- As an aid to reassembly, take notice of wire routings and position in wire guides and traps while dismantling tool.
- Route wires into wire traps and channels as shown.
- Be sure to place wires down into wire traps, being sure to remove any wire slack while routing.
- Be sure all components of electronics assembly are seated firmly and squarely in the corresponding cavity of handle support.
- Be sure there are no interferences when installing handle cover over handle support. Watch for pinched wires.
- Check for proper functionality of slide buttons and switch prior to installing battery.
