WORK HARD. STAY SAFE.®

RADIAN'S®

WELCOME TO RADIAN'S

LEADING THE WAY TO A SAFER TOMORROW

In over 20 years, Radians has become a major leader in the safety industry by manufacturing high performance Personal Protective Equipment (PPE) for the industrial, construction, and safety markets. Fostering a culture of innovation, flexibility, and excellence, we create products, services and experiences that are leading the way to a safer tomorrow.

We manufacture premium product lines, such as DEWALT® and Crossfire®, and performance value brands. Our comprehensive line of safety equipment provides a variety of PPE solutions to satisfy style demands, comfort requirements, compliance concerns, and price considerations of end users.

You are important to us. We don't take our relationships and partnerships for granted. We are continuously evolving and expanding our product lines, our capabilities, and our processes to be your top tier supplier of quality safety solutions for the end user while consistently meeting our partners' expectations.

OUR COMMITMENT TO YOU

- Our products are manufactured in ISO-certified facilities and have passed strict ANSI testing to ensure maximum protection and performance.
- Our numerous brands and extensive line of safety gear will help you create a solutions-oriented safety program.
- Our world class customer service, product managers, safety specialists and outside sales team will support and train you.
- Our automated warehouse improves the speed and accuracy of your orders.
- Our Made in USA manufacturing capabilities provide fast turnaround times and the choice to buy American-made PPE.
- Our customization programs offer fast and economical solutions for imprinting. Plus, our online software called My-Viz lets you design custom vests and T-shirts that Radians will fabricate for you quickly.
- Our programs will help you gain a competitive edge, such as no additional charges for drop shipments and same-day shipping of in-stock items if ordered by 5 p.m., CST.

BRANDS

BRANDS THE INDUSTRY TRUSTS

RADIANS IS PASSIONATE ABOUT OUR PRODUCTS AND CAPABILITIES

RADIANS: Whether your workplace environment is inside a manufacturing plant or outdoors in a hazardous construction work zone area, Radians offers a comprehensive line of quality safety gear to minimize exposure to workplace hazards to help keep you safe.

CROSSFIRE: Crossfire Eyewear by Radians is an industry leader in eyewear designs that afford the end-user a seamless link between the latest in style and cutting edge technology for superior optical clarity.

DEWALT: Recognized around the world, DEWALT has always had the toughest tools to help you get the job done. With DEWALT Protective Gear, now you can make sure that the toughest jobs are done safely. DEWALT protective gear is engineered for comfort, durability and above all, safety.

BELLINGHAM: Bellingham Glove is a trusted and respected source for high-quality industrial gloves that help prevent hand injuries. Protection, durability, and wearability are key design factors in the line.

NEESE INDUSTRIES: Neese Industries provides the global workforce and consumers with high performance protective rainwear and flame-resistant clothing to keep people safe while providing the compliance solutions that safety professionals need.

VOLCORE FR: Reduce burn injury from flash fire and electric arc flash with VolCore® FR Workwear by Radians®. Flame-resistant (FR) VolCore workwear helps protect workers from short-term thermal incidents because it self-extinguishes and doesn't melt when exposed to flame.

RADWEAR: Radians' commitment to innovation and manufacturing in the USA is easy to see in our high visibility apparel for fire, law enforcement, emergency, construction, transportation, highway, industrial and other specialty markets.

ARCTIC RADWEAR: If your work, lifestyle, or sport activities expose you to high levels of heat, protect yourself against heat stress with Arctic Radwear cooling products by Radians.

NORDIC BLAZE: Nordic Blaze warming gear is designed to keep you warm in cold and harsh environments. The ergonomically designed product includes several features for added warmth, comfort and protection.

VISIONAID: VisionAid lens cleaning systems are available in disposable or permanent stations, emergency eyewash stations, and pre-moistened towelettes. VisionAid products are made in the USA.

CUSTOM EMBROIDERY & IMPRINTING MADE EASY

MADE IN USA

MANUFACTURING PPE IN THE USA

Over the past decade, Radians has delivered on its commitment to bring US made products to the PPE market. From RadWear custom high visibility vests to Radians foam earplugs to VisionAid lens cleaning products, Radians is investing in our manufacturing footprint in the USA. And we are committed to continuing this trend.

BENEFITS OF MANUFACTURING RADIANS PRODUCTS IN THE USA

- Faster turnaround times
- Optimal control of the manufacturing process to ensure a quality product
- Giving you the choice to choose USA vs. Imported products
- Creating jobs in America and improving the American economy

CUSTOMIZE YOUR PROTECTION

Do you have a special safety situation that calls for a uniquely designed safety vest or T-shirt? If so, Radians' My-Viz Custom Designer is the perfect tool. We will manufacture customized safety solutions in the USA quickly and affordably.

YOU DESIGN IT — WE BUILD IT

- ✓ Intuitive Online Software to Create your Vest or T-Shirt
- ✓ Quick Turnaround Times - Made in USA
- ✓ Low Minimums
- ✓ Affordable Costs
- ✓ Complete Customization

CREATING YOUR CUSTOM VEST OR T-SHIRT IS QUICK & EASY!

- ✓ Choose your style of vest or t-shirt
- ✓ Pick a color combination
- ✓ Find the right fabric for your needs
- ✓ Select the style of reflective tape
- ✓ Choose your pockets and accessories
- ✓ Place your custom imprinting message

CAPABILITIES

QUALITY ASSURANCE

The International Organization for Standardization (ISO) 9001:2015 specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements.

PRODUCT INNOVATION

Radians is not only a manufacturer and supplier of quality safety products, we develop and design new products:

- To satisfy our customers' changing safety needs.
- To stay abreast of emerging market trends.
- To produce the highest quality PPE products at lowest possible costs to offer a value proposition.

WAREHOUSE AUTOMATION

Because the customer experience and journey are important to Radians, we have made significant capital investments in automation. These advances in automation:

- Improve the speed and accuracy of order fulfillment
- Expedite picking and shipping process
- Provide real-time inventory status
- Enhance our ability to expedite same-day orders
- Reduce errors in shortages and overages to 1 in 5,000

INCREASED EFFICIENCY & CUSTOMER SERVICE

To help us consistently meet and exceed our partners' expectations, Radians is always evolving. Radians recent investment in an automated warehouse solution increases levels of customer service and satisfaction.

- Real-Time shipping information
- Expedite same day orders more efficiently
- Improve speed and accuracy of orders
- Reduce error in shortages and overages

CAPABILITIES

WEB & MARKETING RESOURCES

The Radians brand is synonymous with market leadership, quality and reliability, and is sold exclusively through authorized distributors.

- 24/7 online ordering
- Check on status of orders
- Instant access to stock availability
- View invoices and purchase history
- Track shipments

MARKETING TOOLS

Radians' website provides valuable information, resources and images on all of our products and capabilities.

- Custom flyer program
- Interactive and downloadable PDF catalogs
- Individual product sales sheets
- Downloadable high resolution product images
- Search engine
- Product videos
- Imprinting locations
- RadLink distributor portal

TESTING & STANDARDS

To maintain and grow our leadership status, Radians tests all of our products against the current regulatory standards for the regions where the product will be marketed. All glasses, high-visibility materials, fire retardant materials, and EU products are tested by third party independent laboratories.

