

3 Gallons, 3 Handles, 3 Innovative Accessories

The EZ3 Utility Jug is exactly what the name implies. It is a 3 Gallon (12 Liter) Utility Jug that is simply easy to use. It has a triple handle design that is completely unique. The top handle and side handle are obvious, but it is the third fingertip handle at the front of the jug that comes in handy during the end of the pour. This triple handle design allows the user to carry and pour at any angle with comfort and control.

Durable Construction

Carry and pour with confidence knowing that the EZ3 is constructed from thick-walled, high-density, polyethylene plastic, ensuring it is durable enough to hold up to any fluids you may transport.

Anodized Aluminum Breather

The EZ3 also solves the common problem of liquid spilling from the vent hole, which is commonly placed entirely too close to the cap and spout. Risk placed the vent on the EZ3 on the very back of the top handle, keeping it far from the main cap ensuring plenty of venting without the spills.

Transport Securely

Safely securing a utility jug for transport can also be a hassle. Risk has solved this issue as well. The EZ3 has a floor mount accessory called The EZ3 Boot. This hardened steel frame mounts easily to the floor of a trailer, van or truck bed. The EZ3 Utility jug then snaps right in place, preventing it from falling over during transit. Additionally, a padlock can be placed through the EZ3 Boot to securely lock the EZ3 Utility Jug to your truck or trailer, protecting your investment.

Angle jug into mount

Press jug down

Optionally lock jug

Pull up to remove

Risk Racing® EZ3 Utility Jug

Easy to handle and pour!

FOR IMMEDIATE RELEASE – MOORESVILLE, NC – Risk Racing is proud to release their latest innovation, the EZ3 Utility Jug. The EZ3 is a visual standout among most jugs on the market. The sharp and aggressive design is certainly eye catching, but Risk Racing doesn't stop at looks. Risk has identified the challenges surrounding utility jugs, and developed smart solutions to make life easier when dealing with fluids. This jug solves the trials and tribulations common with transport, pouring, and even venting.

The EZ3 Utility Jug is exactly what the name implies. It is a 3 Gallon (10 Liter) Utility Jug that is simply easy to use. It has a triple handle design that is completely unique. The top handle and side handle are obvious, but it is the third fingertip handle at the front of the jug that comes in handy during the end of the pour. This triple handle design allows the user to carry and pour at any angle with comfort and control. Carry and pour with confidence knowing that the EZ3 is constructed from thick-walled, high-density, polyethylene plastic, ensuring it is durable enough to hold up to any fluids you may transport.

The EZ3 also solves the common problem of liquid spilling from the vent hole, which is commonly placed entirely too close to the cap and spout. Risk placed the vent on the EZ3 on the very back of the top handle, keeping it far from the main cap ensuring plenty of venting without the spills.

Safely securing a utility jug for transport can also be a hassle. Risk has solved this issue as well. The EZ3 has a floor mount accessory called The EZ3 Boot. This hardened steel frame mounts easily to the floor of a trailer, van or truck bed. The EZ3 Utility jug then snaps right in place, preventing it from falling over during transit. Additionally, a padlock can be placed through the EZ3 Boot to securely lock the EZ3 Utility Jug to your truck or trailer, protecting your investment.

Finally, Risk Racing has 2 innovative spouts to choose from which complement the EZ3 jug, and further enhance the user experience. Customers can choose to pair their EZ3 with the new Hose Bender spout, which positions the hose in the perfect pouring position. Or they can choose the Flow Control which has the hose bender feature, but also the Auto Shut-off spout.
