

GENERAL CATALOG

CONNECTED TO INNOVATION

# Connected to performance

For more than 40 years, PREVOST has been designing, manufacturing and marketing a comprehensive range of products for compressed air and fluid distribution networks, including safety quick couplings, filtration solutions and pneumatic equipment.

PREVOST has become the preferred partner for industries using pneumatic and hydraulic power. Each day, the PREVOST team works to provide our customers with the latest, cutting edge technology.

THROUGH INNOVATION AND CONSTANTLY SEEKING AREAS FOR IMPROVEMENT

THROUGH THE QUALITY OF OUR PRODUCTS, ADVICE AND SERVICES

PRODUCTION  
FACILITIES  
France  
Italy

INTERNATIONAL  
PRESENCE  
France, Germany,  
United Kingdom,  
Spain, Italy, USA

80 COUNTRIES  
with distributors

7000  
PRODUCTS

Building on its success, PREVOST is expanding across Europe, in the United States and in over 80 countries: our solutions and our team's commitment are truly CONNECTED TO PERFORMANCE.

# Connected to innovation

Our approach to innovation is based on two principles:

## ■ TECHNOLOGICAL DEVELOPMENT

Our R&D strategy has resulted in numerous patent applications.

Our products are integrated with safety features which comply with all applicable safety standards.

## ■ MAKING THE BEST USE OF OUR PRODUCTS

We provide reliable equipment with a long service life to save our customers valuable time and money from lost production and replacement costs.

After investing in PREVOST, your business will begin to see an increase in production rates.

We pay close attention to design and ergonomics, which makes our tools easy and comfortable to handle for long periods of time.

PATENT  
APPLICATIONS

MADE IN  
FRANCE  
AND EUROPE

**PREVOST'S CONNECTION TO INNOVATION ALLOWS YOU TO  
OPERATE A HIGHLY EFFICIENT AND SAFE WORKPLACE.**

# Connected to your **business** **needs**

One of the best assurances of quality, for us, is our thorough knowledge of your applications.  
PREVOST supplies companies in the industrial and service sectors where pneumatic and hydraulic powers are used:

## → AUTOMOTIVE **MANUFACTURING**

Automotive construction, assembly lines, etc.

## → AUTOMOTIVE **MAINTENANCE**

Mechanical repairs, paintwork, bodywork, etc.

## → PLASTICS **PROCESSING**

## → WOOD

Sawmills, joinery workshops, etc.

## → TEXTILE **INDUSTRY**

Textile mills, garment manufacturing plants, etc.

## → FOOD-PROCESSING **INDUSTRY**

Abattoirs, meat processing plants, dairies, agricultural applications, etc.

ISO 9001

QUALITY

SAFETY

BECAUSE WE UNDERSTAND YOUR  
INDUSTRY, WE ARE CONNECTED  
TO YOUR NEEDS.

# Connected to our **services**

To better serve you, PREVOST provides excellent technical, logistical and customer support services.

## → FIRST-CLASS **LOGISTICS**

After placing your order, our team manages operations so your products are packed with care. Delivery may be arranged to best suit your schedule.

## → DESIGN **SERVICES**

Our expert Sales team is dedicated to designing you a custom pipe network. They analyze, advise and assist you with a basic network diagram, a detailed plan and a full quote.

## → AN INFORMATIVE CUSTOMER **SERVICE TEAM**

Our dedicated and knowledgeable support staff are on hand to assist you with placing orders, tracking shipments and technical questions.

## → A DYNAMIC AND RESPONSIVE **SALES FORCE**

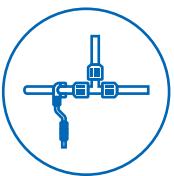

BY CHOOSING PREVOST, YOU ARE CONNECTED TO THE BEST SERVICE.

24/48-HOUR

# The prevoS1 range

The prevoS1 coupling meets the top level of quality standards required in the professional industry.

The range is synonymous with top of the line quality, extended service life, advanced technology, safety and efficiency.

When used with PREVOST plugs, prevoS1 couplings carry a three-year, leak-free guarantee. The prevoS1 couplings are unrivalled in the market with quality, patent and protected technology.

## Simple and easy-to-use

### ■ Quick and effortless coupling:

**easy to connect,** with no risk of damaging the internal mechanism.

### ■ Decompression and disconnection of your pneumatic systems and tools in a single press:

**easy to use,** enabling tools to be changed quickly on assembly lines.

### ■ Swivel body creates a quick assembly and optimal positioning:

**cost savings from increased productivity and decreased labor requirements.**

## Certified safety

### ■ One push control to decompress the system and disconnect in complete safety:

eliminates hose whip to protect the user, surrounding tools and equipment.

**ISO 4414 standard**

### ■ Silicone free manufacturing:

avoids the risk of contaminating compressed air during the paint or varnish applications which can cause surface imperfections.

### ■ Anti-static construction:

external dust will not be attracted to painted or varnished surfaces from the creation of static electricity.

### ■ ATEX certification:

attests to the safety of prevoS1 couplings in many industries (gaseous environments, paint booths, etc.). Equipment complies with requirements for zones classified as 1 & 2 (gas) and 21 & 22 (dust).

## The **prevoS1** range

### **Ergonomically designed** for long lasting comfort

- Functionally designed to allow a natural grip and easy handling.
- Composite body material: anti-scratch body material also allows user to create a firm grip on the coupling.
- Compact and lightweight coupling for maximum user comfort when handling repetitively. Provides accuracy and increases work station efficiency.

### Long service **life**

- Resistant to abrasion, vibrations, corrosion, impacts and crushing: reinforced composite body is capable of withstanding the harsh conditions frequently found in production environments.

### **International compatibility**

- The most popular prevoS1 profiles (Industrial, ISO 6150 C, High Flow, ARO 210, Automotive), meet the requirements of many international standards.
- Color coded buttons make the wide selection of international profiles easy to identify: this system reduces the risk of connection errors which may cause damages or accidents.

### **Industry standards**

- prevoS1 couplings comply with:
  - The European Pressure Equipment Directive
  - The safety requirements of the ISO 4414 standard
  - The European RoHS Directive
  - ATEX classification 1 & 2 (gas) and 21 & 22 (dust).

## Body styles

■ Available in different international profiles

INDUSTRIAL BRITISH HIGH FLOW ARO 210 AUTOMOTIVE ISO 6150C

## Installation types

### Parallel female thread

- BSPP
- International standard ISO 228/1

### Parallel male thread

- BSPP
- Built-in gasket
- International standard ISO 228/1

### Tapered female thread

- NPT according to ASME 1.20.1 standard
- BSPT according to ISO 7

### Tapered male thread

- NPT according to ASME 1.20.1 standard
- BSPT according to ISO 7

### Hose barb

- Assembled worm-drive or ear-type hose clamp

### Bulkhead

### Threaded swivel join

- Scratch protection
- Rotation through 360° on two axes

### Rotating coupling, parallel thread

- Built-in gasket
- Rotation through 360° on two axes

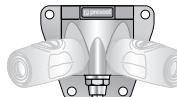

### Single wall manifold

- Built-in manual drain

### Double wall manifold

- Built-in manual drain

## Coupling identification

- Color coded based on international profile
- Logical product code system
- Thread type engraved on the product

Example of product code:

**ISI 061101SW**

## Polymer body

- **Body:** composite body construction can withstand heavy duty applications
- **Other components:** steel or aluminum with RoHS compliant anti-corrosion treatment
- **Seal:** Nitrile NBR gasket

## Advantages exclusive to the prevoS1 composite body

### ■ Ultra-lightweight

2.5 Oz for couplings with 6 mm - 1/4" body  
4 Oz for couplings with 8 mm - 3/8" body

### ■ Non-scratch

No damage to delicate surfaces.

**■ Anti-static** conducts electricity to avoid problems related to static electricity (ex. dust attracted to paint/polish or electronic work surfaces). Allows the coupling to meet ATEX Directive.

**■ Service pressure range:** 29 to 174 psi (not suitable for vacuum)

**■ Temperature:** +5°F to +158°F

### ■ Versatile coupling

< 18 lbf at 90 psi for couplings with 1/4" clearance  
< 22 lbf at 90 psi for couplings with 3/8" clearance  
*Unit of measurement lbf: pound-force*

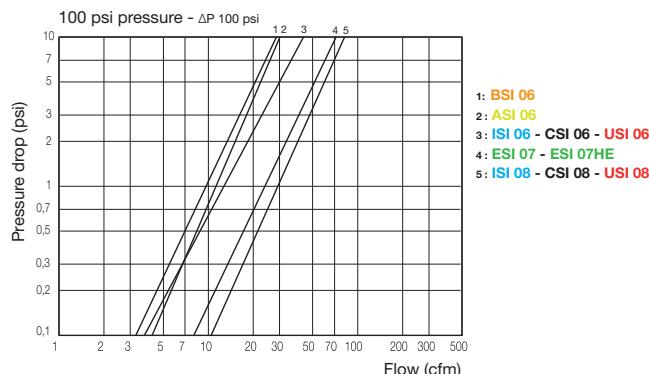

### ■ Applications

- All connections
- Assembly lines (automotive, household appliances, etc.)
- Mechanical manufacturing, machining workshops
- Paper and printing industries
- Automotive repairs
- Textile industries
- Wood and plastics industries
- All work on fragile products
- Technical education

## Pneumatic flow rate / pressure loss curves

## The **prevoS1** range

### *Stainless steel **body***

- **Body:** stainless steel with 17% chromium
- **Other components:** steel or aluminum with RoHS compliant anti-corrosion treatment
- **Seal:** Nitrile NBR gasket
- **Check valve and button:** composite

### *Advantages exclusive to the **prevoS1** with 11 mm - 1/2" clearance*

- **Greater air flow** enabling users to work with even the largest pneumatic tools at full capacity.
- **Tough, high resistance couplings** suited to the most challenging conditions for which this type of product may be required, including violent impacts, crushing, dirty or damp environments, etc.
- **Recommended for heavy duty industries:** such as public works, ship building, heavy machinery, mining, offshore drilling, etc.
- **Anti-static** conducts electricity to avoid static related problems (ex. dust attracted to paint/polish or electronic work surfaces). Allows the coupling to meet ATEX Directive.
- **Service pressure range:** 29 to 174 psi (not suitable for vacuum)
- **Temperature:** +5°F to +158°F

#### ■ **Intuitive and easy to connect**

Quick to connect the plug into the coupling thanks to the innovative design of the internal locking mechanism.

#### ■ **Safe and effortless handling**

#### ■ **Connecting force at 90 psi**

< 36 lbf at 90 psi

*Unit of measurement lbf: pound-force*

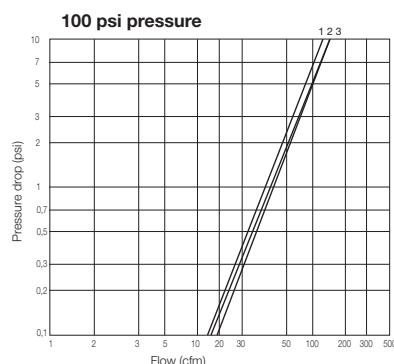

#### ■ **Applications**

- Tough locations
- Harsh environments
- Maintenance of industrial vehicles, agriculture, public works, mines and quarries, etc.
- Heavy industry and manufacturing, iron and steel.

## 2

# CSM safety quick release coupling

**CSM safety couplings** combine reliability and high performance with technology that guarantees the couplings are safe, easy to use, leak free and durable.

## ■ ANTI-HOSE WHIP SAFETY MECHANISM

The **CSM range** offers two-press depressurization and uncoupling:

- **1**: automatic depressurization of the downline hose.
- **2**: safe uncoupling.

## ■ LEAK FREE

Each coupling is individually inspected before leaving the factory for a guaranteed leak free performance.

This significantly cuts energy costs.

## ■ PERFORMANCE

The design of **CSM** couplings actively enhances the efficiency of pneumatic facilities.

The mechanism is reliable and the couplings offer an excellent flow rate.

Complies with the safety requirements of the **ISO 4414 standard**.

Flow rate at 100 psi - ΔP: 10 psi			Working pressure		Temperature	Weight
Ø 6 mm - 1/4" <b>CSM 06</b>	Ø 8 mm - 3/8" <b>CSM 08</b>	Ø 11 mm - 1/2" <b>CSM 11</b>	Ø 6 mm - 1/4" <b>CSM 06</b>	Ø 8 mm - 3/8" <b>CSM 08</b> Ø 11 mm - 1/2" <b>CSM 11</b>		Couplings Ø 6 mm - 1/4" for hoses Ø 10 mm - 3/8"
34 cfm	85 cfm	165 cfm	0 to 232 psi	29 to 232 psi	+5°F to +158°F	from 2.4 Oz

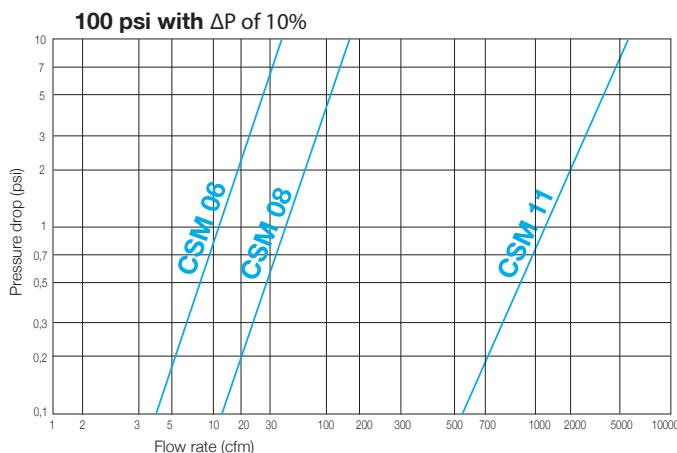

## DURABLE

### Materials used:

- Reinforced stainless steel body with 17% chromium
- One-piece lock: stainless steel with 13% chromium
- Streamlined valve and nitrile gasket
- Obturator: steel or aluminum with anti-corrosion treatment

### Withstands:

- Abrasion
- Impacts
- Crushing
- Corrosion

## COMPATIBILITY

Couplings are compatible with all international profile connections.

### ISO 6150 series C interchange, 3 body sizes:

- 6 mm - 1/4", **CSM 06**
- 8 mm - 3/8", **CSM 08**
- 11 mm - 1/2", **CSM 11**

**RoHS Directive** on the restriction of the use of certain hazardous substances in electrical and electronic equipment (lead, mercury, cadmium, hexavalent chromium, polybrominated bi-phenyls –PBBs– and polybrominated di-phenyl ethers –PBDEs–).

# PROLAC

## quick couplings

**PROLAC** couplings are easily connected by pushing the plug into the coupling. To disconnect instantaneously, simply press the button.

Tools equipped with compact and lightweight **PROLAC** couplings can be used for long periods of time without causing fatigue.

### ■ APPLICATIONS

- Assembly and finishing workshops
- Automotive paint shops
- Bodywork shops
- Woodworking shops

**PROLAC** couplings are connected to the end of an air hose to allow quick and direct connection of pneumatic tools or paint spray guns with the corresponding plugs.

*Compact, lightweight, non-scratch couplings*

### ■ COMPACT

The single-piece, perfectly cylindrical composite body enables the couplings to be used in all work environments.

There are no parts overhanging outside the connector, avoiding accidental catching and disconnections.

### ■ LIGHTWEIGHT

Prolac couplings are designed to enhance efficiency in the users movements because they are easy to use, lightweight and compact.

### ■ NON-SCRATCH

If the coupling rubs against delicate surfaces, its reinforced polymer construction prevents the risk of scratches.

# PROLAC quick couplings

## Simple and safe **connection and disconnection**

To connect a **PROLAC** coupling, simply push the plug into the coupling.

To instantaneously disconnect, just a single thumb press on the button. The single press disconnection and shut off process feels natural.

Quick couplings paired with a PREVOST plug assure users a leak free performance:

- Plug on O-ring
- Valve gasket attached through the seat
- Core gasket in the shut off chamber

### SWIVEL VERSION: FA

The 360° rotating axis allows for unrestricted movement. This swivel joint eliminates awkward movements in the hose from winding and twisting.

Users can move freely when using a paint spray gun, air tool or performing other precision work.

### STAINLESS STEEL VERSION: PROXI

**External construction:** composite material compatible with corrosive atmospheres\*

**Internal construction:** high-tensile stainless steel\*

- Shut-off valve: 316L stainless steel

**Fluids carried:**

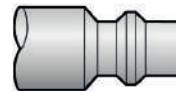

- Compressed air in a corrosive atmosphere
- Neutral gases, from +5°F to +140°F

\*Call your Regional Sales Manager for availability.

# 4

# Metal quick release couplings **IRM**

With its metal body, this rugged coupling is ideal for heavy duty applications.

## ■ DURABLE

The metal body can stand up to the toughest environments:

- Entire internal and external body: anti-corrosion treated steel
- Seals: nitrile
- Valve: polyacetal

This tough, metal quick release coupling can withstand:

- Abrasion
- Heavy impacts
- Crushing
- Corrosion

**IRM**

Fluid compliant: compressed air

## ■ LEAK FREE

Each coupling is individually inspected before leaving the factory for a guaranteed leak free performance.

## ■ PERFORMANCE

- Metal quick release couplings enhance the efficiency of air powered systems.
- Allows one handed operation.
- Coupling offers a consistent and reliable flow rate.
- Push button offers an effortless automatic connection which is instantaneous (< 22.5 lbf).

## ■ COMPATIBILITY

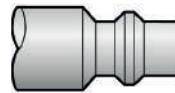

Couplings are compatible with the Industrial profile.

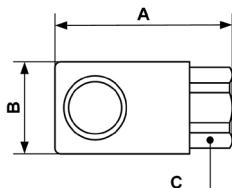

## ■ TECHNICAL SPECIFICATIONS

# 5

# ELS

# Quick couplings

*Universal couplings for low pressure water systems*

The design and construction materials used to manufacture the **ELS couplings** is ideal for running cold water systems with or without cleaning agents. They are rugged enough to withstand harsh operating environments.

## ■ APPLICATIONS

- Maintenance, cleaning, washing, supply to cleaning machines or washing spray guns.
- Water couplings for industrial, construction, food processing, car washes and water spigots.
- Agricultural or public works watering applications.

## ■ AUTOMATIC CONNECTION

Push the plug into the coupling for a quick and easy connection. Release the connection by pulling the knurled locking ring back.

## ■ COMPATIBILITY

The connection profiles of the **ELS** couplings and **ELP** plugs are interchangeable with the most popular style water couplings.

An **ELP** plug or an **ELS** coupling can be connected to the majority of existing plastic or brass products with the same clearance diameter.

## ■ SEALING

The valve-gasket-spring technology used in couplings with a shut-off valve, ensures a perfect seal on coupling and uncoupling.

The Garden hose thread coupling and plug is fitted with a flat gasket (3/4" GHT) clipped in the thread base.

## ■ STRENGTH

The superior design of PREVOST couplings and plugs offer excellent reliability under pressure, even in harsh conditions.

The materials used ensure that the **ELS** range offers excellent corrosion resistance.

# ELS quick couplings

## ■ CONFIGURATIONS

- **Coupling with shut-off valve:**

When uncoupled, the coupling automatically shuts off the water supply.

- **Full-flow coupling:**

Without a valve, when disconnected, the the water supply stays open. This coupling has a higher flow rate than the coupling with a shut-off valve.

- **Adaptor with a shut off valve:**

When disconnected, a one-way valve shuts off the downstream water supply.

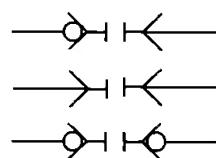

- **Full-flow plug:**

Plug maintains a constant open flow of water.  
Higher flow rate than the option with a shut off valve.

