Be sure post in shift disc of switch is inserted into slot of forward/reverse shuttle when installing the electronics assembly. Check for proper functionality prior to screwing housing halves together.

As an aid to reassembly, take note of wire routing and position in wire guides and traps while dismantling tool.

Be sure that all components of the electronics assembly are seated firmly and squarely in the housing recesses.

Avoid pinched wires, be sure that all wires and sleeves are pressed completely down in wire guides and traps.

Prior to installing the housing cover onto the housing support, be sure that there are no interferences.