At our corporate headquarters, Radians has installed a state-of-the-art hearing protection laboratory which is accredited through the National Voluntary Laboratory Accreditation Program (NVLAP Lab 500090-0) for testing of hearing protection products to ANSI S3.19 and ANSI S12.6.

Radians also maintains in-house testing facilities to ensure continued compliance with applicable optical and high-impact standards for eyewear in addition to third party eyewear testing.

With our focus on product quality, regulatory standards, and testing, you can be confident Radians' products meet or exceed all necessary requirements to ensure your safety.

PROTECTIVE EYEWEAR

Since the premium eyewear market is a multi-billion dollar market, it's apparent that millions of people have a self-expressive connection with their premium eyewear and place extreme importance on brand recognition. Brand recognition of eyewear goes beyond lifestyle and plays a serious role in the industrial markets because premium brands are a catalyst for compliance.

To meet worker expectation for premium style, all day comfort, and extreme protection, Radians offers affordable premium brands, such as Crossfire and DeWALT.

STANDARDS & TESTING

STANDARD	IMPACT	CALIBER	PROJECTILE
ANSI Z87 + High Velocity	150ft/s 45m/s	0.25" dia. steel ball (25 cal)	
Mil-PRF-31013 VO Ballistic	640-660 ft/s 195 m/s	0.15" dia. steel projectile (15 cal)	
High Mass Impact	17.6oz/50" hgt 500g/127cm hgt	17.6oz/500g pointed projectile dropped	

- All safety glasses & goggles meet the high impact requirements of ANSI Z87.1 (Z87+).
- Select styles have also been tested for compliance with additional military /international standards including VO Ballistics (0.15 caliber), CSA Z94.3, EN166, and AS/NZS 1337.
- Eyeglasses are NOT safety glasses unless both the lenses and frame are in compliance with the specifications for safety eyewear described in the ANSI Z87.1 standard.

No one likes to switch back-and-forth between their safety glasses and readers. It's inconvenient, unsafe, and can be downright annoying. Radians offers several safety solutions when it comes to PPE Bifocal Readers. Our Bifocals are designed with comfort features, such as vented rubber nosepieces and adjustable temples. Several styles are offered including EVA foam-lined frames that protect against dust and debris and sleek, lightweight styles for work and play.

- Possibly the Most Wearable Light Weight Industrial Raincoat on the Market

Packable Design

If how you work or live requires 'the need to be seen' in high-visibility rain and safety wear then the NeeseViz line is for you! Traffic zones, work zones, and operations around heavy equipment and recreation when away from work often requires that special precautions and considerations be taken. The NeeseViz line features basic visibility wear as well as specialized ANSI Class 2 and Class 3 approved rainwear, jackets, vests, and coveralls in fluorescent lime and orange. When you need to be seen, use NeeseViz for your safety and performance wear requirements.

The Need to Be Seen

Outdoor working environments create serious potential dangers and hazards to contend with. Vehicle hazards such as fast moving cars and trucks often speed past, often within inches of workers. Drivers that are distracted, impatient, or impaired often provide a great risk to workers, public safety professionals and recreationists. Noise and focused tasks often make it difficult for workers to hear or notice approaching vehicles and equipment. Work or play when done at night or when light levels are low at dawn, dusk, and during inclement weather provide additional visibility and safety risks.

The use of high-visibility apparel serves as a first line of defense to protect workers. The United States Occupational Safety and Health Administration (OSHA) recognize the value of high visibility apparel to protect workers. OSHA requires employers to outfit employees with "reflectORIZED and highly visible materials to enhance worker safety." Also, the U.S. Department of Transportation's Manual of Uniform Traffic Control Devices specifies high-visibility clothing for flaggers, law enforcement officers, firefighters and others involved in managing work-zone traffic.

TELCOM 9002

The Neese Viz Telcom series is designed for comfort and safety in any environment; the Telcom 9000 series is lightweight, durable, and 100% waterproof. Made from polyurethane on nylon material it is an ideal garment for the worker who needs tough but lightweight rainwear with high visibility features. Telcom 9002 garments meet ANSI/ISEA 107-2004 Class 3 and Flame Resistant ASTM D6413.

Keeping workers, public safety professionals, and recreationalists dry and safe is what we do best at Neese. For over 50 years the dedicated employees at Neese have been crafting rainwear that meets the needs of our customers. With careful attention to detail and using the finest materials we make every garment like we would be using it ourselves.

At Neese helping you find the right rainwear for your application is all part of what we do. Our team of field sales representative works closely with our distributor partners and our product end user constantly to identify modifications and updates that meet the demanding needs of our customers. With the majority of our products being manufactured in North America, we can customize products to fit your job or need, it's what we do.

In the following pages we believe you will find the most comprehensive protective clothing and rainwear offering available in the market today. Whether you are a recreationalist, an industrial worker, agriculture professional, public safety hero or one of countless other occupations the team at Neese has you covered when the job and nature make your days tough.

SANI LIGHT 77 SERIES

These Sani Light 77 garments are made of special vinylized PVC on nylon fabric that has a comfortable lightweight appeal and yet maintains its reliable durability for tough jobs. It is ideal for warm weather, sanitation or industrial operations where lightweight protection is required.

“Neither Rain nor Sleet.....”

At Neese we take pride doing our part to protect USPS workers. In 1989 Neese Industries began manufacturing rainwear specifically for the United States Postal Service. As one of a small group of companies approved to service the USPS Neese is proud to offer a full array of garments that are certified by the United States Navy Clothing and Textile Research Facility (NCTRF). The government certified postal rainwear from Neese Industries offers the comfort, special design features, and quality construction that postal workers need for harsh weather environments.

Industrial Protective Wear for Incidental Chemical Splash

Industrial Garments Tested in Accordance to ASTM F903: "Standard Test Method for Resistance of Materials Used in Protective Clothing to Penetration by Liquids"

Neese Chem Shield Garments are made of special materials that are designed for wear and utility for protection and coverage for incidental chemical splash during specific work operations. These industrial protective wear garments offer excellent abrasion and tear resistance, as well as protection from liquid penetration or incidental chemical splash exposures.

MAGNUM 45 SERIES

The Neese Magnum 45 series is a medium weight yet heavy-duty nylon fabric coated with strong and flexible neoprene to provide maximum cold weather flexibility with a high resistance to abrasion.

45AJ

DU PONT
NOMEX®

CAT 2

Industrial, utility, and various electrical and petrochem workers, operate every day in a work environment that exposes them to the potential hazards that could cause severe or fatal burn injuries. The very short duration and high energy of an electric arc flash presents a unique and dangerous hazard that requires specialized protection for the operator working in these environments.

NeeseArc Protective Rainwear is made of special protective materials made for withstanding varying levels of arc flash hazardous flame and heat exposure. NeeseArc protective rainwear meets ASTM F1891-02 and flame resistance specifications. The use of arc protective rainwear that meets ASTM F1891 eliminates the melting hazard and protects the worker.

FLEX ARC SERIES

Arc Flash/Flash Fire/High Visibility

The NeeseArc FlexArc products are made from a unique polyurethane on a weft knitted FR treated cotton and designed especially for utility workers exposed to electrical arc hazard.

