LUG NUTS

Kluhsman Racing Components offers the strongest aluminum lug nuts on the market. They are manufactured from 7075 non-corrosive aircraft aluminum, and then black hard anodized to provide the toughest nut around. The 5/8" course thread is rolled, making them lighter and stronger than steel. Nuts are available in single or double angle style with a lifetime guarantee. We also offer teflon and zinc plated, hardened steel lug nuts with the same Kluhsman reliability. Another Kluhsman first is the introduction of our New Nextel Cup Heat Treated Super Slick™ Teflon Coated Lug Nuts.