**Potential combinations**

Coupling      Plug

## ■ ACCESSORIES

Various accessories can be used to adapt the circuit depending on its configuration:

- Joiners
- Two-way and three-way adapters
- Two-way control valves
- Ball valves

Ball valve

## ■ SPECIFICATIONS

<b>Clearance diameter (mm)</b>	9 mm
<b>Water flow rate (GPM) <math>\Delta P = 4.35 \text{ psi}</math>:</b>

# CONEX push-to-connect fittings

## A comprehensive **high performance range**

- Fixed equipment fittings, with Teflon-coated tapered threads or parallel threads with gasket
- Interconnection fittings for tube-to-tube connections
- Functional fittings: valves, flow regulators
- Compact micro-fittings

### **Push-to-connect fittings**

polymer body

→ lightweight and tough

### ■ INSTALLATION

- Safe and easy to install with Teflon coated tapered threads and cylindrical threads with gasket
- Slimline fittings require little space
- Wide range of configurations available for various applications related to pneumatic wiring, cylinders, control valves, pneumatic controls, etc.
- Optimized angled outlet ports
- Easy to attach and align via the one or two eyelets

Threads			
	Teflon-coated tapered threads	NPT	1/8" to 1/2"
	Parallel threads with NBR gasket at bottom of groove	BSPP	G 1/8 - G 1/2
	Parallel threads with NBR gasket at bottom of groove	UNF	10 - 32
	Parallel threads with NBR gasket at bottom of groove	Metric	M3 and M5

**REACH regulations** on the improvement of the management of risks related to the usage and dangerous properties of chemicals manufactured in or imported into the EU.

The 6 panel profile inside the fittings allows easy installation. This system facilitates the installation of fittings in difficult to access areas.

The polymer range of fittings are equipped with a movable shell. The shell can be adjusted after installation to allow for compact and precise orientation.

## ■ CONNECTION - DISCONNECTION

- Easy to handle
- Easy to push-to-connect
- Easy to install due to ring self-positioning system
- Excellent connection, even in the harshest conditions (vibrations, misalignment, etc.)

## ■ LEAK FREE

- Creates an instant seal
- Solid grip of the tube in the fitting
- Vibration resistance

## ■ OPERATION

The connection between the tube and fitting is made simply by pushing the tube into the fitting.

The tube must be cut square and inserted fully into the fitting. A system of stainless steel teeth holds the tube in place.

The seal between the tube and the fitting is made by a lip seal, protected by a metal sleeve located between the seal and the teeth. The tube can be disconnected by pushing the release collar, which pushes the teeth and releases the tube from the fitting.

## ■ OPERATING PRESSURE AND TEMPERATURES

### CONEX fittings

	Polymer body / RP
<b>Fluids</b>	Compressed air
<b>Working pressure</b>	0 to 145 psi
<b>Operating temperature</b>	+32°F to +140°F
<b>Recommended tubes</b>	Polyurethane ether or ester and polyamide

Pressure resistance with specified use: - for a 30 in Hg vacuum (99.9% vacuum)

- for a maximum working pressure of 145 psi (for polymers only)

### ASSOCIATED PRODUCTS

Polyurethane and polyamide tubes

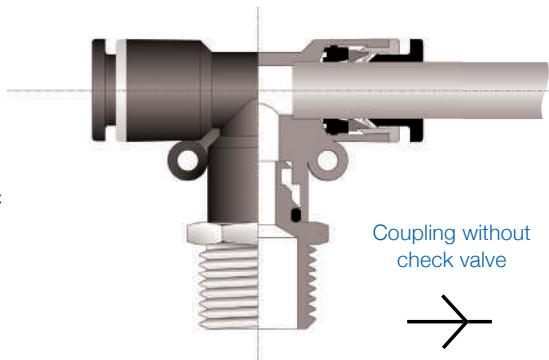

# Push-to-connect fittings **CONEX**

## Fixed equipment **couplings** Tube-to-tube **interconnection** **fittings**

A wide range of fittings are available to meet all pneumatic configurations: straight fittings, unions, elbows, T fittings, Y fittings, cross fittings, triple unions and stoppers.

**CONEX** push-to-connect fittings are specifically designed for connecting thermoplastic tubes and are suited for pneumatic systems in all industries.

Coupling without  
check valve

## Functional **push-to-connect fittings**

### ■ VALVE

Function: blocking air flow in both directions.

Operating pressure  
0 to 145 psi

Temperature  
+32°F to +140°F

Construction  
Polymer and  
nickel-plated  
brass

Specially designed to get a 90° clean cut

# Connecting parts

## A range **for all configurations**

These products allows users to customize their systems into numerous configurations.

This wide range of hose connectors and the extensive selection of parts (plugs, reducers, brackets, T couplings, cross couplings, stoppers, bulk head fittings, etc.) are available with all thread types and are ideal for customizing a piping system.

### ■ FLUIDS

Air, water, inert fluids

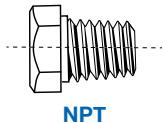

### ■ THREADS

- Tapered thread for connections with sealant applied:

**ASME 1.20.1 standard**

Thread sizes from 1/8" to 3/4"

NPT

Part type	Material	Pressure
<b>Connectors</b>	Nickel-plated brass	0 to 217 psi
<b>Joiners</b>	Steel	0 to 217 psi

# HOSE TAILS

Technology  
Straight through path

Operating pressure  
0 to 217 psi

## *Ball valves*

Valves are necessary equipment for opening and closing air circuits without having to turn off the entire upstream air supply.

They are located throughout the system and used to shut off sections for maintenance, when changing tools, bleeding a line, etc.

## *Valve types*

- Quarter-turn brass full-flow valves (RSI)
- Butterfly valves
- De-pressurization valves
- Padlockable stainless steel valves
- Double valves
- Mini-valves
- Programmable valves

**Compliant with specified** dimensions, tolerance and labelling for parallel threads.

### ■ LEAK FREE

Hot forging ensures that the valve body walls are free of micro-leaks.

PTFE stem gaskets ensure a leaktight seal and maintenance-free use.

### ■ EASY TO USE

Frequent opening and closing of the the valves is facilitated by a long lever that is easy to maneuver. The stem does not pass through the ball and is not subjected to any air pressure or risk of ejections.

### ■ HEAVY DUTY

- The valves are made from hot die-forged, high-purity brass and are carefully assembled to guarantee a tough body and long service life. Viton (FPM) gaskets withstand a wide range of applications.
- The valve bodies are nickel-plated and the operating lever is cadmium-plated, for excellent corrosion resistance.

# Compressed air systems **PPS**

## **P**REVOST **P**IPING **S**YSTEM

**100% aluminum**

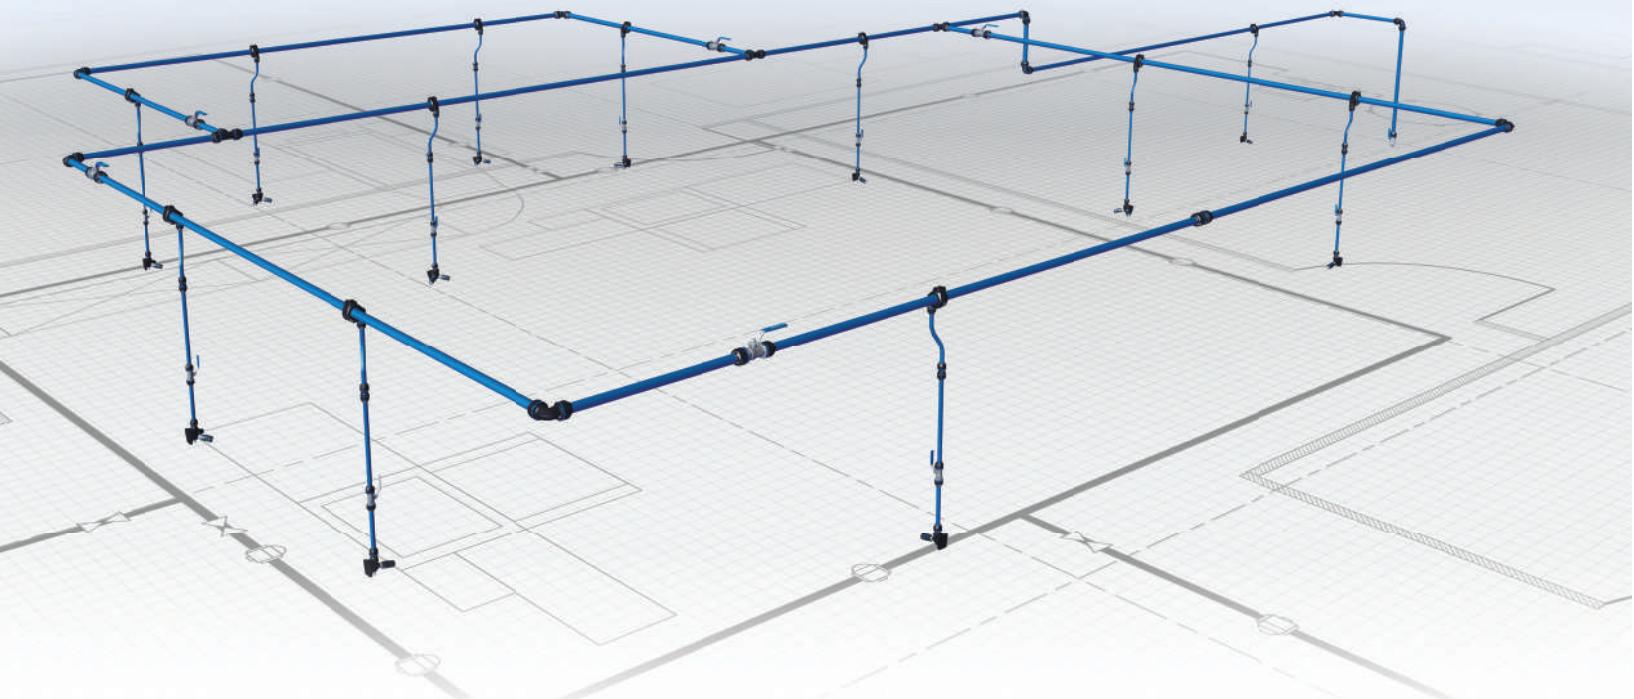

The **P**REVOST **P**IPING **S**YSTEM compressed air network range is compact, lightweight and corrosion resistant with all aluminum fittings.

The network can be pressurized immediately after a quick and easy installation.

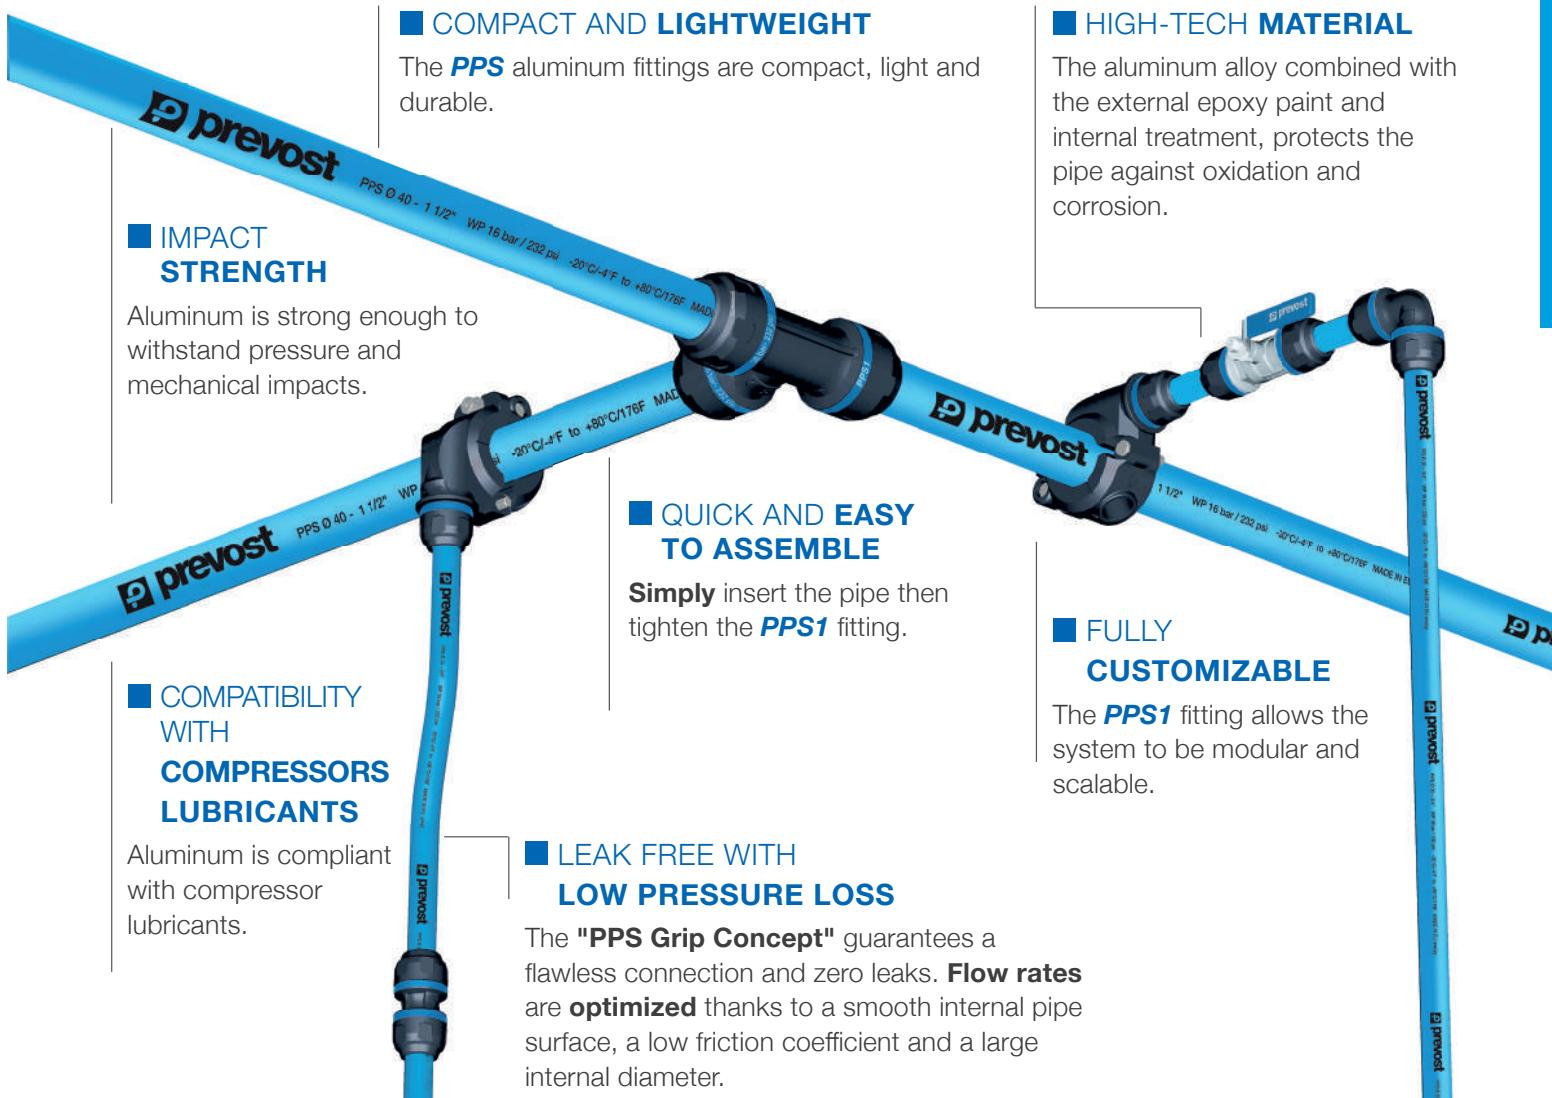

**The *P*REVOST *P*IPING *S*YSTEM range guarantees:**

- a clean and high quality air supply
- a leak free network with an optimized flow rate
- a maximum working pressure of 232 psi

The network will provide a long service life and can easily be configured so each workstation is well supplied, accessible and organized.

## Advantages of the PREVOST PIPING SYSTEM range

### ■ COMPACT AND LIGHTWEIGHT

The **PPS** aluminum fittings are compact, light and durable.

### ■ IMPACT STRENGTH

Aluminum is strong enough to withstand pressure and mechanical impacts.

### ■ COMPATIBILITY WITH COMPRESSORS LUBRICANTS

Aluminum is compliant with compressor lubricants.

### ■ HIGH-TECH MATERIAL

The aluminum alloy combined with the external epoxy paint and internal treatment, protects the pipe against oxidation and corrosion.

### ■ QUICK AND EASY TO ASSEMBLE

**Simply** insert the pipe then tighten the **PPS1** fitting.

### ■ LEAK FREE WITH LOW PRESSURE LOSS

The "**PPS Grip Concept**" guarantees a flawless connection and zero leaks. **Flow rates** are **optimized** thanks to a smooth internal pipe surface, a low friction coefficient and a large internal diameter.

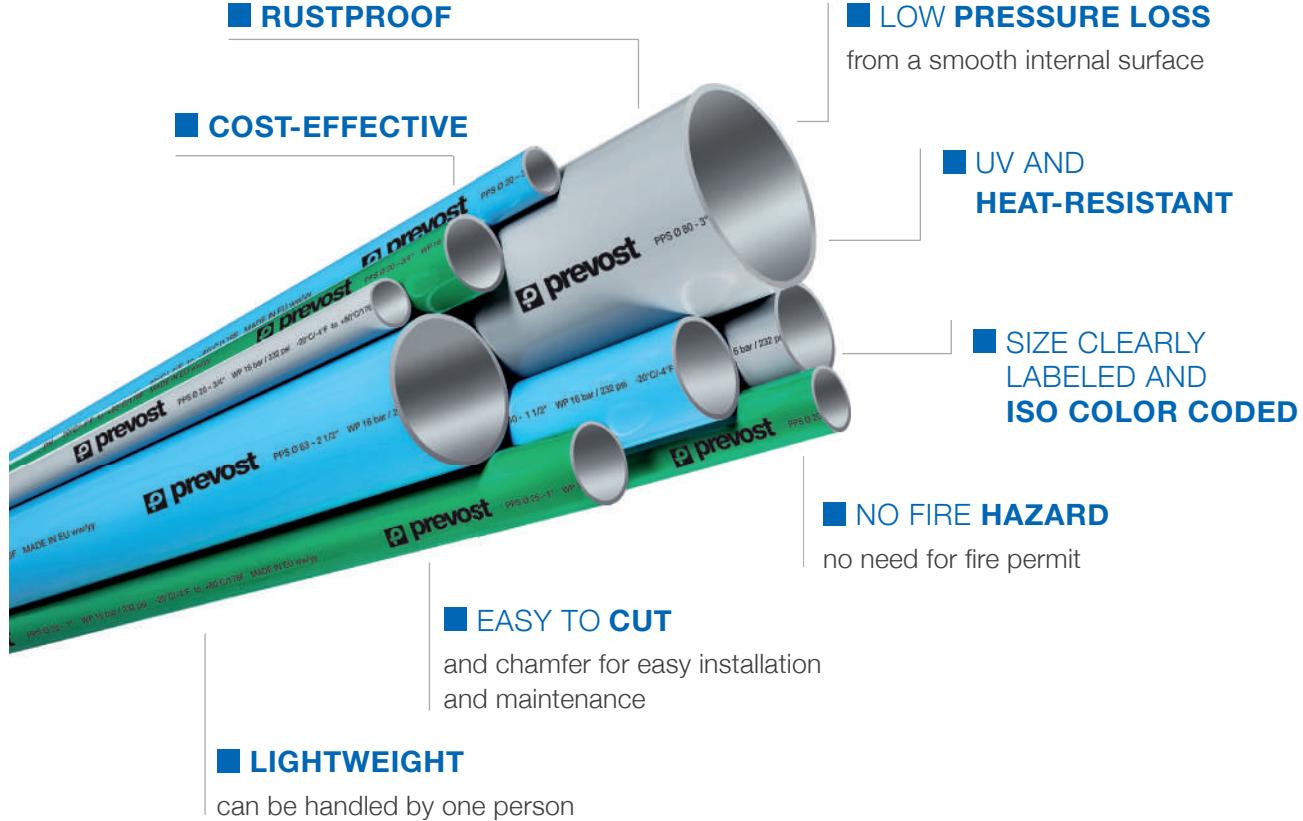

### ■ FULLY CUSTOMIZABLE

The **PPS1** fitting allows the system to be modular and scalable.

