Portable industrial tools for professionals

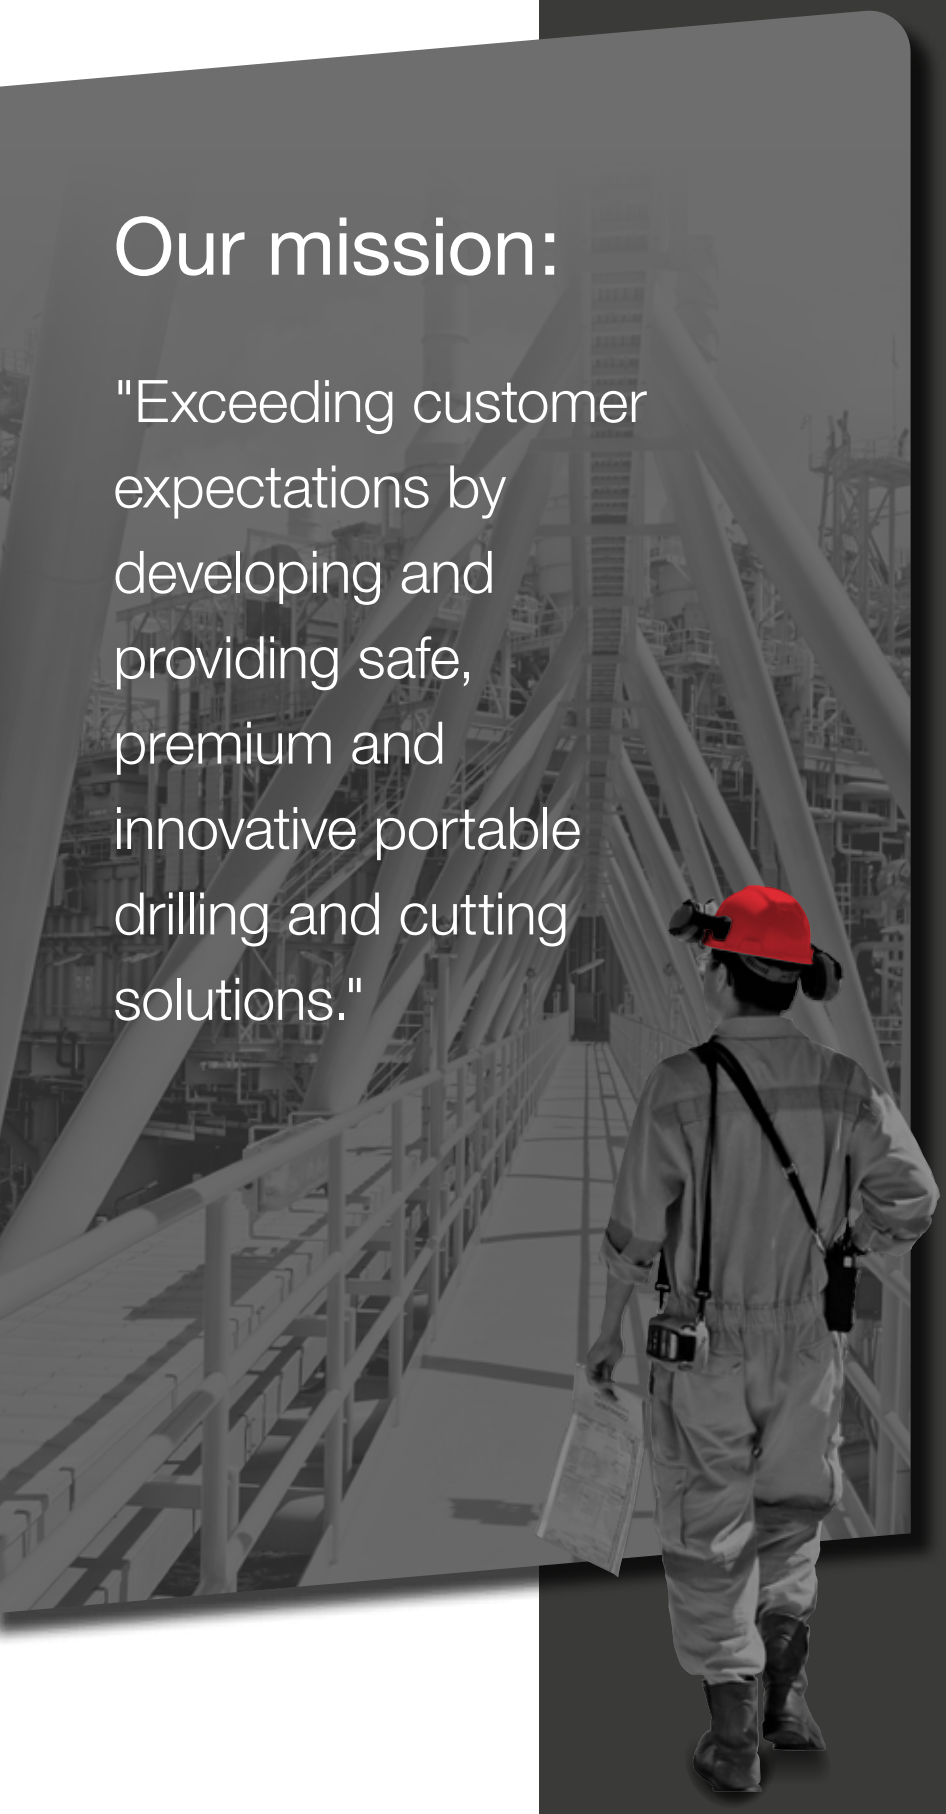
Exceeding customer expectations since 1977

EUROBOOR

FOR PROFESSIONALS BY PROFESSIONALS

Our mission:

"Exceeding customer expectations by developing and providing safe, premium and innovative portable drilling and cutting solutions."



EUROBOOR

ISO9001 certified company

Table of contents

Our vision

Ever worked with industrial tools which did not deliver on the promised quality and output? Heavy machines which are inconvenient to use and therefore cost both you and your employees a lot of time and effort?

At Euroboor we believe, ever since our founding in 1977, that it can be done differently. That a professional like you must be able to rely on a professional supplier. Which has led us to become a major player in the industrial world, with our own factory and several offices worldwide. All because we have always listened to our customers and to the demands from the market.

Our customers are the ones who use our tools every day. Therefore they are our key indicators when it comes to the development and production. To which the starting point is clear: good is not good enough! Euroboor always goes one step further.

With our production methods and technical approach, it is our goal to develop lighter, stronger, safer and more reliable tools. In addition, we test our tools thoroughly from the start of the development process all the way up to production.

Our vision is focused on developing innovative portable tools that add value for our customers and facilitate them in their daily work. We never lose sight of safety, sustainability, time & cost savings. Our mission is always clear: exceeding customer's expectations by developing and providing premium and innovative portable drilling and cutting solutions.

Focus

Quality

Efficiency

Safety

From development, to extensive prototype testing to producing premium tools

The production of our magnetic drilling machines takes place in our own and highly organised facility where we are able to produce our tools to the highest standards. Having our own facility also means we are able to adapt, evolve and innovate easily and therefore make new developments and tailor-made products available to you quickly.

To be able to develop and provide premium and innovative portable drilling and cutting solutions which exceed our customer expectations we test each and every concept, sample and component to its limits, and beyond. Our own testing facility allows us to extensively test our self-produced prototypes and expose them to all necessary endurance tests.

Sustainability & Ecological awareness

By continuously updating our production process we are able to shorten production times and minimise usage of raw materials, thus consuming and wasting less material which means we reduce our use of natural resources. The use of virgin, but renewable, raw materials during our advanced manufacturing process helps us to develop lighter, stronger and more reliable and efficient tools. Making their practical use clear: faster and more premium results with reduced operating time. This translates directly into reduced energy use, causing less stress on the environment.

With our drilling and cutting solutions we want to add value for our customer's and facilitate them in their daily work. To do so we have developed a wide range of premium and innovative portable magnetic drilling machines. No matter the size, location or difficulty of your drilling job we have the best solution for you!

* Exclusive power cord and/or handle(s), ** Hand drill dependable

Most of our magnetic drilling machines are available in two editions, so you can choose the edition most suitable for your situation. When you prefer a magnetic drilling machine with innovative electronics that protect both machine and user, our + editions will best suit you.

These + machines benefit from additional features, such as:

- Gyro-Tec safety
- Power surge protection
- Power fluctuation protection
- Automatic shut-off
- Carbon brush wear indicator

Euroboor
magnetic drilling machines

Our magnetic drilling machines are designed and engineered to the highest standards. With our many years of experience we dare to say that we know what you need. We stay in charge of today's and tomorrow's demands by being active in the field and remaining in close contact with the people that actually use our machines.

We develop, design, engineer and produce our magnetic drilling machines in-house.
We only use the best and most trustworthy suppliers or we roll up our sleeves and produce the required parts ourselves. The same applies for all our drills and cutters.

Every stage in the production process is subjected to stringent durability tests, and pre-shipment inspections are equally meticulous. Only thus can we ensure you our core values: Efficiency, Focus, Quality, and Safety.

We pride ourselves on our line-up of magnetic drilling machines ranging from small scale fabrication to special purposes and designed to offer you the best possible options. Regardless of your company size, specialism or tasks at hand, you will find the perfect match at Euroboor.

Safety features explained

Magnet LED-indicator

The control panel on your magnetic drilling machine is designed for maximum ease of use and safety. Here you can find the magnet LED-indicator. There are two options:

The LED-indicator lights up **GREEN**
when the generated magnetic force is sufficient. You can now safely start your drilling job.

The LED-indicator lights up **RED**
when the generated magnetic force is insufficient due to:

- *Surface not being flat*
- *Workpiece not being magnetisable (e.g. aluminium)*
- *Workpiece is coated or painted*
- *Workpiece is not thick enough*

If resolving the above doesn't help, the magnet doesn't function properly. Don't start your drilling job, but have your machine checked and serviced.

Gyro-Tec safety

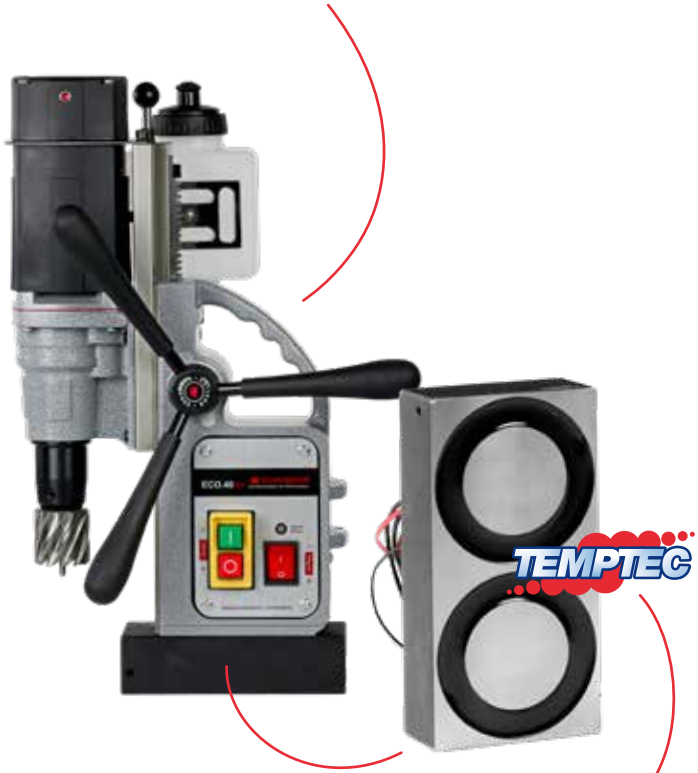
Gyro-Tec safety features a gyroscopic sensor which detects acceleration and displacement in any direction. The **Gyro-Tec** safety feature engages three seconds after the motor is started. Whenever the machine recognises a sudden or unwanted movement the motor will be shut down automatically by the machine's electronics. This safety functionality offers extra protection in various circumstances, such as:

- *Sudden loss of magnetic force while in operation*
- *Excessive vibration caused by incorrect drilling procedure, worn-out cutting tools, etc.*
- *Sudden displacement of the workpiece to which the magnetic drilling machine is attached*

By the motor shutting down automatically, risk of damaging or hurting the machine, tools, workpiece and operator is reduced.

Integrated motor cable

The frame of your magnetic drilling machine is designed for maximum safety and comfort. It is provided with an ergonomic handle and part of the machines in our portfolio have an integrated motor cable. The machines with integrated cable offer increased safety as the cable is completely incorporated in the frame. This prevents the user from getting caught in the cable and the cable from tearing or snapping off. It also prevents a lot of unnecessary repairs and therefore additional costs because the user can no longer lift and carry the machine by the motor cable, which often happens in practice.



2-way magnet

The 2-way magnet saves energy when the machine is not being used. The machine sticks sufficiently at half the magnetic force, this ensures you use less energy. The magnet generates less heat which makes the lifespan of the machine is longer. Only with full magnetic force the machine can be used for drilling.

Power protection

The power protection feature is two-fold; it consists of both power fluctuation protection and power surge protection. Special safety components built into the electronics of the machine make it more reliable in situations where power supply can be of varying quality due to factors:

- Around the workplace, for example caused by switching on high power or unreliable electrical devices, a broken circuit breaker or faulty wiring
- Outside the workplace, for example caused by an instable power grid or lightning

A machine with this feature is able to cope with standard rated voltage and frequency fluctuations ranging from:

- 110 Volt to 130 Volt and 45 Hz to 65 Hz, or
- 220 Volt to 240 Volt and 45 Hz to 65 Hz reducing the probability of breakdown and minimizing down-time and repair cost.

Power fluctuation protection

When the frequency is too high (above 65 Hz) or too low (below 45 Hz), the motor will not start. If the frequency of the power supply falls outside the range during your drilling job, the motor will shut off automatically. The machine will work again normally when the normal frequency has been restored.*

Power surge protection

Beyond the rated voltage, a machine with this feature is able to cope with voltage spikes up to 4,000 Volt (1-2µs)*, which could be caused by nearby welding activities. Depending on the height of the spike, it may be necessary to replace built-in fuses, the control unit or the power switch, but other valuable parts like the motor and magnet will be protected.

Overload protection

To ensure safe use and longer lifetime of the motor the machine profits by overload protection. While you are using the machine there are different types of load levels, which correlate with the feed pressure. Once you go from close to overload to exceeding the overload limit the machine will automatically stop the motor.

Smart Restart

When the motor is in overload, **the Smart Restart** torque control technology ensures trouble-free continuation of your drilling job. When the feed pressure is reduced, the machine's electronics recognise the reduction and the motor continues within a few seconds.

Overheat protection

To prevent damage, machines with this feature are equipped with a sensor which will shut off the motor automatically when the temperature of the field coil exceeds 95° C.

*Disclaimer: Euroboor is not liable for any damage caused to the machine due to electrical problems in the workplace. Above mentioned protection is not guaranteed in all cases of voltage spikes and/or frequency fluctuations. Euroboor accepts no liability when it comes to the power protection not functioning or functioning poorly.

Worn-out carbon brush | Regular carbon brush | Automatic shut-off carbon brush

Carbon brushes

The carbon brushes on the magnetic drilling machine are equipped with two protective features. The purpose of both features is to schedule timely service and avoid additional costs by unexpected downtime or unnecessary part replacement.

Carbon brush wear indicator

On the motor housing you will find an integrated LED light. Under normal circumstances this light is off. The LED light will start burning **RED** when the carbon brushes are worn to a level where it is advised to replace them.