Workers and consumers around the world have respected Neeese Protective Clothing since 1961. Why Neeese? Look at the value Neeese strives to deliver each day.

We make unique, high quality products.

For almost 60 years, Neeese has provided premium protective clothing to keep people safe, dry and happy. We take pride in developing products with the unique features and benefits our end users want and the compliance solutions that safety professionals need.

Customized Garments. Owning our own plants, equipment and transportation network and having an in-house design and production team allows Neeese to respond quickly to unique customer needs. Whether you need a customized product with special configuration or an off-the-shelf product, Neeese has you covered.

Garment Designs for Utility and Comfort. At Neeese, we pride ourselves on listening to our customers' needs and then designing, manufacturing and supplying apparel to match the need while providing the protection, utility, comfort, durability, and compliance that you have come to expect from Neeese.

FR COVERALLS

These FR Coveralls are designed for the wearer's comfort, workplace utility, and reliable protection from FR Hazards. All NeeeseWearFR coveralls meet or exceed NFPA 70E, NFPA 2112 and ASTM F1506 for Arc Thermal Performance.

- Leaf collar
- Double-stitched pockets (2 chest, 2 rear, 2 hip, 1 tool)
- Wide elastic waist
- FR zipper front closure
- Non-sparking covered snaps
- Bar tacked stress points
- Action-back design

FR WORKWEAR

Reduce burn injury from flash fire and electric arc flash with VolCore[®] FR Workwear by Radians[®]. Flame-resistant (FR) VolCore workwear helps protect workers from short-term thermal incidents because it self-extinguishes and doesn't melt when exposed to flame, dramatically reducing the severity of burn injuries. It's ironic, but the most serious burns that occur at jobsites are not from the actual fire or explosion but from the igniting of standard, non-FR workwear that often continues to burn even after the removal of the ignition source. Each UL certified piece in the VolCore FR Workwear line has been finely crafted with durable materials and distinct features to keep workers safe, comfortable, and compliant with industry-wide FR standards.

WHO NEEDS VOLCORE FR WORKWEAR?

- Workers in hazardous Electric Arc environments, such as electricians and electric utility linemen.
- Workers in hazardous Flash Fire environments, such as refinery, chemical, petrochemical, oil/gas, & pharmaceutical workers.
- Workers in environments prone to Combustible Dust Explosion, which includes the paper and pulp industry, food processing, paint, and many more industries.
- Workers who come in contact with energized electrical equipment are at risk.

CUSTOMIZATIONS AVAILABLE

Including reflective striping, patches, direct embroidery, screen printing, tool pockets and mic tabs.

FRS-001 M-5XL 88% COTTON 12% NYLON LONG SLEEVE BUTTON DOWN FR SHIRT

9720

Laminated 2" Reflective Material for T-shirts. Industrial Laundered.

PRISMATIC

High Gloss Prismatic Tape Available in Silver, Lime, or Orange.

STANDARDS AND TESTING

ANSI/ISEA 107-2015 STANDARD: Numerous workers in a wide range of applications are exposed to hazards resulting from low light conditions. ANSI/ISEA 107-2015 is the safety standard for design and specification of protective clothing intended to help protect workers from "struck-by" hazards.

Type R HVSA provides high visibility protection for workers who require greater visibility under inclement weather conditions, when backgrounds are complex and when tasks divert attention from traffic.

ANSI/ISEA 107-2015 Type R Class 2 Standards:
Background Fabric: 775 Square Inches (540 Sq In - Small Sizes)
Reflective Material: 201 Square Inches Minimum
Reflective Width: 1.37 Inches

ANSI/ISEA 107-2015 Type R Class 3 Standards:
Background Fabric: 1240 Square Inches (1000 Sq In - Small Sizes)
Reflective Material: 310 Square Inches Minimum
Reflective Width: 2 Inches

Type 0 is intended to enhance conspicuity for workers in occupational environments which pose struck-by hazards from moving vehicles, but which will not include exposure to traffic on public access highways or roadway temporary traffic control (TTC) zones.

Type P HVSA provides additional options for emergency responders, incident responders and law enforcement who have competing hazards or require access to special equipment.

ANSI/ISEA 107-2015 Type P Class 2 Standards:
Background Fabric: 450 Square Inches
Reflective Material: 201 Square Inches Minimum
Reflective Width: 2 Inches

ANSI/ISEA 107-2015 Type P Class 3 Standards:
Background Fabric: 775 Square Inches (540 Sq In - Small Sizes)
Reflective Material: 310 Square Inches Minimum
Reflective Width: 2 Inches

ANSI/ISEA 107-2015 Type 0 Class 1 Standards:
Background Fabric: 217 Square Inches
Reflective Material: 155 Square Inches Minimum
Reflective Width: 1 Inch Split

FLAME RESISTANT

Inherently Flame Resistant (IFR)
ASTM 1506

- Inherently more difficult to ignite than normal clothing.
- FR properties introduced during the initial stages of fiber formation.
- Flame resistant for the life of the fiber / garment.
- Flame resistance is not altered by variations in laundering conditions or environment.

Flame Resistant Fabric / Clothing - Intended to Provide a Range of Protection

- Reduces exposure to flame.
- Create barrier to heat.
- Resistant to breaking open when exposed to flame.

GlenGuard ^{HI-VIS}

GlenGuard® Hi-Vis - Modacrylic

- Primary material for hazards requiring IFR and ANSI 107.
- All components are IFR and will last the life of the garment.
- Meets ASTM 1506 after 50 laundings.
- Meets ANSI 107 - 2015 after 50 laundings.
- Protected by 4 US patents.

Self Extinguishing Treated Fabric

These garments are made from Polyester. They are treated to be Self-Extinguishing as defined by ASTM D6413 (<2.0 s flameout / <6" Char Length). They should never be used where an Arc Flash or Flash Fire hazard is present.

Self Extinguishing: will burn if exposed to flame, but will not continue to burn after the source of ignition is removed.

- Improved Fit works perfectly under hard hats

RWL22SE Thermal Balaclava

Garment is made from Polyester. Treated to be Self-Extinguishing as defined by ASTM D6413 (<2.0 s flameout / <6" Char Length). This garment should never be used where an arc flash or flash fire hazard is present. Self Extinguishing: will burn if exposed to flame, but will not continue to burn after the source of ignition is removed.

ANSI/ISEA Z89.1-2014

CLASS E (ELECTRICAL) - PREVIOUSLY CLASS B

Designed to reduce danger of contact with high voltage sources and is proof tested to 20,000 volts.

CLASS G (GENERAL) - PREVIOUSLY CLASS A

Designed to protect against contact w/ low voltage & is proof tested to 2,200 volts.

TYPE I (TOP IMPACT):

Reduces the force of an impact to the top of the wearer's head.

IMPACT ENERGY ATTENUATION

Measures helmet crown's capability to reduce the force of an impact from falling objects to the top of a wearer's head.

APEX PENETRATION

Measures helmet crown's capability to resist penetration.

FLAMMABILITY

Measures the resistance to burning or combustion when exposed to an ignition source.

ELECTRICAL INSULATION

Measures electrical shock resistance capability of helmet. Helmet Types I & II.

