

GREASE JOINT REJUVENATOR® POCKET MODEL

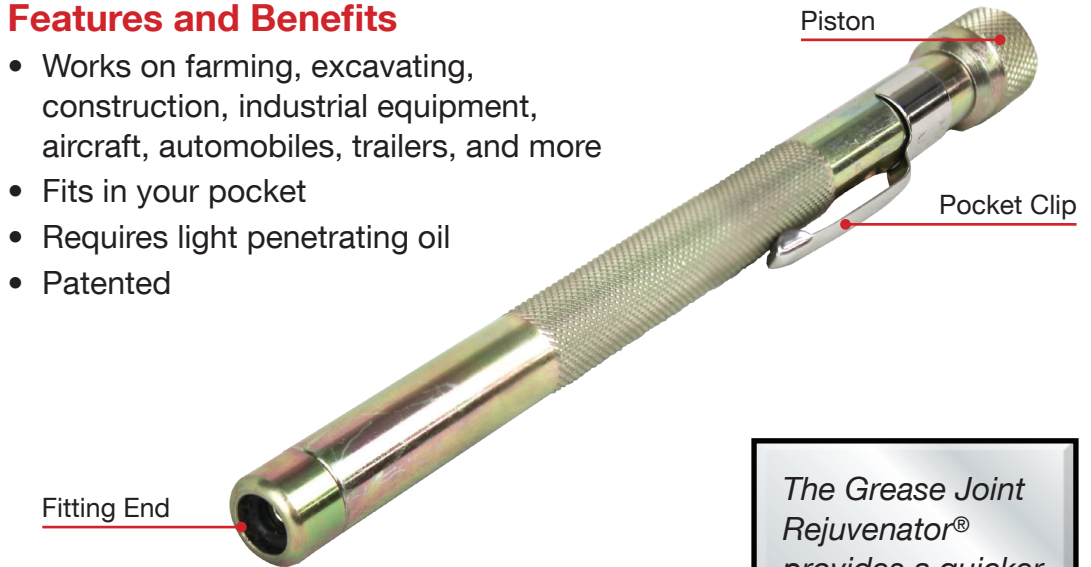

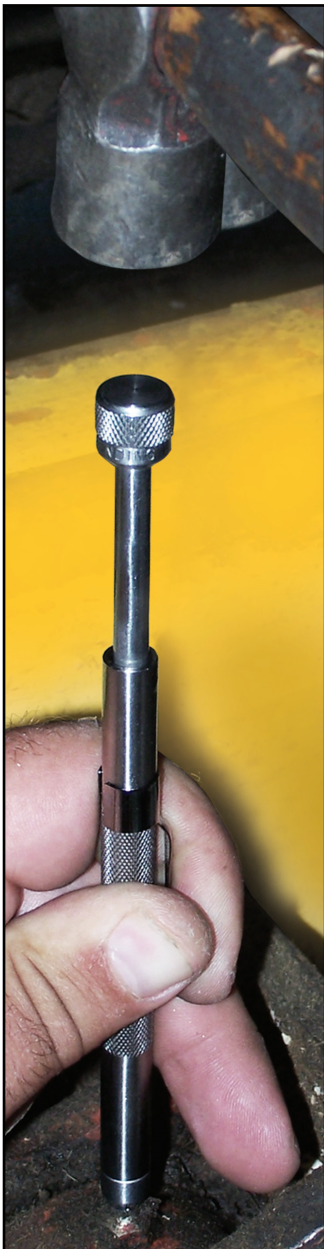

#7864

Have you ever tried to force grease through a grease joint or fitting and couldn't? Now you can!

The problem is in the joint not the fitting. By forcing light oil into the joint, the Grease Joint Rejuvenator® flushes out old hardened grease and allows the new grease to be pushed through.

Features and Benefits

- Works on farming, excavating, construction, industrial equipment, aircraft, automobiles, trailers, and more
- Fits in your pocket
- Requires light penetrating oil
- Patented

Protective
Rubber Cap
for Fitting End

The Grease Joint Rejuvenator® provides a quicker and better option than fishing wire through, heating, or disassembling the joint.
