

About The Gallon Pour Spout

Want to buy your favorite Chemical Guys products in gallon bulk quantities, but don't want to spill and waste it all when you go to pour? Pick up the Gallon Size Easy Pour Spout, and never waste a drop of product again! These screw-on caps keep product jugs clean and neat, and easily distribute your favorite Chemical Guys products in seconds. Ever use a ketchup squeeze bottle at a restaurant? This cap works in the exact same way! The caps even feature a seal, so you can close up the lid and keep products fresh and the squeeze spout clean. Using a squeeze spout greatly helps reduce spillage as you transfer product from gallons into smaller bottles, or directly into wash buckets or onto applicator pads. The Easy Pour Spout tip fits the 38/400 bottle thread used on every Chemical Guys 1 gallon and 1/2 gallon product jug. Don't spill another drop! Screw on an Easy Pour Spout, and dole out your favorite Chemical Guys products for trouble-free detailing and housekeeping.

How To Use:

- Unscrew the cap from the gallon container.
- Screw the Easy Pour Spout onto the threads.
- Remove red cap and snip off the very end of the spout tip.
- Replace red cap to keep spout clean, clear, and sealed between use.

Chemical Guys puts everything within reach.
