MOUNTING

Ceiling or Wall Installation

1. Select a location within 2 feet of an electrical outlet. The outlet for a garage door opener is desirable.
2. Drywall will not hold the weight of the reel assembly, so locate a ceiling joist or wall stud and using the mounting bracket as a template, mark the holes so they are centered on the ceiling joist or stud.
3. Attach the mounting bracket to the stud using the 2 wood screws provided.
4. Align the holes on the side of the reel with the holes in the side of the mounting bracket and insert the pin.
5. Place the retaining ring on the pin and twist until the entire ring is through the hole in the pin. **DO NOT operate this reel without the retaining ring in place on the pin.**

SAFETY / CARE

- Caution: do not allow the cord to retract by itself as damage or injury may occur from excessive rewind speed.
- Adjust the cord stop to hold the receptacle at the desired length when the cord is retracted.
- Before cleaning the reel always unplug from the power source.
- Clean the outside of the cord reel only. Use a soft cloth with mild detergent. Do not use petroleum based to clean the cord reel. Never immerse the cord reel or receptacles or work lights in water. Dry thoroughly before attempting to reattach to power source.
