

PIT PAL PRODUCTS

Instructions for Pit Pal ATV tire rack, safety cross tube.

Customer needs to obtain 1 length of 1/2" conduit tubing to complete cross tube.

Assemble and mount your ATV tire rack in your desired length and location.
Measure between flag brackets on scissor support arms, to decide correct length of conduit.
Cut conduit to size to fit in between flag brackets with minimal gap.

Using supplied 1/4-20 star nut tube inserts, and noting the direction they are assembled.
Install into conduit tubing.

To install inserts: using 1/4-20 bolt, thread bolt into star nut insert until hand tight (do not over tighten).
Install insert into end of tube with bolt threads pointed inward.
Tap on head of bolt to seat insert into tubing, head of bolt should be flush with end of conduit.
Insert should only go approximately 1/4" past end of tube.

**TIRE RACK IS FOR ATV TIRES ONLY,
USING TIRE RACK IN NON-APPROVED MANNER
MAY CAUSE DAMAGE OR INJURY!**