RESPIRATORS

HEARING PROTECTION

Although hearing protection regulations have been in place for decades, Noise Induced Hearing Loss (NIHL) is still a major occupational illness. Hearing loss is imperceptible at first with no pain or trauma. Unfortunately, once hearing damage occurs, it is irreversible; and your lifestyle at work and at home can be negatively impacted.

STANDARDS & TESTING

- **TESTED** - Radians tests all of our products against the current regulatory standards for their specific marketed regions.
- **UNIQUE** - Radians has installed a state-of-the-art hearing protection laboratory accredited through National Voluntary Laboratory Accreditation Program (NVLAP Lab 500090-0) for testing of hearing protection products to ANSI S3.19 and ANSI S12.6.
- **FOCUSED** - Radians focuses intently on product quality, regulatory standards, and testing.

NRR 32 NRR - Noise Reduction Rating: The higher the rating, the more attenuation provided

ELECTRONIC Electronic Hearing Protection allows for hearing normal conversation while dampening noises over 85dB

HAND PROTECTION

Radians has aggressively expanded our line of hand protection to provide gloves that keep workers' hands protected from common workplace hazards. The National Safety Council estimates that the direct cost of a laceration is \$10,000 including care and missing six days of work, which is the average time off for a hand injury.

You can look to us for performance gloves that protect your workers' hands while not compromising comfort and dexterity. We offer a variety of materials and coatings for various job applications, including nitrile, latex, polyurethane coatings, and cut resistant fibers.

STANDARDS & TESTING

Standardized testing of gloves ensures that the proper glove can be selected based on the hazards present. Testing includes ratings for abrasion, cut, tear, and puncture. New versions of the EN388 and ANSI/ISEA 107 standards improve cut testing to rate much higher cut levels, align cut test results between ANSI and EN cut test methods, and add ratings for vibration and impact resistance.

ANSI Cut Level Ratings

There are many kinds of cut hazards, and each one requires a different level of protection. Use the table below to help determine the cut level rating necessary for your work environment.

	Nuisance Cuts Paper cuts, automotive maintenance, parts assembly, material handling.
	Low Cut Hazards Construction, automotive assembly, packaging, some masonry applications.
 	Moderate Cut Hazards Light metal stamping, light-duty glass handling applications.
 +	High Cut Hazards Metal stamping & casting, sheet metal, window & tile handling, meat & poultry.

EN388

EN388 ratings are also noted on Radians hand protection. EN388 includes more specific information about the resistance to particular types of hazards you may encounter on the job. There are five numbers listed which indicate the level of resistance to puncture, tearing, blade cut and abrasion. Look at the diagram to the left to reference which number corresponds to which hazard.

Palm Coatings

To address specific work-related hand protection issues, Radians uses several different types of palm coatings: smooth nitrile, foam nitrile, sandy foam nitrile, foam latex, sandy foam latex, crinkle latex, and PU polyurethane. Palm coatings allow for better gripping capabilities and tactile sensation without losing dexterity.

DEFINITIONS/APPLICATIONS:

SMOOTH NITRILE

Smooth/Flat gloves do not have any texture on the surface of the glove. They provide excellent resistance to abrasion, snags, and perforation. Made of synthetic rubber, they are latex-free with no natural rubber proteins. Excellent puncture resistance, tactile sensitivity, and flexible grip.

FOAM NITRILE

Micro texture is the most common and lightest form of texturing for nitrile gloves. This texture is suitable for gripping small objects or tools in wet or dry applications. Breathable, flexible and porous, foam nitrile will channel oil and water away from surface quickly. Excellent resistance to abrasion, snags and perforation. Made of synthetic rubber, foam nitrile gloves are latex-free with no natural rubber proteins.

SANDY FOAM NITRILE

Roughened texture finish. The sandy-like finish on these gloves increases abrasion resistance and improves grip. They are good for wet, dry or oily applications. Made of synthetic rubber, these gloves are latex-free with no natural rubber proteins.

FOAM LATEX

Texture that offers better breathability and comfort. Excellent flexibility and resistant to tears and cuts. Good for wet or dry applications.

SANDY FOAM LATEX

Micro roughened texture for better breathability and comfort. Excellent flexibility and resistant to tears and cuts.

CRINKLE LATEX

Rough textured for better grip and abrasion. Latex gloves are natural material, made out of rubber. They offer excellent flexibility and protection from tears and cuts.

PU (POLYURETHANE)

Semi-smooth texture is extremely flexible and provides superior dexterity and sensitivity. A PU coating can be silicone free and has a low-particulate shed, which reduces risk of contamination from the dip itself. The coating “strikes through” onto the inside of the glove, which can lead to heat retention and sweating. Not as durable as nitrile or latex, PU gloves can be used for inside light duty, detailed assembly, inspection, light fabrication, and box/small parts handling.

BELLINGHAM GLOVES

Bellingham Glove is a trusted source for high quality industrial gloves, with a reputation for supplying gloves that fit well, have excellent grip, and are tough enough to satisfy the demands of industry.

We also understand that industrial users require on-time delivery and competitive pricing.

GLOVE HANG TAG PROGRAM

For Fast, Easy, and Professional Retail Display of Radians Gloves at Industrial Storefronts.

FAST Five business day turnaround.

EASY You can place an order for a case of “tagged” gloves just as you would place an order for a case of “untagged” gloves.

Minimum Order Requirement is One Case

The minimum order is a case and the gloves in that case can include bulk packs of a dozen in multiple sizes. Keep in mind some of our cases include 72 gloves and some cases include 120 gloves. After a case is ordered, you may order more gloves by the dozen. Many of our competitors will only sell by the case, but Radians is more flexible allowing for dozen bulk pack purchases after the minimum case requirement has been satisfied.

CUT PROTECTION GLOVES

WORLD'S MOST ADVANCED CUT RESISTANT FIBER

Dyneema® Diamond Technology offers maximum protection over traditional materials like aramid, leather, nylon and polyethylene with glass fiber.

It can achieve levels B, C and D based on the latest EN388 2016 standard and levels A2, A3 and A4 on the new ANSI/ISEA 105-2016 standard without the use of glass or steel fiber reinforcement, which may break during use causing skin irritation.

GREATER COMFORT & DEXTERITY

Dyneema® Diamond Technology fibers are thinner than generic HMPE fibers and 40% less dense than aramid fibers, making them more comfortable, thinner and cooler to the touch, while still providing advanced cut protection.

It also promotes skin-like dexterity, allowing users to perform delicate and precise tasks efficiently.

HIGHER DURABILITY & COST EFFICIENCY

Cut resistant gloves made with Dyneema® Diamond Technology offer greater abrasion and U.V. resistance and higher durability in comparison to gloves made with leather, aramid and polyethylene with glass fiber.

They can also be laundered and reused multiple times without losing their performance, maximizing cost efficiency.

THE RADIANS ADVANTAGE

RADIANS HIGH PERFORMANCE SAFETY GEAR MINIMIZES EXPOSURE TO SHOOTING AND OUTDOOR HAZARDS

It's no secret that hunters and shooters are exposed to loud and dangerous noises, harmful glare from the sun, and flying debris that could harm the eyes. Designed and engineered especially for shooters, hunters, and sport enthusiasts, we have the gear you need to safely navigate the sporting life. From ANSI Z87 impact resistant shooting glasses to premium electronic hearing protection to high visibility apparel, Radians safety gear offers protection at the shooting range, in the woods, on the playing field, or as a spectator at a sporting event.