# Compressed air network PPS

## 100% aluminum **piping**

PREVOST offers a wide range of 100% aluminum pipes for compressed air, vacuum and nitrogen systems.

### ■ PIPE PROPERTIES

- **Material:** extruded aluminum  
EN AW 6060 T6 UNI-EN 573-3 alloy
- **Treatment:** interior and exterior (compliant with RoHS standard)
- **Coating:** electrostatic paint
- **Extrusion quality:** calibrated, seamless
- **Compatible fluids:** compressed air, vacuum, neutral gases
- **Pipe lengths:** 13.12 ft (4 meters)  
or 19.70 ft (6 meters)
- **Density:** 170 lb/ft<sup>3</sup>
- **Pipe external diameter:**  
Ø 1/2" (16 mm), 3/4" (20 mm), 1" (25 mm),  
1 1/4" (32 mm), 1 1/2" (40 mm), 2" (50 mm),  
2 1/2" (63 mm), 3" (80 mm)

## 100% aluminum **fittings**

Pipes are firmly held in the fitting using the **PPS Grip Concept**.

This new concept is based on a stainless steel ring with teeth that penetrate the aluminum. The new contoured and lubricated seal design guarantees a leak free performance.

### ■ IDENTIFICATION

The PREVOST logo is engraved on each fitting

### ■ DIAMETER

Pipe external diameter  
(mm and inches)

### ■ PRESSURE

Maximum service pressure (bar/psi)

### ■ ID MARKER

To indicate that the pipe is correctly positioned in the fitting

### ■ TRACEABILITY

Clearly marked date of manufacturing code

### ■ LEAK FREE

It is comprised of two Teflon-coated lobes to create a perfect leak free seal

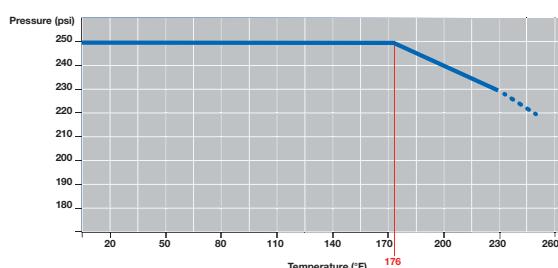

### ■ INTERNAL PARTS

Internal parts cannot be detached from the body after assembly

### ■ TECHNICAL SPECIFICATIONS

- **Temperature range:** from -4°F to +176°F
- **Body and nut:** 100% aluminum, EN AB 46100
- **PPS Grip Concept:** fastening system using teeth
- **Maximum working pressure:** 232 psi
- **Vacuum level:** 0.59 inHg

Pressure graph  
as a function of temperature

# Compressed air network PPS

## ■ TAPPING PORT FLANGE

The body and nut are made **entirely of aluminum**. The tapping flange is extremely compact, and is fitted **with an anti-rotation system** and removable half-shell. The pipe can be drilled and the flange installed without disassembling the entire network.

The tapping flange provides a dry air supply to workstations by drawing air from the wall of the pipe.

The water remaining in the lower portion of the main pipe will drain to a low point by automatic drain trap.

A tapping flange provides a drop to drain condensates.

## ■ VALVES

Multiple options available:

Tube/Tube

Male threaded/Tube

Female threaded/Tube

## ■ TIGHTENING

A PREVOST tightening wrench is recommended to tighten the nut to the accurate specifications. Torque can be set using a torque wrench.

## Network design

A compressed air network involves linking a source of compressed air and one or more compressors to a designated distribution point or points.

The supply line ring main is made of PREVOST aluminum pipes which are installed at a minimum of 8 ft. above floor level and forms the primary loop of the network.

From this main loop, drops (smaller diameter pipes) are installed. The end of a drop should be installed approximately 4 ft. from the ground. The drops form distribution points to plug in air powered equipment such as quick couplings, filters, hoses, etc.

## ■ NETWORK DESIGN CALCULATIONS

To design a network the pipe diameter must be calculated by taking the desired flow rate and the length of the main pipe. The data below is calculated for operating pressure of 116 psi (8 bar) with 5% pressure loss.

COMPRESSOR*					MAIN RING LENGTH								
POWER		FLOW			30 m	76 m	152 m	305 m	610 m	914 m	1219 m	1524 m	1981 m

200	270	2000	33333	1177	3"	3"	3"						

\* These values may differ slightly from the data provided by compressor manufacturers.

## ■ EXPANSION OF MATERIAL

As the temperature rises and falls, aluminum is subject to expansion and contraction. To compensate for these variables, it is recommended the system be designed to allow for movement.

For small diameters, a flexible hose can be used. For larger diameters, use an expansion kit.

Expansion coefficient:  $13.7 \times 10^{-6}$  inch per inch per °F.

Expansion is calculated as follows:

**C:** Expansion coefficient

**L:** Length of the straight stretch (between two fixed points)

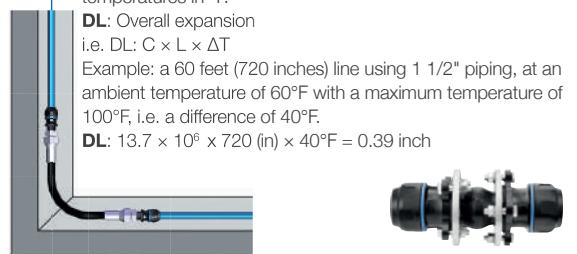

**T:** Difference between the maximum and minimum ambient temperatures in °F.

**DL:** Overall expansion

i.e.  $DL = C \times L \times \Delta T$

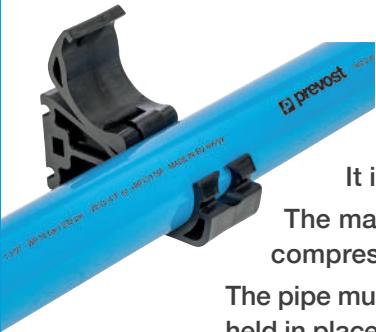

Example: a 60 feet (720 inches) line using 1 1/2" piping, at an ambient temperature of 60°F with a maximum temperature of 100°F, i.e. a difference of 40°F.

**DL:**  $13.7 \times 10^{-6} \times 720 (\text{in}) \times 40^\circ\text{F} = 0.39 \text{ inch}$

# Compressed air network PPS

## Guidelines for network installation

Ideally, the compressor room should be spacious, well ventilated, insulated and separate from the rest of the workshop.

Machines must be connected to the PPS network with flexible hoses to eliminate problems related to vibrations and to allow for maintenance (part numbers LEM).

It is important to install bypasses between each machine, the tank(s) and filters.

The main network should form a loop. For safety reasons, we advise installing the main compressed air pipes at a minimum of 8.2 ft (2.50 m) above floor level.

The pipe must be fastened using an adequate number of sliding clamps so the system is securely held in place, yet allowing for expansion and contraction of the pipe (part numbers PPS1 CL).

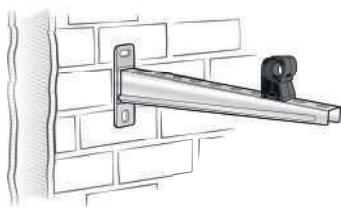

To drain the remaining condensates from the main line, install drops which terminate in an automatic drain trap system.

### ■ MOUNTING THE NETWORK

Mounting options must be selected to best suit the configuration of the workshop.

When installing the network, pipes must be perfectly aligned and mounted to a sturdy surface.

For correct assembly, a 10 ft (3 m) distance should be left between the two clamps.

Mounting bracket is secured to a metal support that is installed directly into a wall

Mounting bracket is installed directly to the wall

Pipe suspended with a thread rod

Cable hung pipe

## Assembly **guidelines**

### TIGHTENING

Hand tighten the nut and then use a torque wrench to the specified recommendations.  
(ref. PPS CLE)

### ASSEMBLY

Unscrew the nut by several turns and then insert the pipe while rotating it slightly until the recommended depth is reached.

### CUTTING

The pipe must be cut perpendicular to its length (ref. PPS CTU)

### CHAMFERING

Chamfering the external edge of the pipe will avoid damages to the seal and inner edge. This will eliminate cutting residue and improve laminar air flow.  
(ref. PPS CH)

### LUBRICANT

The use of an assembly fluid (ref. PPS AL) is recommended to facilitate the assembly.

### MARKING

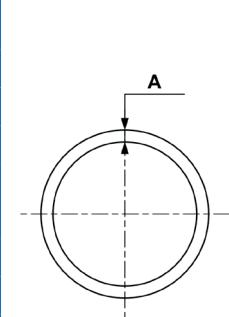

Mark the tube to indicate the insertion depth in the fitting (use the reference marks on the fittings or on the wrench).

## 10

# Mounting decks for network accessories

PREVOST metal mounting decks are an ideal solution for safe and ergonomic work station organization.

## ■ QUICK INSTALLATION AND TIME SAVINGS

The decks are quick and easy to install. Individual items may be pre-assembled on the deck prior to mounting in the final location to reduce on-site installation time.

## ■ MOUNTING SYSTEM WITHOUT DRILLING OR THE USE OF SPECIAL TOOLS

Attached using two or four steel anchors, ensuring compliance with building standards and mechanical properties.

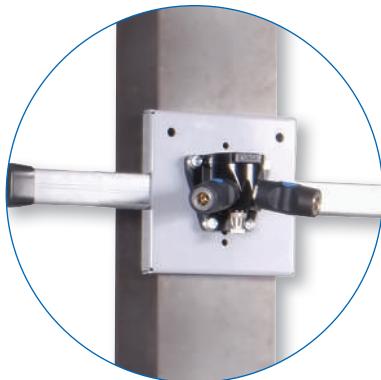

## ■ DECKS CAN BE EASILY REMOVED AND REPOSITIONED

All the screws and nuts necessary to mount PREVOST hose reels and accessories arrive with the kit.

## ■ EASY-TO-USE FOR DAY-TO-DAY OPERATIONS AND PRODUCTIVITY

## Applications

Four pre-drilled deck configurations for a wide range of applications. Each deck can be customized to mount various PREVOST products.

### ■ PLA 2000 - PLA 450

For open or closed-drum automatic hose reels, facilitating the compressed air supply to work station tools:

- Safety during use
- Ease of operation
- Work station efficiency

### ■ PLA 1000 - PLA 225

- **prevoS1** work station wall mounts, for quick and safe connection.
- **ALTO** air preparation assemblies which include: filter, regulator and lubricator to create a high efficiency system to run pneumatic tools and equipment.
- Multi-purpose decks for mounting the following accessories:
  - hose holder
  - blow gun holder
  - bolt holder
  - tool holder

Each deck is supplied with the anchors needed to mount it on a beam, and the fittings needed to mount the work equipment.  
The PLA 225 and PLA 450 decks are supplied with the rails needed to attach them to beams.

Maximum weight on PLA 2000 and PLA 1000: 220 lb

Maximum weight on PLA 225 and PLA 450: 88 lb

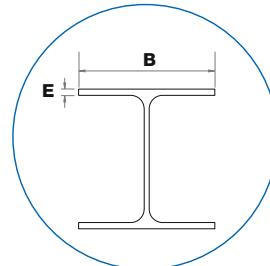

# Mounting decks for network accessories

## Assembly **guidelines**

### ■ ATTACHMENT ON BEAMS

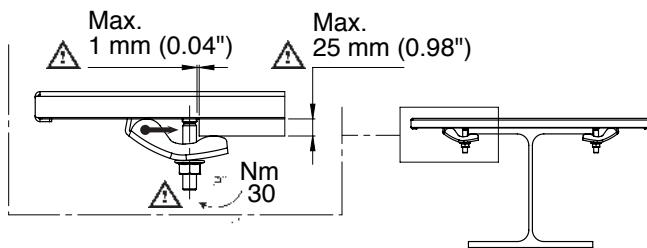

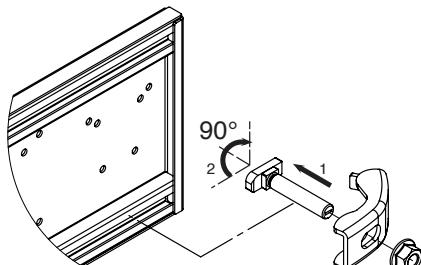

PREVOST decks are fastened to the structural metal beams of the building. Our fastening system using anchors is compatible with IPN and HEA beams with the following dimensions:

- Thickness "E" of beams: 0 to 25 mm (0" to 1") maximum
- Width "B" of beams: 100 to 340 mm (4" to 13") maximum

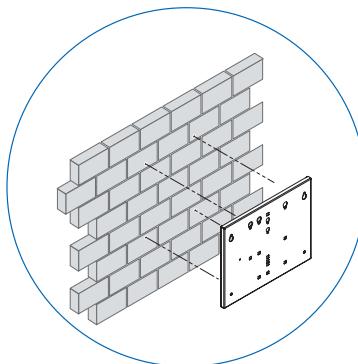

The plates are fastened to metal beams using two or four steel anchors.

- 1 - The anchor screws are positioned in the rails on the rear of the deck.
- 2 - The jaw of each deck is secured to the screw and then tightened to clamp onto the side of the metal beam.
- 3 - The deck is now firmly held in place.

### ■ DIRECT WALL MOUNTING

Conventional installation with screws and wall anchors.

## GRATING FOR ANCHORING TO IPN/HEA BEAM

Includes	Part Numbers
Steel anchors system supplied with: - 1 anchor - 1 M10 screw - L = 50 mm - 1 M10 nut	PLA CR

## KIT OF SCREWS AND NUTS FOR PANEL MOUNTING

Includes	Part Numbers
Kit comprising: - 4 M10x20 screws - 2 M10 nuts - 2 captive M10 nuts	PLA VEGM
Kit comprising: - 2 M8x20 mm screws - 1 M8 nut - 1 captive M8 nut	PLA VEPM
Kit comprising: - 12 M6x20 mm rectangular head screws - 12 M6 nuts for mounting an accessory, a wall fitting and an ALTO assembly	PLA VEAF
Kit of screws and nuts: - 4 M6x20 mm screws - 4 M6 nuts	PLA VEWF

## SIDE RAIL FOR MOUNTING SMALL PLATES ON IPN/HEA BEAMS

Description	Function	Part Numbers
420 mm side rail	Mounting PLA 450 and PLA 225 panels on HEA beams	PLA RA

## WEDGE BLOCK

Includes	Part Numbers
Rubber block diam. 25 mm Supplied with: - 1 M4x25 screw - 1 M4 nut	PLA TC

## HOOK FOR HOSE HOLDER

Description	Part Numbers
Hook for hose holder	PLA HRK

Automatic hose reels are an essential tool to enhance work place organization. They save time and allow hoses to be used safely and efficiently.

Available for the following fluids:

- Compressed air
- Cold water and hot water at high and low pressure
- Oil, grease

## Design

Our extensive research and development process used to manufacture our hose reels guarantees a long- lasting and reliable service life. The technology and high quality materials ensure the reels are durable and resilient.

All PREVOST automatic hose reels comply with the Machinery Directive. The following rules are also applied:

- ISO 12100: "Safety of machinery - General principles for design - Risk assessment and risk reduction"
- ISO 13857: "Safety of machinery - Safety distances to prevent hazard zones being reached by upper and lower limbs".

## Advantages

### ■ RETURN SPRING

The return spring system effortlessly winds the hose back into the reel housing to significantly increase the service life of the hose.

The hose is no longer laying on the ground being exposed to contaminants, damage or creating a tripping hazard.

### ■ CONTROLLED HOSE RETURN SYSTEM

(identified with a yellow stop ball)

The DRFB range features a braked return system to create a safer environment for users and surrounding equipment.

When the hose is released, the brake enables the hose to reel back into the housing gradually and at a controlled speed.

### ■ QUICK COUPLINGS

Air hose reels are paired with a **prevoS1** quick safety coupling which offers hose whip protection and enables de-pressurization and disconnection in one simple push of a button.

The range features various types of couplings:

- 1/4", 3/8" and 1/2" clearance depending on the hose size and the corresponding air flow.
- Various profiles (Industrial, High Flow, Automotive, ARO 210) meeting the needs of international markets.

### ■ BEND RESTRICTOR

With the bend restrictors in place, the hose will not kink at the inlet and outlet connectors. The system is made from a lightweight polyamide and prevents impact damage from hoses. The stainless steel reel range features a stainless steel bend restrictor.

### ■ STOP CATCH

The reel mechanism includes a catch system that locks the hose at the desired length for the operator. This system avoids the user being weighed down by a heavy, awkward length of hose. Pulling on the hose releases the catch which allows the the return spring to automatically wind the hose back into the housing.

### ■ WALL-MOUNTED OR OVERHEAD INSTALLATION

PREVOST hose reels can be mounted on a wall, overhead or installed on a trolley to allow easy access anywhere in the workshop. A conveniently placed reel reduces works space clutter and increases productivity and efficiency.

## ■ SWIVEL OR FIXED MOUNTING BRACKET

All closed drum reels (except DGF) feature swivel mounting brackets allowing the unit to rotate 180°. Open drum reels feature fixed mounting brackets, but can also be fitted with 140° swivel brackets with mounting dimensions identical to those with fixed brackets.

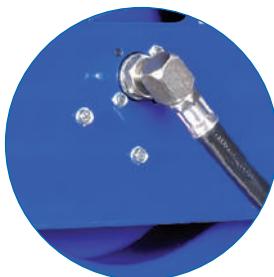

## ■ STOP BALL

The stop ball can easily be adjusted to set the length of the hose and coupling left outside of the housing. Adjusting the stop ball when the hose is in use, is not recommended.

## ■ SUPPLY HOSE

A hose whip with a 360° rotating coupling connects to the supply network and is included with each reel.

## ■ STEEL HOUSING

The housing is made from cold-stamped steel which is then hot galvanized and coated with a UV-resistant polyester powder coating. This technology ensures that housings are durable and offer high corrosion resistance while remaining environmentally friendly.

## ■ STAINLESS STEEL HOUSING

Reels with AISI 304 stainless steel housings can be used in all environments, particularly those where corrosion resistance is important, including the food processing industry, abattoirs, institutional facilities, swimming pools, and so on.

# Polyurethane and polyamide tubing

- Sturdy, flexible tubes
- Excellent coil memory, tube returns to its initial shape
- Pressure and temperature resistance
- Abrasion resistant
- Wide variety of colors to identify circuits

Length markings and labelling every 20 inches

## *Specifications and advantages of* ***polyurethane ester and ether tubing***

- Flexible
- Low bend radius
- Resistant to abrasion and UV radiation
- Thermal stability
- Repels oil and grease

### ■ PU ESTER TUBING

- High mechanical specifications

	Polyurethane ester tubing	
<b>Maximum working pressure at 68°F</b>	int./ext. diam.	Psi
	1.8 x 3 mm	203 psi
	2.5 x 4 mm	145 psi
	3 x 5 mm	159.5 psi
	4 x 6 mm	130.5 psi
	5.5 x 8 mm	116 psi
	7 x 10 mm	116 psi
	8 x 12 mm	130.5 psi
	9.5 x 14 mm	130.5 psi
	11 x 16 mm	130.5 psi
<b>Temperature</b>	4°F to 158°F	
<b>Minimum bend radius at 23°C</b>	In accordance with NF E49-101	
<b>Hardness</b>	52 Shore D	
<b>Tensile strength</b>	40 MPa	
<b>Elongation at break</b>	470 %	
<b>Stress at 100% elongation</b>	16 MPa	
<b>Tear strength</b>	120 N/mm	
<b>Abrasion</b>	35 mm³	
<b>Fire resistance</b>	HB UL94	

# Polyurethane and polyamide tubing

## Pneumatic applications

Supply to pneumatic automation components, piping, industrial circuits.

