

Model # 7760

SHOP EQUIPMENT

Cordless Circuit Tester

FEATURES:

- This unit does not require ground wire or clip and is safe with ECMs, Sensors, Transducers, Airbags, etc.
- Designed to be used on DC powered circuits with voltages between 3 and 28 volts
- Special designed V-Tip needle allows safe piercing and prevents side-slipping when piercing wire's insulation
V-Tip can be removed to test hard to reach places
- Unit works with replaceable long-life alkaline batteries
- Made of rugged chrome metal
