

Milwaukee® 6 in 1 Combination Pliers: The Best Just Got Better

MILWAUKEE, WI- Milwaukee Tool introduces the next generation of its market-leading 6 in 1 combination wire pliers. The new lineup consists of 6 in 1 pliers for both metallic and non-metallic wire, and have been completely redesigned from the ground-up to deliver even more innovation to the user – from long nose plier applications to reaming pipe, cutting wire, stripping wire, making loops, cutting bolts.

“When we first launched the 6 in 1 combination pliers, it was a new-to-world design that completely eliminated the need for users to carry multiple tools in their belt. This tool delivered immense productivity to our users,” said Bobby Shaw, Director of Marketing for Milwaukee Tool. “After listening to these users, we’ve now fully redesigned this tool to make it even more efficient than the original. We expanded the wire stripping capacity, included an all-metal swing lock, designed a longer curved cutting blade, and improved the handle ergonomics.”

In response to the growth of the residential market, Milwaukee® has also designed a version of these new pliers that is ideal for work with non-metallic wire. This is the first forged non-metallic wire stripper on the market, giving users the durability to make punch-outs in electrical boxes and minimize the risk of the pliers breaking.

For the multitude of users who commonly strip wire, a general purpose wire stripper has also been introduced with improved ergonomics, light weight design, and an all-metal swing lock for fast one-handed operation.

Available in March 2016, this next generation of pliers confirm Milwaukee’s unrelenting commitment to listening to its users and providing solutions that solve key industry frustrations, while increasing jobsite productivity. All are backed by Milwaukee’s limited lifetime warranty.

Specifications:

6N1 Combination Wire Pliers (48-22-3079)

- Solid Wire Stripping 8-18 awg
- Stranded Wire Stripping 10-20 awg
- Bolt Cutting for #6-32 and #8-32
- Pipe reaming up to 1 ½"

Combination Wire Pliers for NM (48-22-3070)

- 12/2 & 14/2
- Bolt Cutting for #6-32 and #8-32
- Pipe reaming up to 1 ½"

General Purpose Wire Strippers (48-22-6109)

- Solid Wire Stripping 10-18 awg
- Stranded Wire Stripping 12-20 awg
- Bolt Cutting for #6-32 and #8-32
