MaxiDry®

- Ultra-lightweight, synthetic nitrile coated glove.
- General purpose assembly requiring precision handling.
- Superior grip in oily and wet environments.
- Excellent dexterity due to strategic placement of coating.
- Locking cuff prevents the glove from slipping; elasticated wrist support provides snug fit.

Applications: Gear box assembly. General handling. Handling small castings. Handling of small components. Light metal fabrication and parts handling. Primary, secondary and final assembly. Shock absorber assembly. Maintenance.

ATG® Technology Platforms

- 360° breathability
- Heat dissipates naturally
- Cool hands are happier, safer and more productive

- 25% thinner than most foam nitrile gloves on the market
- Twice the durability compared to other polyurethane and foamed nitrile gloves on the market
- Form, fit and feel mimics the "hand at rest"
- Consistent liner penetration

- Innovative fibres
- Reinforcement between the thumb and forefinger

- Optimized grip
- Reduced hand fatigue
- Dexterity and flexibility

- Liquid repellence
- High grade chemical resistance available
- Safeguard your hands

HandCare® technology can be seen in the MaxiFlex® Active™ range. This process cools, refreshes and vitalizes the hand with Vitamin E and Aloe Vera.

All of our gloves are certified to **Oeko-Tex® 100®** which is a recognized international standard guaranteeing that the glove is 'skin friendly'.

The **Sanitized®** (triclosan free) hygiene function acts like a built-in deodorant that keeps clothing fresh longer and leaves you feeling safe and protected.

All components and ingredients used in the manufacturing and construction of ATG® products have been assessed and comply with the **R.E.A.C.H.** European Directive, EC # 1907/2006 (Registration, Evaluation, Authorisation and Restriction of Chemicals).

Get informed in a few minutes by watching our short 3D movies that explain the features and benefits of specific product families.
