# WESCO® GATOR GRIP® DRUM GRAB

## Gator Grip®

US PATENT NO. 6,619,905

Traditional devices require drum weight to maintain a positive lock. If a drum bounces during fork truck transportation, the drum may momentarily become weightless, which can cause the grip to snap open dropping the drum. The patented Auto Grip Lock automatically locks the jaws closed, even over rough terrain.

**EXTENDED FOLD**  
Part #274238  
Extended Height HD  
Complete with fold-out carriage.

## Power LiftKar HD: 725 lb. high capacity models

### Three Models

**Uni** – straight frame – accepts #274102 fold-out wheel carriage for 4-wheel support.

**Fold** – upper handle angle can be adjusted. Best for copiers, safes, heavy motors or any short and heavy load which would require the user to pull the load back to a very low position for proper balance. The adjustable angle position on the Fold model allows the user to stand upright when using the truck at a very low angle.

**Extended Fold** – Same advantages as **Fold** but with an extra 7" in height and fold-out wheel carriage.

- Innovative edge-of-step braking system – automatically applies brake when wheels are at edge of step. Helps prevent loss of load control caused by accidental rolling down steps.
- Brake can be shut off for use on level ground – prevents unwanted braking when moving over ground with an uneven surface.
- Two operating modes: single step (ascend or descend button must be pressed after each step – ideal for maximum control), or continuous climb.
- 24v quick-change battery pack – sealed maintenance-free battery.
- Battery, charger and 137" x 2" cargo belt included.
- 21" W x 7.25" D noseplate. Additional sizes available, contact Wesco Customer Service.
- Two climbing speeds: 6 steps/min. or 10 steps/min.
- Average number of steps with fully charged battery:
  - 440 lbs. of cargo - 220 steps
  - 550 lbs. of cargo - 190 steps
  - 725 lbs. of cargo - 120 steps.
- Maximum stair height 8.25".
- 1 year warranty on parts against defects in materials and workmanship.
- 6 month warranty on battery.

*HeviMovers™ are made with precision ground and hardened steel rollers that form an endless chain which revolves around a central load-bearing plate in the frame. Weight of the load is transferred directly from load-bearing plate to rollers. This eliminates axle friction and requires less power to start and move the load. HeviMovers™ roll easily over cracks and pitted floor areas to reduce possible damage to goods.*

Our patented GatorGrip drum grab handles most 30, 55 or 85 gallon steel, fiber or poly drums with at least a 3/16" lip. The auto-lock feature of the GatorGrip helps hold the drum securely in place until the drum is placed on the ground – even over rough surfaces. The operator does not need to touch drums to operate and our power units have an up/down remote control.