Automatic shut-off

When the carbon brushes are actually worn to a level where replacement is needed, the motor will be shut-off automatically. This prevents the armature from being damaged. Once shut off, the LED-indicator is no longer lit.

ECO.30

Technical data	
Annular cutting	Ø 12 - 30 mm
Twist drilling (Weldon)	Ø 1 - 13 mm
Countersinking	Ø 10 - 35 mm
Length	275 mm
Width	190 mm
Height	293 - 383 mm
Stroke	90 mm
Weight*	8.5 kg
Magnet (l x w x h)	160 x 80 x 37 mm
Magnetic force	1,200 kg
Motor power	900 W
Total power	950 W
Speed (no load)	I 775 rpm
Speed (load 900 W)	I 400 rpm
Spindle (Weldon)	19.05 mm (3/4")
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

*Exclusive power cord and handles

Benefits

- Lightest Ø 30 mm magnetic drilling machine:
  - Most compact in class
  - Incredibly easy to handle
- Direct spindle drive and integrated tool cooling and lubrication
- One-speed gearbox
- Integrated slide for:
  - High accuracy
  - Enlarged lifecycle
  - Minimal vibration
- High-precision height adjustment for:
  - Low maintenance
  - Minimal wear correction
- Strong dual coil CNC machined magnet
- Reversible handles: to enable you to change the operation side of the feed handles in confined spaces
- Also available with permanent TUBE magnet for both pipe and flat material (page. 44)

Technical data

Annular cutting	Ø 12 - 40 mm
Twist drilling	Ø 1 - 13 mm
Countersinking	Ø 10 - 45 mm
Length	320 mm
Width	210 mm
Height	395 - 540 mm
Stroke	150 mm
Weight*	11.5 kg
Magnet (l x w x h)	160 x 80 x 42 mm
Magnetic force	1,500 kg
Motor power	1,050 W
Total power	1,100 W
Speed (no load)	I 720 rpm
	II 1,300 rpm
Speed (load 1,050 W)	I 315 rpm
	II 560 rpm
Spindle (Weldon)	19.05 mm (3/4")
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

*Exclusive power cord and handles

Shown extras not included.

Benefits

- Particularly suitable for both annular cutting and twist drilling
- Detachable spindle drive and integrated tool cooling and lubrication
- Two-speed gearbox
- Integrated slide for:
  - High accuracy
  - Enlarged lifecycle
  - Minimal vibration
- High-precision height adjustment for:
  - Low maintenance
  - Minimal wear correction
- Strong dual coil CNC machined magnet

ECO.40S

Technical data

Annular cutting	Ø 12 - 40 mm
Twist drilling	Ø 1 - 16 mm
Countersinking	Ø 10 - 45 mm
Length	264 mm
Width	180 mm
Height	360 - 440 mm
Stroke	145 mm
Weight*	10.5 kg
Magnet (l x w x h)	160 x 80 x 42 mm
Magnetic force	1,500 kg
Motor power	1,150 W
Total power	1,200 W
Speed (no load)	I 600 rpm
Speed (load 1,150 W)	I 380 rpm
Spindle (Weldon)	19.05 mm (3/4")
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

*Exclusive power cord and handles

Benefits

- Lightest Ø 40 mm magnetic drilling machine
- Fits cutters up to 110 mm DoC
- High-efficiency motor with less heat generation
- High-accuracy capstan hub
- Direct spindle drive and integrated tool cooling and lubrication
- One-speed oil lubricated gearbox
- Integrated slide for:
  - High accuracy
  - Enlarged lifecycle
  - Minimal vibration
- High-precision height adjustment for:
  - Low maintenance
  - Minimal wear correction
- Strong dual coil CNC machined magnet
- Reversible handles: to enable you to change the operation side of the feed handles in confined spaces

Lightest Ø 40 mm magnetic drilling machine in the market

Features

Oil lubricated gearbox

Magnet LED-indicator (SensorTec)

Optimised motor efficiency and lifetime of key components due to oil lubricated gearbox

Drilling as efficiently as you possibly can!

Euroboor's magnetic drilling machines that truly match your level of professionalism. There is no doubt your needs for fully assisted and fastest drilling with the highest accuracy are being met by our ECO.55S/T, ECO.55S+/T and ECO.55S+/TA

Top features

LED load indicators and digital display with Smart Restart technology

Easily accessible carbon brushes
When replacement is needed the motor will be shut-off automatically

Oil lubricated gearbox
Maximum lubrication

Integrated slide and gearbox system
- High accuracy
- Sturdy design enlarges lifecycle
- Minimal vibration

Automatic drill functionality with automatic return on the ECO.55S+/TA
(Only for annular cutting)

Z-profile guide rails
Maximum contact surface

Clear and easy controls
With RPM dial and right/left rotation functionality

LED load indicators

1. Machine is on. No load.

2. Start drilling. Ideal working load.

3. When drilling. Acceptable overload.

4. Close to overload. Reduce pressure.

* Smart Restart

When the motor is in overload, the Smart Restart torque control technology ( ) ensures trouble-free continuation of your drilling job. When the feed pressure is reduced, the machine's electronics recognises the reduction and the motor continues. This benefits your drilling process, safes time and prevents excessive tool wear and failure.

A flashing red light with beeping sound means the overload limit is exceeded. The motor halts.*

	III 140 - 400 rpm
	IV 220 - 620 rpm
Speed (load 1,900 W)	I 85 rpm
	II 152 rpm
	III 270 rpm
	IV 480 rpm
Spindle (Weldon)	MT3 19.05 mm (3/4")
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

*Exclusive power cord and handles

Benefits

- Particularly suitable for tapping
- Four-speed gearbox
- Morse Taper 3 spindle with integrated tool cooling and lubrication
- Strong dual coil CNC machined magnet

Features

RPM **Adjustable speed**

Nm **Torque control**

R/L rotation

Overheat protection

Magnet LED-indicator (SensorTec)

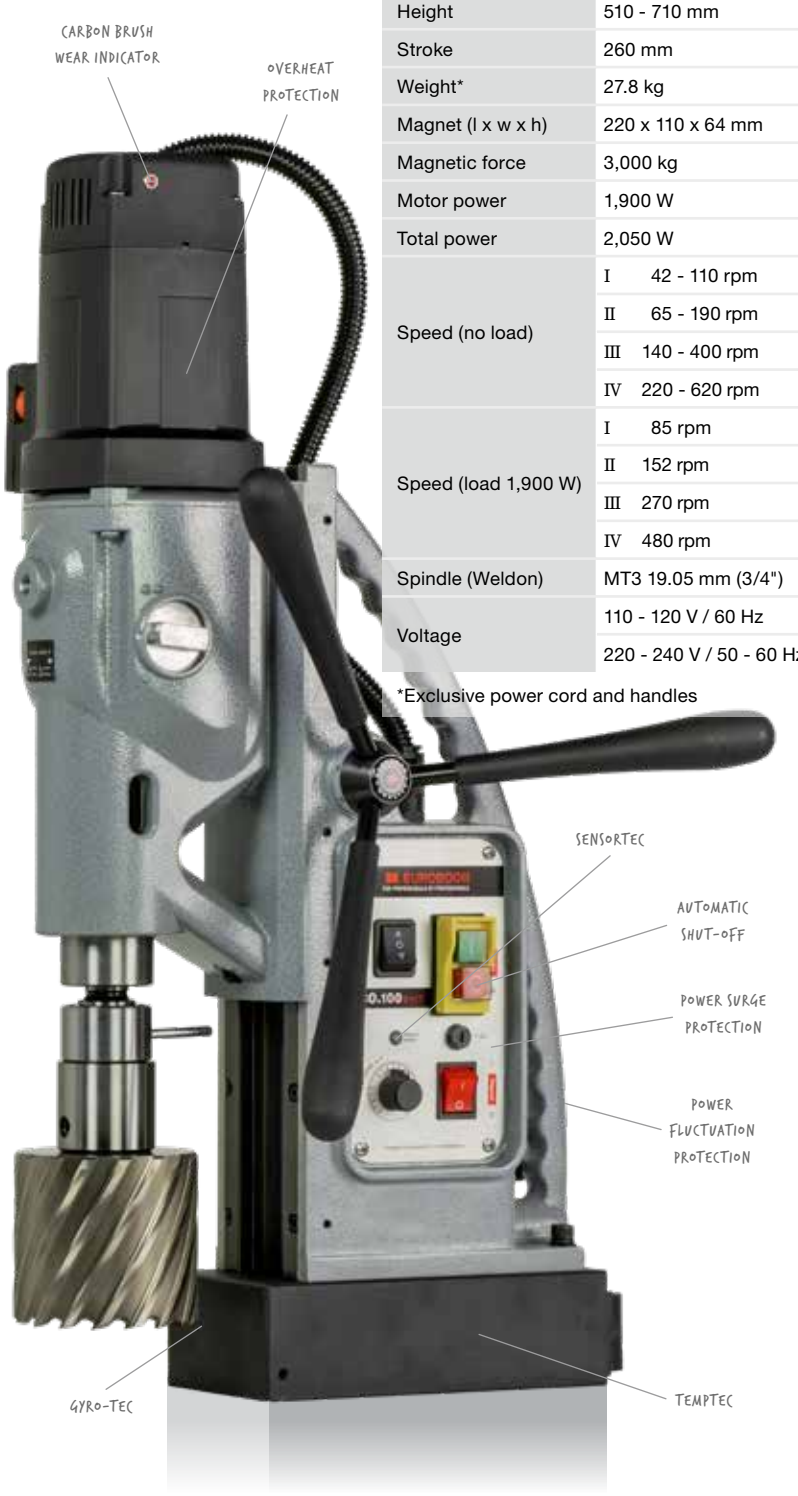
Tapping

ECO.100S+/T

Technical data

Annular cutting	Ø 12 - 100 mm
Twist drilling	Ø 1 - 31.75 mm
Countersinking	Ø 10 - 105 mm
Tapping	M3 - M30
Length	365 mm
Width	310 mm
Height	510 - 710 mm
Stroke	260 mm
Weight*	27.8 kg
Magnet (l x w x h)	220 x 110 x 64 mm
Magnetic force	3,000 kg
Motor power	1,900 W
Total power	2,050 W
Speed (no load)	I 42 - 110 rpm
	II 65 - 190 rpm
	III 140 - 400 rpm
	IV 220 - 620 rpm
Speed (load 1,900 W)	I 85 rpm
	II 152 rpm
	III 270 rpm
	IV 480 rpm
Spindle (Weldon)	MT3 19.05 mm (3/4")
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

*Exclusive power cord and handles



Benefits

- Particularly suitable for tapping
- Four-speed oil lubricated gearbox
- Morse Taper 3 spindle with integrated tool cooling and lubrication
- Strong dual coil CNC machined 2-way magnet, causing the machine to use less energy, generate less heat and therefore lasts longer
- Reduced risk of damaging machine, tools and workpiece and hurting operator
- Suitable for use in areas and workplaces where power supply is of less quality
- Reduced risk of armature damage
- Reduced risk of control unit(s) damage
- Timely service notification to avoid additional cost by unexpected downtime or unnecessary part replacement

Features

- Adjustable speed
- Torque control
- R/L rotation
- Overheat protection
- Power surge protection
- Power fluctuation protection
- Gyro-Tec
- Automatic shut-off
- Oil lubricated gearbox
- Carbon brush wear indicator
- 2-way magnet (TempTec)
- Magnet LED-indicator (SensorTec)
- Tapping

Optimised motor efficiency and lifetime of key components due to oil lubricated gearbox

Spindle (Weldon)	MT4 31.75 mm (1 1/4")
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

Benefits

- Two-speed gearbox
- Integrated tool cooling and lubrication tank and fluid level indication
- Integrated safety strap and lifting shackle
- High-precision tubular rail balancer system
- Progressive feed assist
- Morse Taper 4 spindle
- Strong triple coil CNC machined magnet

F16

Technical data

Twist drilling	Ø 1 - 16 mm*
Length	310 mm
Width	170 mm
Height	325 - 495 mm
Stroke	170 mm
Weight**	7.5 kg
Magnet (l x w x h)	160 x 80 x 36 mm
Magnetic force	1,200 kg
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

*Hand drill dependable
**Exclusive power cord and handles

Mounted hand drilling machine not included.

Benefits

- Perfect solution for high-precision small diameter drilling tasks
- 43 mm Euro collar connection (33 mm and 38 mm filler rings included)
- Safe and easy rear mounted socket
- High-accuracy capstan hub
- High-precision height adjustment for:
  - Low maintenance
  - Minimal wear correction
- Strong dual coil CNC machined magnet
- Reversible handles: to enable you to change the operation side of the feed handles in confined spaces

Suitable for your favorite hand drilling machine

Features

Magnet LED-indicator (SensorTec)

Unique design, unique usage

Drilling high-precision holes in steel tubes and pipes has always been a hassle. Until now! "Position and use" is what you expect of a portable power tool. Forget about the time consuming process of clamping all kinds of pipe adapters to your work piece.

Meet our TUBE-serie, an innovative generation drilling machines specifically designed for drilling on curved material. By joining forces with Magswitch, technology leader in switchable magnetic technology, we have been able to develop a concept that instantly addresses, and drastically improves work efficiency in the pipe industry. Not only will these help you save time. Its strong, powerful and sturdy design will also actively enable you to drill holes as fast as possible.

The magnets can be adjusted for the best position on round and flat surfaces. No extra accessories needed

Safe

Magnets do not require electrical power.

Light

The machines are extremely light.
TUBE.30 - 10.3 kg
TUBE.30S+ - 11 kg
TUBE.55S/T - 17.6 kg
TUBE.55S+/T - 17.6 kg
TUBE.55/AIR - 16.7 kg

Strong

Maintains strong grip on thin steel. Minimal thickness of 3 mm.

Easy to use

Automatically conform to any pipe Ø 76.2 mm or larger in diameter.

Efficient

One tool for flat or round surfaces without the need for expensive adapters – save time and money.