25 meters - 82 ft. Roll

Polyurethane tubing: 100-meter drums - 328 ft. bulk rolls  
Polyamide tubing: 100, 500 and 1000 ft

## Specifications and advantages of Nylon 12 tube

- Resistance to hydrolysis and chemical substances
- Withstands a wide range of temperatures and pressures
- Durable
- High abrasion resistance

PA 12 polyamide tubing		
Max working pressure at 70°F	Diam. (inch)	Psi
	0.125 x 0.080	420 psi
	0.156 x 0.105	350 psi
	0.188 x 0.138	320 psi
	0.250 x 0.180	290 psi
	0.313 x 0.236	250 psi
	0.375 x 0.275	250 psi
	0.500 x 0.375	240 psi
Temperature	-60°F to +200°F	
Hardness	70 Shore D	

For optimum connection of the tubing in the coupling, the tube should be cut at exactly 90° before inserting it in the coupling. We recommend using a R22CT tube cutter.

### ASSOCIATED PRODUCTS

Push-to-connect fittings. Not suitable for braking circuits

# POLYAMIDE TUBING (NYLON)

Temperature  
- 60°F to +200°F

Construction  
Polyamide PA 12

**Highlight**  
Excellent shape  
memory  
Highly resistant  
to chemicals

# 13 Bulk hose

There are two variables to consider when choosing the proper hose:

- Environmental conditions: Regular or harsh, indoor or outdoor, etc.
- Type of fluid running through the hose: compressed air, lubricated or dry.

To improve working conditions, select a hose that is the proper length, diameter and has the adequate flexibility necessary for job, work station and operator.

## Selecting the correct hose

A range of hoses are available for numerous applications.

### AIRCA

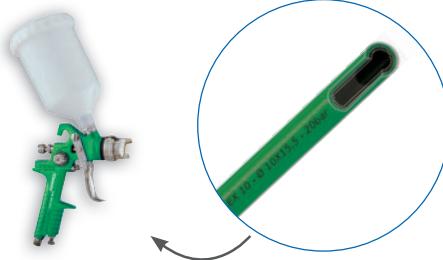

#### Rubber hose

- Inner tube: black, synthetic rubber
- Synthetic fabric braid
- Outer cover: red synthetic rubber
- Flexible with good abrasion resistance
- Excellent dependability
- Applications: supply air to pneumatic tools

### STOFLEX

#### Non-static rubber hose

- Conductivity via hose: electrical resistance  $< 10^6 \Omega/m$
- Inner tube: black synthetic rubber
- Reinforced with synthetic thread
- Outer cover: green synthetic rubber
- Applications: compressed air supply for paint spray guns

### FLEXAIR

#### Polymer hybrid hose

- Combining the best characteristics of PVC and rubber
- Blue PVC inner and outer lining
- Extremely flexible hose with good, high-quality grip
- Light weight
- Applications: air supply for pneumatic tools

### SURFLEX

#### Industrial PVC hose

- Hose with 2 thermoplastic layers
- Light, flexible, resists impacts and compression
- Applications: air supply for pneumatic tools

### ASSOCIATED PRODUCTS

Flexible hoses fitted with safety couplings

## Air hose kits with coupling and plug

- Wide range of air hoses available in an assortment of materials, diameters and lengths
- Couplings are paired with the appropriate hose diameter
- Fully non-scratch product
- Easy and dependable connections
- Arrive ready to use
- Easy to maneuver, move and store

## Types of equipment

### ■ CRIMPED EXTENSION HOSES

- Hose connected to coupling by industrial crimping
- No protruding parts
- Assembly covered by non-scratch coating on the coupling side
- Excellent grip on the hose

### ■ FLEXIBLE HOSES WITH SWIVEL COUPLING

Hoses with a swivel coupling eliminates:

- Twisted hoses
- Downtime due to broken hoses
- Difficult and uncomfortable positions
- Arm and wrist fatigue

They provide the operator with the freedom of movement required for quick, high-quality work.

## Rubber air hoses

Hoses are compatible with lubricated air systems

UAIR 3850FA

### ■ COMPRESSED AIR FLEXIBLE HOSE ASSEMBLY FOR PNEUMATIC TOOLS, WITH AIRCA RUBBER HOSE AND SWIVEL COUPLING

## Rubber air hoses

- COMPRESSED AIR FLEXIBLE HOSE ASSEMBLY FOR PAINT GUNS WITH **STOFLEX** ANTI-STATIC HOSE

ESTO 03850FA

## Hybrid polymer air hoses **for non-lubricated air**

RST RISB3850

- COMPRESSED AIR FLEXIBLE HOSE ASSEMBLY WITH HYBRID PVC **FLEXAIR** HOSE AND **prevoS1** SAFETY QUICK RELEASE COUPLINGS

ISDI 1440

- PVC FLEXIBLE HOSE WITH PROTECTIVE GUARD AND QUICK COUPLINGS

## Water hose with **ELS** automatic water coupling

- WATER HOSE WITH ELS COUPLING WITH SHUTOFF VALVE AND STANDARD PLUG FOR WATER (SHUT-OFF VALVE INCLUDED)

Standard profile

# STOFLEX HOSE EXTENSION WITH QUICK RELEASE COUPLINGS

Operating pressure  
0 to 174 psi

Temperature

## HOSE HOLDER

A (inch)	B (inch)	C (inch)	D (inch)	Includes	Part Numbers
11.496	8.976	5.906	-	Hose holder supplied with: - 1 hook for spray gun - 1 kit of screws and nuts - 2 rubber wedges	<b>PLA HR</b>

## STAINLESS STEEL HOSE HOLDER

A (inch)	B (inch)	C (inch)	D (inch)	Description	Part Numbers
13.976	8.268	6.299	6.299	Wall storage bracket Heavy duty stainkless stainless Suitable for 82 ft. of hose	<b>EHS 25</b>

## *Guaranteed freedom of movement*

In workshops, spiral hoses are a versatile way to supply air to quick couplings, blow guns and other pneumatic tools.

The length of the hose can be adjusted to allow operators to use tools within their work area without being restricted by weight or extra hose length. There is also no risk of twisting.

## **PUS polyurethane** version

### ■ PUS POLYURETHANE SPIRAL HOSE

- Ready to use supplied hoses
- Tapered male Teflon-coated coupling threads for easy and reliable installation
- Nickel-plated brass couplings
- Good elasticity
- Returns to initial position after long-term extension, guaranteed
- Plastic guard for protection against hose breakage at couplings

Fixed coupling on supply side

Ball bearing-mounted swivel coupling on pneumatic tool side:  
effortless rotation even under pressure

### Special polyurethane couplings supplied as spare parts:

- Swivel couplings
- Fixed couplings

For heavy-duty applications, we recommend the use of FF PUS polyurethane spiral hose with fixed couplings on both sides.

## Spiral hoses

### *Blow gun assemblies and **spiral hoses***

#### ■ **BLOW GUN AND SPIRAL HOSE ASSEMBLIES EQUIPPED WITH COUPLING AND PLUG**

Sealed assemblies, ready for use (with or without blow gun).

## Ear clamps

Ear clamps are used to attach hoses made from PVC, rubber and other materials.

- Secure attachment
- Quick and easy assembly
- Wide range of uses
- Economical solution

## ■ TECHNICAL ADVANTAGES

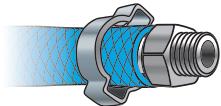

- Shakeproof attachment
- Leak proof
- Corrosion resistance
- Quick and easy to fit
- Sleek appearance
- Thoroughly deburred to avoid any risk of injury
- Usable under a wide range of varying pressures

## ■ INSTALLING AN EAR CLAMP

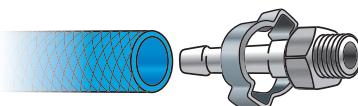

### Selecting a clamp

1. Determine the outside diameter of the hose to be crimped
2. Add 1 mm (0.04")
3. This is the diameter to be selected from the clamp range

### Installing a clamp

1. Position the clamp on the part to be crimped
2. Insert the hose between the clamp and the part
3. Gradually tighten, in 3 successive operations, using pliers (part number SER 02)

### Removing a clamp to modify the installation

Cut the clamp widthwise using a clamp cutter

# Clamping rings

## Solid-band **worm-drive clamps**

### **PBS - PBI** clamps:

- technology perfectly designed to clamp flexible hoses
- are made from high-quality steel

### ■ ADVANTAGES

- High clamping torque
- Reliable and durable
- No risk of loosening
- Constant clamping force
- Preserve the integrity of the hose
- Some corrosion resistance (**PBI**)
- Withstand vibrations

### ■ DESIGN

#### → Material

**PBS** Made from high-quality carbon steel, galvanized with 10 to 14 micron zinc plating

**PBI** Made from 304 stainless steel

#### → Raised edges

The raised edges make it easier to position the clamp and avoid any risk of cutting the hose

#### → Square threads

Tightened via square thread drive. Forged screw threads and indentations on the clamp, to withstand vibrations

#### → Stamped housing

The housings are made from steel tubes, protected by a blue corrosion-resistant coating

## Mini clamps

### PBM

#### ■ APPLICATIONS

- Clamps for thin-walled and small diameter hoses

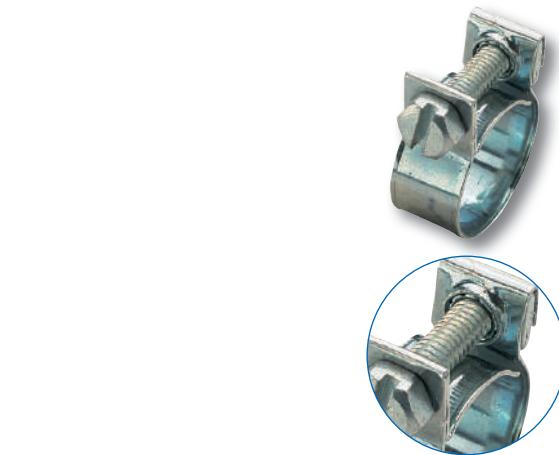

#### ■ ADVANTAGES

- No damage to hoses
- Excellent leaktightness
- Good resistance

#### ■ DESIGN

→ Material  
Galvanized steel

→ Raised edges  
Facilitate clamp positioning and avoid any risk of cutting the hose

#### → Captive nut

The nut stays in place even if the screw is removed.

## Galvanized double-wire clamps

**PF** - Constant spacing double wire system: a cost-effective solution for difficult seals, particularly for smooth adapters.

#### ■ APPLICATIONS

- For rigid and semi-rigid hoses with a cross-section that may not be perfectly cylindrical.
- Air conditioning
- Air ducts

#### ■ DESIGN

→ Material  
Galvanized steel

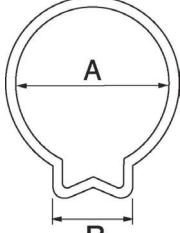

→ Head  
Slotted 8 mm (0.31") hex head

→ Double wire

# WORM-DRIVE CLAMP ACCESSORIES

## CLAMP DISPLAY WITH CLAMPS

Includes	Part Numbers
 <p>244 worm-drive clamps:            - 100 mini type PBM:            10 x PBM 8 / 10 x PBM 9 / 10 x PBM 10 /            10 x PBM 11 / 10 x PBM 12 / 10 x PBM 13 / 10 x PBM 14 / 10 x PBM 15 /            10 x PBM 16 / 10 x PBM 17            - 144 standard PBS:            12 x PBS9 814 / 12 x PBS9 1117 / 12 x PBS9 1320 / 24 x PBS9 1524 /            12 x PBS9 1928 / 12 x PBS9 2232 / 12 x PBS9 2638 / 12 x PBS9 3244 /            12 x PBS9 3850 / 12 x PBS9 4456 / 12 x PBS9 506            - 1 flexible worm driver: PB 3000</p>	<b>DEPANNE 244</b>

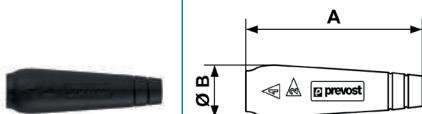

# EAR-CLAMP PROTECTORS

Highlight  
Non scratch

## RUBBER COUPLER PROTECTORS

A (inch)	B (inch)	For tube OD (in)	Part Numbers
3.937	1.161	1/4" - 3/8"	<b>ECP S11417</b>
4.331	1.299	3/8" - 1/2"	<b>ECP S11720</b>

Provides a 100% non-scratch connection between the coupling **prevoS1** and the hose, by covering the ear-clamps

# 17 Balancers

A cable-actuated balancer keeps tools at a desired height to minimize an operators workload and maximize efficiency. An ergonomic work space facilitates user safety and promotes comfort for jobs with repetitive motion.

Balancers can be used on production lines or individual work stations. For example, manufacturing or assembly lines and packaging stations.

## Cable-actuated **balancers**

The choice of balancer depends on the weight of the load to be supported, which must be between the minimum and maximum capacity of the balancer. The balancer position and cable adjustment are defined depending on the size of the work area.

### ■ ADVANTAGES

- Straightforward installation and positioning based on the balancers weight and the desired position relative to the workspace
- Snap hook for safe attachment
- Sturdy aluminum construction
- Durable stainless steel cable
- Various built-in safety systems depending on the model

Balancer model	Load supported (lb)	Cable length (ft)
Series A	0.88 to 6.62 lb	5.25
Series B	4.41 to 17.64 lb	6.56
Series CP	17.64 to 30.87 lb	8.20
Series DP	8.82 to 55.13 lb	6.56
Series F	55.13 to 231.53 lb	6.56

## Balancers with compressed air supply hose

The balancers are equipped with a flexible polyurethane hose which can carry the compressed air and also hold the tool at a specified height.  
Load capacity: 0.88 to 5.51 lb - Hose length : 4.6 ft

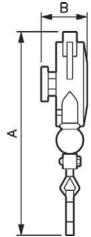

## Balancers with spiral-wound supply hose

SPIRALEX balancers support and provide a compressed air supply to pneumatic tools such as grinders, power screwdrivers, nailers, and so on. They can withstand sudden and quick extension.  
Axial spring system.

# BALANCE REELS WITH STEEL CABLES

## BALANCER: CABLE LENGTH 5.25'

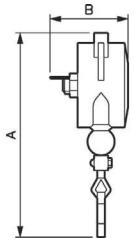

A (inch)	B (inch)	Length (Cable (ft))	Min. load (lb)	Max. load (lb)	Weight (lb)	Part Numbers
11.102	2.165	5.25	0.88	2.21	1.26	<b>BAL 0410A</b>

21.693	5.512	6.56	48.51	55.13	14.40	<b>BAL 220250DP</b>

- Grooved knob adjusts spring tension

- Braking device for positioning the load at different heights

- Brake stops loads from falling if spring suddenly breaks

- Swivel safety hook for ceiling mounting

- Safety cable for ceiling mounting

- Stainless steel cable with special frictionless guide

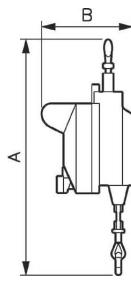

- Cable wound in tapered drum rotating on ball bearings

Temperature  
+41°F to +140°F

Construction  
Body: Aluminum  
Cable: Stainless  
steel

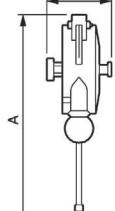

Applications  
Mounting Decks,  
Assembling,  
Packaging

### BALANCER: CABLE LENGTH 6.56'

<ul style="list-style-type: none"> <li>- Polyurethane hose supplies air directly to tools</li> <li>- Grooved knob adjusts spring tension</li> <li>- 1/4" MBSP Teflon-coated male fitting</li> <li>- Max operating pressure: 116 psi at 70°F</li> </ul>								

## TOOL BALancers WITH SPIRAL-WOUND

Temperature  
+41°F to +140°F

Applications  
Mounting decks,  
Assembling,  
Packaging

### RECOILING HOSE BALancers

	Outlet (NPT)	Max length (ft)	Weight (Weight of tool(lb))	Part Numbers
	1/4" MNPT	2.1	0.44 to 1.10	<b>SPI 1251</b>
	1/4" MNPT	3.5	1.54 to 4.41	<b>SPI 3251</b>
	1/4" MNPT	4.8	5.51 to 11.03	<b>SPI 5252</b>
	3/8" MNPT	4.7	13.23 to 22.05	<b>SPI 7252</b>

The **prevoS1** blow gun is compact and comfortable to use. The blow gun is equipped with an integrated PREVOST plug which is compatible with all major connection profile standards.

The plug connects directly into a **prevoS1** safety coupling to become a comfortable handle for the blow gun.

## ■ USE

- Fluid: compressed air
- Applications: blowing, dust removal, cleaning and drying of tools and work stations
- Industries of use: industrial, automotive, wood working, etc.

## ■ TECHNICAL SPECIFICATIONS

- Maximum working pressure: 174 psi
- Recommended pressure: 100 psi
- Operating temperature range: +5°F to +158°F

## ■ SAFETY

- Extra safety with the **prevoS1** quick couplings

## ■ CONSTRUCTION

- Body and lever: polyamide composite
- Seals: nitrile
- Valves: polyacetal (POM)
- Plug: nitrided steel, scratch and corrosion resistant

All materials are compliant with the RoHS directive and REACH regulations.

## ■ EASY TO USE

- Ergonomics and design intended to facilitate the user's work
- Compact design allows for comfortable handling and easy storage
- High-tech composite body material: tough yet lightweight and insulated so the tool remains at a comfortable working temperature

## Models

The range of the **prevoS1** blow guns includes:

- **prevoS1** standard blow guns

IBG 06OSH

IBG 06MTL

IBG 06MTLH

IBG 06ECR

IBG 06PRE

IBG 06SIL

- **prevoS1** pocket blow guns

IPG 06OSH

Each blow gun is equipped with a built-in plug; various profiles are available for each type:

Industrial

High Flow

ISO 6150 C

ARO 210

Automotive

British

The plug is built into the body of the blow gun, for a more compact design and to eliminate the risk of leaks when connecting the tool to the compressed air supply.

Available packaged for retail, self service displays. Please call your Regional Sales Manager for details.

# Blow guns prevoS1

## ■ ENERGY SAVINGS

- Low air consumption
- No risk of leaks, thanks to the plug directly embedded in the blow gun

## ■ PERFORMANCE

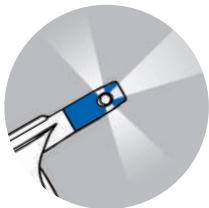

- Powerful and precise blowing

## ■ EXTENDED SERVICE LIFE

- Robust design and construction for a long service life
- Hermetically sealed to prevent internal contamination from external elements.

