

HD SCISSORS DF-HDS1 & DF-HDSC1

Great tools to use all around the shop!

The Heavy Duty Scissors with Micro Teeth (DF-HDS1) and the Heavy Duty Scissors with Cable Cutter and Micro Teeth (DF-HDSC1) are the perfect solution for cutting plastic, rubber, leather, cloth, gaskets, wire and other materials. Both HD Scissors are equipped with a serrated edge comprised of micro teeth. These teeth grip and hold the material in place for a clean and precise cut. The teeth cut through materials as thin as tissue to more difficult and thicker jobs, like rubber and leather. The DF-HDSC1 has a U-shaped cable cutter notch on the blade that seats the wire or cable for a secure cut. From the upholstery shop to the body shop Dent Fix Equipment's HD Scissors are the preferred choice of the premium technician.

APPLICATION

Cutting plastic, leather, cloth, rubber, gaskets, wire and other automotive materials.

FEATURE & BENEFITS

- **MICRO TEETH** - Grips and precuts the material for a smooth cut.
- **CABLE CUTTER** - DF-HDSC1 has a notch in the blade to prevent the cable moving.
- **SAFETY**- Ergonomic safety lock can be toggled with a flick of the thumb.
- **NO SLIP GRIP** - Grooves in the handle ensure control and safety while cutting.
- **HIGH VIS YELLOW** - Easily spot from anywhere in the shop
