Spring is a special time for me. Just add the gobble of a wild turkey and you know where you will find me! It's a time of year that takes me back to the mid-1970s when I was fortunate enough to get to know an elderly gentlemen, farmer and cotton gin owner from Greenwood, Mississippi named Mr. Charles Whittington. He too loved the spring and the gobble of wild turkeys. Through the 1950s and '60s, his pursuit of them had taken him to the remote swamps of Mississippi, the Lake Despair area of Louisiana's Madison Parish, Pinckney Island in South Carolina, Mexico's Sierra Madre Mountains, the Beatrice and Pine Apple area in South Alabama and many more locales.

In 1971, Mr. Whittington wrote about his turkey hunting exploits in his book Tall Timber Gabriels. He affectionately called a gobbler "Old Gabriel" after an angel, since gobblers sing each spring from their tall timber perches sending out their love songs for all to hear. Mr. Whittington's book is full of stories about turkey hunting in bygone days when he learned the art of turkey hunting through pure hard knocks and a love of the hunt.

So I affectionately named my favorite box call The Tall Timber Gabriel. This box call was built by hand through years of acquired knowledge from box call makers come and gone, and from the skill and knowledge of the Primos Custom Shop guided by Anthony Foster. We've put everything we know and cherish about call making into it—from the choice of woods to the curves of the striking surfaces, the shape and cutouts of the sideboards and every aspect right down to the finish—all in order to give you the finest instrument to reproduce the sounds that "Old Gabriel" so badly wants to hear.

Welcome to 120 years of trial and error in box call technology, which started in 1897 with the first patented box call by Henry C. Gibson.

- » 90% Pattern Density at 40 Yards
- » Designed to Shoot Hevi•Shot®, Copperplated Lead or Regular Lead

Designed to increase the range and pattern density of your favorite turkey gun! The Jelly Head Maximum utilizes an extended taper and fluted ports to tighten patterns up to 20% and reduce recoil allowing you to stop Gobblers in their tracks at even longer ranges!

We utilize proprietary Black-T coating, the same protective barrier utilized by the military's Special Forces to prevent rust and corrosion on weapons in the harshest environments, like turkey hunting.
