

ATD-12555

**5-in-1 Preset Torque Wrench
OPERATING INSTRUCTIONS**

⚠ WARNING ⚠

WARNING: This product contains chemicals, including lead, known to the State of California to cause cancer, birth defects or other reproductive harm. *Wash hands after handling.*

Made in Taiwan to ATD Tools, Inc. Specifications

OPERATION:

1. Pull back the adjusting locking knob to unlock the handle.

2. Turn clockwise or counter-clockwise to set the desired torque.

3. Push back the adjusting locking knob to lock the handle.

CAUTION:

1. While setting the desired torque, the arrow must line up with the scale before pushing back the adjustment locking knob, otherwise it may damage the inner mechanism.
2. Stop wrenching the torque wrench when you hear a "click" sound in order to prevent over-torquing the nuts/fasteners.
3. Never use your torque wrench to apply more torque than it's rated capacity. This will affect the calibration.

4. Apply a steady force to the center of handle, and stop wrenching when you hear a "click" sound.

⚠ WARNING

- Read, study, understand and follow all instructions before using.
- Always wear safety goggles (including bystanders).
- Do not use a "cheater bar".
- Do not use torque wrenches to loosen fasteners.
- Do not submerge this unit into any fluid.
- This product may contain one or more chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **Wash hands thoroughly after handling.**
- Failure to heed these warnings may result in personal injury and/or property damage.