TUBE.30

Technical data	
Annular cutting	Ø 12 - 30 mm
Twist drilling (Weldon)	Ø 1 - 13 mm
Countersinking	Ø 10 - 35 mm
Length	275 mm

TUBE.55/AIR

Technical data

Annular cutting	Ø 12 - 52 mm (HSS) Ø 12 - 55 mm (TCT)
Twist drilling	Ø 1 - 23 mm
Countersinking	Ø 10 - 55 mm
Length	345 mm
Width	245 mm
Height	630 - 730 mm
Stroke	167 mm
Weight*	16.7 kg
Magnet (l x w x h)	275 x 190 x 80 mm
Magnetic force	1,300 kg
Min. material thickness	3 mm
Min. pipe diameter	80 mm
Speed (no load)	380 rpm
Spindle (Weldon)	MT3 19.05 mm (3/4")
Power source	Air, min. 6.3 bar, max. 8 bar, consumption 1.1 m³/min

*Exclusive handles

Benefits

- Air-powered motor system
- The magnets can be adjusted for the best position on round and flat surfaces
- Powerful, spark-free, explosion-safe motor
- Large 167 mm stroke
- Automatic, integrated lubrication and cooling system
- Anti-static construction
- Also available with permanent base magnet (page. 53)

Magnet benefits

- Permanent, non-electric magnet system
- No loss of magnetic grip in case of electric power cuts or fluctuations
- Flexible dual magnet array which automatically adjust to the geometry of the workpiece
- Powerful hold, even on thinner steel thicknesses

Features

Air motor: min 6.3 bar (90 PSI)

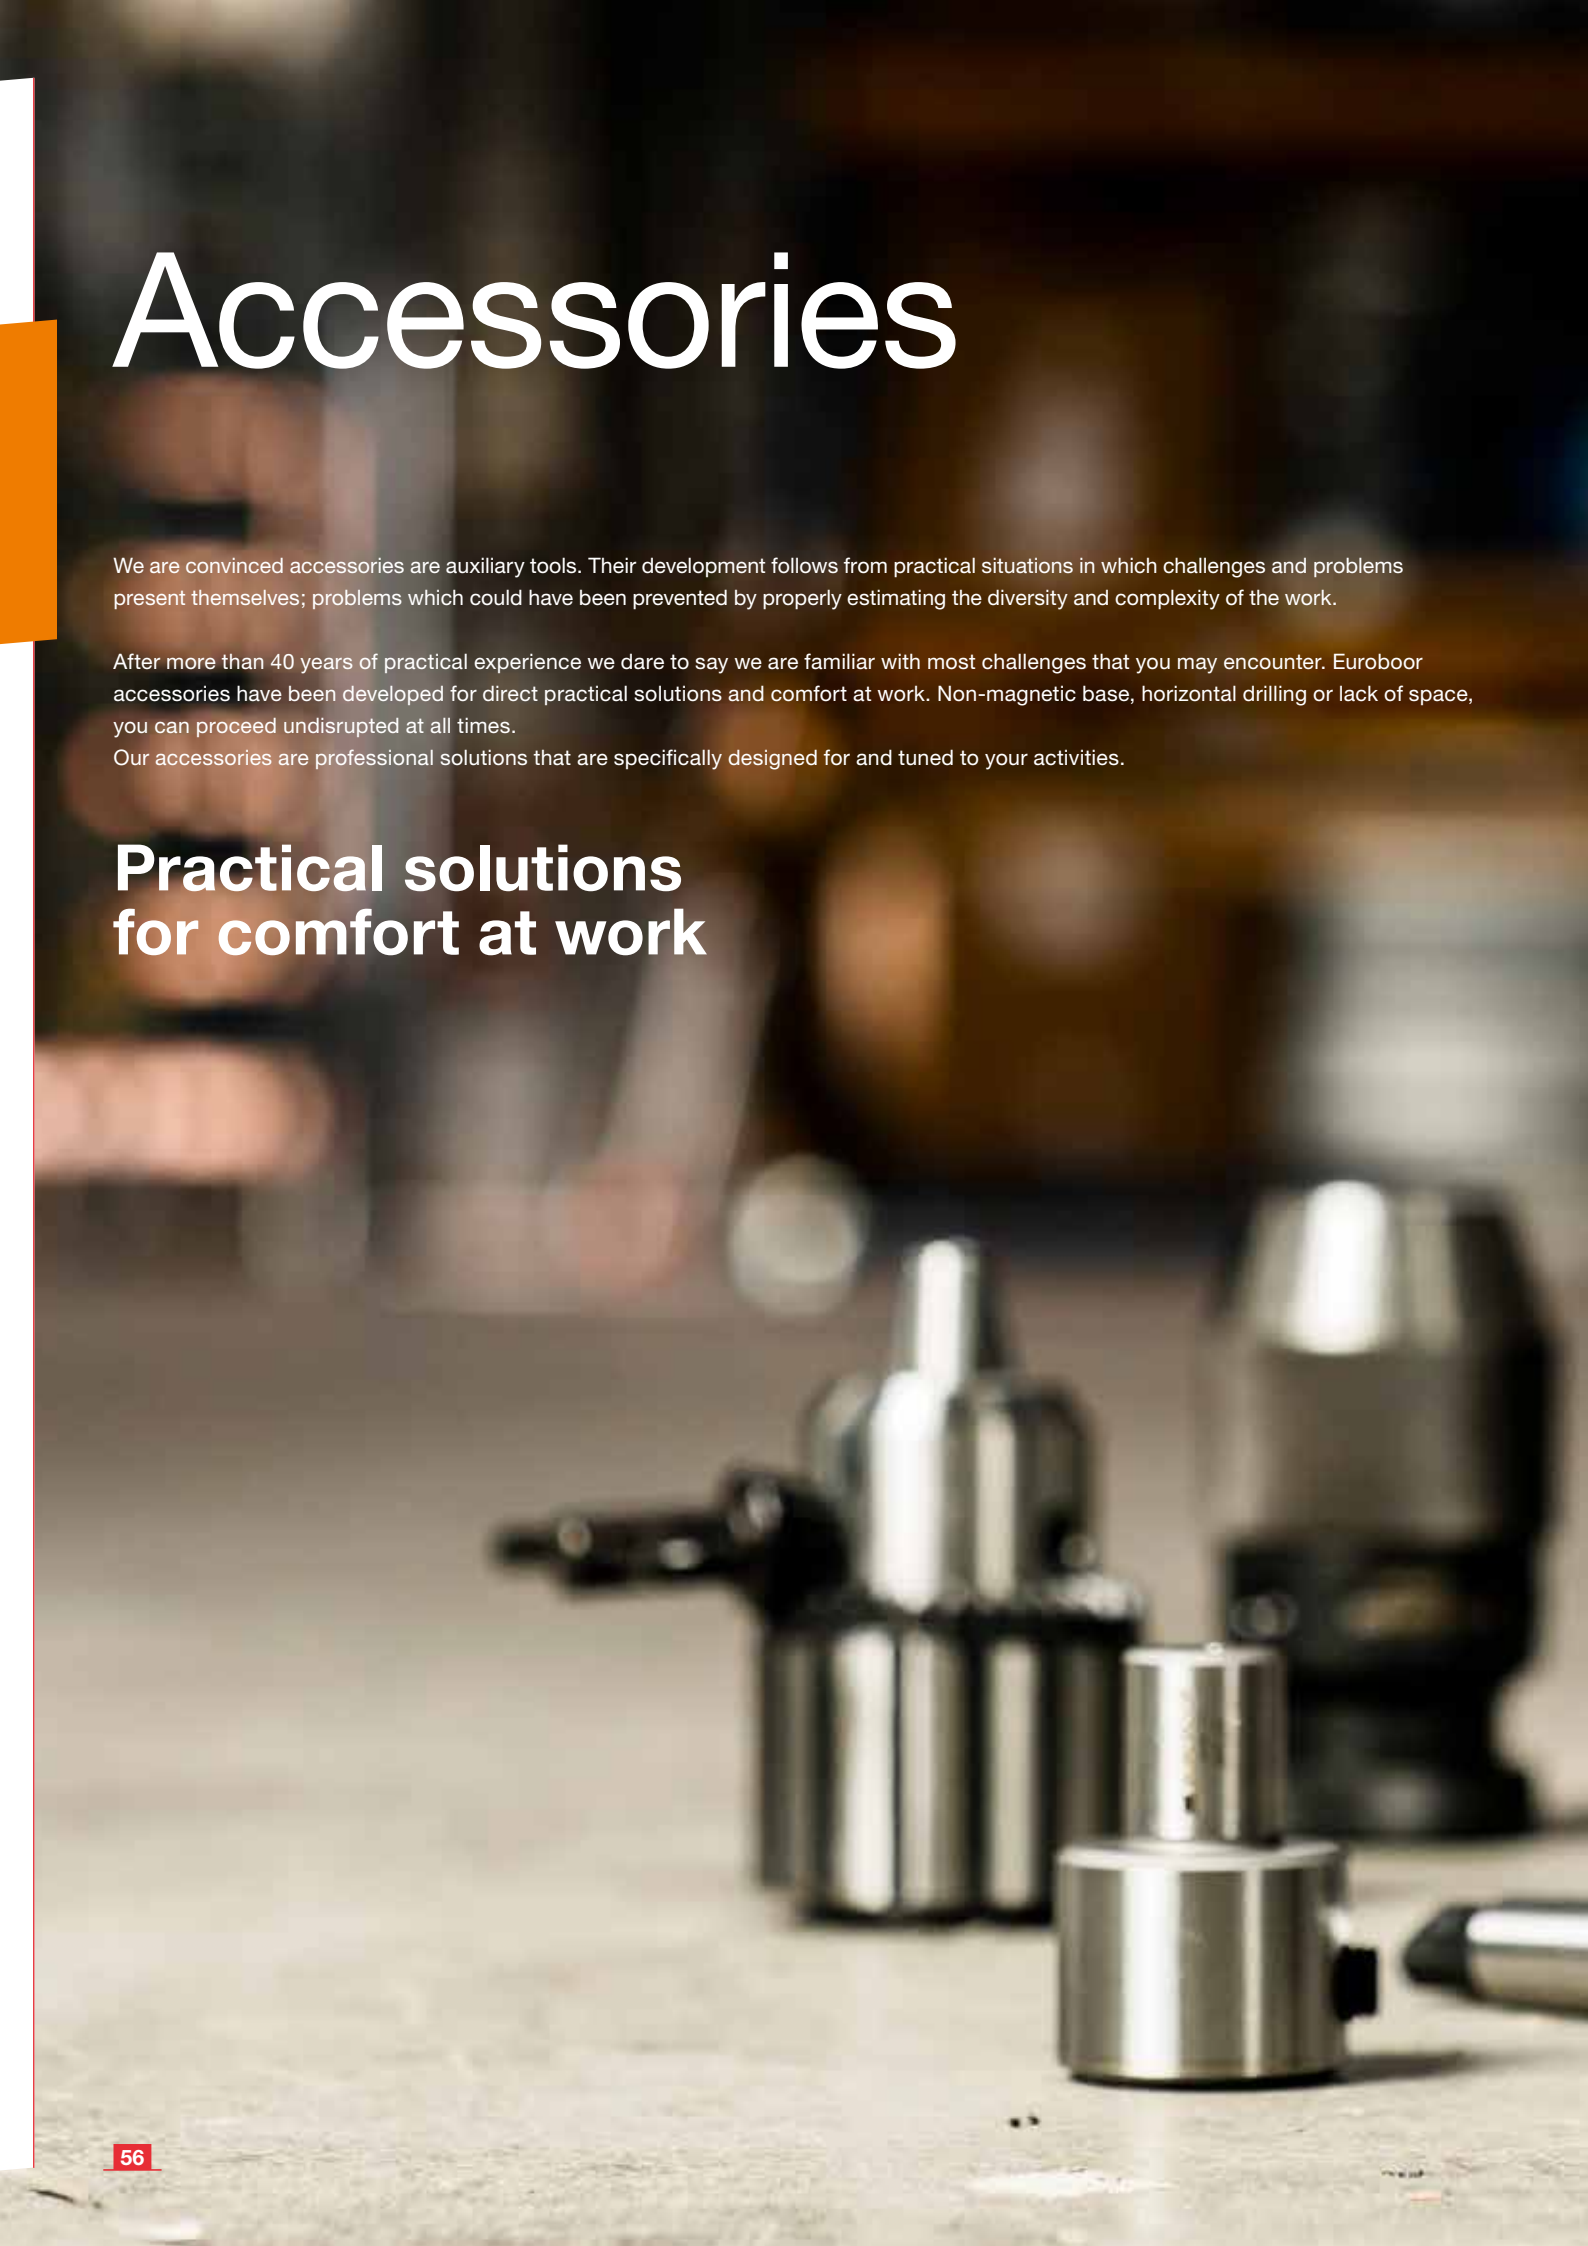
Accessories

We are convinced accessories are auxiliary tools. Their development follows from practical situations in which challenges and problems present themselves; problems which could have been prevented by properly estimating the diversity and complexity of the work.

After more than 40 years of practical experience we dare to say we are familiar with most challenges that you may encounter. Euroboor accessories have been developed for direct practical solutions and comfort at work. Non-magnetic base, horizontal drilling or lack of space, you can proceed undisrupted at all times.
Our accessories are professional solutions that are specifically designed for and tuned to your activities.

Practical solutions for comfort at work



“Our vision is focused on developing accessories that add value and facilitate you in your daily work”.

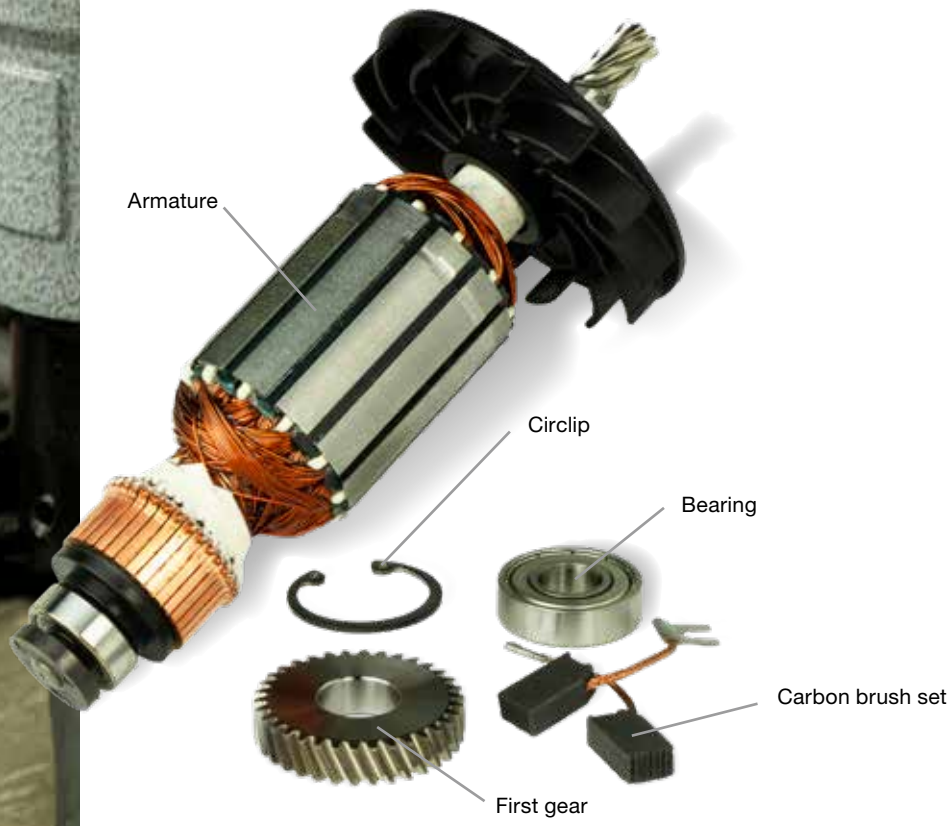
EUROBOOR
Armature kit
EUROBOOR
FOR PROFESSIONALS BY PROFESSIONALS
Armature kit
Original Euroboor Parts

Armature kit

The armature kit consists of original parts for the maintenance of your magnetic core drill. We therefore recommend that you only use this official Euroboor kit to maintain your machine warranty. There is a suitable armature kit for all Euroboor magnetic core drilling machines.



Total package

The use of all spare parts from this total package ensures that the lifespan of your magnetic drilling machine can be extended by factor four to five. In addition, hidden maintenance costs are kept to a bare minimum and you maintain your machine warranty. After maintenance with the armature kit, the magnetic drilling machine operates as new again.

The armature kit with original Euroboor spare parts consists of:

- Armature
- Bearing(s)*
- Circlip
- First gear
- Carbon brush set

ARM.KIT

* Depending on machine the number and type of bearings may vary.

