Fig. 23, No. 32-10-1056 Clutch Assembly- has been "calibrated" at the factory and requires no "run-in".

When servicing individual parts of the Clutch Assy., care should be taken to thoroughly grease all components during re-assembly. Failure to correctly grease the components can damage mechanism, making it inoperable. The tool must be "run-in", activating the clutch for a minimum of 3 seconds. The acceptable static torque range of the Clutch Assembly is 90-50 ft.-lbs.

LUBRICATION NOTES:

Type 'Y' Grease No. 49-08-5270, 6oz./170g tube

The entire amount of *two tubes* will be needed.

or

Type 'Y' Grease No. 49-08-5275, 14oz./396g tub (can)

When servicing, remove 90-95% of existing grease prior to installing Type 'Y'. Original grease may be similar in color but not compatible with 'Y'.

DO NOT wash Clutch Hub Assembly #23. Prior to reinstalling, clean gear assemblies with a clean dry cloth.

Fig. 23, No. 32-10-1058 Clutch Assembly- has been "calibrated" at the factory and requires no "run-in".

LUBRICATION NOTES:

Type 'Y' Grease No. 49-08-5270,
6oz./170g tube

The entire amount of *two tubes* will be needed.

or
Type 'Y' Grease No. 49-08-5275, 14oz./396g tub (can)

When servicing, remove 90-95% of existing grease prior to installing Type 'Y'. Original grease may be similar in color but not compatible with 'Y'.

DO NOT wash Clutch Hub Assembly #23. Prior to reinstalling, clean gear assemblies with a clean dry cloth.