Whether you need enhanced optical clarity, polarized or HD lenses, or X-Treme Anti-Fog Coatings on eyewear, Radians has over 100 SKUs of performance and premium shooting glasses to meet the needs of first-time shooters or professional marksman who demand the very best. We also carry a wide range of passive and electronic earmuffs and disposable and reusable earplugs.

RADIANS SAFETY GEAR IS UP FOR THE CHALLENGE

Our products are manufactured in ISO certified facilities and are field tested to ensure maximum performance and protection. Our distributors and end users can feel confident that Radians' safety gear is up for the challenge and meets the required safety regulations and ANSI standards.

BECAUSE COMFORT, FIT, AND STYLE MATTER... A LOT

If it's not comfortable, safety gear may get left behind in the duffel bag. That's why Radians pays special attention to comfort features, such as wire core adjustable nosepieces, vented rubberized nosepieces, padded adjustable headbands on earmuffs, and gun stock cutouts.

RADIANS CAPABILITIES & PROGRAMS GIVE OUR DISTRIBUTORS & RETAILERS THE COMPETITIVE ADVANTAGE

RADIANS® PERFORMANCE PROTECTIVE EYEWEAR

Because of our global presence and our culture of safety, Radians® tests products to meet or exceed standards, including ANSI Z87.1, MIL-PRF-32432 Ballistic Fragmentation, CSA Z94.3, EN166, and

AS/NZS 1337. Consumers can feel confident about Radians® products meeting all necessary safety standards and regulations.

KNOW THE DIFFERENCE Eyeglasses are **NOT** safety glasses unless both the lenses and frame are in compliance with the specifications for safety eyewear described in the ANSI Z87.1 Standard.

STANDARD	IMPACT	CALIBER	PROJECTILE
ANSI Z87 + High Velocity	150 feet / second 45 meters / second	0.25 inch diameter steel ball (25 caliber)	
MIL-PRF-32432 Ballistic Fragmentation	840 - 880 feet / second 105 meters / second	0.15 inch diameter steel projectile (15 caliber)	
High Mass Impact	17.6 oz / 500 g height 500 g / 127cm height	17.6 oz / 500 g pointed projectile dropped	

All Radians® and Crossfire® eyewear complies with ANSI Z87.1 impact standards, protects against 99.9% of harmful UV rays and includes a hard coat polycarbonate lens to protect against scratches.

POLARIZED LENSES

Radians' polarized lens technology prevents glare by filtering out the reflective bent light and glare resulting in enhanced vision in harsh environments.

XTRACLEAR LENSES

Radians' XtraClear technology provides reduced distortion and enhanced clarity.

CROSSFIRE
by RADIANS
TAKES AN IMPACT. MAKES AN IMPACT.™

Crossfire meets the demand for style and technology. All eyewear features scratch resistant hard coat polycarbonate lenses, 99% UVA/UVB protection from harmful sun exposure and exceeds the industry standards for impact and shatter resistance set forth by ANSI.

Crossfire by Radians offers choices of highly stylized and equally functional, protective eyewear. These products are tested to the same ANSI Z87.1+ standards for impact and shatter resistance as other Radians safety glasses but in designs that reflect the most current styles, materials and colors.

Many Crossfire styles are available in amber, clear and smoke lenses which makes it perfect for shooting at the range, hunting wild game, working in the workshop or riding ATVs. Regardless the adventure, Crossfire provides superior comfort, fit and protection.

ENHANCED OPTICAL CLARITY

The optically correct portion of the lens blank is pinpointed and marked at the focal point.

DE-CENTERED CUT LENS

The de-centered lens is cut to match the focal point with actual line of sight, ensuring optical clarity.

HD LENS TECHNOLOGY

Crossfire's High Definition (HD) Lens Technology provides enhanced vision by filtering the most damaging blue rays and allowing for more transmission of the High Definition light spectrum.

TESTING

TYPICAL SOUND LEVELS

TESTING & STANDARDS

Radians® earned NVLAP Accreditation to test and certify hearing protective devices (NVLAP Lab # 500090-0). Accreditation, which is issued by the National Institute of Standards and Testing (NIST), allows Radians® to perform accredited acoustical testing of hearing protective devices to the ANSI/ASA S3.19 and S12.6 standards. Radians' accredited lab is now a member of a very select group and viewed as a leader in the hearing protection industry.

MADE IN THE USA

American consumers are becoming increasingly aware of the Made in USA labels and the impact they can have on our economy by purchasing American made products. Radians® is increasing the selection of Made in USA products every year. This initiative increases employment in the US, improves speed of replenishment and provides users with the option to 'Buy American,' when choosing personal protection products. The Made in USA range includes foam ear plugs, high visibility and reflective apparel, protective eyewear and lens cleaning accessories.

QUALITY ASSURANCE

The International Organization for Standardization (ISO) 9001:2008 specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements. Our ISO 9001:2008 certification reinforces the Radians® commitment to quality assurance and to consistently manufacture and distribute quality personal safety products.

R-SERIES: LITE

- Electronic hearing enhancement and protection earbuds

- Premium padded headband
- 2 pairs foam earplugs included

* When Dual Protection is Used

MX0100CS | Black

Maximus Earmuff: 28 NRR
Deflector Foam Earplug: 33 NRR

*** DUAL USE ATTENUATION:** Due to the extreme noise levels produced by firearms, dual protection is recommended for maximum protection. Per the OSHA Technical Manual, attenuation provided by wearing dual protection such as earmuffs with earplugs can be estimated by adding 5dB to the higher of the two product NRR values. For example, with an earplug of 33 dB NRR and an earmuff of 28 dB NRR, combined attenuation can be estimated as 33 dB + 5 dB = 38 dB. Actual attenuation will vary by user.

M-31™ NRR 30

LADIES

SHE HAS STYLE!

Women are the fastest growing segment of gun owners in the United States. While they enjoy both sport and leisure shooting, many are simply looking at gun ownership as a means of extra security and protection. Increased enrollment in gun safety courses, range use and gun permits for women means more women who want PPE that fits their size and their style while providing maximum comfort and protection.

LOWSET™ NRR 21

- Low profile earmuff
- Adjustable moisture wicking headband
- Compact folding feature

This low profile earmuff works well for men but features adjustability making the fit suitable for ladies and youth.

ARCTIC RADWEAR

by RADIANS

If your work or hobbies involve the outdoors and unpleasant or even dangerously warm conditions, consider the comfort and protection of Arctic Radwear cooling products from Radians. Arctic Radwear products accelerate the evaporative cooling process and provide welcome, and in some cases essential, relief from the heat. Safe and reusable, just soak the product in water the wear for several hours of cooling relief.

PLAY HARD. STAY SAFE.

WAREHOUSE AUTOMATION

To help us consistently meet and exceed our partners' expectations, Radians is always evolving. Radians automated warehouse solution increases levels of customer service and satisfaction.