Adapters

Pipe Adapter kit

- Suitable for tube diameter from Ø 35 mm up to 550 mm
- Suitable for all Euroboor magnetic drilling machines (except ECO.200 & TUBE serie)
- Suitable for almost all drilling machines in the market (for universal use)

Dimensions PAK.250
Lenght: 286 mm
Width: 268 mm
Height: 96 mm

Dimensions inside plate

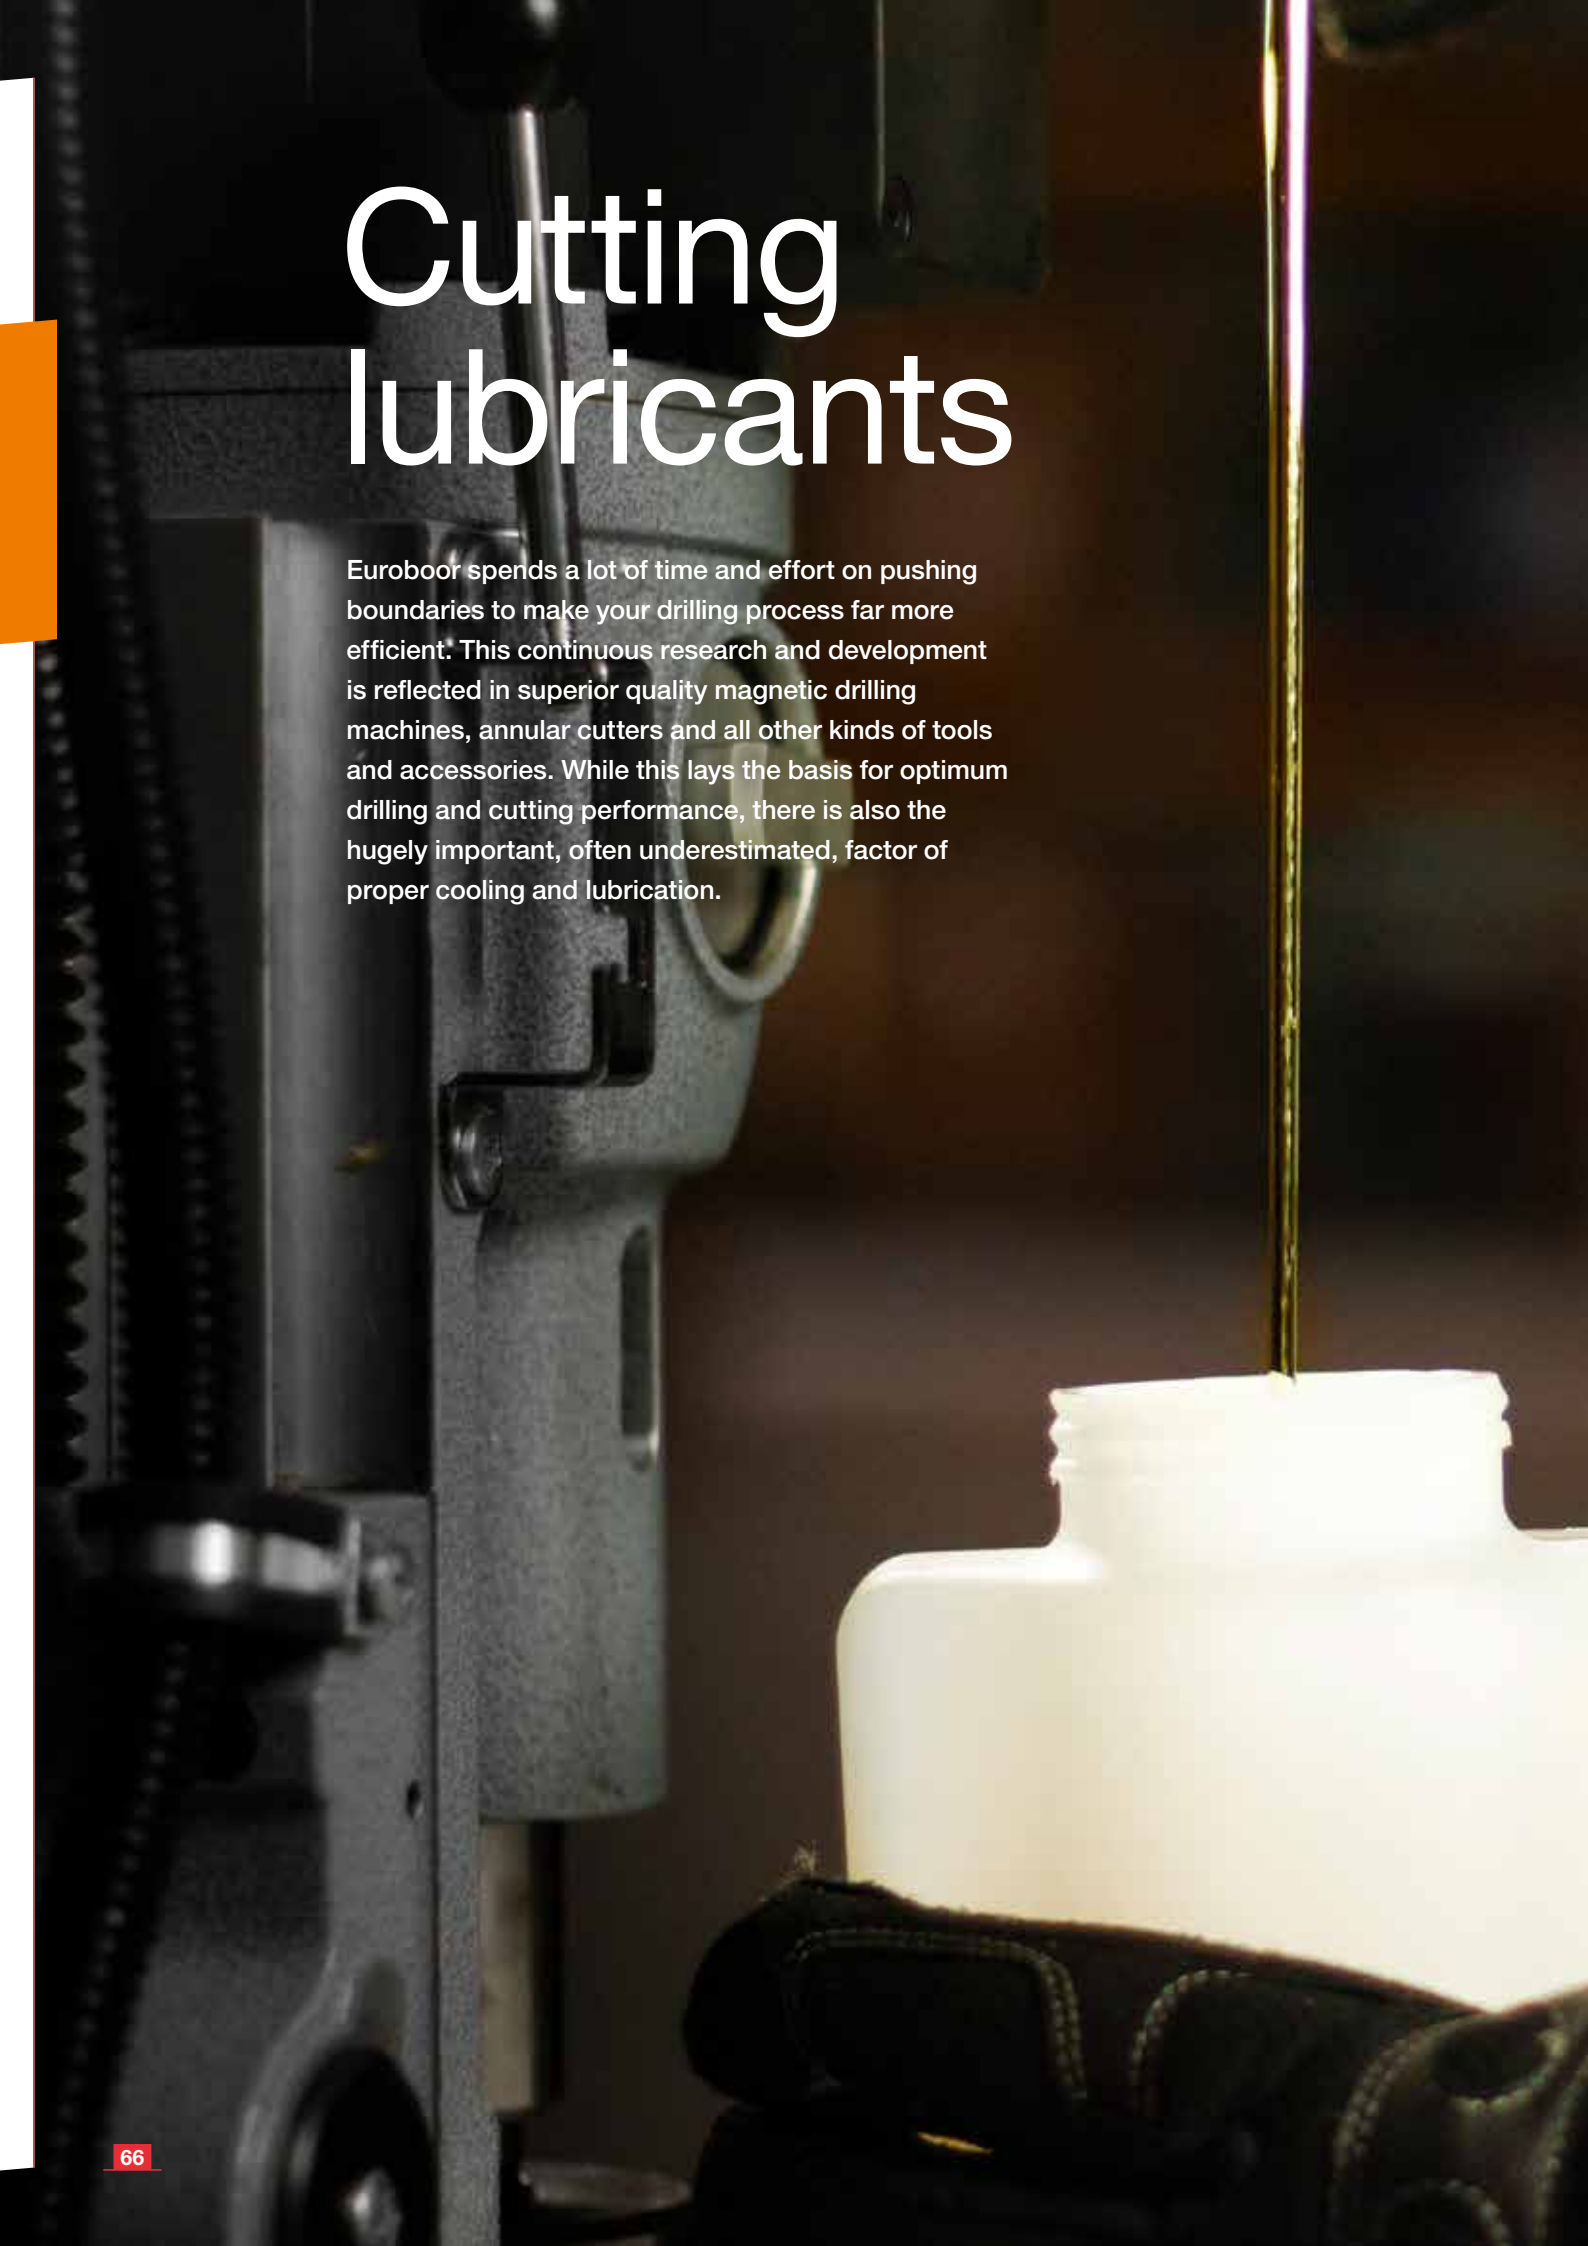
The IBQ.13 and IBQ.16 Quick connect drill chucks are keyless, three-jaw, self-centering chucks that hold drill bits in place during drilling tasks. They can be used with magnetic drilling machines together with Euroboor accessories like IBK.14, IBK.15 and 1/2" x 20 UNF Morse Taper.

Cutting lubricants

Euroboor spends a lot of time and effort on pushing boundaries to make your drilling process far more efficient. This continuous research and development is reflected in superior quality magnetic drilling machines, annular cutters and all other kinds of tools and accessories. While this lays the basis for optimum drilling and cutting performance, there is also the hugely important, often underestimated, factor of proper cooling and lubrication.



However sharp, stable or fast a cutting tool may be, working with metal is a demanding job which generates friction and heat, impacting end result, processing time and durability.

Lubrication
A suitable lubricant will reduce friction greatly. The tool will set itself much better and will generate less vibrations. A smoother operation means less power needs to be put into the job, the finished result will be more precise and operation time can be reduced by up to 30%.

Cooling
Processing metals can, as generally known, produce a lot of heat. Overheating can have serious negative effects on the behaviour of the workpiece and tool, and thus the overall performance. The result is generally an increased processing time, but not being able to complete the job might even be possible as well. Inappropriate cooling can lead to specific issues, such as unreliable slug ejection when working with annular cutters.

Protection
For example, think about the discolouration of your metal workpiece or about the sizing accuracy of drilled holes after cooling down. When pushing your cutting tools fast and hard, burning them up might even be possible quicker than you would have imagined. With the use of appropriate lubrication and cooling you are able to actively protect the workpiece and used tools.

Durability
Making sure a cutting tool is able to perform smoothly and constantly by proper cooling and lubrication will increase its functional life significantly. Taking annular cutting as an example, both the drilling machine and cutter will benefit from the drastically reduced stress. Depending on circumstances, an annular cutter can last up to 5 times longer when properly taken care of during operation!

Our offering
Euroboor offers a wide range of well-considered cooling and lubrication products to match your requirements. If you are processing high-tensile strength stainless steel or need to cut a plain aluminium bar, create large-bore holes or prepare a fine-coarse thread, whether working on a drilling line or in difficult spots on location, we can help you out with just the right lubricant.

The use of appropriate cutting lubricant adds value to your business operation

- Higher quality workpiece finishing
- Minimised tool wear and replacement
- Reduced processing time & lower operation cost

* Inconnell, Nimonic, HARDOX and Hastelloy

Cutting oils, sprays, paste and gearbox oil

General usage

IBO.10

Mild steel lubricating and cooling cutting oil

General cutting oil offering premium cooling and lubrication for most common mild steel projects. High-cutting power tool preservation and improved processing times.

IBO.1001 (1 litre)

IBO.1050 (5 liters)

MV.4

All metals lubricating and cooling concentrate

User and environmentally friendly water-soluble cooling and lubricating concentrate. Particularly suitable for automatic dosing systems, offering efficient cooling on the majority of metal workpieces. No harmful mist formation and economical in use (can be diluted up to 1:20 ratio).

MV.4001 (1 litre)

MV.4050 (5 liters)

Specialised usage

IBO.20

Inox, chromium and nickel lubricating and cooling cutting oil

Heavy duty cutting oil with extremely efficient lubricating and cooling properties, solely for use on hard (plated) materials such as stainless steel, chromium and nickel. Drill up to two times faster, while minimising the chance of burnt tool bits and discoloured workpieces.

IBO.2001 (1 litre)

IBO.2050 (5 liters)

IBO.50

Non-ferrous metals cutting oil

Mild paraffin-based mineral oil with excellent lubricating possibilities for softer, non-ferrous, metals such as aluminium, copper and zinc. Highly effective in preventing discoloration and deformation of the workpiece and enhancing drilling performance.

