

#8120
#8151

3-in-1 Diamond Grinding Wheels

For ¼" and ⅜" Arbor Die Grinders
Grind, Cut and Undercut

The 3-in-1 Diamond Grinding Wheels last longer and perform better than traditional grinding wheels. They maintain their size and shape throughout their cutting life ensuring consistent reach and performance. The wheel's innovative, diamond-abrasive coating allows for fast cutting, back cutting, gully grinding and bead finishing with far less sparks and odor. The #8120 and #8151 are professional solutions for professional metal workers.

(Die Grinder Not Included)

Features and Benefits

- Outperform standard grinding wheels in all ways; maintain diameter, last longer and cut faster with low odor and debris
- Access hard-to-reach areas
- Last a minimum of 2000% longer than traditional grinding wheels
- For grinding, deburring, surface prepping, cutting sheet metal, fiberglass and more

Specifications

Size: 2" Diameter (#8120)
3" Diameter (#8151)

Material: Industrial, Diamond Abrasive

Speed: 30,000 rpm max.

#8120: ¼" Shank

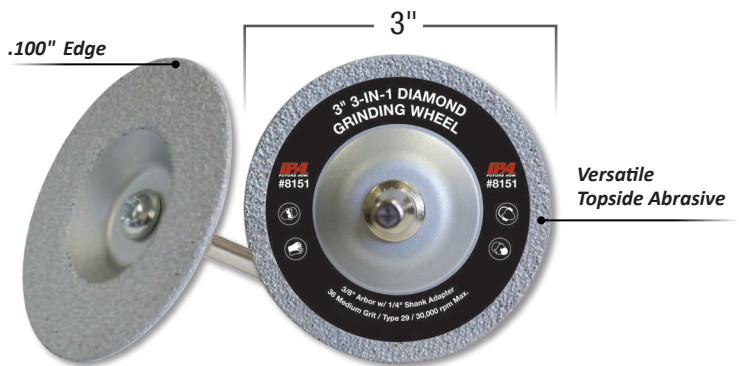

#8151: ⅜" Arbor with ¼" Shank Adapter

Applications: For use on ferrous metals, concrete and ceramic. Can also be used on aluminum with proper lubrication.

#8120 2" Diameter

#8151 3" Diameter