- Real-Time Shipping Information
- Expedite same day orders more efficiently
- Improve speed and accuracy of orders
- Reduce error in shortages and overages

INCREASED EFFICIENCY & CUSTOMER SERVICE

The International Organization for Standardization (ISO) 9001:2008 specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements.

Radians® is not only a manufacturer and supplier of quality safety products, we develop and design new products:

- To satisfy our customers' changing safety needs.
- To stay abreast of evolving market trends.
- To produce the highest quality PPE products at lowest possible costs to offer a value proposition.

HAND PROTECTION

Radians has aggressively expanded our line of hand protection to provide gloves that keep workers' hands protected from common workplace hazards.

You can look to us for performance gloves that protect your workers' hands while not compromising comfort and dexterity. We offer a variety of materials and coatings for various job applications, including nitrile, latex, polyurethane coatings, and cut resistant fibers.

- Trusted Brand
- Worldwide Marketing Support
- Premium Designs

RADIANS®

- Uncompromisable Protection
- Quality Performance
- Innovative Solutions

STANDARDS & TESTING

Standardized testing of gloves ensures that the proper glove can be selected based on the hazards present. Testing includes ratings for abrasion, cut, tear, and puncture. New versions of the EN388 and ANSI/ISEA 107 standards improve cut testing to rate much higher cut levels, align cut test results between ANSI and EN cut test methods, and add ratings for vibration and impact resistance.

ANSI Cut Level Ratings

There are many kinds of cut hazards, and each one requires a different level of protection. Use the table below to help determine the cut level rating necessary for your work environment.

	Nuisance Cuts Paper cuts, automotive maintenance, parts assembly, material handling.
	Low Cut Hazards Construction, automotive assembly, packaging, some masonry applications.
 	Moderate Cut Hazards Light metal stamping, light-duty glass handling applications.
	High Cut Hazards Metal stamping & casting, sheet metal, window & tile handling, meat & poultry.

EN388

EN388 ratings are also noted on Radians hand protection. EN388 includes more specific information about the resistance to particular types of hazards you may encounter on the job. There are five numbers listed which indicate the level of resistance to puncture, tearing, blade cut and abrasion. Look at the diagram to the left to reference which number corresponds to which hazard.

Palm Coatings

To address specific work-related hand protection issues, Radians uses several different types of palm coatings: smooth nitrile, foam nitrile, sandy foam nitrile, foam latex, sandy foam latex, crinkle latex, and PU polyurethane. Palm coatings allow for better gripping capabilities and tactile sensation without losing dexterity.

DEFINITIONS/APPLICATIONS:

SMOOTH NITRILE

Smooth/Flat gloves do not have any texture on the surface of the glove. They provide excellent resistance to abrasion, snags, and perforation. Made of synthetic rubber, they are latex-free with no natural rubber proteins. Excellent puncture resistance, tactile sensitivity, and flexible grip.

FOAM NITRILE

Micro texture is the most common and lightest form of texturing for nitrile gloves. This texture is suitable for gripping small objects or tools in wet or dry applications. Breathable, flexible and porous, foam nitrile will channel oil and water away from surface quickly. Excellent resistance to abrasion, snags and perforation. Made of synthetic rubber, foam nitrile gloves are latex-free with no natural rubber proteins.

SANDY FOAM NITRILE

Roughened texture finish. The sandy-like finish on these gloves increases abrasion resistance and improves grip. They are good for wet, dry or oily applications. Made of synthetic rubber, these gloves are latex-free with no natural rubber proteins.

FOAM LATEX

Texture that offers better breathability and comfort. Excellent flexibility and resistant to tears and cuts. Good for wet or dry applications.

SANDY FOAM LATEX

Micro roughened texture for better breathability and comfort. Excellent flexibility and resistant to tears and cuts.

CRINKLE LATEX

Rough textured for better grip and abrasion. Latex gloves are natural material, made out of rubber. They offer excellent flexibility and protection from tears and cuts.

PU (POLYURETHANE)

Semi-smooth texture is extremely flexible and provides superior dexterity and sensitivity. A PU coating can be silicone free and has a low-particulate shed, which reduces risk of contamination from the dip itself. The coating "strikes through" onto the inside of the glove, which can lead to heat retention and sweating. Not as durable as nitrile or latex, PU gloves can be used for inside light duty, detailed assembly, inspection, light fabrication, and box/small parts handling.

DEWALT**GEAR****RADIANS**

MERCHANDISING

GLOVE HANG TAG PROGRAM

For Fast, Easy, and Professional Retail Display of Radians Gloves at Industrial Storefronts.

FAST Five business day turnaround.

EASY You can place an order for a case of “tagged” gloves just as you would place an order for a case of “untagged” gloves.

Minimum Order Requirement is One Case

The minimum order is a case and the gloves in that case can include bulk packs of a dozen in multiple sizes. Keep in mind some of our cases include 72 gloves and some cases include 120 gloves. After a case is ordered, you may order more gloves by the dozen. Many of our competitors will only sell by the case, but Radians is more flexible allowing for dozen bulk pack purchases after the minimum case requirement has been satisfied.

CUT PROTECTION GLOVES

LET'S CREATE THE WORLD'S SAFEST HANDS

WORLD'S MOST ADVANCED CUT RESISTANT FIBER

Dyneema® Diamond Technology offers maximum protection over traditional materials like aramid, leather, nylon and polyethylene with glass fiber.

It can achieve levels B, C and D based on the latest EN388 2016 standard and levels A2, A3 and A4 on the new ANSI/ISEA 105-2016 standard without the use of glass or steel fiber reinforcement, which may break during use causing skin irritation.

GREATER COMFORT & DEXTERITY

Dyneema® Diamond Technology fibers are thinner than generic HMPE fibers and 40% less dense than aramid fibers, making them more comfortable, thinner and cooler to the touch, while still providing advanced cut protection.

It also promotes skin-like dexterity, allowing users to perform delicate and precise tasks efficiently.

HIGHER DURABILITY & COST EFFICIENCY

Cut resistant gloves made with Dyneema® Diamond Technology offer greater abrasion and U.V. resistance and higher durability in comparison to gloves made with leather, aramid and polyethylene with glass fiber.

They can also be laundered and reused multiple times without losing their performance, maximizing cost efficiency.

DYNEEMA® DIAMOND TECHNOLOGY (A4)

RADIANS®

WORK HARD. STAY SAFE.®

PERSONAL PROTECTIVE EQUIPMENT CATALOG

WORK HARD. STAY SAFE.®

LEADING THE WAY TO A SAFER TOMORROW

In 19 years, Radians has become a major leader in the safety industry by manufacturing high performance Personal Protective Equipment (PPE) for the industrial, construction, and safety markets. Fostering a culture of innovation, flexibility, and excellence, we create products, services and experiences that are leading the way to a safer tomorrow.

We manufacture premium product lines, such as DEWALT® and Crossfire®, and performance value brands. Our comprehensive line of safety equipment provides a variety of PPE solutions to satisfy style demands, comfort requirements, compliance concerns, and price considerations of end users.

You are important to us. We don't take our relationships and partnerships for granted. We are continuously evolving and expanding our product lines, our capabilities, and processes to be your top tier supplier of quality safety solutions for the end user while consistently meeting our partners' expectations.