IBO.5001 (1 litre)

IBO.5050 (5 liters)

IBO.60

Tapping and threading oil

Universal non-staining cutting oil, specifically for tapping and threading. Offers consistent lubrication and enhances the precision of your operation. The unique properties actively help chip clearance and keep your tools sharp.

IBO.6001 (1 litre)

IBO.6050 (5 liters)

Gearbox oil

IBO.G1
Offered as official Euroboor spare part, IBO.G1 is the recommended oil for Euroboor magnetic drilling machines with oil lubricated gearboxes. This is the only gear lubricant which is able to meet our high-requirements for operating temperature, minimal wear and high-machine efficiency.

For use with:
ECO.30S+, ECO.40S, ECO.40S+, ECO.50S, ECO.50S+, ECO.55S/T, ECO.55S+/T, ECO.55S+/TA, ECO.60S, ECO.60S+, ECO.80S+, ECO.100S+/T, ECO.100S+/TD, TUBE.30S+ and TUBE.55S/T, TUBE.55S+/T.

IBO.G101 (1 litre)

IBO-P.911
Mild steel lubricating and cooling cutting oil spray
Premium metal processing cooling and lubrication in spray can form, suitable for use on mild steel.
Highly versatile in use and ideal for tool preparation.

IBO-P.911.500 (500 ml)

IBO.30
All metals lubricating and cooling cutting oil spray
Versatile spray with high-cooling and evaporation properties.
Ideal for the (after) cooling of all workpieces and tools. The minimal harmful contents and minimal greasy residue facilitate further proceedings with the workpiece.

IBO.30 (500 ml)

IBP.70
High-alloy steel cutting paste
A cutting compound for metal, with strong adhesive strength on materials and tools, for vertical and upside down applications where liquid metal working oils can't be used. Based on mineral oil with carefully selected extreme pressure additives with excellent lubricating properties for low tool wear and excellent surface quality. Suitable for drilling, milling, tapping, threading and punching of high-alloy steel grades.

IBP.70 (1 liters)

Multifunctional oil spray

Operational use:
- Rust removing
- Lubricating
- Contact improving
- Cleaning
- Corrosion protective
- Moisture repellent

IBO.40
Universal problem solving and preventing spray, suitable for the maintenance of tools and other moving parts. Also suitable as protector of electronics. Does not contain silicones, water or graphite.

IBO.40 (400 ml)

Euroboor
Annular cutters

Annular cutters

- Longer lifespan
- Exact dimensions
- Unique teeth geometry
- Optimum chip clearance
- Superior slug ejection

High-precision shanks, various connections

Weldon
19.05 mm (3/4")

Nitto/Weldon
19.05 mm (3/4")

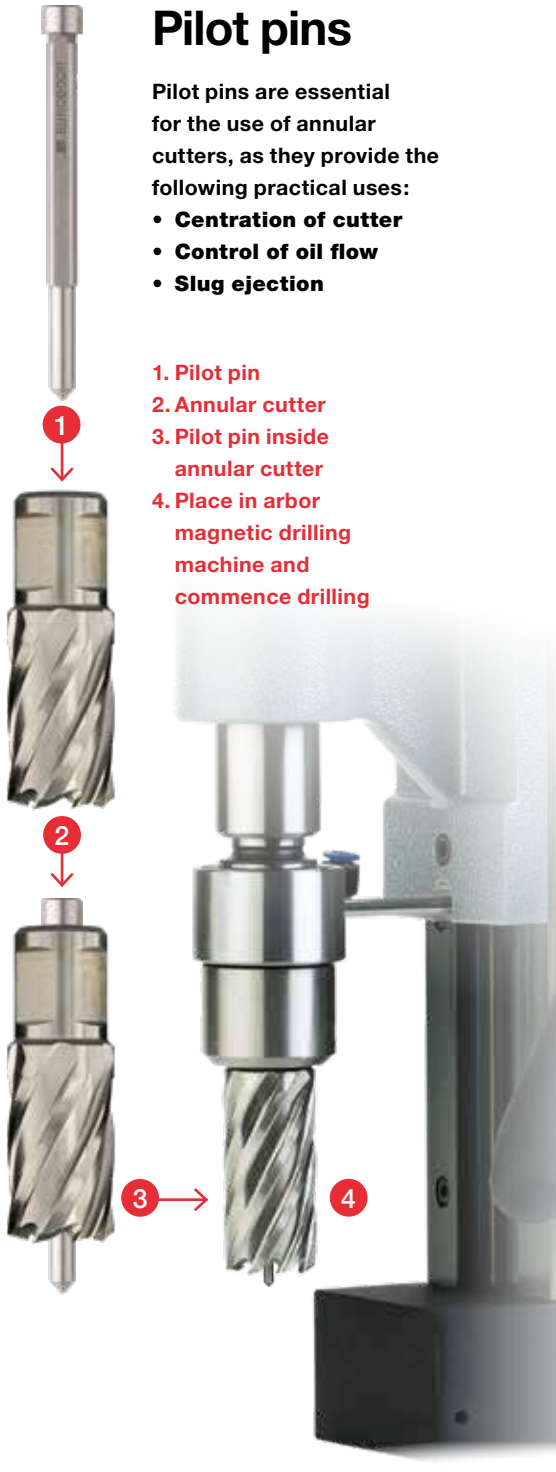
Weldon
31.75 mm (1 1/4")

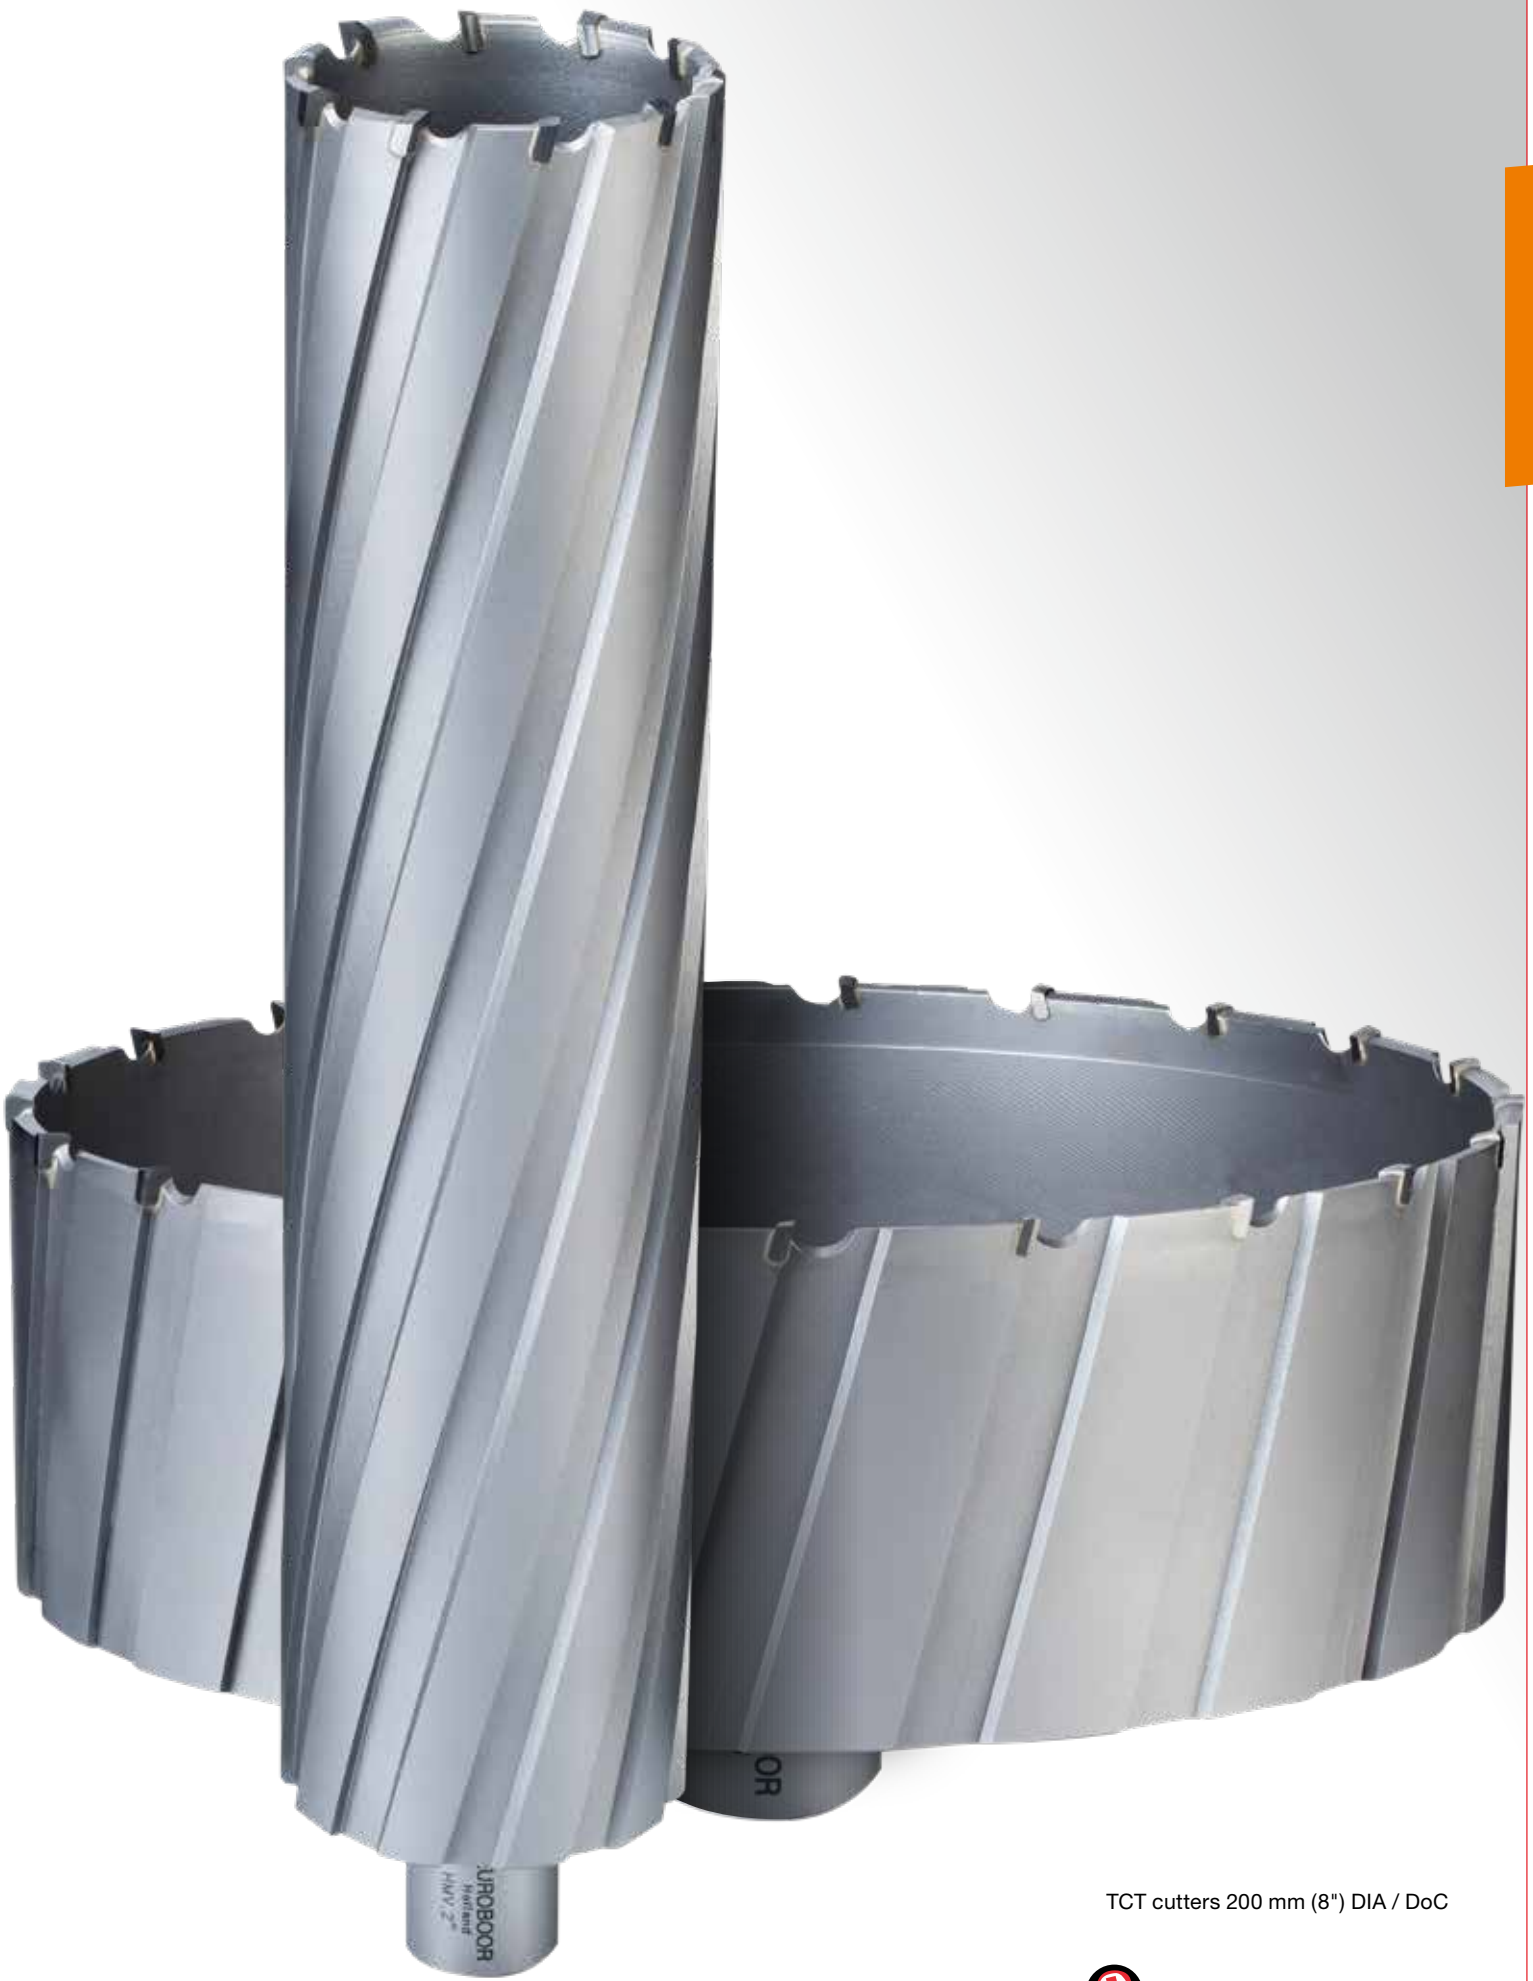
Pilot pins

Pilot pins are essential for the use of annular cutters, as they provide the following practical uses:

- **Centration of cutter**
- **Control of oil flow**
- **Slug ejection**

1. Pilot pin
2. Annular cutter
3. Pilot pin inside annular cutter
4. Place in arbor magnetic drilling machine and commence drilling





TCT cutters 200 mm (8") DIA / DoC

Euroboor annular cutter portfolio

Geometry

Altering cutting teeth angles for precise and clear cuts

On our HSS and TCT cutters every tooth does its own job, working together to cut cleaner and quicker. They actually save time!