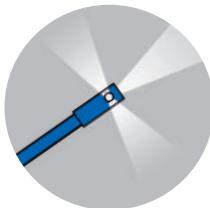

## Nozzle types

### OSHA nozzle

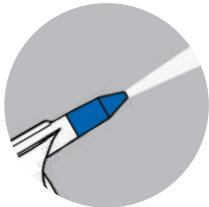

- Material: polyamide composite
- Characteristics: blow gun complying with OSHA directive 1910.242 (b), outlet pressure limited to 2 bar (30 psi)
- Complies with **OSHA**
- **Anti-scratch** tip prevents damage to surrounding equipment

### MTL OSHA nozzle

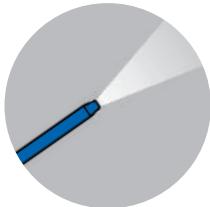

- Material: galvanized steel
- Characteristics: long and narrow nozzle, powerful blowing
- Complies with **OSHA**

### PRE nozzle

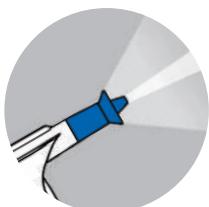

- Material: polyamide composite
- Characteristics: standard blow gun, direct, concentrated jet
- **Anti-scratch** tip prevents damage to surrounding equipment

### MTL nozzle

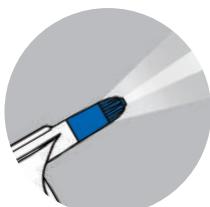

- Material: galvanized steel
- Characteristics: blow gun with long tapered metal nozzle

### ECR nozzle

- Material: polyamide composite
- Characteristics: air screen blow gun, protects against dust and chippings
- **Anti-scratch** tip prevents damage to surrounding equipment

### SIL nozzle

- Material: polyamide composite
- Characteristics: silent blow gun (74dB) limits noise in workshop
- Complies with **OSHA**
- **Anti-scratch** tip prevents damage to surrounding equipment

Nozzle model	Air consumption (cfm) at 90 psi	Noise level (dBA) at 90 psi	Blowing force (OzF) at 90 psi	Dynamic pressure (psi) at 0.39 in at 87 psi
<b>OSHA</b>	7.7	87	9.2	14
<b>MTL</b>	11.8	89	13.8	32
<b>MTL OSHA</b>	7.7	85	8.7	33

<b>SIL</b>	5.5	74	5.8	2.9
<b>OSHA pocket</b>	8.2	89	5.9	7.2

## Accessories

### ■ WALL MOUNT BRACKET

- Blow gun wall mount bracket allows the gun to be removed quickly and safely without damaging the mount or the gun
- Compatible with the **prevoS1** and **27202** ranges of blow guns
- Attachment spacing: 70 mm (2.76 in)

Wall mounting bracket			
A (in)	B (in)	C (in)	Part Numbers

# 27202 blow guns

The **27202** model blow gun provides an accurate flow of air that can be controlled progressively from light blowing to a more powerful jet.

## Applications

- Blowing to eliminate shavings and debris
- Dust removal
- Cleaning machines, work benches/stations and hard to access areas
- Drying production parts

## Advantages

### ■ DESIGN

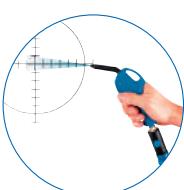

- High-tech composite material: tough, non-scratch, insulated and non-slip
- Air intake connection with brass insert for total safety
- Hermetically sealed design to prevent any infiltration of external elements that might block the mechanism

- Smooth shape to avoid dust and filings settling on the blow gun body and trigger

### ■ EASY TO HANDLE

- Smooth trigger action for precise flow rate control and a progressive opening to the compressed air system
- The ergonomic design of the blow gun fits perfectly in the hand.

The **27202** blow gun can be mounted on a wall:

- hang by the trigger or the ring incorporated in the body,
- or using the BG FIX mount specially designed for **prevoS1** and **27202** blow guns

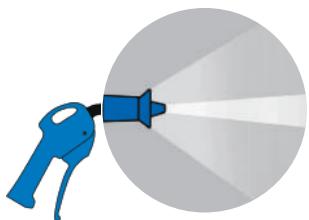

\* BG FIX and BG FIXM is not compatible with pocket model blow guns

The BG FIX wall mount simplifies storage and enables the blow gun to be gripped easily without damaging the mount or the gun. The blow gun can be removed from the mount simply by pulling it, without needing to lift it as would be the case with a hook.

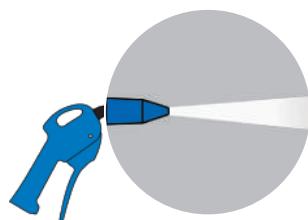

Magnetic version available (BG FIXM)

## Nozzle options

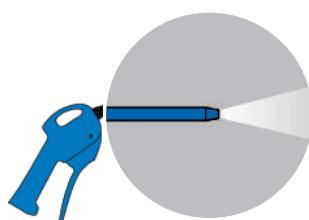

### 27202 ECR

- Air screen blow gun, protects against backflow of dust and shavings.
- Anti-scratch tip prevents damage to surrounding equipment.

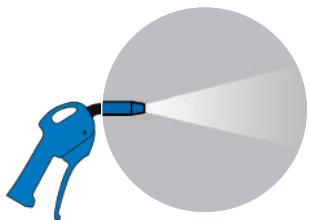

### 27202 PRE

- Standard blow gun, direct and concentrated air jet.
- Anti-scratch tip prevents damage to surrounding equipment.

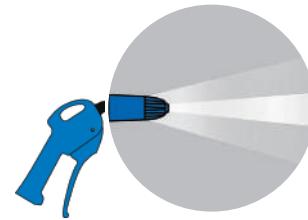

### 27202 MTL + MB13 + MB20

- Blow gun with long, tapered metal nozzle.

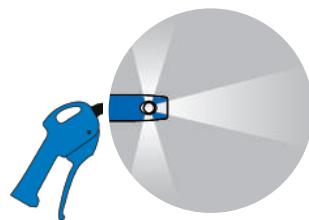

### 27202 MB40 OSH

- Blow gun compliant with OSHA: outlet pressure restricted to 30 psi (2 bar).
- Nozzle length: 40" galvanized metal

### 27202 SIL

- Silent blow gun: 77 dB, for reduced workshop noise
- OSHA: outlet pressure restricted to 30 psi (2 bar).
- Anti-scratch tip prevents damage to surrounding equipment.

### 27202 OSH + MTL OSHA

#### + MB OSHA

- Blow gun compliant with OSHA: outlet pressure restricted to 30 psi (2 bar).
- Anti-scratch tip prevents damage to surrounding equipment.

# Blow guns, assemblies and pneumatic vacuum cleaners

## *Blow gun assemblies*

Blow gun assemblies consist of a spiral hose fitted with a blow gun. They are delivered packaged and ready to use.

Two versions are available:

- 1 - Assemblies with quick coupling for disconnecting the blow gun
- 2 - Assemblies with spiral hose and blow gun fitted

## *Pneumatic vacuum cleaners*

### ■ “ASPIVENT” ASVM1

#### ALUMINUM PNEUMATIC VACUUM CLEANERS

- Portable vacuum gun designed to suck up dust, shavings, manufacturing residue, etc., wherever the tool is connected.
- The vacuum kit consists of: a vacuum cleaner, fabric collection bag, air hose, suction nozzle, brush, discharge hose and extended nozzle.
- It is delivered ready for use.

# "ASPIVENT" VACUUM CLEANER KIT

## DUST BAG KIT

Includes	Part Numbers
- 1 cloth dust bag - 1 clamp	<b>ASVM 301</b>

## NOZZLE KIT

Includes	Part Numbers
- 1 round nozzle - 1 flat nozzle - 1 brush nozzle - 1 tiny nozzle	<b>ASVM 302</b>

## HOSE KIT

Includes	Part Numbers
- 1 clamp - 1 air hose	<b>ASVM 303</b>

# Wash down guns

## *Multiple applications*

### ■ INDUSTRIAL

Used for cleaning equipment, tanks, floors, and walls in food processing and packaging facilities (dairies, abattoirs, breweries, canneries, etc.) and any other industry which requires frequent sanitation or washing down and any other industry which requires frequent sanitation or cleaning.

PL JET

### ■ AUTOMOTIVE

Washing bodywork, cleaning chassis, accessories, machinery, etc. in garages, body shops, public works, farms, etc.

### ■ INSTITUTIONAL APPLICATIONS

For sanitizing superstores, restaurants, schools, public buildings, parks, etc.

### ■ PUBLIC WORKS

Road cleaning and water supply: pavements, pedestrian streets, pools, fountains, public gardens, flower beds, etc.

## *PL JET industrial washing spray gun*

### ■ ERGONOMICS

- The guard prevents any unintentional handling. The body, lever and guard have a polyamide coating for thermal insulation and impact protection.
- It offers an excellent grip, enabling steady work without causing fatigue.
- The progressive control lever can be used to vary the jet shape from a wide conical spray to a powerful, concentrated straight jet.
- The hook can be used to hold the trigger open for extended use.

### ■ DESIGN

- The water flow rate is adjustable via a screw at the rear of the gun, enabling the flow to be reduced for lower water consumption.
- The mechanism is straightforward and secure. The double seal on the needle provides complete leaktightness.
- The rounded shape of the body and handle prevent the build-up of dirt and facilitate maintenance.
- The three extremities have a rubber coating to prevent any risk of scratches to delicate surfaces.

## Wash down guns

### ■ PL JETI STAINLESS STEEL VERSION

Anti-corrosive

- Recommended for food industry and dockside use  
(salty and aggressive environments)

# ALTO

## air treatment units

### Filtration and regulation of compressed air

**Treatment of compressed air is essential:** to protect pneumatic tools, achieve professional quality work and lower maintenance costs. By ensuring air is free of dust, oil and liquid water, **ALTO** units extend the service life of pneumatic tools and guarantee they operate efficiently.

### The range

**ALTO** treatment units are available as modules (filter, regulator, lubricator, filter-regulator) or as a complete unit. They arrive fully assembled and packaged with a pressure gauge and wall mounting brackets. They cover a range of sizes from 1/8" to 1" threads.

Range	Thread
ALTO 1	1/4" FNPT
ALTO 2	3/8" FNPT
ALTO 3	1/2" FNPT
ALTO 4	3/4" FNPT - 1" FNPT

### ■ ALTO FILTER

**ALTO** filters eliminate contaminants (particles, water and oil) from compressed air using a sintered bronze thread or borosilicate which traps solid and liquid particles as the air passes through it.

These contaminants are collected in the tank.

- **Filtration**

**ALTO** filters offer 95% separation of water, oil and solid particles greater than or equal to the filtration threshold size.

- **Drain valve**

A manual drain opens the bottom of the tank when the drain button is pressed, thereby evacuating the accumulated contaminants. The ALTO 1 to 4 ranges may be equipped with an automatic float drain as an option.

- **Bowl**

The tank is attached via a locking bayonet fitting for the **ALTO 2**, **ALTO 3** and **ALTO 4** units. **ALTO 1** units feature a thread tank.

The tank is available in 2 versions:

- Polycarbonate bowls with metal protectors for **ALTO 1, 2, 3 & 4**,
- Completely metal bowls for **ALTO 3HP**.

Filtration threshold				
Range	40 µ	25 µ	5 µ	0.01 µ
ALTO 1		X	X	X
ALTO 2		X	X	
ALTO 3		X	X	X
ALTO 3HP	X			
ALTO 4		X		

# ALTO air treatment units

## ■ ALTO REGULATOR

**ALTO** regulators enable the pressure to be adjusted to suit usage. A membrane and spring ensure a constant outlet pressure corresponding to the chosen value. They protect pneumatic tools from excess pressure and cut unnecessary energy consumption. Regulators are equipped with a progressive membrane. The pressure is set via a control valve.

Pressure gauge connection:

- 1/8" FBSP for **ALTO 1**, **ALTO 2** and **ALTO 3**
- 1/4" FBSP for **ALTO 4**

The filter-regulator module combines the filter and regulator functions in a single module.

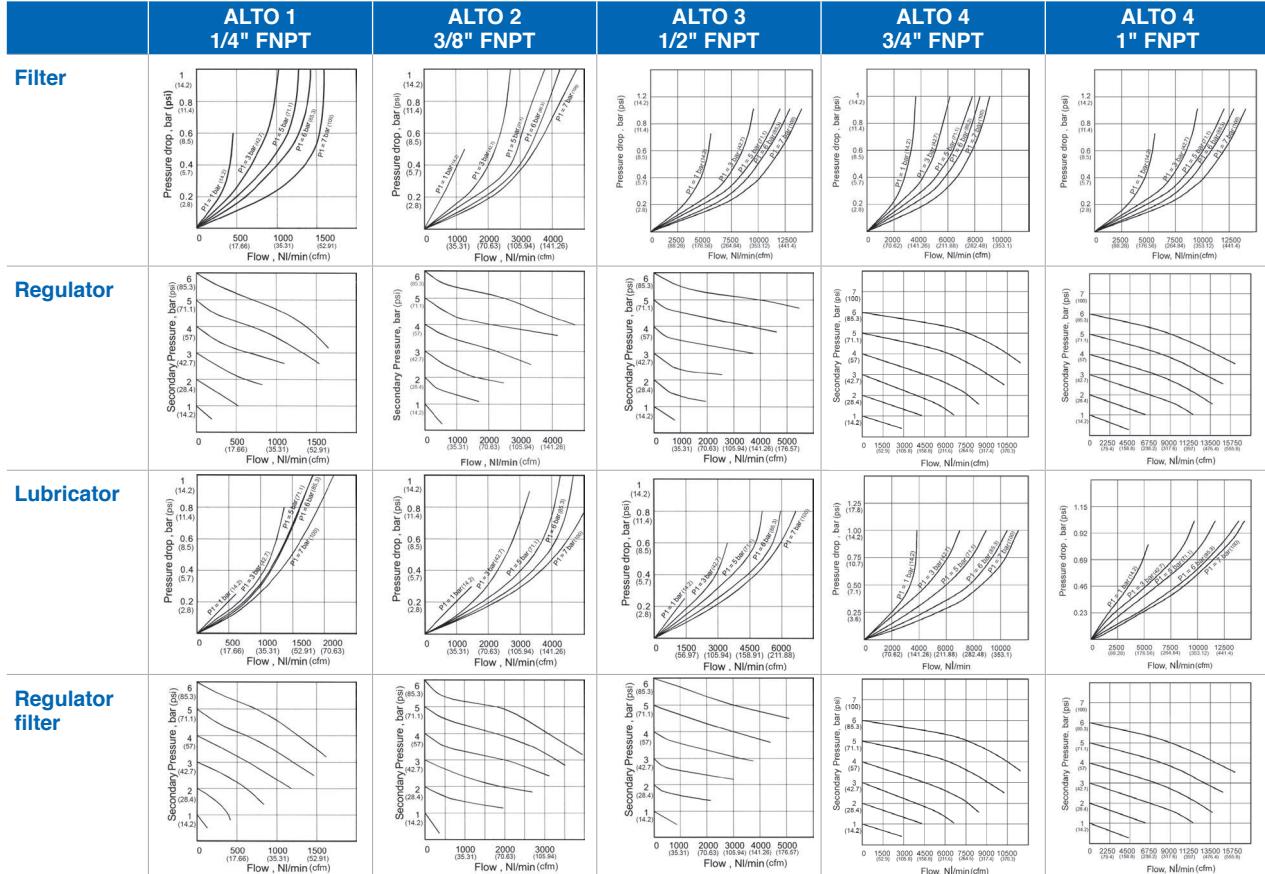

## ■ ALTO LUBRICATOR

**ALTO** oil mist lubricators protect your pneumatic tools by injecting a precisely dosed amount of fine lubricant into the filtered air. Lubrication reduces friction between moving parts, avoids seizure, protects against corrosion, and absorbs and evacuates heat energy. The action of ALTO lubricators extends the service life and the efficiency of pneumatic tools.

The oil flow is adjusted via a cone-point set screw, thereby controlling the amount of lubricant diffused into the pipework. Recommended oil: ISO VG32 (part number LUB 3256). The oil tank can be filled during use. The tank is attached via a locking bayonet fitting for the **ALTO 2**, **ALTO 3** and **ALTO 4** units. **ALTO 1** units feature a threaded tank.

## ■ FLOW RATE GRAPHS

## ■ ALTO AIR TREATMENT MODULES AND ASSEMBLIES

The **ALTO** range offers a wide range of flow rates. From 1/4" FNPT threads to units with 1" FNPT threads (pneumatic tools, pneumatic cylinders, blowing, inflation, paintwork, etc.).

### SPECIAL FILTER-REGULATOR FOR PAINT APPLICATIONS

A two-unit **ALTO 3** assembly includes a prefilter-regulator, with 5 µm filtration, a micro-filter with 0.01 µm filtration, and a pressure gauge with glass screen compatible with solvents, is available for oil-free applications. Efficiency: 99.999%

# ALTO air treatment units

## ■ PRESSURE GAUGES

A pressure gauge is an essential tool for checking the correct operation of a circuit. PREVOST offers various models, to be selected depending on the application (pressure ranges, threads, shapes, solvent resistance, etc.) and thread positions (rear or 6 h).

## ■ ALTO SPACER

The spacer is an additional module, placed upstream of the lubricator, that provides four non-lubricated dry air tappings. It is assembled in the same way as other modules. A single **ALTO** unit can be used to supply several applications, only some of which require lubrication. This option is available on **ALTO 1**, **ALTO 2** and **ALTO 3** units.

The spacer has two vertical outlets and two horizontal outlets. The outlets are threaded, as follows:

- 1/4" FNPT for **ALTO 1**
- 3/8" FNPT for **ALTO 2**
- 1/2" FNPT for **ALTO 3**

Each outlet has a cylindrical male cap with gasket and hex socket drive.

For wall mounted units, use a wall mounting plate and network connection kit (part number **TC...** is recommended).

## ■ AIR TREATMENT ASSEMBLIES ON FRAMES

The frame enables compressed air to be treated immediately adjacent to work stations in workshops. The air is filtered with the same efficiency as in a conventional workshop with fixed work stations

**Advantages:** three versions available, depending on the application:

- **PTC.** Dry air version for paint booths and oil-free applications – 5 µm pre-filtration, 0.01 µm micro-filtration.
- **PTE.** Dry and lubricated air version for workshops with pneumatic tools and dry air needs – 25 µm filtration – use of pneumatic tools and dry air needs for blowing, inflation, etc.

### Optional

- **Kit of four casters, part number PT RL.** Assembled on the frame, enables easy transfer from one point of use to another.
- **One wall bracket, part number PT K.** Enables the frame to be hung on a wall when needed.

## Easy **to use**

### ■ MODULAR CONSTRUCTION

An assortment of easy to assemble accessories are available which quickly mount and connect to the network. They are compatible with all **ALTO 1**, **ALTO 2**, **ALTO 3** and **ALTO 4** units.

- **Assembly**

Assembly kit – part number TA M  
One kit to assemble two modules  
Two kits are needed to assemble three modules

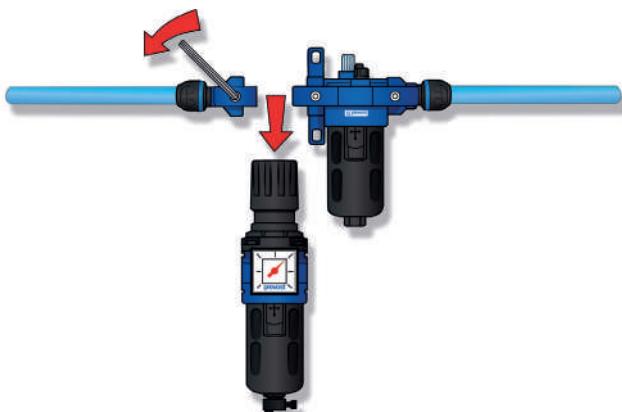

- **Assembly and wall mounting**

Assembly kit with wall mounting plate - part number TA S  
One kit to assemble two modules  
Two kits to assemble three modules

- **Wall mounting brackets**

for filter or lubricator – part number TP or for regulator and filter-regulator – part number TR

- **Quick connection to the pipe network**

Quick connection kit – TC P

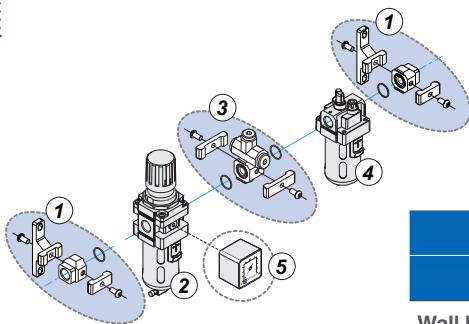

- **Quick connection and wall mounting**

Wall mounting quick connection kit – TC S

The quick connection kit enables units to be installed and removed without affecting the air piping system.

## Submicron filters for compressed AIR

**MICRO AIR** filters eliminate harmful agents in compressed air like solid particles, liquid particles and oil aerosols. With a filtration efficiency greater than **99.99%**, they guarantee high quality air with very little pressure loss.

