

SURFACE PREP DISCS

For a fine finish...get a great start with **Glit/Gemtex Surface Prep Products**.

Glit/Gemtex Surface Prep Products provide performance, value and versatility to meet the evolving requirements of our customers in the automotive, aerospace, metal fabrication, tool & die, food equipment and chemical manufacturing markets.

We offer the broadest range of high performance, premium-quality surface conditioning discs for greater versatility in meeting your specific requirements:

- Five grit types to choose from - very fine, fine, medium, coarse and extra coarse
- Three Rapid Change backings - Hook & Loop, Type "R" and Type "N" Style Locking Systems
- Rapid Change Holders for both Type "R" and Type "N" Style Locking Systems let you go from conventional coated abrasive disc grinding to surface conditioning without changing holders

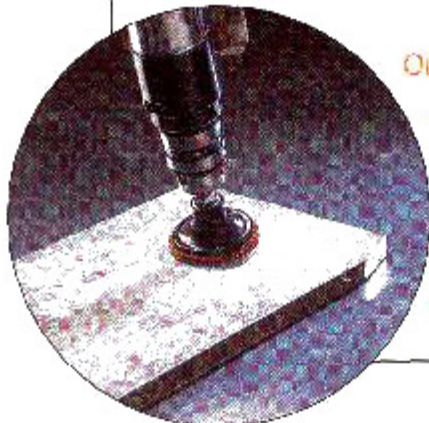

Glit/Gemtex Surface Prep Products are made from a tight, non-woven fiber web and impregnated with a specially processed mineral grain which resists loading, eliminates edge fraying and grain shedding to produce a consistent finish. Our Surface Prep products are ideal for blending, cleaning, de-burring and finishing of metal and fiberglass. They are flexible for use on flat and contour surfaces and, because they are a non-woven abrasive, will not rust and can be used with water, oils or cleaners.

Our Surface Prep product is also available in jumbo rolls with a low stretch feature for converting into surface finishing belts.

Glit/Gemtex is a manufacturer of specialty abrasive products that are sold world wide to automotive, industrial and retail accounts under the Glit, Glit/Gemtex and private label brand names. The primary manufacturing plant and corporate headquarters are located in Toronto, Ontario, Canada. Customer Service, Distribution Center and Sales/Marketing offices for the United States are located in Buffalo, New York.

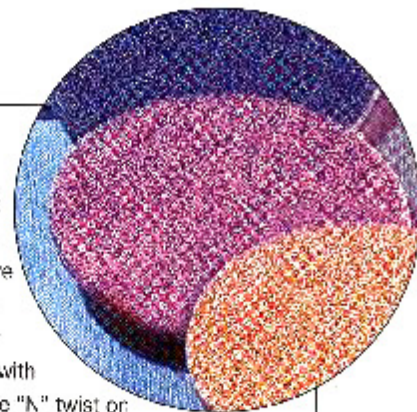

Glit/Gemtex is one of the Katy Industries group of companies. Katy Industries, headquartered in Englewood, Colorado is a diversified corporation with interests primarily in Electrical/Electronic and Maintenance Products. Katy Industries shares are traded on the New York Stock Exchange under the KT symbol.

APPLICATION

Our high performance Surface Prep Products are manufactured from a tight non-woven fiber web with a woven backing and impregnated with a specially processed mineral grain. They are tough, flexible and long lasting. They are ideal for deburring, blending coarse abrasive scratches and removing rust, corrosion, oxides, paint, adhesives and gaskets.

SURFACE PREP DISCS

Our Surface Prep Products provide a fast initial cut and high rate of productivity. They are tough and long lasting. These discs feature our Rapid Change System with Type "R" screw on, Type "N" twist on and Hook and Loop fastening systems. Jumbo Rolls with a low stretch feature are also available for converting into Surface Finishing Belts.