TCT cutters have three different teeth

HSS cutters have two different teeth

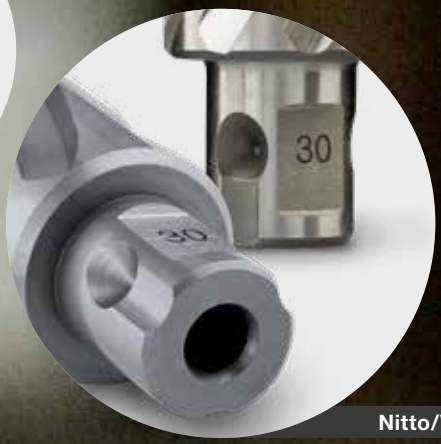
Did you know?

- With the **right lubrication** tool life is drastically improved;
- Drilling with cutters is best with **internal cooling**;
- A **perfect fitting pilot pin** prevents cutter breakage;
- **TCT cutters need a higher speed** than HSS cutters;
- Euroboor HSS cutters have an extra landing on the outside and cut more accurate with **less friction**;
- Euroboor cutters have a grounded inside **which offers expansion room to slug**;
- Metric & imperial **specific sizes** and **shank variations** can be supplied on request.

Weldon shank

Shank

Euroboor annular cutters are standard equipped with **high-precision Weldon shanks**. Depending on the cutter size and specification; 19.05 mm (3/4") or 31.75 mm (1 1/4"). Additionally we also offer cutters with double shank design. These annular cutters have an increased practical application, as they are suitable for use on machinery requiring Weldon fitment as well as machinery with Nitto fitment.



Nitto/Weldon shank

The No. 1 choice in HSS, HSS-Cobalt and TCT

We offer a well-considered range of annular cutters, designed to exceed your requirements. Many years of our hands-on experience are reflected in the unique features of our cutters. We do not compromise on quality and for that reason our cutters are appreciated worldwide for optimum performance, durability and longer functional life in all industries. From small scale fabrication to the oil and shipping industry, and from large scale fabrication to construction, and beyond.

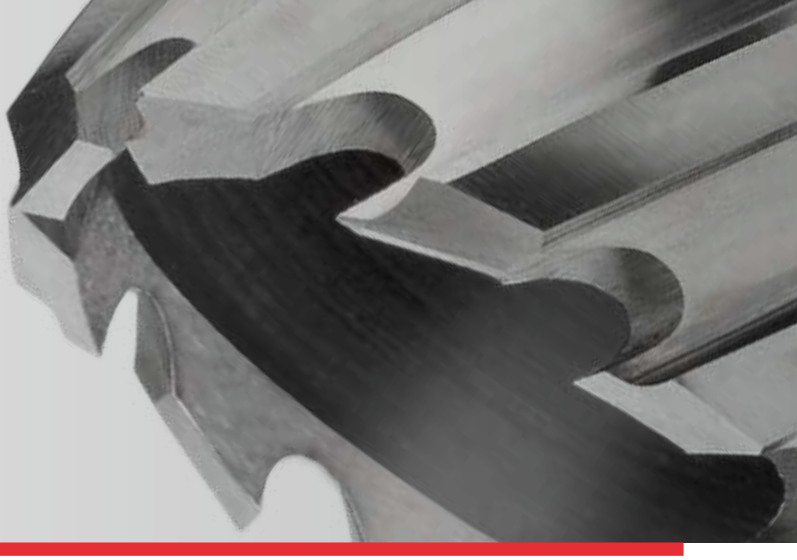
Annular cutter

High Speed Steel



HSS annular cutters, with unique teeth geometry, provide clear cutting, fast feed rate, less vibration, smooth hole surface and long tool life. They are better and quicker than twist drills. HSS annular cutters can be used on all kinds of magnetic drilling machines. They can be widely used in drilling steel, copper, aluminium, stainless steel and plastic, in either plate or pipe form. The HSS annular cutters have gained huge popularity in the market. The entire range is available in various specifications that can be customised as per your requirements.

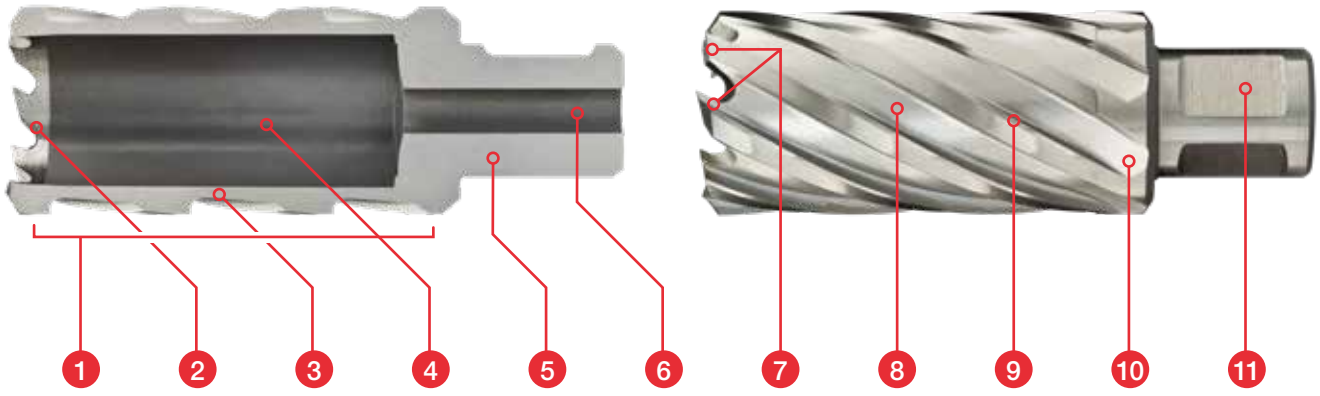
HSS profile



1. Stage hardening. Combines maximum hardness at the teeth with superior strength at the cutter body, reducing breakage to a minimum.
2. Inner ground cutting teeth. Helps stable "setting" of the cutter, reduces friction during drilling and helps slug ejection.
3. Wall thickness matched to the diameter of the cutter, combining the best possible cutting time with strength.
4. Tapered inside fitment prevents the cutter getting stuck. Guaranteed slug ejection with usage of the correct pilot pin.
5. Precise shank fitment for maximum interchangeability and close tolerance drilling without run-out.
6. Precise pilot pin fitment for perfect centration, hassle-free pin retraction and controlled lubricant flow.
7. Altering "continuous pre-cut" teeth geometry. Generates faster and more stable drilling performance and results in clear cuts of the highest precision and smooth, burr-free finishes.
8. Well-thought-out spiral flute angles for optimal chip removal.
9. Specially designed blades for optimum stability and heat-reduction.
10. Number of flutes and teeth matched to the diameter of the cutter for the best tooth load and superior cutting speeds.
11. Precision ground shanks for optimum fitment of the cutter itself in the tool holder and of pilot pin in the annular cutter. Increases safety, stability and accurate hole dimensions.

Annular cutter

High Speed Steel Stack

Standard HSS Euroboor annular cutters feature teeth geometry which is optimised for use on single layer workpieces, ensuring the fastest and best drilling performance. The rest material created with the use of these cutters is our signature: the Euroboor slug. The rim on this slug is exactly what prevents our standard HSS cutters from penetrating the second layer of material.
In order to drill multiple layers of material simultaneously, we recommend the use of our annular cutters with stack geometry.

The unique teeth profile ensures safe and stable penetration: layer for layer.

Combined with the standard performance improving characteristics of Euroboor annular cutters this results in smooth layer transitions, precise and clean hole finishes and the time savings you are looking for.

HSS stack material application ● Optimal ○ Good ◯ Possible

Plastics GRP/CRP	Brass, Copper, Tin	Grey cast iron	Steel					Stainless steel		Aluminium		Exotic materials, Inconnell, Nimonic, HARDOX, Hastelloy	Rails

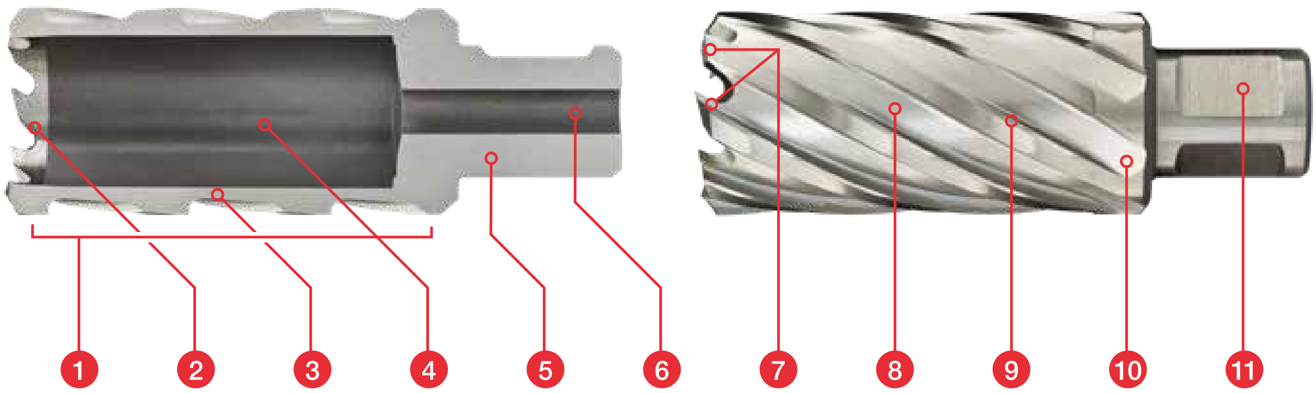
●	○		●	●	○					○			

HSS profile



1. Stage hardening. Combines maximum hardness at the teeth with superior strength at the cutter body, reducing breakage to a minimum.
2. Extra deep inner ground cutting teeth. Helps stable “setting” of the cutter, reduces friction during drilling and helps (multiple) slug ejection.
3. Wall thickness matched to the diameter of the cutter, combining the best possible cutting time with strength.
4. Tapered inside fitment prevents the cutter getting stuck. Guaranteed slug(s) ejection with usage of the correct pilot pin.
5. Precise shank fitment for maximum interchangeability and close tolerance drilling without run-out.
6. Precise pilot pin fitment for perfect centration, hassle-free pin retraction and controlled lubricant flow.
7. Stack teeth geometry ensures stable and precise material penetration with fast cutting performance
8. Well-thought-out spiral flute angles for optimal chip removal.
9. Specially designed blades for optimum stability and heat-reduction.
10. Number of flutes and teeth matched to the diameter of the cutter for the best tooth load and superior cutting speeds.
11. Precision ground shanks for optimum fitment of the cutter itself in the tool holder and of pilot pin in the annular cutter. Increases safety, stability and accurate hole dimensions.

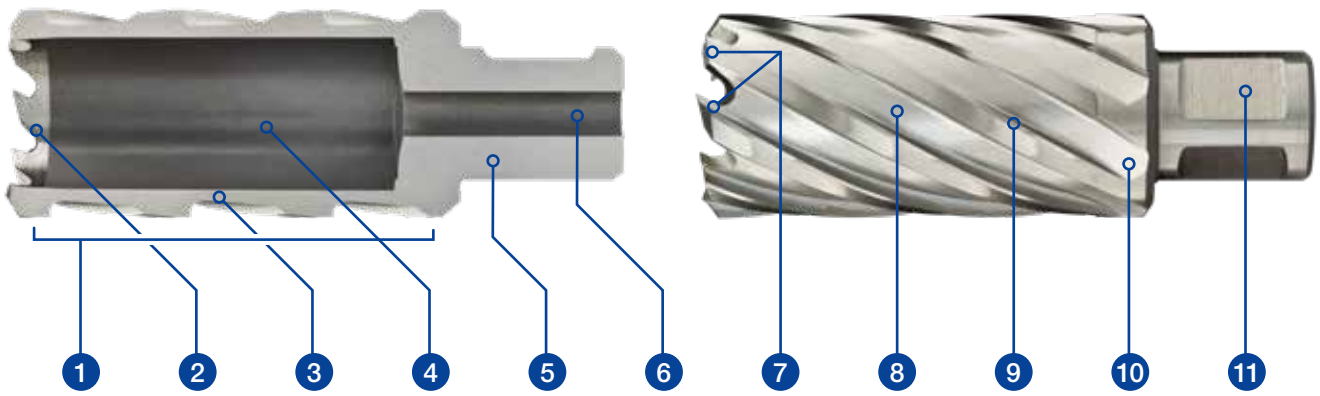
High Speed Steel Cobalt

Euroboor HSS-Cobalt annular cutters are made of Molybdenum-Chromium-Vanadium-Tungsten alloy High Speed Steel with an additional 8% Cobalt (M42). The HSS-Cobalt annular cutter is specifically designed to remain cool when cutting holes. All flutes are fully ground, resulting in super-fast feed rates and smooth holes in hard materials, providing better chip clearance and higher cutting performances. The M42 HSS-Cobalt annular cutter is widely used in the metalworking industry for its superior red hardness compared to more conventional high speed steels. This will lead to shorter cycle times in production environments due to higher cutting speeds.

HSS-Cobalt material application ● Optimal ◎ Good ○ Possible

Plastics GRP/CRP	Brass, Copper, Tin	Grey cast iron	Steel					Stainless steel		Aluminium		Exotic materials, Inconnell, Nimonic, HARDOX, Hastelloy	Rails
			< 500N	< 750N	< 900N	< 1,100N	< 1,400N	< 900N	≤ 900N	< 10% Si	≤ 10% Si		
●	●	◎	●	●	●	◎	○	◎	○	●	◎	○	

HSS-Cobalt profile



1. Stage hardening. Combines maximum hardness at the teeth with superior strength at the cutter body, reducing breakage to a minimum.
2. Inner ground cutting teeth. Helps stable "setting" of the cutter, reduces friction during and drilling and helps slug ejection.
3. Wall thickness matched to the diameter of the cutter, combining the best possible cutting time with strength.
4. Tapered inside fitment prevents the cutter getting stuck. Guaranteed slug ejection with usage of the correct pilot pin.
5. Precise shank fitment for maximum interchangeability and close tolerance drilling without run-out.
6. Precise pilot pin fitment for perfect centration, hassle-free pin retraction and controlled lubricant flow.
7. Altering "continuous pre-cut" teeth geometry. Generates faster and more stable drilling performance and results in clear cuts of the highest precision and smooth, burr-free finishes.
8. Well-thought-out spiral flute angles for optimal chip removal.
9. Specially designed blades for optimum stability and heat-reduction.
10. Number of flutes and teeth matched to the diameter of the cutter for the best tooth load and superior cutting speeds.
11. Precision ground shanks for optimum fitment of the cutter itself in the tool holder and of pilot pin in the annular cutter. Increases safety, stability and accurate hole dimensions.

Annular cutter

Tungsten Carbide Tipped

Euroboor TCT (**SANDVIK**) annular cutters are equipped with a spiral flute which creates optimum chip removal and makes seizure virtually impossible. These annular cutters are used for example in hardened materials such as HARDOX steel, stainless steels and high tensile strength steel such as railway tracks. Because of the above composition, and when used in a proper way, these cutters are less susceptible to breakage than standard High Speed Steel cutters, especially in larger diameters and lengths.