### ■ IMPORTANT POINTS

- Deliver the level of filtration required for quality professional work.
- Extend the service life of the filter cartridges.
- Reduce pressure losses.
- Easy installation and maintenance.

### ■ HIGH-QUALITY FILTER MEDIA

The filter element consists of several components:

- The **pleated** main medium is made of HEPA-grade borosilicate glass microfiber and has a **filtration surface area 4.5 times larger than the one of conventional media**.
- Compared with conventional elements, it reduces pressure losses by 50% and offers 96% more retention capacity.
- The bowl guard is made of stainless steel.
- The polymer needle felt drainage sleeve ensures **complete coalescence** and is **highly resistant to compressor oils**.

### ■ EASY FILTER CARTRIDGE REPLACEMENT

- The nitrile gasket between the screw-on bowl and the end cap resists even the most aggressive chemicals.
- The shoulder inside the end cap prevents rotation and the insertion of elements of other shapes.
- Maximum safety: an audible alarm sounds if an attempt is made to remove the bowl under pressure.
- The molded aluminum housing and filter head are protected by a two-layer coating.

*The combination of oil, dust and water in compressed air is extremely corrosive.  
These contaminants can damage air systems and pneumatic tools, and adversely affect the quality of work.*

## ■ PATENTED VENTURI FILTER ELEMENT

- Specially designed nesting system allows turbulence free air to easily flow in and out of the filter.
  - **Smother air flows**
  - **Steady flow rate**
  - **Reduced pressure loss**
- The element rests inside the filter head.
- The nitrile seal guarantees an airtight push-fit connection, even when subjected to temperature variations or vibrations.
- The unique reinforced glass fiber end cap is color coded for easy identification of the element grade.
  - **White:** 1 µm filtration
  - **Green:** 0.01 µm filtration
  - **Black:** activated carbon

## ■ HIGH-ACCURACY PRESSURE GAUGES FITTED AS STANDARD

The pressure gauge indicates pressure loss and allows at-a-glance filter element condition checks. The needle moves to the red area when the filter element is completely clogged and requires changing (pressure loss equivalent to at least 6 psi).

- **MPI 1** clogging indicator for 1/4" FNPT to 3/4" FNPT models
- **MPI 2** differential pressure gauge for 1" FNPT to 3" FNPT models

## ■ EFFICIENT AUTOMATIC CONDENSATE DRAINS

- **MPD** automatic float drain on 1/4" FNPT to 2" FNPT models  
Bowl bottom port: female 1/8" FNPT

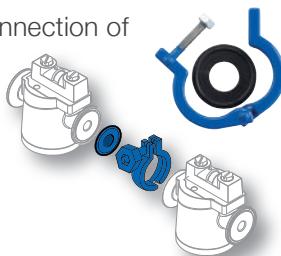

- **MPD X3** electric drain with capacitive sensor for 1/2" FNPT to 3" FNPT models  
Bowl bottom port: female 1/2" FNPT  
Allows condensates to drain without any loss of compressed air

## ■ QUICK ASSEMBLY AND FASTENING

### • MPA assembly clamp

- Ensures quick, easy connection of filters in series
- Nitrile side gaskets guarantee leak free performance

### • MPK wall bracket

- Quick and easy wall mounting of filter modules - One bracket required for one filter - Two brackets required for two or more filters

### • MTS 103 adapter for quick assembly

- MTS 103 adapters, installed on a filter using MPA assembly clamps, provide a leak proof attachment between the filter and the network.

- The adapters have a 1/2" FNPT thread on the network side and are compatible with filter sizes from 1/4" FNPT to 1/2" FNPT

Assemblies	MPA assemblies	MPK brackets
<b>1/4" FNPT, 3/8" FNPT, 1/2" FNPT</b>	MPA 1	MPK 1
<b>3/4" FNPT, 1" FNPT</b>	MPA 2	MPK 2
<b>1 1/2" FNPT, 2" FNPT</b>	MPA 3	MPK 3
<b>2 1/2" FNPT, 3" FNPT</b>	MPA 4	MPK 4

\*Liquid particles of 0.01 µm to 5 µm - Oil inlet concentration: 10 mg/m³

- The **Micro Air** line is tested and certified to **ISO 12500**.
- The stated values were measured in accordance with **ISO 12500 (parts 1, 2 and 3)**
- The air quality classes are those defined in **ISO 8573-1:2009**.

### Correction factors:

The treated flow rates stated for the **MFM**, **MFB** and **MFC** ranges are for a system pressure of 101 psi. The correction factors to be applied for different pressures are given in the table below.

<b>Pressure (psi/bar)</b>	<b>psig</b>	20	30	40	60	80	100	120	150	200	250
	<b>barg</b>	1.4	2.1	2.8	4.1	5.5	6.9	8.3	10.3	13.8	17.2
<b>Correction factor</b>		0.30	0.39	0.48	0.65	0.82	1.00	1.17	1.43	1.87	2.31

## ■ MFM FILTERS

### Mechanical micron filtration

The filter removes suspended particles, traps them in the filter media and directs them into the bowl to be drained.

- Automatic float drain on 1/4" FNPT to 2" FNPT models
- Electric drain with capacitive sensor on 2 1/2" FNPT to 3" FNPT models

3/4" FNPT to 1" FNPT  
models

### MFM filter (1 µm):

- Traps all liquid and solid particles equal to or larger than 1µm.
- Removes over 99.999% of solid particles and over 80% of suspended oils.
- Ensures a residual oil content of less than 2 mg per m<sup>3</sup> at 68°F and at atmospheric pressure. Oil concentration 0.5 ppm
- Quality classes
  - Particles: Class 2
  - Oil: Class 4

### MFM microfilter applications

- Primary filter at the head-end of the system
- Post-filtration for adsorption dryers (dust filter)
- Prefiltration for submicron filters

## ■ APPLICATIONS

Typical standard workshops

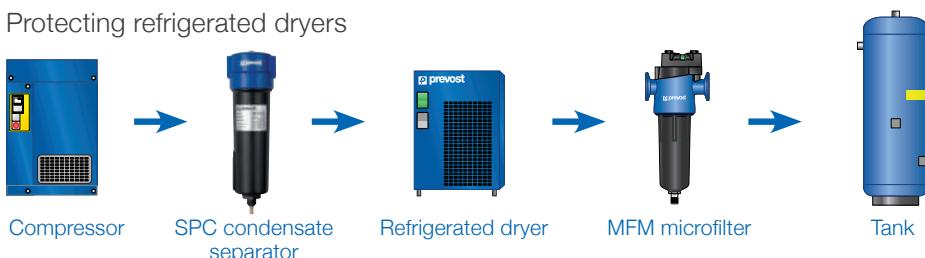

Standard small industry and auto repair workshops

# MICRO AIR filters

## ■ APPLICATIONS

Protecting refrigerated dryers

## ■ MFB FILTERS

### Submicron coalescing filtration

Coalescing filtration consists of two phases.

- In the first phase, contaminants are mechanically separated and solid particles of a particular size are trapped.
- In the second phase, molecules of oil and water suspended in the air flow are mixed together, or coalesced. This coalescence phase takes place in the sleeve, which discharges the mixture to the drain at the bottom of the filter.

- Automatic float drain on 1/4" FNPT to 2" FNPT models
- Electric drain with capacitive sensor on 2 1/2" FNPT to 3" FNPT models

#### MFB submicron filter (0.01 µm):

- Traps all liquid and solid particles larger than 0.01µm.
- Removes over 99.999% of solid particles and over 99.9% of suspended oils.
- Ensures a residual oil content of less than 0.01 mg per m<sup>3</sup> at 68°F and at atmospheric pressure. Oil concentration 0.01 ppm
- Quality classes:
  - Particles: Class 1
  - Oil: Class 1

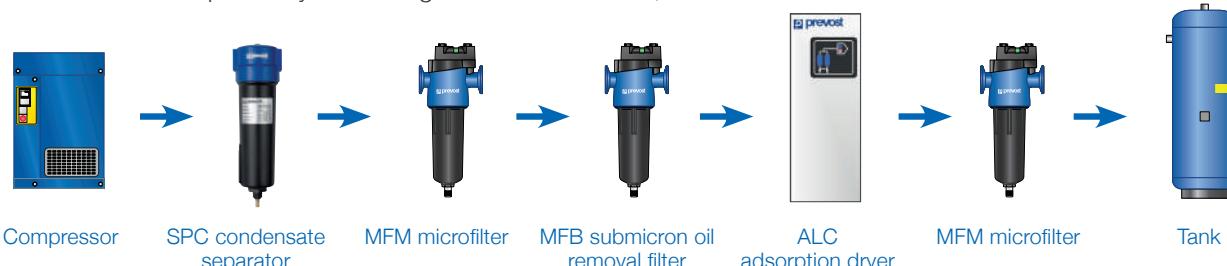

Model  
3/4" FNPT to 1" FNPT

#### MFB submicron filter applications:

- Prefilter for membrane dryers
- Prefilter for activated carbon filters
- Prefilter for adsorption dryers
- Breathing air purification systems

## ■ APPLICATIONS

Protection of adsorption dryers/Storage of air free of dust, water and oil

## ■ MFC FILTERS

### Activated carbon filtration

The activated carbon in the cartridge absorbs odors.

#### MFC filter:

- Traps solid particles larger than 0.01 µm.
- Ensures a residual oil content of less than 0.004 mg per m<sup>3</sup> (oil vapor) at 68°F and at atmospheric pressure. Oil concentration 0.003 ppm
- Eliminates odors carried by the air flow
- Quality classes:
  - Particles: Class 1
  - Oil: Class 1

Model  
3/4" FNPT to 1" FNPT

A submicron coalescence prefilter must be fitted upstream of the activated carbon filter.

The activated carbon filter element must be changed when the submicron prefilter element is changed.

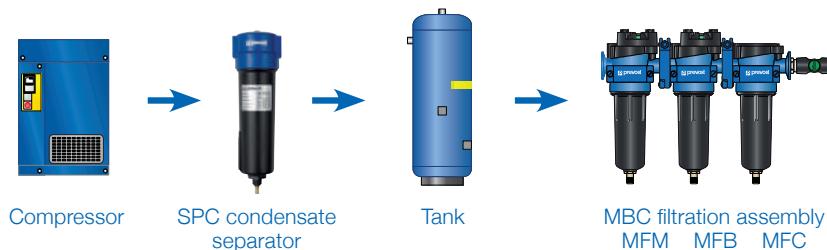

This filter does not remove methane, carbon monoxide, carbon dioxide and other toxic gases and vapors.

#### MFC activated carbon filter applications

- Contact with food products
- Contact with pharmaceutical products
- Air used for technical and testing purposes
- Air used for paint spraying (HVLP)
- Breathing air purification systems

## ■ APPLICATIONS

Paint and body shops

## Special filtration systems for paint booth applications: MBR - MBC - MBCR

For a high quality paint finish air must be free of dust, oil and silicone.

### SPECIAL FILTRATION ASSEMBLIES FOR WATER-BASED PAINT SPRAY GUNS

- Excellent filtration for high-quality paint finishes
- Contaminants flushed out by automatic float drain
- Items delivered in kit:
  - wall bracket
  - air outlet quick couplings

Depending on the model:

- pressure regulator with pressure gauge
- activated carbon filter

**MBR**

The regulator adjusts the pressure supplied to the gun. It is fitted with a pressure gauge with a glass dial for protection against damage from solvents or other diluents.

New, water based paints are highly sensitive to contaminants such as water, oil vapor and fine dust. Activated carbon filters are the best treatment for these contaminants and will reduce amounts to residual levels of 0.004 mg/m<sup>3</sup> air.

**MBCR**

**MBC**

#### Assemblies with prevoS1 couplings:

- Anti-static
- Non-scratch
- Lightweight, high flow
- Silicone-free
- Anti-hose whip
- ATEX

Available with the following profiles:

##### Industrial

##### High Flow

##### Automotive

To avoid any risk of contamination between the filters and the spray guns, install the **MBR** and **MBCR** filtration assemblies as close to paint booths as possible. They may be installed directly inside paint booths

# Separators and drain systems

## Separators

Condensates collected by filtration or separation within the air network should be released quickly and effectively to avoid contaminants in the system that negatively affect the air tools.

Drains offer an effective solution for releasing waste.

The type of drain used is dependent on the scale of the network, the location to be equipped and the accessibility of the air line.

It is essential to install drains for effective compressed air filtration.

A properly equipped network will efficiently power pneumatic tools and enhance work performance.

# Separators and **drain systems**

## 1 Automatic drain cyclone separator **SPC**

### ■ LOCATION

Compressor outlet, tank outlet, prefilter for refrigerated dryers or submicron filters.

### ■ OPERATION

The cyclone separator is designed for the efficient separation and elimination of the largest solid particles as well as water droplets in compressed air.

Inside the tank, a fin system drives the compressed air in a rotational movement.

Particulate matter is projected against the walls of the tank, under the effect of centrifugal force, then guided towards the base.

Condensates are then drained via the automatic float drain.

### ■ ADVANTAGES

- Dual action: separation and discharge.
- Possible high inlet temperature.
- Sturdy construction.
- Advantages of float drains.
- Cost-effective and dependable operation.

### ■ TECHNICAL SPECIFICATIONS

Applications for flow rates from 91 to 753 cfm and for all industries.

Operating pressure ..... 0 to 232 psi

Temperature ..... +34°F to 149°F

Body construction ..... Anodized aluminum

External coating ... Polyester-based epoxy paint

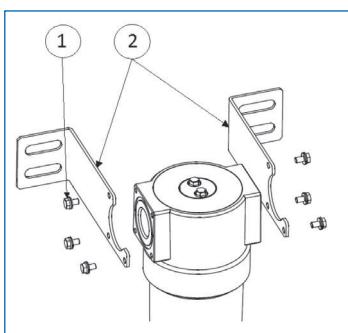

Tank gasket material ..... NBR

Cyclone component ..... PA6 30% glass fiber, steel

Separation: Greater than 98% at nominal flow rate and at 100 psi, temperature 68°F, particle size from 10 µm to 60 µm.

Classification according to ISO 8573-1

Water: Class 8

Optional: wall mounting kit,  
part number SPC K

## 2 Magnetic float drain - PMA 201T

### ■ LOCATION

Low points, filter tanks of all kinds.

### ■ OPERATION

Condensates are automatically drained via a magnetic valve.  
When a certain water level is reached, the float opens the magnetic valve.  
Once the water has been discharged, the float falls and closes the valve.

### ■ ADVANTAGES

- No loss of compressed air
- No electrical power supply
- No adjustment
- Servicing limited to simple cleaning
- High discharge capacity
- Corrosion-resistant aluminum body
- No risk of condensates forming an emulsion

### ■ TECHNICAL SPECIFICATIONS

Inlet connection .....	1/2" FNPT
Outlet connection .....	1/8" FNPT
Max. working temp. ....	122°F
Min. working temp. ....	37°F
Max. operating temperature .....	212°F
Max. operating pressure .....	232 psi
Clearance .....	0.08"
Body material:	corrosion-resistant aluminum

## 3 Electromagnetic drain valve - PDE 100T

### ■ LOCATION

Dryers, separators, low points on networks

### ■ OPERATION

When the level of contaminants reaches a certain height within the bowl, the drain float reaches its top position and sends a magnetic pulse to the control valve (electrical control) which opens, draining the condensates without any loss of compressed air. The outlet closes once draining is complete.

### ■ ADVANTAGES

- No loss of compressed air and no turbulence during condensate draining.
- Treatment of condensates for decantation.

The PDE 100 drain is supplied with a male/male equal union and a pushfit fitting for connection of an 8 mm (0.31") polyamide tube (allows immediate connection of a drain hose).

### ■ TECHNICAL SPECIFICATIONS

Air inlet connection: .	1/2" FNPT male coupling
Condensate drain connection:.....	
Push-fit fitting .....	for 8 mm (0.31") polyurethane or polyamide tubing
Temperature .....	36°F to 140°F
Operating pressure .....	3 to 232 psi
Power supply voltage...	230 V AC (50/60 Hz)
Protection rating .....	IP 65
Discharge capacity .....	1.35 gal/h

# Separators and **drain systems**

## 4 Timed electric drain - TEMP

### ■ LOCATION

Low points, compressor tanks, dryers, separators, filters.

### ■ OPERATION

Equipped with a timer and a solenoid valve, the timed electric drains open and discharge accumulated contaminants based on an adjustable time switch.

### ■ ADVANTAGES

**Depending on the degree of contamination and humidity in the atmosphere:**

- Choice of drain valve opening time
- Choice of drain valve opening frequency
- Compact assembly
- Can be integrated in all positions at all points of use

### ■ TECHNICAL SPECIFICATIONS

Interval duration .....	0.5 - 45 minutes
Discharge time .....	0.5 - 10 seconds
Voltage options .....	24 - 240 V AC/DC ..... 50-60 Hz ( $\pm$ 10%)
Timer housing .....	.ABS plastic FR classified
Connection .....	DIN 43650A / ISO 4400
Indicators .....	LED (yellow) ON/OFF
Valve type .....	2/2 - directly controlled
Max. pressure .....	232 psi
Min./max. temp.....	35°F to 134°F ambient
Max. fluid temperature .....	194°F
Brass solenoid valve, port .....	5/32"
Coil insulation .....	Degree -H
Environmental protection .....	IP65

## 5 Float drain - PAM 203

### ■ LOCATION

Low points, line ends.

### ■ OPERATION

Depending on the water level in the drain bowl, the float raises and opens the bowl. Once the condensates have drained, the float lowers and closes the port.

### ■ ADVANTAGES

- Automatic, standalone drain
- No loss of compressed air
- Discharge of impure water (oil)
- Sturdy construction

### ■ TECHNICAL SPECIFICATIONS

Min./max. working pressures .....	29 to 174 psi
Min./max. temperature .....	35°F to 136°F
Inlet connection .....	1/2" FNPT
Drain outlet .....	5/16"
Bowl capacity .....	4 Oz
Bowl and cover material .....	Zinc
Max. temperature .....	212°F
Clearance .....	0.08"

# A

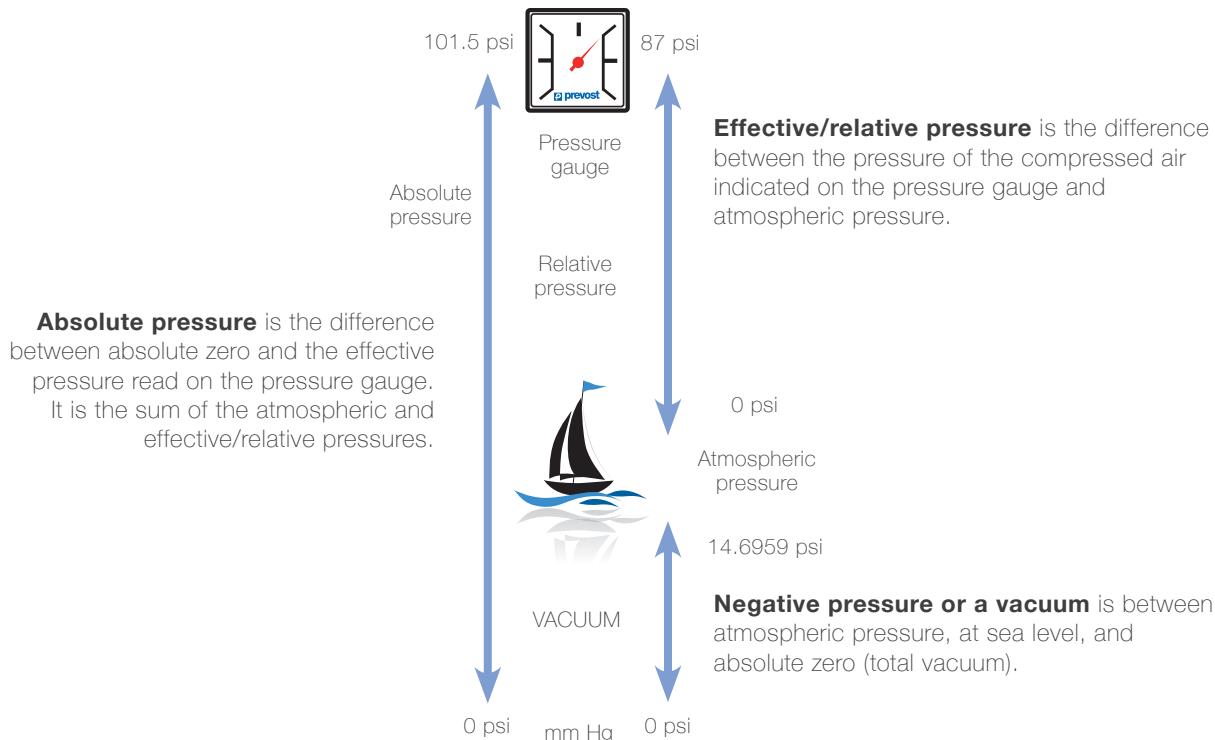

# Compressed air

## ■ WHAT IS COMPRESSED AIR?

The compression of air generates a transformation determined by the laws of thermodynamics. Boyle's law states that if a volume of gas (air) is reduced by compression, the pressure increases proportionally.