OUR COMMITMENT TO YOU

- Our products are manufactured in ISO-certified facilities and have passed strict ANSI testing to ensure protection and performance.
- Our numerous brands and extensive line of safety gear will help you create a solutions-oriented safety program.
- Our world class customer service, product managers, safety specialists and outside sales team will support and train you.
- Our automated warehouse improves the speed and accuracy of your orders.
- Our Made in USA manufacturing capabilities provide fast turn-around times and the choice to buy American-made PPE.
- Our customization programs offer fast and economical solutions for imprinting. Plus, our online software called My-Viz lets you design custom vests and T-shirts that Radians will fabricate for you quickly.
- Our programs will help you gain a competitive edge, such as no additional charges for drop shipments and same-day shipping of in-stock items if ordered by 5 pm CST.

BRANDS YOU TRUST

USA MANUFACTURING

Prior to 2008, we imported 98% of our product. In the past eight years, we made strategic acquisitions of U.S. Companies, such as Crossfire, VisionAid, and CSS, that have allowed us to manufacture products in the USA, and we plan on continuing this trend.

NVLAP TESTING AND STANDARDS

NVLAP LAB CODE: 500090-0

To maintain and grow our leadership status, Radians tests all of our products against the current regulatory standards for the regions where the product will be marketed. All glasses, high-visibility materials, fire retardant materials, and EU products are tested by third party independent laboratories.

At our corporate headquarters, Radians has installed a state-of-the-art hearing protection laboratory which is accredited through the National Voluntary Laboratory Accreditation Program (NVLAP Lab 500090-0) for testing of hearing protection products to ANSI S3.19 and ANSI S12.6. Radians also maintains in-house testing facilities to ensure continued compliance with applicable optical and high-impact standards for eyewear in addition to third party eyewear testing.

With our focus on product quality, regulatory standards, and testing, you can feel confident Radians' products meet or exceed all necessary requirements to ensure your safety.

WAREHOUSE AUTOMATION

INCREASED EFFICIENCY & CUSTOMER SERVICE

To help us consistently meet and exceed our partners' expectations, Radians is always evolving. Radians recent investment in an automated warehouse solution increases levels of customer service and satisfaction.

- Real-Time shipping information
- Expedite same day orders more efficiently
- Improve speed and accuracy of orders
- Reduce error in shortages and overages

QUALITY ASSURANCE

The International Organization for Standardization (ISO) 9001:2008 specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements.

DCHJ061C1: Includes DCHJ061 Heated Jacket, DCB201 20V MAX* Lithium-Ion Battery (1.5 Ah), Charger and DCB091 Dual USB Port Battery Adapter

DCHJ061B: Includes DCHJ061 Heated Jacket and DCB091 Dual USB Port Battery Adapter

- Durable water and wind resistant cotton outer shell
- Dual USB Port Battery Adapter includes battery fuel gauge, and 2 USB power ports for charging portable electronics
- Expands to accept DeWALT XR 4.0 Ah battery pack
- LED controller offers 3 temperature settings (high, medium, low) with pre-heat function
- Built-in hood with adjustable drawstrings
- 3 Pockets: L&R waist, inner left chest

DCHJ062 Available in sizes S-3XL

TRUE TIMBER® HTC CAMO JACKET

DCHJ062C1: Includes DCHJ062 Heated Jacket, DCB201 20V MAX* Lithium-Ion Battery (1.5 Ah), Charger and DCB091 Dual USB Port Battery Adapter

DCHJ062B: Includes DCHJ062 Heated Jacket and DCB091 Dual USB Port Battery Adapter

- Water and wind resistant, soft poly outer shell
- LED controller offers 3 temperature settings (high, medium, low) with pre-heat function
- Removable hood with neck and face guard
- Dual USB Port Battery Adapter includes battery fuel gauge, and 2 USB power ports for charging portable electronics
- Expands to accept DeWALT XR 4.0 Ah battery pack
- 7 Pockets: L&R waist, L&R stomach, left outer chest, L&R inner chest

DCHJ064 Available in sizes S-3XL

KHAKI HOODED JACKET

DCHJ064C1: Includes DCHJ064 Heated Jacket, DCB201 20V MAX* Lithium-Ion Battery (1.5 Ah), Charger and DCB091 Dual USB Port Battery Adapter

DCHJ064B: Includes DCHJ064 Heated Jacket and DCB091 Dual USB Port Battery Adapter

- Durable water and wind resistant cotton twill outer shell
 - Dual USB Port Battery Adapter includes battery fuel gauge, and 2 USB power ports for charging portable electronics
- Expands to accept DeWALT XR 4.0 Ah battery pack
- LED controller offers 3 temperature settings (high, medium, low) with pre-heat function
- 4 Pockets: Back, L&R waist, inside left chest cell phone pocket for phone charging off battery

DCHJ065 Available in sizes S-3XL

REMOVABLE SLEEVES JACKET

DCHJ065C1: Includes DCHJ065 Heated Jacket, DCB201 20V MAX* Lithium-Ion Battery (1.5 Ah), Charger and DCB091 Dual USB Port Battery Adapter

DCHJ065B: Includes DCHJ065 Heated Jacket and DCB091 Dual USB Port Battery Adapter

- Durable water and wind resistant cotton outer shell
- Dual USB Port Battery Adapter includes battery fuel gauge, and 2 USB power ports for charging portable electronics
- Expands to accept DeWALT XR 4.0 Ah battery pack
- LED controller offers 3 temperature settings (high, medium, low) with pre-heat function
- Robust metal zipper with wind guard
- Reinforced stitching on cuffs
- 4 Pockets: Back, L&R waist, inside left chest cell phone pocket for phone charging off battery

DCHJ066

Available in sizes XS-2XL

WOMEN'S HOODED JACKET

DCHJ066C1: Includes DCHJ066 Heated Jacket, DCB201 20V MAX* Lithium-Ion Battery (1.5 Ah), Charger and DCB091 Dual USB Port Battery Adapter

- Water and wind resistant, soft polyester blend outer shell
- Dual USB Port Battery Adapter includes battery fuel gauge, and 2 USB power ports for charging portable electronics
- Expands to accept DeWALT XR 4.0 Ah battery pack
- LED controller offers 3 temperature settings (high, medium, low) with pre-heat function

CROSSFIRE[®]
by RADIANS

TAKES AN IMPACT. MAKES AN IMPACT.[™]

CROSSFIRE[®] Premium Safety Eyewear by Radians takes an impact with ANSI Z87.1+ certified frames and lenses.

CROSSFIRE safety eyewear makes an impact on or off the jobsite with bold styles that protect your eyes from debris and UV rays, without sacrificing the appeal of sunglasses.

CROSSFIRE Polarized Lens Technology knocks out glare by filtering the reflected bent light resulting in enhanced, undistracted vision in potentially dangerous environments

CROSSFIRE High Definition Lens Technology provides enhanced vision and exceptional optical clarity by filtering out the most damaging blue rays.

PROTECT YOUR EYES

WORK HARD. STAY SAFE.®

Whether your workplace environment is inside a manufacturing plant, outdoors at a construction site, or in the public safety and law enforcement sectors, Radians® comprehensive line of performance safety gear minimizes your exposure to occupational and jobsite hazards.

