Rear Wheel

Front Wheel

ATV WHEEL BEARING AND SEAL KITS

Contains all the bearings and seals required to refit a wheel.

- High-speed bearings are manufactured to ABEC 3 precision levels
- Triple-lip rubber seals keep the grease in and the water and dirt out
- Chevron SRI 2 grease contains rust and oxidation inhibitors (-29° C to 177° C)
- Double lip TC seals with stainless steel garter springs

Note: For Polaris using a front strut, the wheel bearings, located in the wheel hub, rotate while in two-wheel drive mode. In four-wheel drive mode, a magnetic clutch is activated to engage the strut bearings, which are located in the strut tower.

UTV WHEEL BEARING AND SEAL KITS

Contains all the bearings and seals required to re-fit a wheel.

- High-speed bearings are manufactured to ABEC 3 precision levels
- Triple-lip rubber seals keep the grease in and the water and dirt out
- Chevron SRI 2 grease contains rust and oxidation inhibitors (-29° C to 177° C)
- Double-lip TC seals with stainless steel garter springs

Note: For Polaris using a front strut, the wheel bearings, located in the wheel hub, rotate while in two-wheel drive mode. In four-wheel drive mode, a magnetic clutch is activated to engage the strut bearings, which are located in the strut tower.

ADJUSTABLE FRONT AND REAR RACK EXTENSIONS

These sturdy racks can be adjusted to custom-fit your cargo.

Two ways to adjust rack extensions; the unique adjustable width feature with spring locking buttons to size for cargo load and the industry's first adjustable corner angle (up to 30°) to fit almost any ATV rack.

- Strong steel tubular construction with lasered-steel support plates
- Solid universal mounting hardware works on most tubular or plastic racks
- Includes mounting hardware
- 574329: straight front extension 30-37" x 10-1/2" x 5"
- 574330: angled front extension 30-37" x 13" x 5"
- 574331: angled rear extension 35-41" x 12" x 8"
- 574332: straight rear extension 35-41" x 17" x 8"

Note: Applications with an N/A indicate the rack extension will not fit the model. If an application is not listed, a rack extension may be available; the customer will need to measure their rack and compare to the rack dimensions listed.

STEEL VS. SYNTHETIC

QuadBoss® winches are available in either steel cable or synthetic rope, so which best fits your needs? Here are some features and benefits of both:

Steel

The traditional durability of steel cable is abrasion-resistant and great for utility applications where the line may contact objects like rocks, stumps and other items that may rub against the rope. It has been used for decades by riders and drivers; however, steel rope is heavier and less flexible than synthetic line. Steel rope is also cheaper than synthetic rope.

Dyneema®

Dyneema® Synthetic rope is the result of innovation. This strong, light-weight, easy-to-handle and will float in water making it a great choice for vehicle recovery. Dyneema® rope is more prone to damage by abrasion and requires the use of the included abrasion sleeve when the rope comes into contact with an object. Synthetic ropes should be checked regularly for wear and are more expensive than steel ropes; however, it's a great choice for those who are looking to keep weight down, push the limits with their vehicle and use the winch frequently.

CURVED SINGLE ROW LIGHT BARS

Lighting the way to fun and adventure.

Don't let the whims of nature or the hands of the clock result in Parked Quad Syndrome with these high-intensity, minimal-draw Cree® LEDs that will help make sundown a negotiable situation and greatly reduce the pucker factor of low-visibility rides.

Note: See Wiring Harness on page 219.

LED LIGHTS

See what you're missing.

QuadBoss lights aren't afraid of hard work or hard play. Abrasion-, shatter- and weather-resistant, they can take just about anything you have to give. Damage to part of the light will only cause LEDs in that section to fail; the rest just keep on lighting your way. They easily mount to a wide range of vehicles; ATVs, UTVs, even trucks and SUVs. And, with no bulbs to burn out and no glass lens to break, your quad might just wear out before these lights do!

- High-power CREE® LEDs
- 30,000-hour life expectancy
- 94% efficient; more light, less power
- Heavy-duty aluminum housing
- 100% waterproof enclosure
- Combination beam pattern with flood and spot reflectors for maximum spread and throw
- Works great with 12-Volt DC applications
- One-year manufacturer's warranty

KAWASAKI BRUTE FORCE A-ARM UPGRADE KIT

Reverse the effects of time and use, and add some muscle to your A-arm.

The O.E.M. design uses two spherical bearings to carry the thrust load of the entire front end. Over time, bearings begin to wear and the external seals become ineffective due to excess play, which allows water and debris to enter the assembly.

- Contains all the parts needed to upgrade all four A-arms
- Includes 12 machined acetal shoulder bushings and hardened steel pins to carry the load, greatly extending the life of the A-arm assembly

LOWER SHOCK BUSHING KIT

BALL JOINT KITS

Never be inconvenienced by ball joint failure again.

Put an end to premature Honda® ball joint failure by upgrading from the O.E.M. aluminum joint to our heavy-duty steel joint. We also offer replacement ball joints for those Kawasaki and Suzuki applications that force you to buy an expensive A-arm or steering knuckle.

- Heavy-duty steel cases with a POM-M90 bearing cup isolate the ball end from the case for long life
- Ball joint kit is sold per A-arm and comes with snap ring and cotter pin
