
- Unplug the charger adapter plug from the AC outlet for safety purposes when cleaning or leaving the unit unused for 10 days or more. Doing otherwise may cause a fire or electric shock.
