

Lever-action DEF transfer pump

Made from premium-grade polypropylene to protect the purity of your DEF

Pump benefits:

- DEF (diesel exhaust fluid) compatible
- Locking ring enables optimal pump positioning
- Nozzle hanger keeps hose within reach and off the floor
- Designed for automotive, trucking, agriculture and construction applications
- Transfers bulk fluid to smaller DEF containers or directly into vehicle reservoirs
- Self-priming pump unit

Lincoln model 1392 is an addition to our line of DEF-compatible pumps and features the industry-preferred polypropylene construction.

The telescoping pickup tube makes it suitable for a wide range of tank depths. Its unique locking ring enables you to optimize nozzle placement to minimize pump load and simplify operation.

The pump package includes a premium non-kink, six-foot hose with 3/4-inch outlet nozzle that fits all standard DEF reservoirs. It also has a 45-degree nozzle for dispensing fluid at the pump head.

The pump's threaded 2-inch bung mounts securely to bulk DEF tanks, providing stable pumping action while also helping prevent DEF contamination.

Model 1392 features:

- Durable polypropylene housing / PTFE seals
- Adjustable pickup tube fits various container sizes
- Top handle provides support while pumping
- Non-kink, six-foot hose with 3/4-inch dispensing nozzle