TCT material application ● Optimal ○ Good ○ Possible

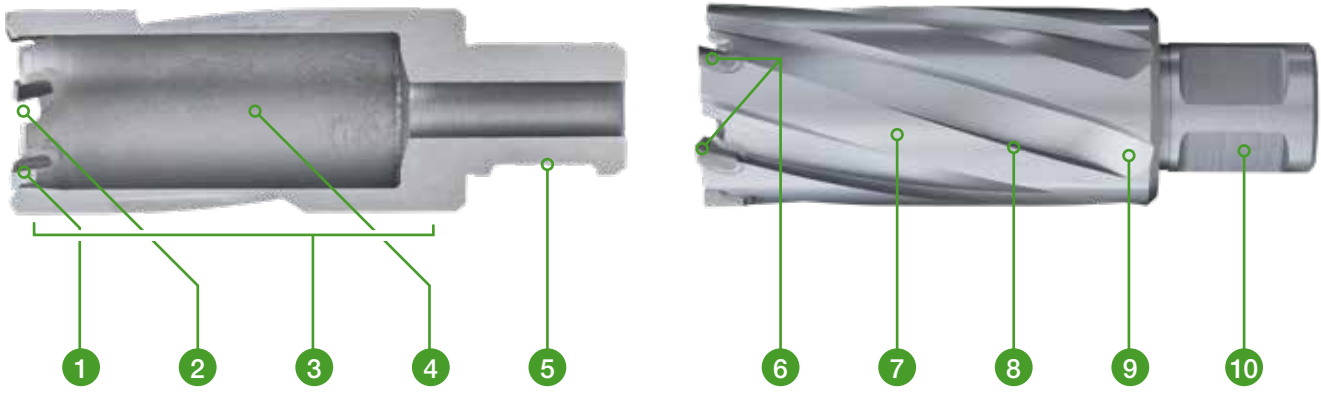
TCT profile



1. Extremely hard and durable tungsten carbide cutting teeth (**SANDVIK**) for the hardest of drilling tasks. Offset positioning for the lowest possible heat development.
2. Optimised cutting angles for shortest drilling times and clearest cuts.
3. Special alloy body for optimum strength and durability.
4. Tapered inside fitment prevents the cutter getting stuck. Guaranteed slug ejection with usage of the correct pilot pin.
5. Precise shank fitment for maximum interchangeability and close tolerance drilling without run-out.
6. Altering "continuous pre-cut" teeth geometry. Generates faster and more stable drilling performance and results in clear cuts of the highest precision and smooth, burr-free finishes. **SANDVIK** carbide tipped.
7. Well-thought-out spiral flute angles for optimal chip removal.
8. Specially designed blades for optimum stability and heat-reduction.
9. Number of flutes and teeth matched to the diameter of the cutter for the best tooth load and superior cutting speeds.
10. Precision ground shanks for optimum fitment of the cutter itself in the tool holder and of pilot pin in the annular cutter. Increases safety, stability and accurate hole dimensions.

Annular cutter

Tungsten Carbide Tipped Rail

Euroboor TCT Rail cutters are specifically designed to pierce through the toughest rail grades with the greatest of ease. The super micro-grain (**SANDVIK**) tungsten carbide tips contain optimised cutting angles and ensure vigorous and smooth cutting performance. The cutter body is specially engineered to provide maximum stability and support to cope with the extremely high-torques generated in the cutting process. The design of the specific flutes has been based on keeping a horizontal drilling position and the type of chips from high-tensile strength steel in mind, resulting in optimal chip removal.

TCT Rail material application ● Optimal ○ Good ○ Possible

ERM.100/3 Resharpening machine

Technical data	
Dimensions (l x w x h)	480 x 270 x 300 mm
Weight	28 kg
Motor power	250 W
Noise emission	< 70 dBa
Grinding disk	Ø 125 mm
Wheel bore	Ø 25 mm
Shaft bore	19.05 mm Weldon
Speed (no load)	2,800 rpm
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

Benefits

- Resharpens HSS cutters from Ø 12 – 44 mm in cutting depths of 25 – 55 mm
- Easy angle adjustment; simple alignment to original geometry
- Laser guided cutter alignment ensures correct positioning of cutting edge to the wheel
- Motor positioning
- Including CBN* grinding wheel

* CBN = Cubic Borid Nitride

Cutter position at the cutter sharpening blade

Accessory ERM.100/3

Standard supply

CBN* Grinding wheel (Resharping) For HSS

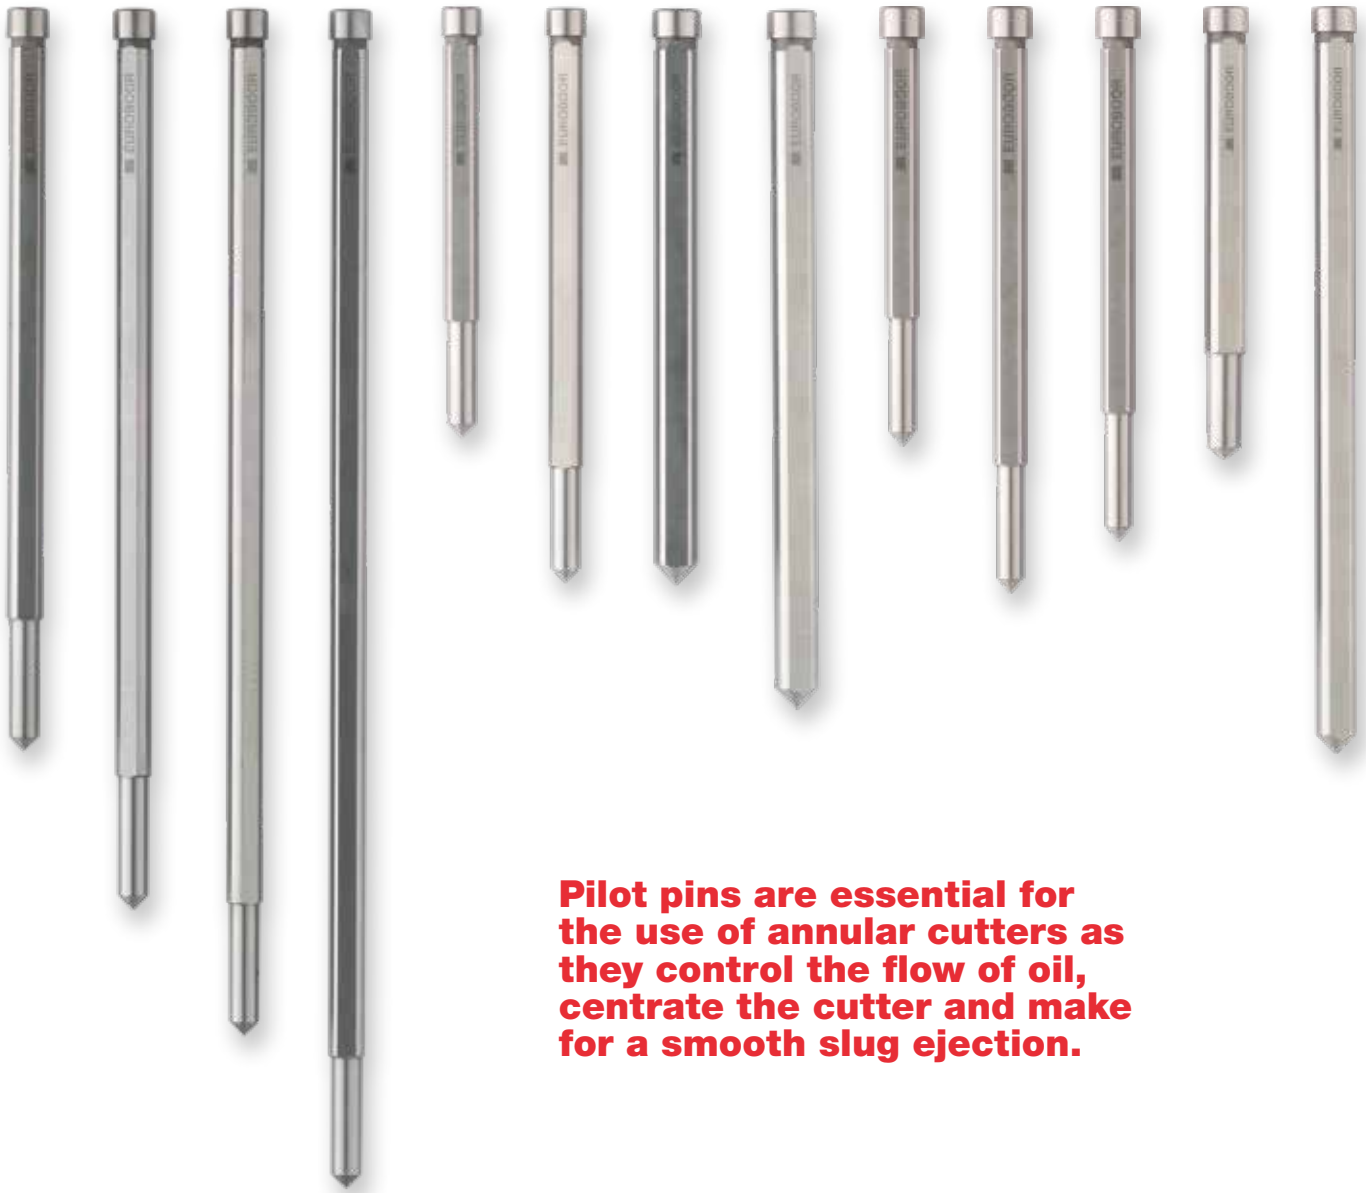
Pilot pins



Pilot pins are essential for the use of annular cutters as they control the flow of oil, centrate the cutter and make for a smooth slug ejection.

Pilot pins are essential for the use of annular cutters, as they provide the following practical uses:

- **Centration of cutter**
- **Control of oil flow**
- **Slug ejection**

As plain as a pilot pin may look, all of these uses require high-precision and extremely low tolerances – just to make sure the centre is exactly the centre, oil flow starts and stops when you need it to, and the slug does not get stuck inside the cutter.

We offer a wide range of pilot pins that match the lengths, diameters and characteristics of our various annular cutters with exactly the required precision to enhance your drilling job in the best way possible.

Overview

Code	Length pin	Diameter pin
IBC.70	77 mm (3")	6.35 mm (1/4")
IBC.70/2	77 mm (3")	6.35 mm (1/4")
IBC.75	90 mm (3 9/16")	6.35 mm (1/4")
IBC.80	103 mm (4 1/16")	8 mm (5/16")
IBC.85	90 mm (3 9/16")	8 mm (5/16")
IBC.90	102 mm (4")	6.35 mm (1/4")
IBC.100	122 mm (4 13/16")	8 mm (5/16")
IBC.110	159 mm (6 1/4")	6.35 mm (1/4")
IBC.120	120 mm (4 3/4")	6.35 mm (1/4")
IBC.130	165 mm (6 1/2")	8 mm (5/16")
IBC.140	150 mm (5 15/16")	8 mm (5/16")
IBC.150	252 mm (9 15/16")	8 mm (5/16")
IBC.160	201 mm (7 15/16")	8 mm (5/16")

Code	Length pin	Diameter pin
IBC.K25[1]	127 mm (5")	6.35 mm (1/4")
IBC.K50[1]	155 mm (6 1/8")	6.35 mm (1/4")
IBC.K75[1]	177 mm (7")	6.35 mm (1/4")
IBC.K100[1]	204 mm (8")	6.35 mm (1/4")
IBC.2P-130[2]	130 mm (5 1/8")	8 mm (5/16")
IBC.2P-144[2]	145 mm (5 11/16")	8 mm (5/16")
IBC.157[2]	159 mm (6 1/4")	8 mm (5/16")
IBC.2P-168[2]	170 mm (6 11/16")	8 mm (5/16")
IBC.2P-205[2]	206 mm (8 1/16")	8 mm (5/16")
IBC.2P-256[2]	258 mm (10 3/16")	8 mm (5/16")

For our IBC.70 and IBC.90 pilot pins we also offer sets:

3 x IBC.70
IBC.70-SET

3 x IBC.90
IBC.90-SET

[1] Extended pilot pin
Specifically for use with long cutters and drilling in very thick workpieces. Makes it possible to continue drilling without mid-process replacement. Suitable for use with longer cutters as from 75 mm (3").

IBC.157

[2] two-piece pilot pin

Place pilot pin through the shank, and attach extension through the bottom inside of the cutter.

Start drilling. Stop at approx. 50 mm depth.

Remove the extension.

Commence drilling until slug ejection.

Pilot pin features

Precise positioning

- Whilst having a perfect fit the Euroboor pilot pin is your guidance to centre the cutter.

Material

Oil flow regulation

- In standstill position with the cutter above the workpiece, the pilot pin prevents the oil from flowing.
- When moving down the cutter with the pilot pin onto the workpiece to commence drilling, the pilot pin is pushed up into the arbor and permits the oil to flow into the cutter for direct cooling and lubricating.

Material

Slug ejection

- When the cutter is through the material, the pilot pin pushes the slug out of the workpiece by means of the strong spring inside the arbor.
- Consequently the oil flow is automatically cut off.

Material

After drilling aid

Magnetic stick for cleaning up metal shavings.
Ø 22 x 400 mm

Simply wave the magnetic stick over the metal shavings to pick them up, carry them over to your scrap barrel, pull the plunger and the shavings are neatly deposited. The Euroboor magic stick is strong enough to quickly clean up your biggest mess of metal shavings.

- Clean up sharp-edged metal chips, screws and other metal parts easily
- Items are safely ejected off of magic stick without hand contact
- Ideal for hard-to-reach spaces

MAGICSTICK

Tapping chucks

Morse Taper torque controlled tapping chucks

Specifically designed for use in combination with portable magnetic drilling machines.

Benefits

+ Quick and precise installation of taps
+ Increased operation accuracy
+ Drastically reduced risk of broken taps and destroyed threads

Features

- Slip clutch torque limiter
- Clear torque controller adjustment scale
- Full instruction manual including:
  - Installation and mounting guide
  - Torque setting guide
  - Tapping speed guide
  - m/min (ft/min) to rpm calculation
  - Cutting fluid recommendation
  - Maintenance guide
- Full “all parts” servicing possibility
- Complete delivery including:
  - 2 different rubber centration collets
  - All tools required for installation and adjustment

ETC.2 ETC.3

Torque controlled tapping chuck MT3

- Machine tap sizes M8 up to M20 (DIN 371 and DIN376)

ETC.2

- Machine tap sizes M14 up to M30 (DIN376)

ETC.3

Tapping chuck B16 MT2 - 3

- Quick change M5 - M12
- Including rubber clamps
  - GSW.172121 (Ø 4 - 7 mm)
  - GSW.172122 (Ø 7 - 10 mm)
- Auto reverse

GSW.512R

Tapping chuck B22 MT3 - 4

- Quick change M8 - M20
- Including rubber clamps
  - GSW.172202 (Ø 10.38 - 14 mm)
  - GSW.172203 (Ø 16 mm)
- Auto reverse

Machine taps

Euroboor machine taps are high-precision tools produced according to DIN standard (DIN 371/376) from Cobalt reinforced High Speed Steel (M35 quality).

