

Pro-Grade®

Professional Hand Tools

Designed to Perform... Built to Last

Pro-Grade products are designed and built with one goal in mind - to equip your customers with the best value available in Professional Quality Hand Tools.

To ensure long-lasting durability and performance, we start by using only premium quality raw materials like Chrome Vanadium, Chrome Nickel, and High Carbon Steel. We then employ the latest in design innovation and ergonomic styling because a professional quality hand tool should not only work hard, it should look good doing it.

Precise manufacturing techniques and strict quality controls are then added so that every product meets or exceeds A.N.S.I. (American National Standards Institute) or U.S. Federal Specifications for quality and performance. In fact, we're so confident of our quality, over 90% of our products are covered by an Unconditional Replacement Warranty for the life of the tool.

The net result is quite simple... a professional quality tool your customers will be proud to own at a price they can afford.