## ■ THE DIFFERENT LEVELS OF PRESSURE

# Compressed air

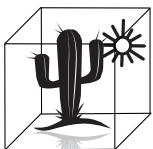

## ■ WHAT IS THE DEW POINT?

A given amount of air has a certain holding capacity for water vapor. After the holding capacity is reached, the additional water begins to condense and form a liquid. As temperatures increase, the holding capacity increases and more water can be held in the air as vapor. When temperatures decrease, the water will condense and form liquid.

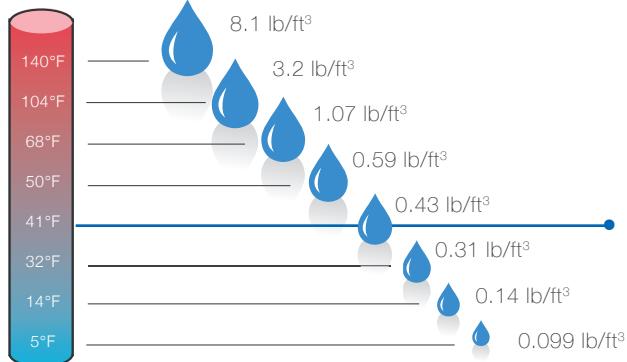

At 5°F, 1 ft<sup>3</sup> of air at atmospheric pressure can hold  $0.099 \times 10^{-3}$  lb/ft<sup>3</sup> of water vapor, any excess amount will condense.

Example: At the North Pole, the air is dry because the water it contained froze at ground level. This is **condensation**.

At 140°F, 1 ft<sup>3</sup> of air at atmospheric pressure can hold  $8.1 \times 10^{-3}$  lb/ft<sup>3</sup> of water vapor. After that point, any excess will evaporate.

Example: In the desert, the air is so hot and dry it can hold an excessive amount of water. This is called **evaporation**.

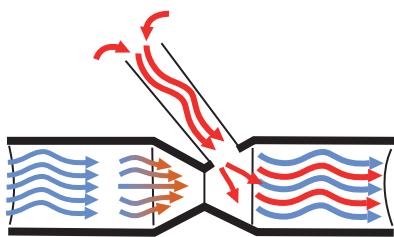

The **dew point** is when the air becomes saturated with water and droplets begin to condense and form a liquid.

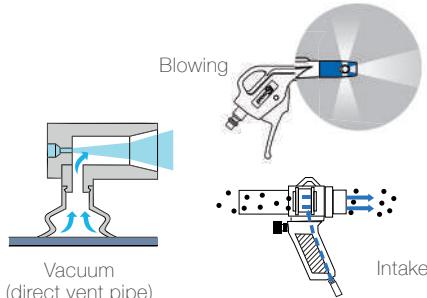

- Maximum quantity of water (59 °F) vapor that cannot be contained in 1 ft<sup>3</sup> of air at atmospheric pressure and with 100% relative humidity.

## ■ WHAT IS THE VENTURI EFFECT?

The **Venturi effect** named after Italian physicist Giovanni Battista Venturi, is a fluid dynamics phenomenon where the movement of gas or liquid particles accelerates due to a reduction of the size of the pipe through which it is traveling. The Bernoulli principle helps to explain this effect: if the fluid flow rate is constant and the diameter is reduced, the speed then increases which creates a decrease in pressure.

**Venturi effect:** at the outlet from the constriction, the acceleration of the air creates a decrease in pressure. The pressure drop pulls in external air and is added to the original air flow. The additional air is supplied via a lateral pipe.

In pneumatics, the **Venturi effect** is used to increase blowing, generate a vacuum or draw in dust from the environment.

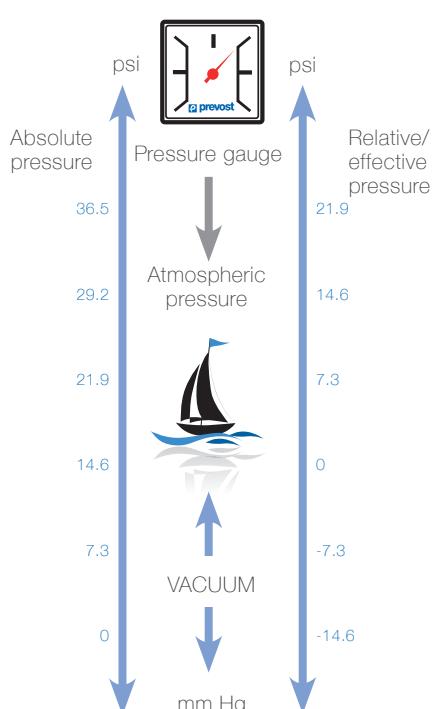

## ■ WHAT IS A VACUUM?

**When air becomes thin or less dense, it forms a vacuum. By removing air from an enclosed space, a negative pressure (or vacuum) is created relative to the atmospheric pressure.**

The level of vacuum can be expressed as:

- Level of negative pressure as a relative pressure value, in relation to the atmospheric pressure
- Level of vacuum as an absolute value (defined relative to absolute zero)

The standard unit used for a vacuum is the millimeter of mercury (mm Hg). A vacuum is commonly expressed in mbar or as a percentage.

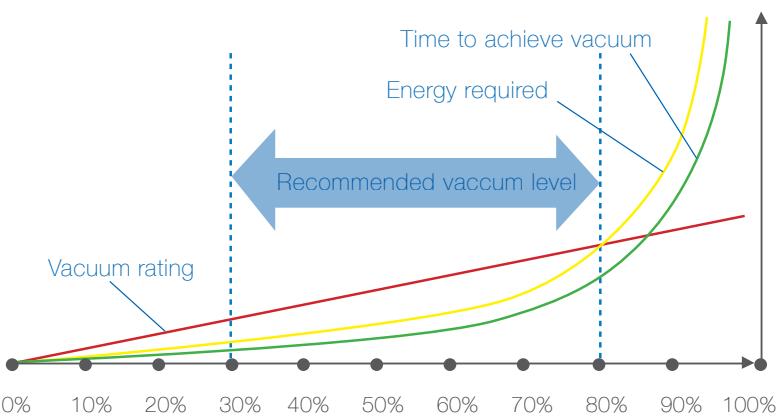

mm Hg	vacuum	mm Hg
750	0 %	0
675	10 %	75
600	20 %	150
525	30 %	225
450	40 %	300
375	50 %	375
300	60 %	450
225	70 %	525
150	80 %	600
75	90 %	675
0	100 %	750

Absolute pressure      Relative/effective pressure

The table above shows the correlation between pressures expressed in bar or mbar and the vacuum as a percentage.

**Note:** The relative or effective pressure corresponds to the reading on the pressure gauge, located on the tool or machine.

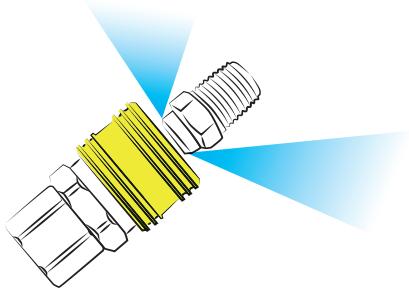

There is a tendency to think that the greater the vacuum, the better the result. However, the cost-efficiency ratio must also be taken into account. In doing so, it is determined that the best results are achieved when the vacuum is between 30% and 80%. In general, these are the values applied in the industrial sector.

# Compressed air

## ■ HOW MUCH DOES A COMPRESSED AIR LEAK COST?

Compressed air pressure in psi	Leak in cfm	Diameter of leak in inch					
		0.02	0.04	0.08	0.12	0.16	0.20
15	0.12	0.47	2.00	4.53	8.59	15.18	
90	0.41	1.82	8.47	19.12	34.00	53.12	
100	0.59	2.41	9.71	21.88	38.88	60.71	
120	0.71	2.71	10.94	24.59	43.71	68.29	
150	0.76	3.06	12.12	27.29	48.59	75.88	
175	0.82	3.35	13.35	30.60	53.41	83.47	
200	1.00	3.94	15.76	35.53	63.12	98.65	

One leaking coupling represents on average an opening of 0.02 inch

At 100 psi, this corresponds to a leak of 0.59 cfm

The energy cost of 100 cfm of compressed air is 0.008 USD

For 1 hour = 0.008 USD

For 8 hours = 0.064 USD

For 24 hours = 0.20 USD

**For 1 year = 70.98 USD**

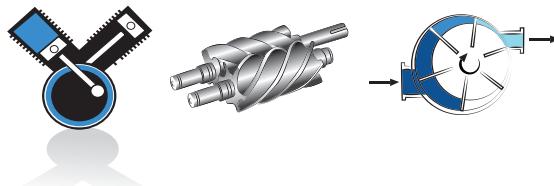

# Compressed air networks

## ■ NETWORK DESIGN CHECKLIST

The topics below must be considered during an initial site visit for a new installation or network.

### COMPRESSOR(S)

- Piston, screw, vane or other
- Power (HP)
- Pressure (psi)
- One or several compressors
- If several, working together or separately?
- Age of compressor(s)

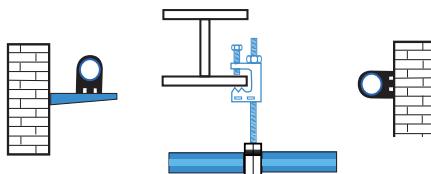

### ACTIVITY

- Business area or industry
- Number of operators using the network
- Future plans to expand workforce
- Type of pneumatic applications being used

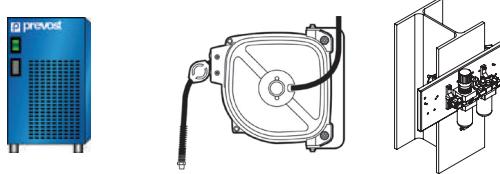

### BUILDING

- Length of the main line (on site or on diagram)
- Type of bracket
- Hard to access areas
- Maximum ambient temperature
- Minimum ambient temperature
- Plans to expand the building, thus increasing the network

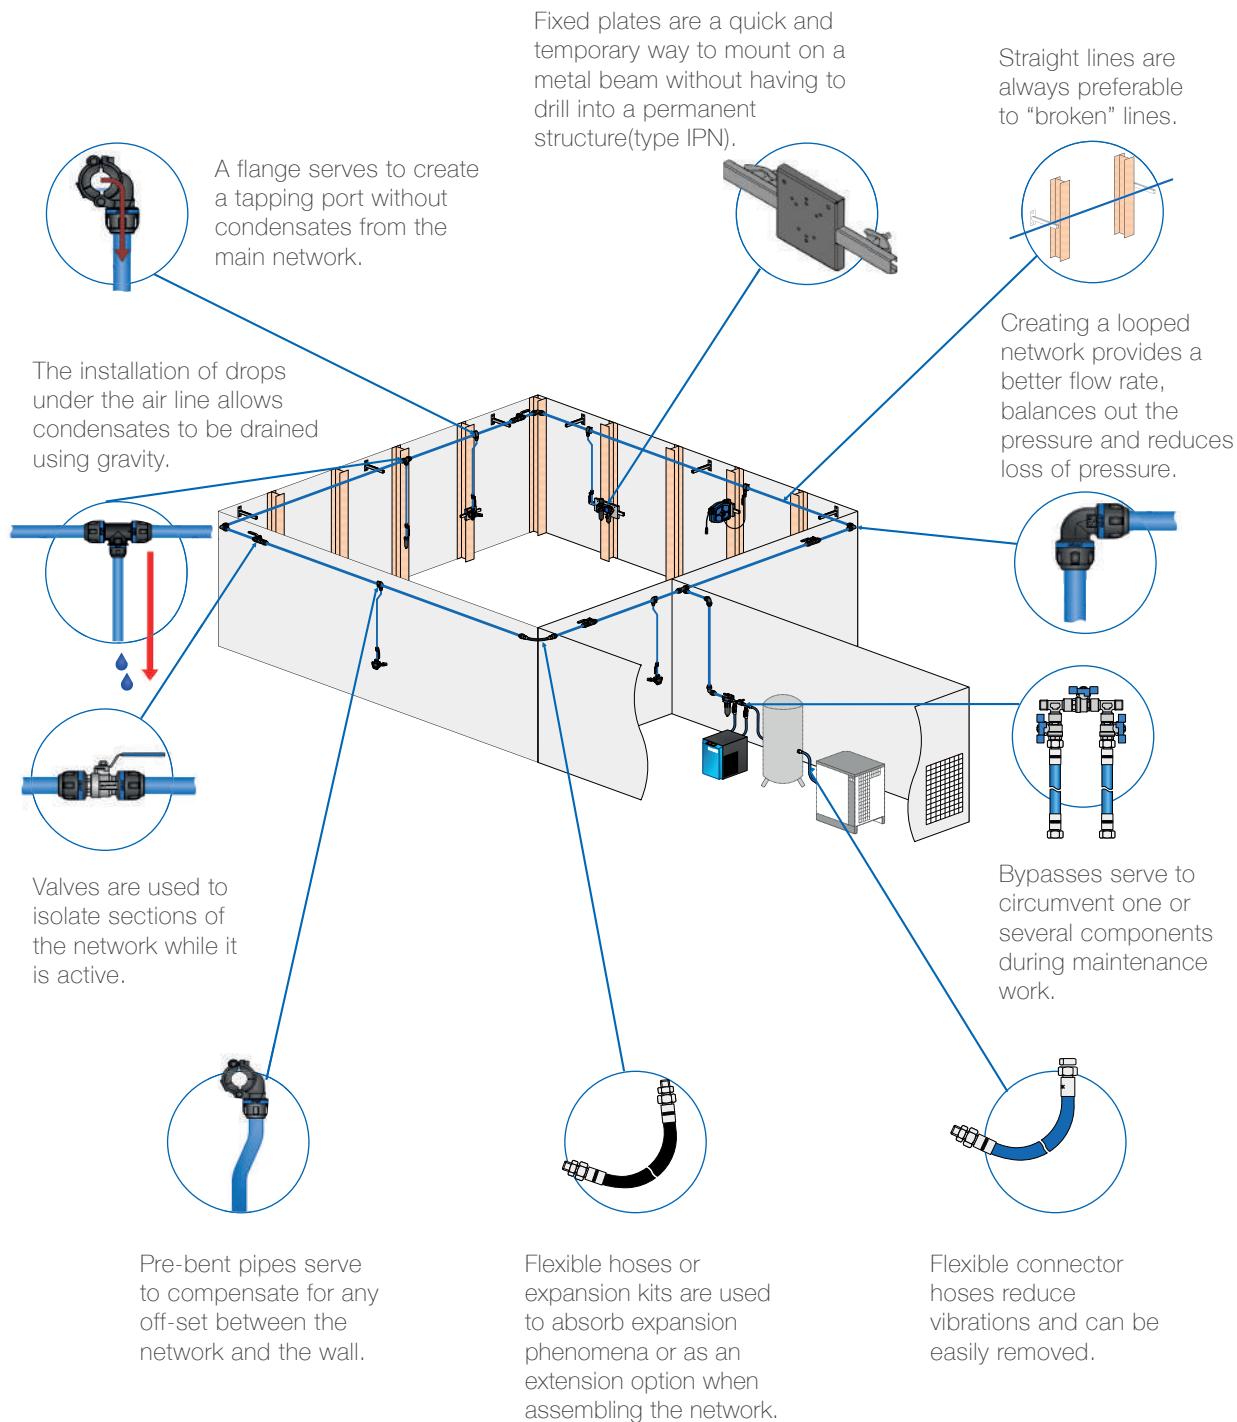

### OPTIONS

- Dryers
- Hose reels
- Plates
- Additional accessories

# Compressed air networks

## ■ GUIDELINES FOR INSTALLING A PREVOST COMPRESSED AIR NETWORK

## ■ PIPE SELECTION FOR COMPRESSED AIR NETWORKS

Before undertaking any compressed air network calculations, you must first choose the type of pipe material.

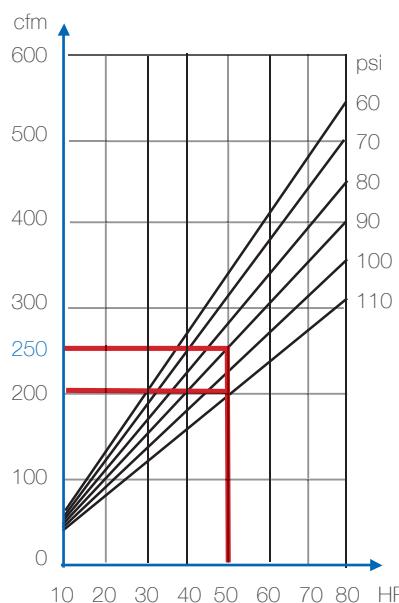

Advantages and/or disadvantages for each type of material

	Steel	Galvanized Steel	Copper	Alu	Stainless Steel (SST)
Air quality	■	■	■	■	■
Pressure loss	■	■	■	■	■
Fast installation	■	■	■	■	■
Easy installation	■	■	■	■	■
Installation tools	■	■	■	■	■
Disassembly	■	■	■	■	■

Anti-corrosive	■	■	■	■	■
Fire resistance	■	■	■	■	■
Crush proof	■	■	■	■	■
Standardized color	■	■	■	■	■

■ Not recommended ■ Acceptable ■ Recommended

## ■ COMPRESSOR FLOW RATE CALCULATIONS

To calculate the flow rate of a compressor, multiply the motor power rating in kW by 10. This gives the air flow in m<sup>3</sup>/h (at 100 psi).

### Example:

A 50 HP compressor produces a flow rate of 50 cfm at 90 psi.

Note that the greater the pressure, the lower the flow rate.

The same compressor produces a flow rate of less than 200 cfm at 110 psi.

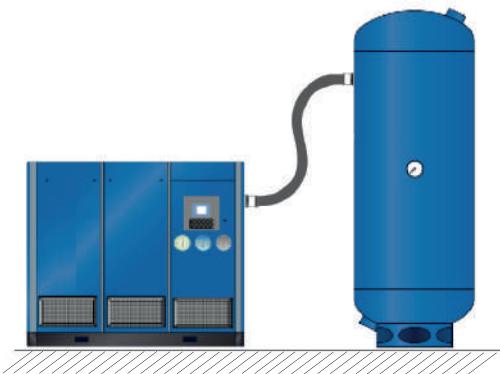

$$\text{HP} \times 4.5 = \text{cfm}$$

Low pressure is a common problem in air systems but increasing the pressure is not the solution. Often times, the network design is the problem. A few reasons why low pressure occurs is: the pipe diameter is too small, too many elbows, pipes are clogged by rust, network not looped, etc. (See *Flow rates and pressure loss*).

# Compressed air networks

## ■ DETERMINING TANK VOLUME

If the tank is too big, the compressor is operating infrequently and for longer time frames.

