

## Spinner T-Handle

The speed, the convenience and ease of use of a T-Handle makes it a tool that a lot of professional mechanics reach for every time. Square drive t-handles are even more versatile, because with one in one hand, and a fist full of sockets in the other, you can do just about anything on a motorcycle or ATV.

If regular T-Handles are fast, then Motion Pro Spinner T-Handles are supersonic. The Spinner is a T-Handle with a long reach shaft to get into tight spaces, and an extra heavy, rubber coated handle for a comfortable grip and good momentum when spinning a bolt in or out. The feature that makes the Spinner stand apart from the rest is the innovative floating spinner grip located on the shaft of the tool. This grip allows you to firmly control the t-handle on any fastener, and its floating design allows it to spin freely without any drag. This makes it extremely fast when working on multiple fasteners on one part like an engine cover or a brake rotor.

The Spinner T-Handle is made of chrome vanadium steel, with a machined aluminum spinner grip. The grip is anodized blue and the t-handle is chromed, both durable finishes that will stand up to years of use. The new Spinner bit driver is designed for use with standard 1/4" drive bits as well with our new bit drive sockets.

## Product of the Week - Spinner T-Handle

- Three Spinner T-handle sizes available; 1/4 inch drive, 3/8 inch drive, Bit driver with 1/4 inch hex head
- Bearing mounted spinner provides faster and easier removal and installation of bolts and nuts
- Padded grip handle
- Durable chrome finish on shaft and handle
- Blue anodized spinner with laser engraved Motion Pro logo
- Lifetime Limited Warranty

Accept no compromises, choose only quality motorcycle tools.
