CHARACTERISTICS

- Lens Material: Polycarbonate
- Lens Thickness: 2.2mm
- Frame Material: Polycarbonate/TPR
- Base Curve: 9
- Strap: 12mm adjustability
- Foam: Optional Foam + Strap Kit

ANSI
Z87.1-
2010

**American
National Standard
for Occupational
and Educational
Eye and Face
Protection
Devices**

Establishes performance criteria and testing requirements for devices used to protect the eyes and face from injuries from impact, non-ionizing radiation and chemical exposure in workplaces and schools. It covers all types of protector configurations including spectacles (plano and prescription), goggles, face shields, welding helmets and full face-piece respirators.

Z87+

**Impact Mark
Rated Plano**

The Z87+ is required when claims of compliance such as impact rating or a specific lens type and/or use are made by the manufacturer for plano protectors

U (+
SCALE
NUMBER)

UV Filter

U and Scale Number (Scale ranges from 2 to 6 – the higher the number the highest protection from far and near UV)

HD Lens

A unique lens treatment resulting in exceptional clarity and superior light transmission. The HD coating may be used for every type of job except those requiring solar protection for industrial use. Bollé Safety's HD lens delivers 96% visible light transmission compared to 90% for classic clear lenses. And the hydrophobic coating and HD technology join together to form a real waterproof polymer barrier against water droplets.

PIVOTING TEMPLES / TILTING FRONT

This technology is used to adapt the angle of the glasses to your face shape.

REMOVABLE TEMPLES

This technology is used to quickly and easily transform safety glasses into safety goggles. The temples can be replaced with the foam and strap kit.

NON-SLIP BRIDGE

Designed for a perfect fit of the frame on the face.

Pivoting temples

Non-slip bridge
