

## TOOLCARD PRO CARRY LESS. DO MORE.

### BE PREPARED... EVERYWHERE.

You don't wait around for others to fix stuff. You jump in and take charge. You demand a lot from yourself and your gear, but it's not always possible to carry your tools with you. That's why we created the Toolcard Pro. It's a credit card-sized multitool with 40 functions. Tuck it in your wallet or use it as a money clip, either way, it's always with you so you can get things done.

### DESIGNED FOR LIFE

With the perfect blend of style and function, the Toolcard Pro™ is designed to look great with your other gear and still be the hardest working card tool out there.

The Toolcard Pro™ has the attention to detail you demand from the objects you carry, with chamfered edges, a smooth satin finish in silver or tactical black, and sharp, laser-etched marks.

### SUPREMELY FUNCTIONAL

Every feature on the Toolcard Pro™ was designed for optimal functionality, from the bartender-style bottle opener to the screwdrivers, which align with the opposite corner for visual guidance.

The cord cutter is safely nestled in the can-opener recess and the outside edges are smooth, so the card feels great in your hand and won't snag in your wallet.

PHOTO CREDIT BAS & LOKES

### WALLET CARD OR MONEY CLIP

At just 1.5mm thin, the Toolcard Pro slips easily into any wallet.

For those times when a wallet is just too thick, get minimal with the most useful money clip around. The optional, removable money clip holds up to six cards or a wad of cash. It snaps on or off in seconds with no tools required and no fasteners to lose.

And the best part... the bottle opener works with your credit cards in place.

CONFIGURED WITH MONEY CLIP

## ENGINEERED TO PERFORM

At Lever Gear, Engineering is at the heart of our design process. By using a thicker gauge steel than similar cards and nesting the tools, we created a design that was strong yet lightweight.

The Toolcard™ is made from blade quality 420 stainless steel, which is heat-treated after forming, to provide the optimal combination of hardness, durability, and corrosion resistance.

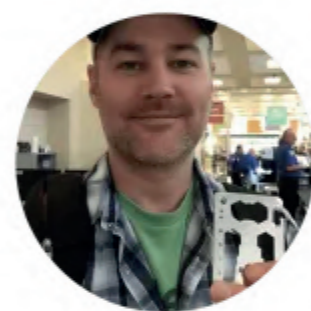

### MANUFACTURED WITH CARE

The Toolcard™ design may appear simple, but there are several intricate processes that go into the final product including stamping, machining, heat-treating, deburring, bead-blasting, PVD coating and finally, laser etching. We work closely with our vendors to ensure exceptional quality every step of the way.

#### MADE IN AMERICA

Designed in Asheville, NC  
Manufacturing in NC & NY

#### TSA COMPLIANT

Complies with [TSA carry-on rules](#)  
Fix stuff on a plane

#### REMOVABLE MONEY CLIP

Snaps on/off in seconds. No tools or fasteners required  
Holds up to six credit cards

#### 420 STAINLESS STEEL

Blade quality stainless steel  
Heat treated for strength & hardness  
Excellent corrosion resistance

#### LASER MARKED GRAPHICS

Sharp, high-contrast marks  
Permanent marks burned into steel

#### ADD PERSONALIZATION

Add a name, message or logo  
Great for gifts or promotions

### PERSONALIZE IT.

Gone are the days of engraving gifts with a lame font and a dot pen machine. Your personalized message is laser etched with your choice of fonts to create the perfect personalized gift.

Creating a customized gift is simple. Simply choose "customized" from the dropdown menu on the product page and use our online customization to type and edit your message. Then select one of four beautiful fonts and adjust the size until it looks the way you want. Add it to cart and then repeat if you want different personalized cards.

Or, select "customized" and leave it blank. Then enter your message and font (Helvetica Neue, Georgia, Copperplate or Giviale) for each card, up to three lines and 20 characters per line, in the order notes after you "proceed to checkout".