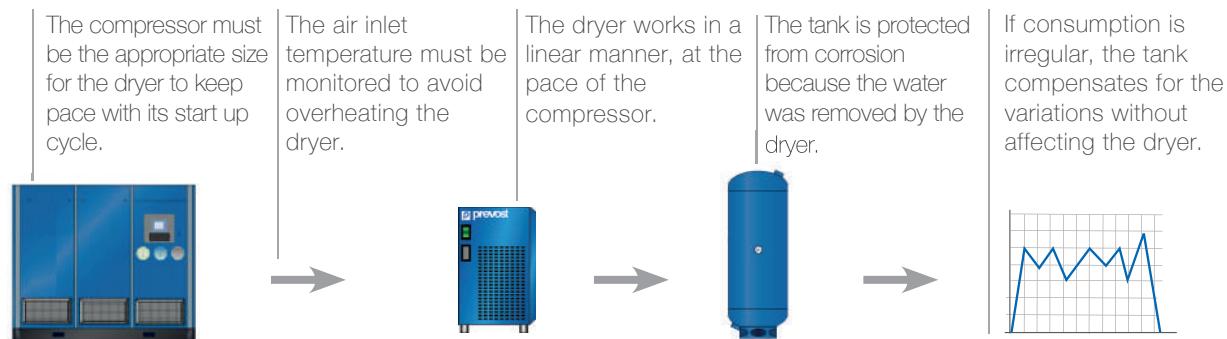

If the tank is too small, the compressor will operate more frequently and for shorter time frames.

Compressor power kW/Cv	*Air flow from compressor		*Recommended tank volume		
	cfm	m <sup>3</sup> /h	cu ft	gal	l
<b>18/25</b>	106	180	11	80	300
<b>30/40</b>	206	350	16	120	500
<b>45/60</b>	294	500	32	240	900
<b>75/100</b>	441	750	53	400	1250
<b>90/125</b>	589	900	53	400	1500
<b>132/175</b>	883	1500	88	660	2500
<b>160/215</b>	1030	1750	88	660	3000
<b>200/270</b>	1177	2000	142	1060	3500

\*These values may differ slightly from the data provided by compressor manufacturers.

## ■ WHERE SHOULD A DRYER BE INSTALLED?

### Dryer located upstream of the tank

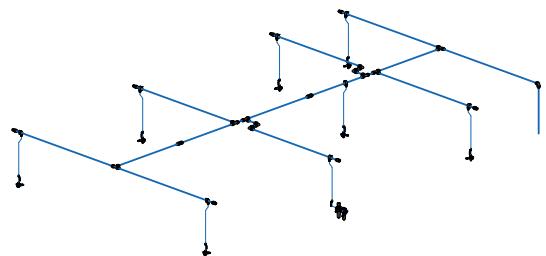

### Dryer located downstream of the tank

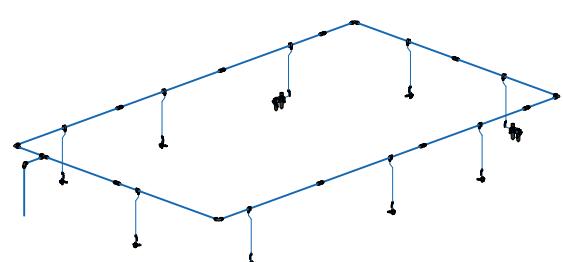

## ■ TYPES OF COMPRESSED AIR PIPING NETWORK

### Bypass network

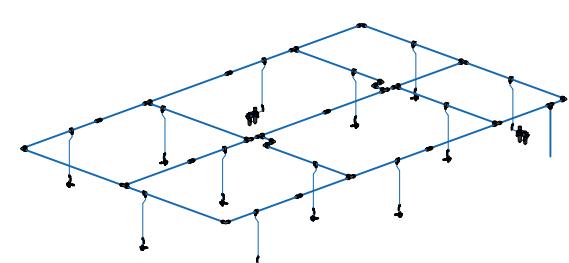

- The main line must be long to achieve adequate air flow.
- Drops must also have a larger diameter due to their greater length.
- No possibility of isolating a section.

### Looped network

- Provides equivalent air flow and pressure at all points in the network.
- Smaller sections of pipe are required.
- Opportunity to isolate a section using valves.
- Recommended system for all industry applications.

### Crossed network (meshed)

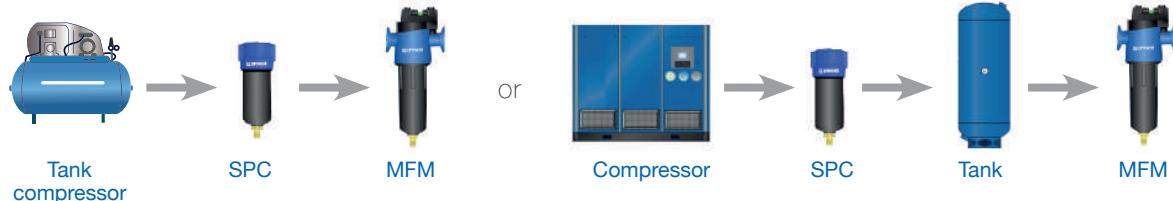

- Provides equivalent air flow and pressure at all points in the network.
- Smaller sections of pipe are required.
- Opportunity to isolate a section using valves.
- Recommended for large companies.

## C

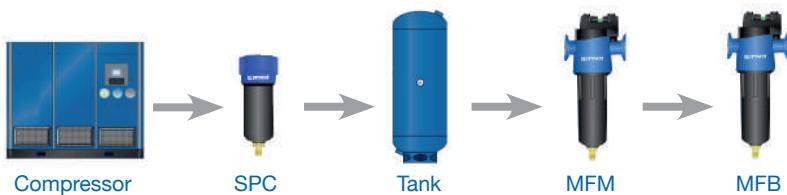

# Air treatment & filtration

## ■ EXAMPLES OF AIR TREATMENT SYSTEMS

**Conventional applications:** Automotive garages / Small industry / Craft workshops / Standard workshops

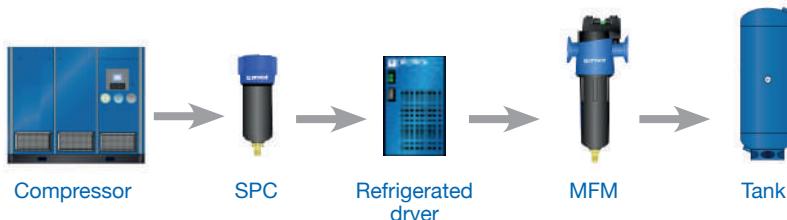

**"Oil-free" applications:** Painting / Varnishing / Printing / Measurements

**"Clean air" applications:** Breathable air / Water-based paints / Food industries  
Medical sector / Pharmaceuticals

**Refrigerated dryer applications:** All industries / All dry air bodywork shops

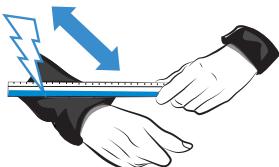

**Adsorption dryer applications:** Very dry air industries / Very low ambient temperatures

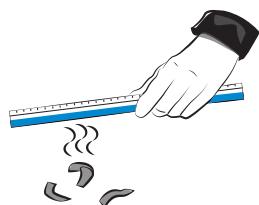

**SPC:** Cyclonic Separator - **MFM:** 1 µm filter - **MFB:** coalescence filter 0.01 µm - **MFC:** Active coal filter

# Painting applications

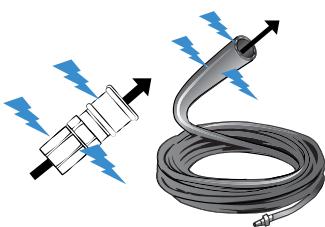

## ■ CREATION OF STATIC ELECTRICITY IN COMPRESSED AIR

When a plastic ruler is rubbed on a piece of fabric, the ruler is gradually charged with static electricity.

When charged with static electricity, the ruler will attract small pieces of paper scattered around it.

The same phenomenon applies to compressed air when it circulates under pressure in a coupling or hose.

In bodywork shops, the electrically charged compressed air in the spray gun mixes with the paint, which, once applied to the sheet metal, will attract dust from the surrounding environment.

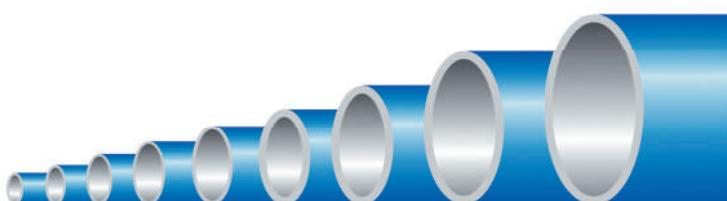

In painting facilities, dust in the air is attracted to static electricity and will stick to freshly painted surfaces. Rectifying this means re-doing the entire painting process, resulting in an overall loss for the bodyshop operator. The use of a special anti-static hose is essential in order to avoid this type of problem.

# Pipe diameter

The **Nominal Diameters (DN)** differ from the actual **Outer Diameters** of the pipes. Several different thicknesses may be available for the same DN: DN is equivalent to NPS (Nominal Pipe Size) in the ASME (American) standards expressed in inches. The various thicknesses are set out in the EN 10220 European standard (in this except, DNs greater than 700 are not included).

Nominal Diameter		Outer Diameter (in)
Ø in millimeters (DN)	Ø in inches (NPS)	ASME standard pipes
6	1/8"	0.405"
8	1/4"	0.540"
12	3/8"	0.675"
15	1/2"	0.840"
20	3/4"	1.050"
25	1"	1.315"
32	1 1/4"	1.660"
40	1 1/2"	1.900"
50	2"	2.375"
65	2 1/2"	2.875"
80	3"	3.500"
90	3 1/2"	4.000"
100	4"	4.500"
125	5"	5.563"
150	6"	6.625"
200	8"	8.625"
250	10"	10.750"
300	12"	12.750"
350	14"	14.000"
400	16"	16.000"
450	18"	18.000"
500	20"	20.000"
550	22"	22.000"
600	24"	24.000"
650	26"	26.000"
700	28"	28.000"

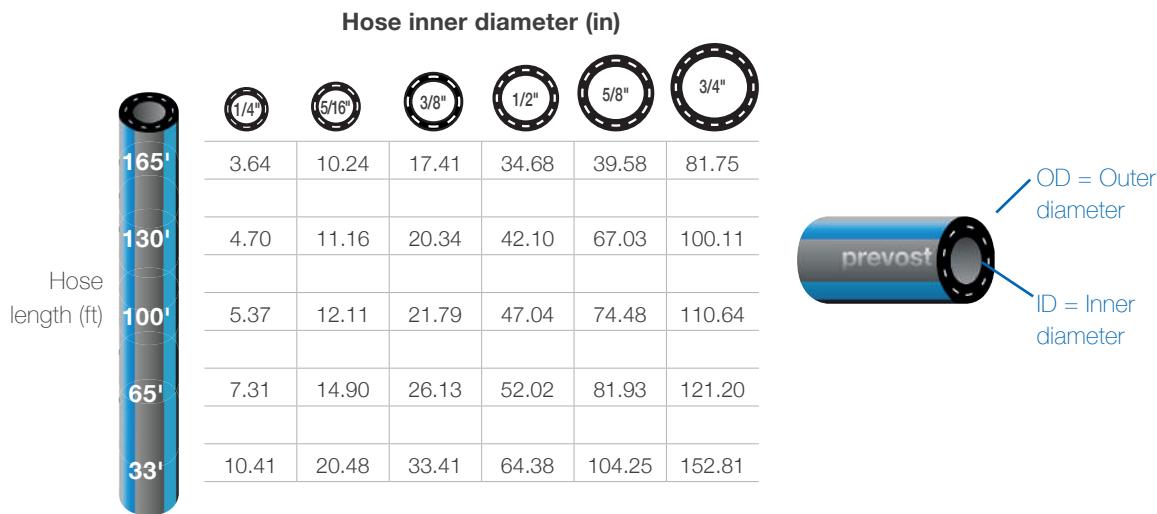

# F

# Flow rates and pressure loss

## ■ FLOW RATE IN COMPRESSED AIR FLEXIBLE HOSES

It is important to select the correct size hose because using a hose that is too long or too small of a diameter, can cause pressure loss or a reduced flow rate.

**Estimated flow rate (cfm)** Supply pressure = 100 psi and pressure loss  $\Delta P = 4$  psi

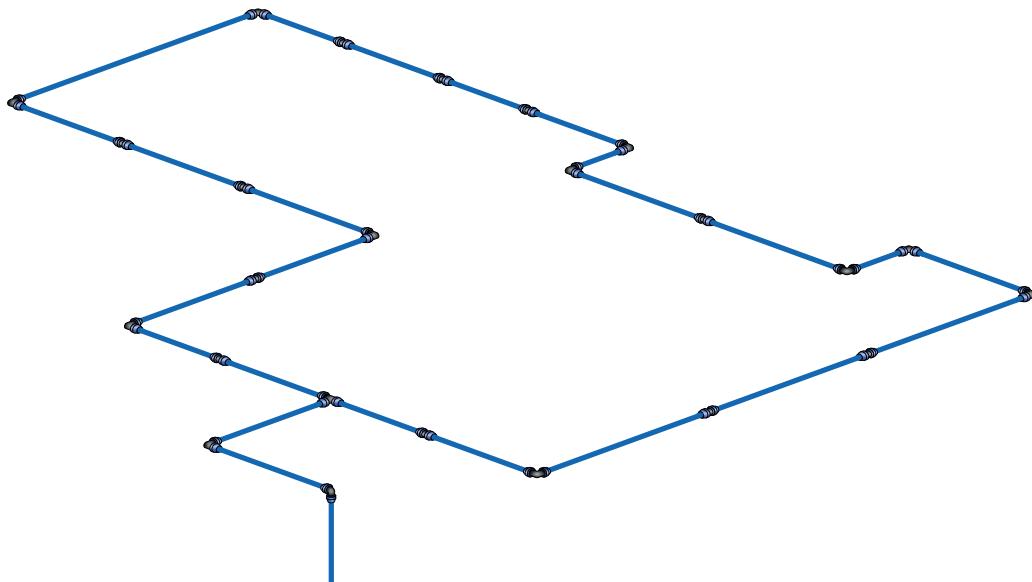

Designation of hose inner diameters	
Diameter in inches (NPS)	Diameter (mm)
3/16"	4
1/4"	6
5/16"	8
3/8"	10
1/2"	12
5/8"	16
3/4"	20
1"	25
1 1/4"	32
1 1/2"	40
2"	50

In North America, hose dimensions are expressed in **fractions of inches NPS (nominal pipe size)**. This table shows the conversion between the two systems. There is no link between this and the threads.

## Flow rates and **pressure loss**

### ■ SELECTING THE DIAMETER OF **PPS PIPE** **(PREVOST PIPING SYSTEM)**

Correspondence of PPS fitting in additional feet of pipes

Ø pipe (in)					
<b>3/4"</b>	0.66	3.94	3.28	0.66	2.80
<b>1"</b>	0.66	6.56	4.26	0.66	5.90
<b>1 1/4"</b>	0.98	13.2	4.92	0.98	7.90
<b>1 1/2"</b>	0.98	11.55	5.90	1.31	11.48
<b>2"</b>	0.98	14.10		1.31	18.04
<b>2 1/2"</b>	1.31	16.40		1.64	
<b>3"</b>	1.31	21.00		1.64	

at 100 psi

- Example of a 50 HP compressor at 87 psi  $50 \times 4.5 = 225$  cfm
- The facility is comprised of 25 lengths of pipe that are 19.7 ft each  $\times 25 = 492.5$  ft
- There are 11 equal fittings, 12 equal elbow fittings, and one equal T-fitting.
- Without calculating pressure losses, we select 1 1/2" from the diameter table.
- The loss of pressure from the equal fittings represents  $0.98 \text{ ft} \times 11 =$  additional 10.8 ft
- The loss of pressure from the elbow fittings represents  $12.46 \text{ ft} \times 12 =$  additional 150 ft
- The loss of pressure from the T-fitting represents  $11.48 \text{ ft} \times 1 =$  additional 11.48 ft
- The total loss is:  $10.8 + 150 + 11.5 = 172.3$  ft i.e. a total of 664.8 ft

# Standards and directives

## ■ ATEX DIRECTIVE

The **ATEX Directive** refers to EXplosive ATmospheres, defined as a mixture with the air, in atmospheric conditions, of flammable substances such as gases, vapors, mists or dusts, in which, after ignition, the combustion may spread to the entire unburned mixture (definition drawn from **Directive 2014/34/UE**). Certified equipment must be designed to prevent the creation of an ignition source, as defined by the **EN1127-1 standard**:

- Hot surfaces
- Flames and hot gases
- Mechanically generated sparks
- Electrical sparks
- Stray electric currents, cathodic corrosion protection
- Static electricity
- Lightning
- Electromagnetic fields
- Electromagnetic waves
- Ionizing radiation
- Ultrasonics
- Adiabatic compression and shock waves, gas flows
- Chemical reactions

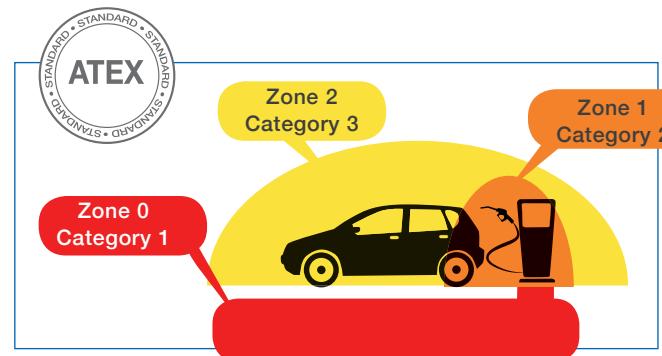

### The prevailing regulations are as follows:

- Directive 1999/92/CE
- Directive 2014/34/UE

**prevoS1** couplings comply with ATEX category 2 and 3 requirements.

Zone		Equipment category	Presence of explosive atmosphere
Gaz	Dust		
0	20	1	Constantly or for long periods > 1000 hours per year
1	21	2	Sometimes 10 ~ 1000 hours per year
2	22	3	Rarely or during short periods < 10 hours per year

Examples of explosive risk zone classifications

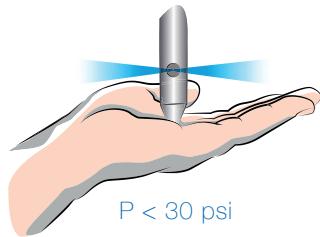

# Standards and **directives**

## ■ WHAT IS THE OSHA COMPRESSED AIR STANDARD?

**OSHA** is the United States' Department of Labor regulatory body. The article relating to safety using compressed air is: **OSHA 1910 242B**.

The nozzle used for cleaning operations must be fitted with a pressure-reducing valve or other mechanism that reduces the pressure at the end of the nozzle when in contact with a surface to less than 30 psi (2.10 bar).

Relief of pressure above 30 psi

OSH, OSHA, MTLOSHA AND SIL nozzle blow guns are compliant with **OSHA 1910 242B** standard.

## ■ REACH & ROHS STANDARDS

**PREVOST** is compliant with the specifications outlined in the **REACH** and **RoHS** standards regarding the substances used to coat parts in its product ranges.

The **REACH** (Registration, Evaluation, Authorization and Restriction of CHemicals) specifications correspond broadly to the constraints previously imposed by the **RoHS** standards.

**REACH** is a European Parliament regulation that entered into force in 2007 and is applicable to all industrial fields

**RoHS (Restriction of the use of certain Hazardous Substances in electrical and electronic equipment)**. Effective since 2006, **RoHS** was implemented for public health and recycling reasons. This directive applies to all new products marketed in the European Union, regardless of whether they are imported or manufactured within the EU.

The following substances are prohibited: Lead / Mercury / Cadmium / Hexavalent chromium (Cr<sub>6+</sub>) /Polybromobiphenyl (PBB) / Polybrominated diphenyl ether (PBDE)