Green ring
- Blank finish
- For use in materials such as construction steel, aluminium, zinc, lead, copper and brass

White ring
- Black oxide finish for improved durability
- For use in materials such as cast iron and stainless steel

Through holes

Tap and twist drill set

14 piece twist drill and tap set

- HSS-Cobalt (M35 quality)
- DIN 371/376
- Through holes: straight flute
- White ring: black oxide finish for improved durability.
  For use in materials such as cast iron and stainless steel
- Twist drills (TDCO-series) also sold per 5 and 10 pieces and taps also available separately

DTS.312

Twist drills	Taps
Ø 2.5 mm	M3
Ø 3.3 mm	M4
Ø 4.2 mm	M5
Ø 5 mm	M6

Ø 8.5 mm	M10
Ø 10.2 mm	M12

Drill tap combination (sets)

Features

- Drilling & tapping with 1 tool
- Also suitable for hard metals (such as stainless steel)
- Cost saver:
  - No need for drill chuck adapter
  - No need for drill chuck
  - No need for tap holder
- Time saver:
  - No need finding the correct tool
  - No need to interchange tools
  - No need to reposition drilling machine
- Especially suitable for on-the-job tasks with limitations to the amount of tools you can bring along.
- HSS-Cobalt (M35 quality)
- Black oxide coating

Application

- Alloy steels, castings & forgings
- Suitable and directly fitting (19.05 mm Weldon connection) to Euroboor magnetic drilling machines:
  ECO.50-T,
  ECO.50+/T,
  ECO.55S/T,
  ECO.55S+/T,
  ECO.55S+/TA,
  ECO.100/4,
  ECO.100S+/T,
  ECO.100S+/TD,
  TUBE.55S/T
  TUBE.55S+/T

Sets

With the developing of our innovative tools, we focus on adding value and making your daily work easier. Our sets are a good example of this. We offer a wide range of sets for annular cutting, twist drilling, tapping and many more.

25 piece twist drill set

- Sizes Ø 1 - 13 mm, 0.5 mm increments
- HSS TiN coated
- DIN 338
- 118° point
- Compatible with every drill chuck

TDS.190

19 piece twist drill set

- Sizes Ø 1 - 10 mm, 0.5 mm increments
- HSS-Cobalt (M35 quality)
- DIN 338
- 135° split point
- Compatible with every drill chuck
- Drills also sold per 5 and 10 pieces

TDS.100

25 piece twist drill set

- Sizes Ø 1 - 13 mm, 0.5 mm increments
- HSS-Cobalt (M35 quality)
- DIN 338
- 135° split point
- Compatible with every drill chuck
- Drills also sold per 5 and 10 pieces

TDS.200

6 piece Weldon twist drill set

- HSS 19.05 mm (3/4") Weldon shank
- 135° split point
- 30 mm length (DoC)
- Sizes Ø 6 – 11 mm, 1 mm increments

SSPI.KIT

6 piece Weldon twist drill set

- HSS 19.05 mm (3/4") Weldon shank
- 135° split point
- 50 mm length (DoC)
- Sizes Ø 6 – 11 mm, 1 mm increments

SPI.KIT

3-piece step drill set

- Sizes:
  Ø 4 - 12 mm
  Ø 4 - 20 mm
  Ø 6 - 30 mm
- HSS TiN coated
- Spiral flute for efficient chip removal

ESS.430/2

6 piece straight shank countersink set

- Sizes Ø 6.3 - 8.3 - 10.4 - 12.4 - 16.5 - 20.5 mm
- HSS-Cobalt (M35 quality) straight shank
- Compatible with every drill chuck
- 3 cutting edges
- 90°

CBS.620

14 piece twist drill and tap set

- HSS-Cobalt (M35 quality)
- DIN 371/376
- Through holes: straight flute
- White ring: black oxide finish for improved durability. For use in materials such as cast iron and stainless steel
- Twist drills (TDCO-series) also sold per 5 and 10 pieces and taps also available separately

EUROBOOR

B60 Bevelling machine

Technical data

Spindle speed rpm	2,850
Max. bevel width	22 mm (45° angle)
Bevel angle	0° - 60°
Pipe diameter	> 150 mm
Length	415 mm
Width	375 mm
Height	268 mm
Weight	22.3 kg
Motor power	1,100 W
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

Benefits

- Powerful high-efficiency motor
- Smooth control with clear, precise and simple (protected) control buttons
- Suitable for pipe material > Ø 150 mm
- Simple replacement and indexation of the cutting plates
- Wide and soft handles

Features

Adjustment angle 0 - 60°

Bevel width 0 - 22 mm

Accessories B60

Milling head

B60S Bevelling machine

Technical data

Spindle speed rpm	1,675 - 2,850
Max. bevel width	22 mm (45° angle)
Bevel angle	0° - 60°
Pipe diameter	> 150 mm
Length	415 mm
Width	375 mm
Height	268 mm
Weight	24.5 kg
Motor power	1,800 W
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

Benefits

- Powerful high-efficiency motor
- Smooth control with clear, precise and simple (protected) control buttons
- Suitable for pipe material > Ø 150 mm
- Simple replacement and indexation of the cutting plates
- Wide and soft handles
- Exceptional powerful motor (1.800 W)
- Extremely suitable for stainless steel (with the use of stainless steel guide plate)
- Overload protection

Features

B45S Bevelling machine

Technical data

Spindle speed rpm	1,750 - 5,250 rpm
Max. bevel width	6 mm (45° angle)
Min. diameter for inside bevels	20 mm
Spindle thread	M12 x 1.75
Length	458 mm
Width	137 mm
Height	300 mm
Weight	4.4 kg
Motor power	1,250 W
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

Benefits

- Ergonomic main handle, user-friendly controls, spindle speed adjustment range for various materials
- Quick and easy bevel width adjustment
- Clear bevel width indication
- Precision 45° milling head with 3 cutting edges (incl. cutting plates)
- Soft-grip front handle suitable for left- and right-handed users
- Electronic speed stabilization
- Anti-kickback and -breakthrough torque control (slow start)
- Quick and easy carbon brush replacement

EDG.600 Electric die grinder

Technical data

Weight	1.8 kg
Motor power	600 W
Speed (no load)	12,000 - 27,000 rpm
Collet	6 mm
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

Benefits

- Lightweight, small and compact design for use in tight spaces
- Easy to hold and carry
- Ideal for finishing dies, press working, die casting and moulding work

Features

RPM

Adjustable speed

Available as

- Carton box

EDG.600

- Luxury case

EDG.600 CASE

- Luxury case set, including a 10 pieces rotary burrs set.
  Set includes:
  Rotary burrs type B cylinder with end cut (RB.B0606 + RB.B1206)
  Rotary burrs type C cylinder ball nose (RB.C0606 + RB.C1206)
  Rotary burrs type D cylinder ball (RB.D0606 + RB.D1206)
  Rotary burrs type F cylinder ball nose tree (RB.F0606 + RB.F1206)
  Rotary burrs type G cylinder arc pointed tree (RB.G0606 + RB.G1206)

EDG.600 SET

ADG.2(A/S) Air die grinders

Technical data	ADG.2A	ADG.2S
Weight	0.53 kg	0.67 kg
Free speed	20,000 rpm	
Collet	6 mm	
Air inlet (PT)	1/4"	
Air hose (ID)	3/8"	
Avg. air consumption	0.113 m³/min (4 SCFM)	0.142 m³/min (5 SCFM)
Working pressure	6.3 bar (90 psi)	
Length	193 mm	
Height	70 mm	

Benefits

- Excellent for grinding, polishing, deburring and smoothing sharp edges
- Four-speed rear regulator
- 360 degrees adjustable exhaust deflector
- Safety lever trigger

ADG.2A

ADG.2S

Features

Adjustable speed

Air motor: min 6.3 bar (90 PSI)

Available as

- Carton box
- Standard 6 mm (1/4") collet
- Optional 3 mm (1/8") collet

ADG.2A / ADG.2S

- Luxury case
- Standard 6 mm (1/4") and 3 mm (1/8") collet

ADG.2A-CASE / ADG.2S-CASE

- Luxury case set, including a 10 pieces rotary burrs set.

Set includes:

- Standard 6 mm (1/4") and 3 mm (1/8") collet
- Rotary burrs type B cylinder with end cut (RB.B0606 + RB.B1206)
- Rotary burrs type C cylinder ball nose (RB.C0606 + RB.C1206)
- Rotary burrs type D cylinder ball (RB.D0606 + RB.D1206)
- Rotary burrs type F cylinder ball nose tree (RB.F0606 + RB.F1206)
- Rotary burrs type G cylinder arc pointed tree (RB.G0606 + RB.G1206)

ADG.2A-SET / ADG.2S-SET

Rotary burrs

Tungsten Carbide

Euroboor heat treated durable Tungsten Carbide rotary burrs are engineered for rapid stock removal in harder materials. The coarse pitch of the teeth removes material effectively, while the deep secondary cuts allow for smooth operation. It reduces the size of the chips and can be used at slower speeds than usual. The addition of the left hand flutes reduces the pulling action, allowing better operator control.

5 piece rotary burrs set shaft Ø 6 mm

- High-quality Tungsten Carbide (K30).
- Double cut - designed for rapid stock removal.
- Delivered with:
  - RB.A1006 - Cylinder without end cut
  - RB.B1006 - Cylinder with end cut
  - RB.C1206 - Cylinder ball nose
  - RB.F1006 - Cylinder ball nose tree
  - RB.L1206 - Cylinder ball nose cone

RBS.105

10 piece rotary burrs set shaft Ø 6 mm

- High-quality Tungsten Carbide (K30).
- Double cut - designed for rapid stock removal.
- Delivered with:
  - RB.A1006 - Cylinder without end cut
  - RB.C1006 - Cylinder ball nose
  - RB.D1006 - Cylinder ball
  - RB.E1206 - Cylinder oval
  - RB.F1206 - Cylinder ball nose tree
  - RB.G1206 - Cylinder arc pointed tree
  - RB.J1006 - Cylinder 60 degree cone
  - RB.L1206 - Cylinder ball nose cone
  - RB.M1206 - Cylinder cone
  - RB.N1006 - Cylinder inverted cone

RBS.110

EBS.500 Band saw

Technical data

Dimensions (l x w x h)	650 x 310 x 450 mm	
Weight	20 kg	
Motor power	1,010 W	
Cutting speed	adjustable, 30 - 80 m	
Cutting angle	adjustable, 0° - 60°	
Cutting capacity: at 0°	○	125 mm
	□	130 × 125 mm
at 45°	○	76 mm
	□	76 x 76 mm
at 60°	○	50 mm
	□	50 x 50 mm
Saw band	13 x 0.65 x 1,440 mm, 10 - 14 tpi M42 8% Cobalt	
Voltage	110 - 120 V / 60 Hz	
	220 - 240 V / 50 - 60 Hz	

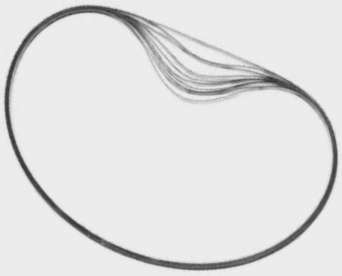
Benefits

- Adjustable vice, cutting angle and sawing speed
- Constant speed due to digital electronic speed regulator
- Wide cutting angle adjustment range
- Double motor protection: amperage and temperature limiter
- Anti-reset safety function
- User-friendly vice with clear indicators
- Adjustable bar stop rod for mass produced cuts
- Chip scraper

Simple speed adjustment with quick guide

Wide cutting angle adjustment range

Accessory EBS.500



EBS.500 uses:
saw band 13 x 0.65 x 1,440 mm, 6 - 10 tpi (set of 5)

Art. nr.: 500.0001

Features

Adjustable speed

Cutting capacity 125 mm

Adjustment angle 0 - 60°

EDC.135 Dry cut-off saw

Technical data		
Dimensions (l x w x h)	610 x 282 x 630 mm	
Weight	23 kg	
Motor power	2,200 W	
Cutting speed (no load)	1,300 rpm	
Cutting angle	adjustable, 0° - 45°	
Bore size	Ø 25.4 mm (1")	
Cutting capacity at 0°	●	130 mm
	■	120 x 120 mm
	▬	95 x 185 mm
Cutting capacity at 45°	●	105 mm
	■	90 x 90 mm
	▬	80 x 110 mm
Max. Ø saw blade	355 mm	
Voltage	110 - 120 V / 60 Hz	
	220 - 240 V / 50 - 60 Hz	

Benefits

- Easily accessible carbon brushes
- Easily accessible saw blade lock nut (spanner included)
- Chip shield
- Easy blade replacement
- Retractable blade guard with pull-down protection

Easy carbon brush replacement

Easy blade replacement

Adjustable vice 0° - 45°

Features

Cutting capacity 130 mm

Adjustment angle 0 - 45°

Accessory EDC.135

EDC.135 uses:
saw blade 355 mm, 80 teeth, bore 25.4 mm

Art. nr.: 130.355/80

EHC.230/4 Circular cut-off saw

Technical data

Dimensions (l x w x h)	420 x 210 x 370 mm
Weight	9.7 kg
Motor power	1,800 W
Cutting speed (no load)	2,300 rpm
Cutting angle, adjustable	0 - 45°
Bore size	Ø 25.4 mm (1")
Max. saw depth 0°	83 mm
Max. saw depth 45°	56.5 mm
Max. Ø Saw blade	230 mm
Max. continuous use	45 minutes
Continuous capacity	6 mm
Cut-off capacity	3 - 10 mm, built-in laser indication
Voltage	110 - 120 V / 60 Hz
	220 - 240 V / 50 - 60 Hz

Benefits

- Wide and stable guide plate
- Integrated cutting length indication
- Built-in laser indicator
- Retracting full blade protection
- Durable safety covers
- Quick-release chip collector
- Easily accessible carbon brushes
- Overload switch

Overload Switch

Adjustable cutting angle, up to 45°

Stable guide plate

Accessory EHC.230/4

EHC.230/4 uses:
saw blade 230 mm, 48 teeth, bore 25.4 mm

Art. nr.: 230.0003

Features

Cutting capacity 83 mm

Adjustment angle 0 - 45°

Lifting magnets

Euroboor lifting magnets are engineered with top priority on safety and practical use. This attention to detail during the manufacturing process makes it possible to combine high-uniform magnetic strength with easy and smooth handle operation. The compact design and limited weight make the magnets easy to handle, optimize workspace and fully exploit crane capacity.

Safety factor 3.5

Euroboor lifting tools are designed to withstand at least 3.5 times the recommended workload and each lifting magnet is individually tested and delivered with a specific certificate as proof of safety. Our lifting tools provide reliable and consistent performance, also under extreme conditions.

Benefits:

- **Safety factor 3.5; Lift at least 3.5 times the suggested weight load**
- **Suitable for flat and tubular objects**
- **Suitable for rough or finished surfaces**
- **High lifting capacity**
- **Suitable for temperatures up to 80°C / 176 °F**
- **Maintenance free**
- **Certified safety**
- **Reliable and consistent performance, also under extreme conditions**
- **Easy handling and operation**

World wide

Euroboor is currently serving an increasing amount of more than 70 countries, covering all continents. With multiple offices throughout the world and many committed distributors. We are proud to be a close-knit team of international employees with shared values and ambitions, ready to make your working day an easier day.

Stock

Euroboor is a privately owned company with in-house production and continuous supply to each of our offices. Whatever your needs are, we strive to serve you with the best possible solutions on the shortest term possible.

Fast delivery

With a fine network of stock keeping offices, distributors and wholesalers, Euroboor will make sure your orders are being supplied with the speed and care they deserve.

Tech support

Our qualified staff of specialists can help you with all your technical requests. Whether it comes down to our offerings, servicing your tool or advise on the most difficult drilling tasks, there is hardly anything we have not dealt with before.

Premium parts

Our complete product range is built on proper quality standards. Throughout the lifecycle of your tools, we will make sure these standards are being kept with supplying you only original manufacturing spare parts.

Metal workers choice

Our company logo represents the slug created with the use of our annular cutters – the solid Euroboor core of your metal working job.

Discover other drills and drivers on our website.
