

## **GARAGE LASER PARK**

### Included Parts

- 1- Dual Garage Laser Park with Mounting Bracket
- 1- AC Adapter (120V AC input, 6V DC output)
- 3- Screws
- 2- Double-Stick Tape

1. Find a suitable mounting location close to an electrical outlet (typically the outlet used to power your garage door opener). The mounting location should be inaccessible to children or pets. Detach the white mounting bracket from the main unit. Attach the mounting bracket to the ceiling or wall as shown with the 3 screws or double-stick tape. Be sure the bracket is oriented correctly; if you are mounting it on the ceiling, the arrow shown below on the mounting bracket should point towards the garage door; if you are mounting it on the wall, it should point towards the ground.

**CAUTION:** Do NOT use double-stick tape to mount the unit on a ceiling. Mount securely with screws.

2. The batteries are only a backup if power is interrupted and they will not last for more than a few days. To install the backup batteries, remove the battery compartment door and install 3 AA 1.5V batteries, matching the correct +/- polarity as shown in the compartment.
3. Slide the main unit into the black mounting bracket as shown.

4. Plug in the AC adapter.
5. Park your cars in the desired positions. Adjust the laser beams so that they shine on a prominent feature on each car. Good choices include a spot on the dashboard or the space between the hood and the windshield. Remember, you must be able to see the spot from the driver's seat while parking the car. Do not allow the laser beams to reflect off a shiny surface and into your eyes.

6. When either of your cars first enters the garage, the motion detector will turn on both lasers. Drive forward until the laser beam for your vehicle hits your pre-determined spot indicating that you are parked in the correct position. Both lasers will turn off automatically after you are parked.

### **Troubleshooting**

The Garage Laser Park lasers may sometimes appear to stay on permanently and never turn off. The Garage Laser Park turns on each time it senses motion. It can be triggered by any movement in the garage such as a door opening, an animal moving, or a car entering the garage. As a result, a homeowner may think that the laser never turns off. In these cases what is usually happening is that each time the homeowner looks in the garage, the laser is triggered when the door is opened. If you believe that the laser is not turning off, please check it in a way that the motion sensor will not be triggered.

## **GARAGE LASER PARK**

**AVOID EXPOSURE, LASER RADIATION IS EMITTED FROM THE APERTURE.**

This product complies with 21 CFR chapter 1, sections 1040.10 and 1040.11

Manufactured in Ningbo, China  
Factory: LDR

- Laser devices can be harmful if used improperly.

### **Indoor Use Only**

#### **90 DAY LIMITED WARRANTY**

MAXSA Innovations, LLC warrants to the original consumer/purchaser that this product shall be free of defects in material and workmanship under normal use and circumstances for a period of ninety (90) days from the date of original purchase for use. This warranty shall constitute the sole liability of MAXSA Innovations, LLC concerning the product. MAXSA Innovations, LLC expressly disclaims all other warranties INCLUDING, WITHOUT LIMITATION, THE WARRANTIES OF MERCHANT ABILITY AND FITNESS FOR A PARTICULAR PURPOSE. NO PERSON, FIRM, OR CORPORATION IS AUTHORIZED TO ASSUME FOR MAXSA Innovations, LLC ANY OTHER LIABILITY IN CONNECTION WITH THE SALE AND USE OF THE PRODUCT. MAXSA Innovations, LLC and agents and distributors will bear no liability whatsoever for incidental or consequential damages or charges of any kind. Some states do not allow the reclusion or limitation of incidental or consequential damages, so the above disclaimer regarding incidental or consequential damages may not apply to you. This warranty is void if the product has been damaged or tampered with or if the product or any such parts have been opened. In all cases of damage during shipment, a claim must be filed with the shipping carrier and not with MAXSA Innovations, LLC. This warranty gives you specific legal rights; you may also have other rights which vary from state to state.

#### **OUT OF WARRANTY REPAIRS**

If the warranty period has expired, MAXSA Innovations, LLC will at its option either (1) replace this product with a functionally similar (but not necessarily identical) refurbished product or (2) repair the original product and return it to the original consumer/purchaser after payment of repair/replacement charges has been received.
