For securing your valuables

1

### M6 Hex Flange Nut

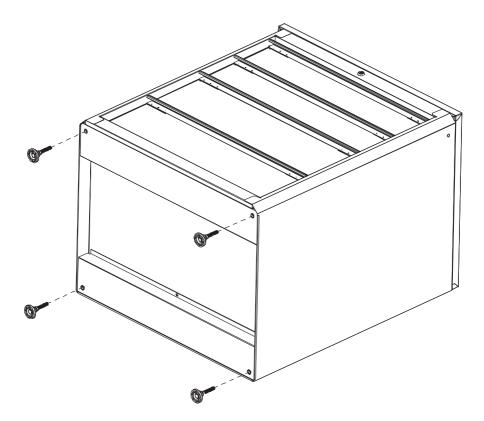

For use with M6 x 16 hex Socket Head Screw when attaching unit to other units

# **ASSEMBLY**

Visit www.montezumastorage.com to watch the how-to video.

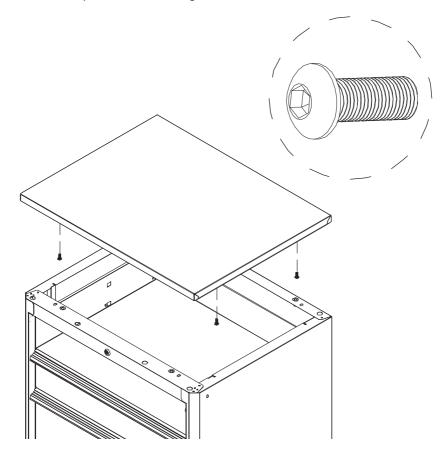

Carefully lay the cabinet on its back, with a soft mat underneath for protection. Screw the four adjustable feet into the cabinet bottom. Turn the cabinet upright.

To add a worktop, remove the top drawer from the cabinet.

Attach the worktop to the cabinet using four M6 x 16 hex socket head screws.

If you have purchased a pegboard back wall, posts and wall cabinet, refer to the owner's manual for the pegboard back wall and posts for how to install them on your base cabinet.

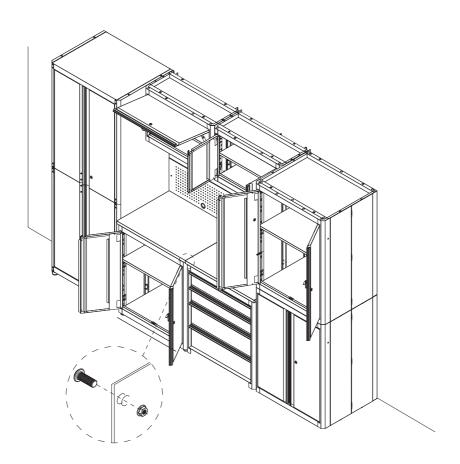

WARNING: DO NOT STACK A BASE 4-DRAWER CABINET ON TOP OF ANOTHER CABINET.

# **INSTALLATION**

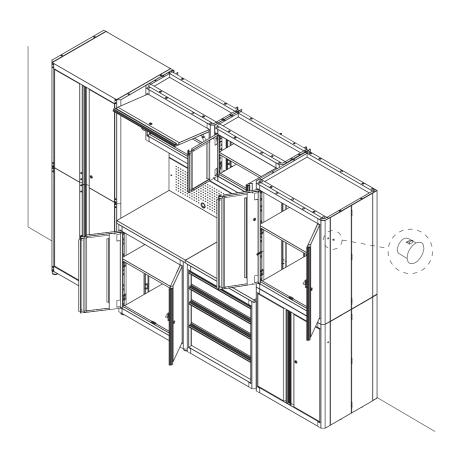

If you have purchased other units, assemble them now, then put all units together to build your garage.

For a better appearance, attach units together using a M6 x 16 hex socket head screw and M6 hex flange nut. Holes are located at the top front side of each unit.

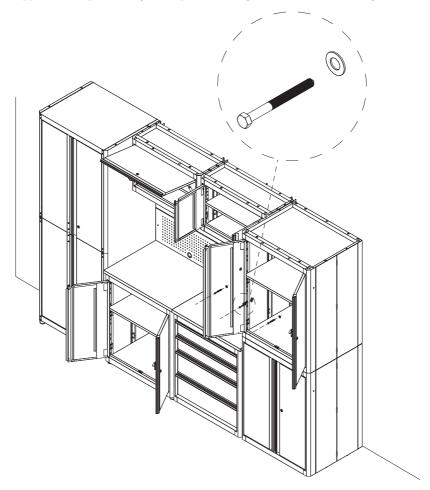

Hide holes on the exterior ends of the units with the supplied end covers, if necessary.

For safety, secure the tops of the each unit to the wall using three M6 x 65 hex tapping screws and washers.

For best results, mount to studs or other solid surfaces. Do not mount to drywall as it will not support the required weight and poses a danger if mounted incorrectly.

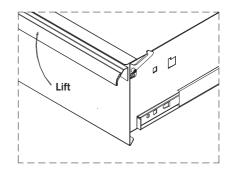

# **OPERATION**

### RAISE AND RELEASE DRAWER FRONTS

These units are equipped with raise and release drawer fronts. To open, lift up on the drawer front while pulling towards you. To close, shut the drawer firmly until the latch engages.

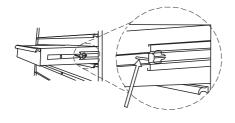

If the drawer does not stay closed, the hook may be bent, or it may be rubbing against the drawer slides. To fix this problem, lightly bend the hook until the drawer will engage in the slide.

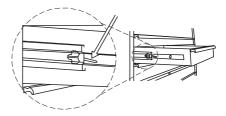

### DRAWER REMOVAL

Pull the drawer out so that it's almost fully extended. Push up on the black release lever on one side, while pushing down on the black release lever on the other side. While holding the levers in these positions, pull the drawer outward until it is released from the drawer slide.

### ONE SIDE - PUSH UP

### OTHER SIDE - PUSH DOWN

## DRAWER REPLACEMENT

Extend the drawer slides from the unit. Insert the brackets on each side of the drawer into the slots in the slides, being careful that they are properly positioned. Once properly inserted, completely close the drawer to set the slides in position.

## **MAINTENANCE**

Periodically clean the door and drawer fronts, trim, and other surfaces with mild detergent and water.

Lubricate the slides (twice a year) with a product like WD40 or other quality lubricant. This is especially important in low temperatures, which can cause the bearing to become stiff.

Grease and oil can be removed with most standard cleaning fluids. For safety, use a nonflammable cleaning fluid.

## SAFETY

Use two people to move the units into place. Failure to do so can result in back or other injuries.

DO NOT leave children unattended near the garage storage system.

DO NOT stand on this product or lean on the drawers or work surfaces.

WEAR SAFETY GLASSES when removing or repositioning the slides. The tool could slip, which may cause personal injury.

DO NOT alter this product in any manner. For example, do not weld external lock bars or attach electrical equipment. This may cause product damage or personal injury.

Close and lock the doors and drawers before moving this product. The drawers could come open and make the product unstable and tip, which may cause personal injury or product damage.

BE CAREFUL when opening more than one drawer. The product could become unstable and tip, which may cause personal injury or product damage.

Keep the product on level surfaces. The product could become unstable and tip if stored or moved on an uneven surface, which may cause personal injury or product damage.
