

Powerful Carpet Scrubbing Brush

The difference between professionals and amateurs is professionals work smarter, not harder. The Carpet Brush With Hook & Loop Attachment turns any dual action polisher into a carpet-scrubbing machine. Why spend hours feebly scrubbing at set-in carpet stains by hand? Slap the Carpet Brush onto your dual action polisher to quickly eradicate deep-set filth, dirt, and stains from floor mats and carpets in any car, truck, SUV, RV, or anywhere else. Harness the power of your favorite machine polisher to spot-treat small spills and stains, or clean entire vehicle interiors with the Carpet Brush in mere minutes. Industry-standard machine polishers like dual action and rotary machines are rarely used to their full potential. Professionals use machine polishers to remove swirls and scratches from paintwork, spread wax, and scrub seats, upholstery, and carpet using specialty brushes like the Carpet Brush With Hook & Loop Attachment. The precision injection molded plastic backing plate shrinks around every bundle of bristles for a secure bond that will never pull out or break. Stiff nylon bristles resist chemicals and bending under physical stress more than traditional horsehair bristles and work for a deeper clean on tough automotive carpets. Use the Carpet Brush With Hook & Loop Attachment for a deep clean on dirt, filth, and stains on any floor mats, carpets, and tough upholstery.

Tough On Stains

The best way to remove deep-set filth, dirt, and stains from carpets and floor mats is through physical agitation. Dirt particles get tangled and trapped deep inside carpet strands, and no amount of gentle wiping or chemical cleaning can dislodge them. The Carpet Brush With Hook & Loop Attachment physically untangles, scrubs, and agitates dirt and filth from deep within cloth and carpet. Dual action and rotary polishers are powerful machines, and only a fraction of their power is enough to eradicate filth and stains forever. Attach the Carpet Brush to any DA or rotary polisher and work over the surface between speed settings 1 and 3. Physical scrubbing is not a half-measure that merely covers filth or stains; the Carpet Brush With Hook & Loop Attachment delivers permanent and thorough cleaning results on floor mats and carpets found throughout the automobile or home.

Tough Construction

Professionals don't have time for tools that break and leave them hanging on a job. Time is money to a professional, and time is precious to any enthusiast spending their weekend detailing the car. The Carpet Brush With Hook & Loop Attachment is designed and built with durable materials for years of dependable detailing use. The precision injection-molded plastic base shrinks around every bundle of nylon bristles for a secure bond that will never break or loose scrubbing power. Short and stiff 7/8" nylon bristles transfer intense scrubbing action from the machine polisher directly into carpet and upholstery without bending or breaking under the strain. Every hook and loop interface is secured to the durable plastic backing via a custom heat-cured adhesive for maximum grip under high pressure and long detailing jobs. Choose the Carpet Brush With Hook & Loop Attachment for years of dependable scrubbing action on floor mats and carpets.

Pair With Great Cleaners

Great detailing results come from choosing the tools, using the right methods, and selecting the best cleaning chemicals. Chemical Guys manufactures different soaps, degreasers, and cleaners from every detailing job around any vehicle. Heavier degreasers contain caustic solvents and agents that can discolor sensitive and absorbent carpets and upholstery. Interior detailing on seats and carpets is best finished with colorless and odorless all-purpose cleaners like Nonsense or Lightning Fast Stain Extractor. Heavier degreasers like Orange Degreaser or All Clean + are best suited for cleaning heavy grease from engine bays, wheel wells, or other undercarriage parts. Turn to Chemical Guys and choose the right product for any detailing job in any vehicle.

How To Use:

- Prepare the surface by vacuuming any large debris from the area.
- Pre-treat any stains or set-in dirt in the area with a few sprays of your preferred Chemical Guys all-purpose cleaner or stain extractor.
- Attach the Carpet Brush With Hook & Loop Attachment to your preferred DA or rotary machine polisher.
- Turn the machine on between speed setting 1 and 3 and gently guide the spinning brush over the surface.
- Avoid pressing with heavy downward pressure into the carpet or upholstery.
- Avoid using high speeds that can tear the adhesive pad from the backing plate.
- Blot cleaner and loosened dirt with microfiber towel

Chemical Guys puts everything within reach.
