## Extended light output

The higher the brightness, the faster the power runs out. For lifesaving flashlights, duration of light is more important than brightness. autoXscape can run 20 hours in low mode and 28 hours in SOS mode, offering ample time to wait for rescue. With replacement AAA batteries, your flashlight can be restored at any time to full capacity.

Peace of mind within reach

An emergency tool should always be close at hand, consistently positioned in a known location and ready for immediate access. The autoXscape comes equipped with a high-strength bracket backed by an industrial adhesive strip, allowing it to be placed wherever is most convenient for you.

Security from two window punches

The tail cap with a blunt-force steel ball is used to cover the sharper tungsten steel punch for safety in daily use. When you don't need to cut the seatbelt and the situation is urgent, you can use the outside window punch to break the corners of the window.
 In an emergency where your seatbelt buckle is stuck, you can detach and toss the cap, cut the seatbelt with the cutter and break the glass with the inside window punch. There is no need to worry whether you can break the window if you lose the cap after cutting the seatbelt.

SOS Signaling

Blinking lights often catch a first responder's attention quicker than a continuous beam. In emergency mode, the autoXscape automatically flashes the universal SOS distress signal so you don't need to hearken back to Boy Scout training—if indeed you have had this training at all—to indicate to rescuers where help is needed.

Tech Specs

Material		Type II hard-anodized aluminium
Light Source		One CREE XP-E2 LED
3 Modes		High - low - SOS
Light Output		135lm (high), 50lm (low)
Run Time		4hrs (high), 20hrs (low), 28hrs (SOS)
Beam Distance		150m/492ft (high), 90m/295ft (low)
Peak Beam Intensity		6,000 candela
Batteries		3 x AAA
Rechargable		No
Window Breaker		Tungsten Steel
Seatbelt Cutter		SK2 high-carbon steel
Wight w/o Batteries		167.2 grams/5.9 ounces
Dimensions		15.7 x 3 x 3 cm/6.2 x 1.2 x 1.2 in
Waterproof		Yes; IPX7
Drop Resistance		1m/3.3ft
In the Box		3-in-1 autoXscape emergency tool, batteries, vehicle mount including screws and adhesive, user manual
