

Milwaukee® Extends Hand Tool Line with High-Tension Hacksaw

MILWAUKEE, WI- Milwaukee Tool continues to expand their Hand Tool offering with the addition of a 12" High-Tension Hacksaw. Up to 4X higher tension and 5X more durable than other leading hacksaws on the market, the new hacksaw was designed to be a reliable solution for plumbers and electricians who need to make fast, accurate cuts.

Two key features are most important for hacksaw users: Durability and high tension. To address these needs, Milwaukee® designed its new hacksaw with a reinforced metal frame, making it the most durable hacksaw in the industry today. A high-leverage tension knob at the top of the hacksaw's frame allows the user to easily tighten the blade to the highest tension needed.

For added utility, the hacksaw features 6-blade storage capacity as well as a 45° blade position for a better angle on flush cuts.

With the introduction of the 12" Hacksaw, Milwaukee Tool demonstrates its commitment to delivering hand tool solutions that increase productivity and are built to withstand even the toughest jobsites. Available in February 2016, the new 12" Hacksaw joins Milwaukee's current lineup of compact hack saws, jab saws and PVC/ABS saws.