We understand that workplace compliance and participation in safety programs increase dramatically when safety gear is comfortable and stylish. That's why we work hard at making innovative personal protective products that meet or exceed the industrial standards while also meeting the style and comfort demands of the workforce.

PLAY HARD. STAY SAFE.™

We know you not only work hard, but you play hard too. Our performance sport, active, and lifestyle safety products give you the safety edge when playing hard at action sports, training for competitions and endurance events, or tackling a do-it-yourself project for your home.

So whether you spend your free time at the range, on the hunt, on the slopes or hiking trails, or at loud concerts, Radians has an extensive line of safety gear to protect your eyes, ears, and hands from sport and lifestyle hazards.

ANSI/ISEA 107-2015 STANDARD:

The American National Standard for High-Visibility Safety Apparel is a standard established by American National Standards Institute, Inc (ANSI) and the International Safety Equipment Association (ISEA). Numerous types of workers are routinely exposed to the hazards of low visibility while on the job. This standard provides guidelines for the selection and use of high-visibility safety vests to improve worker visibility during the day, in low-light conditions and at night.

ANSI 107-2015 VISIBILITY REQUIREMENTS FOR CLASS 2:

- For workers who require greater visibility under inclement weather conditions.
- When work backgrounds are complex.
- When tasks divert attention from approaching vehicle traffic.

CUSTOM IMPRINTING
AVAILABLE FOR ALL SKUS

RAINWEAR CATALOG

RAINWEAR APPAREL

RAINWEAR WORKERS WANT TO WEAR
Radian's Industrial Rainwear line is a commitment in uncompromisable protection. We are focused on quality, value, and service while continually addressing functional wear-ability. Whether your work requires an economical option in disposable protection, durable protection from a hazardous environment, or High Visibility rated protection in inclement weather, we have you covered.

ICONS

ANSI/ISEA 107-2015 Type R - Class 2 & Class 3:
Roadway and Temporary Traffic Control

Class 3: Background Fabric: 1240 Square Inches
Class 3: Reflective Material: 310 Square Inches Minimum
Minimum Reflective Width: 2 Inches

ANSI/ISEA 107-2015 Class 3 Standards:
Background Fabric: 1240 Square Inches
Reflective Material: 310 Square Inches Minimum
Reflective Width: 2 Inches

Supplementary Class E Pants, bib overalls, shorts, and gaiters shall be designated Class E. Class E items shall not be worn alone for the purposes of meeting HVSA PPE requirements. When a Class E item is worn with Performance Class 2 or Class 3, the overall classification shall be Performance Class 3.

Self Extinguishing Treated Fabric
Synthetic Material Treated to be Self Extinguishing. Self Extinguishing performance determined utilizing ASTM D6413 with criteria of <2.0 second flame out and <6" Char Length. This garment should never be used where risk of arc flash or Flash Fire hazards maybe present.

Waterproof Material
These materials repel all precipitation during inclement weather. These waterproof finishes keep your base layers dry while you do battle with the elements. Be Dry. Stay Safe.

Breathable Material
Staying dry while working is a necessity. However, some materials do not allow for air to escape while providing a waterproof coating. While all of our fabrics are breathable, ones marked with this icon exceed the standard for breathability for rainwear.

FABRIC ICONS

PVC / POLY / PVC

Polyester Scrim provides added stability between two layers of Self-Extinguishing PVC for industrial strength at an affordable price.

APPLICATIONS: Construction, General Purpose, Food Processing

TPU / NYLON

Comfortable, flexible and lightweight TPU exterior provides industrial strength protection from hazardous environmental conditions.

APPLICATIONS: Food Processing, Sanitation Clean-Up Applications

PVC / POLY

PVC Exterior and Polyester Interior provide a general purpose level of defense for shielding against harsh environments.

APPLICATIONS: Petrochemical, Chemical Applications, Environmental Clean-Up

PVC / POLY

Heavy Duty for protection in hazardous conditions which require extra performance, yet soft and flexible for comfort.

APPLICATIONS: Petrochemical, Chemical Applications, Environmental Clean-Up

RIPSTOP MATERIAL
WATERPROOF COATING

High Visibility, Rugged and Abrasion resistant exterior with a waterproof, breathable coating interior for added comfort.

APPLICATIONS: Construction, Municipalities, Telecommunications

HIGH VISIBILITY
PVC / NYLON

High Visibility PVC exterior for resistance against the elements with the added strength of a lightweight Nylon interior.

APPLICATIONS: Construction, Municipalities, Telecommunications

HIGH VISIBILITY
PVC / POLY

High Visibility PVC exterior which provides visibility and long-lasting results with a polyester interior that adds dependable protection.

APPLICATIONS: Petrochemical, Chemical Applications, Environmental Clean-Up

HIGH VISIBILITY
OXFORD / PU

High Visibility, Abrasion Resistant exterior that is lightweight and weatherproof with a PU interior coating.

APPLICATIONS: General Purpose, Construction, Municipalities

DRIRAD™ 28

AFFORDABLE DURABILITY

.28mm PVC/Poly/PVC Jacket, Coat, Bibs, and 3pc. Suit

SIZES: M, L, XL, 2X, 3X, 4X, 5X

- .28mm PVC/POLY/PVC
- Self Extinguishing PVC
- SE D6413 Tested
- Detachable Hood (Sold Separately)
- ETP™ COLLAR: Extended in Back, Tapered in Front For Increased Protection and Wearable Comfort
- Lower Front Pockets with Flaps
- Inside Storm Flap

APPLICATIONS: Construction, General Purpose, Food Processing, Basic/Minimal Chemical Protection, Sanitation Applications, Maintenance, Environmental Clean-Up

RADIANS®

WORK HARD. STAY SAFE.®

VOLCORE™

FR WORKWEAR By RADIANS®

FR WORKWEAR

Reduce burn injury from flash fire and electric arc flash with VolCore™ FR Workwear by Radians®. Flame-resistant (FR) VolCore workwear helps protect workers from short-term thermal incidents because it self-extinguishes and doesn't melt when exposed to flame, dramatically reducing the severity of burn injuries. It's ironic, but the most serious burns that occur at jobsites are not from the actual fire or explosion but from the igniting of standard, non-FR workwear that often continues to burn even after the removal of the ignition source. Each UL certified piece in the VolCore FR Workwear line has been finely crafted with durable materials and distinct features to keep workers safe, comfortable, and compliant with industry-wide FR standards.

WHO NEEDS VOLCORE FR WORKWEAR?

- Workers in hazardous Electric Arc environments, such as electricians and electric utility linemen.
- Workers in hazardous Flash Fire environments, such as refinery, chemical, petrochemical, oil/gas, & pharmaceutical workers.
- Workers in environments prone to Combustible Dust Explosion, which includes the paper and pulp industry, food processing, paint, and many more industries.
- Workers who come in contact with energized electrical equipment are at risk.

CUSTOMIZATIONS AVAILABLE

Including reflective striping, patches, direct embroidery, screen printing, tool pockets and mic tabs.

FRS-001 M-5XL 88% COTTON 12% NYLON LONG SLEEVE BUTTON DOWN FR SHIRT

- 88% Cotton 12% Nylon Soft Woven Twill
